Cautions

Attention

- If there is any trouble, disconnect the unit from the telephone line. Plug the telephone directly into the telephone line. If the telephone operates properly, do not reconnect the unit to the line until the problem has been repaired by an authorized Panasonic Factory Service Center. If the telephone does not operate properly, chances are that the problem is in the telephone system, and not in the unit.
- Keep the unit away from heating appliances and electrical noise generating devices such as fluorescent lamps, motors and televisions. These noise sources can interfere with the performance of the unit.
- This unit should be kept free of dust, moisture, high temperature (more than 40 °C [104 °F]) and vibration, and should not be exposed to direct sunlight.
- Never attempt to insert wires, pins, etc., into the vents or holes of this unit.
- Do not use benzene, thinner, or the like, or any abrasive powder to clean the cabinet. Wipe it with a soft cloth.
- Do not use any handset other than a Panasonic handset for KX-TA308 use.

When you ship the product

Carefully pack and send it prepaid, adequately insured and preferably in the original carton. Attach a postage-paid letter, detailing the symptom, to the outside of the carton. **DO NOT** send the product to the Executive or Regional Sales offices. They are **NOT** equipped to make repairs.

Product service

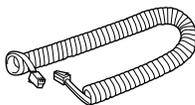

Panasonic Factory Servicenters for this product are listed in the servicenter directory. Consult a certified Panasonic dealer for detailed instructions.

WARNING:

TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY TYPE OF MOISTURE.

Accessory Order Information

- Replacement parts and accessories are available through your local authorized parts distributor.
- For ordering accessories, call toll free 1-800-332-5368.

Introduction

Who Should Use This Manual

This manual is designed for users of an Advanced Hybrid System, model number KX-TA308. It is to be used after the system is installed and System Programming is completed. The focus is Proprietary Telephones (PTs); KX-TA30820/KX-TA30830/KX-TA30850, Single Line Telephones (SLTs) and their features.

The step-by-step procedures required to activate each feature are explained in detail. Illustrations of the KX-TA308 system and the required System Programming are provided separately in the Installation Manual.

How to Use This Manual

This manual consists of the following sections.

(Section 1) PT Overview

Provides configuration information on PTs. It also provides an illustration of each telephone, identifies their feature buttons, supplies background information on these feature buttons, and gives the initial settings.

(Section 2) Station Programming (Personal Programming)

Provides the steps required to assign features to PT flexible buttons and to the PT system.

(Section 3) Telephone Features

Provides background information on the PT and SLT features and lists the steps required to activate each feature.

(Section 4) Appendix

Provides PT Display Examples, a Feature Number List, Tone List, and other information.

Introduction

Features and Capabilities

KX-TA308 is a sophisticated and powerful system which fulfills your expectations of an office communications system. Some of the special features are listed below.

- **Automatic Callback Busy (Camp-On)** informs you when the selected outside (CO) line or the called party becomes idle.
- **Call Log, Incoming (— Option)** allows you to confirm the incoming outside call information on the display. You can also call back the caller by selecting one of the logged numbers. This feature is available only for the KX-TA30830.
- **Conference, Unattended** allows you to leave a conference and let the other two parties continue a conversation when you are in a conference with two outside parties. You can also return to the conference.
- **Data Line Security** prohibits various tones, such as a call waiting tone or hold recall tone, from sounding at an extension in the data communication mode. It also blocks overriding by other extensions, such as Executive Busy Override.
- **Direct Inward System Access (DISA)** allows external callers to call extensions in the system.
- **Doorphone and Door Opener (— Option)** enables a conversation between you and a visitor at the door. You can also unlock the door for a few seconds from your phone.
- **Executive Busy Override** allows you to enter into an existing conversation at an extension/outside (CO) line.
- **Local Carrier-Based Voice Mail Service** informs you with the lit Message/Ringer Lamp when a message is left in the mailbox at your telephone company.
- **Message Waiting** allows you to leave a message notice for another extension. The Message/Ringer Lamp gives visual indication that a message has been received.
- **Paralleled Telephone Connection** allows you to connect your PT in parallel with a single line telephone. Each telephone can have the same extension number so that you can use either telephone.
- **Wireless Proprietary Telephones (KX-T7885 and KX-TD7895)** give you the freedom to move about your residence and still have the powerful features of Panasonic proprietary telephones. Here are three examples of proprietary advantages:
 1. Caller ID
 2. Seizure of CO1/CO2/CO3 lines by one-touch
 3. Carrier-based voice mail notification

Introduction

Terms Used in the Descriptions

Feature Numbers

A feature number is an access code for various features when programming or executing features using proprietary or single line telephones connected to the system. You can access available features by dialing the corresponding feature number (and additional parameter, if required).

The lists of feature numbers are shown in the Appendix (Section 4).

If you use a rotary telephone;

It is not possible to access features that have “*” or “#” in their feature numbers.

Tones

Various tone types, such as a Confirmation tone, Dial tone, Call Waiting tone, etc. are explained in the Appendix (Section 4).

Display

The PT display examples are given in each operation step, if required. The display information list is in the Appendix for your reference.

Programming References

The related and required programming titles are noted for your reference.

System Programming should be done by the extension which is connected to jack number 01. A KX-TA30830 can be used for this programming. Station Programming is individual programming at your own proprietary telephone (PT). You can customize the extension to your needs using any type of proprietary telephone.

Feature References

The related feature titles are noted for your reference.

1.1

Configuration

Panasonic Proprietary Telephones (PTs) are available to utilize various features of the KX-TA308 System, in addition to supporting basic telephone services (making and receiving calls).

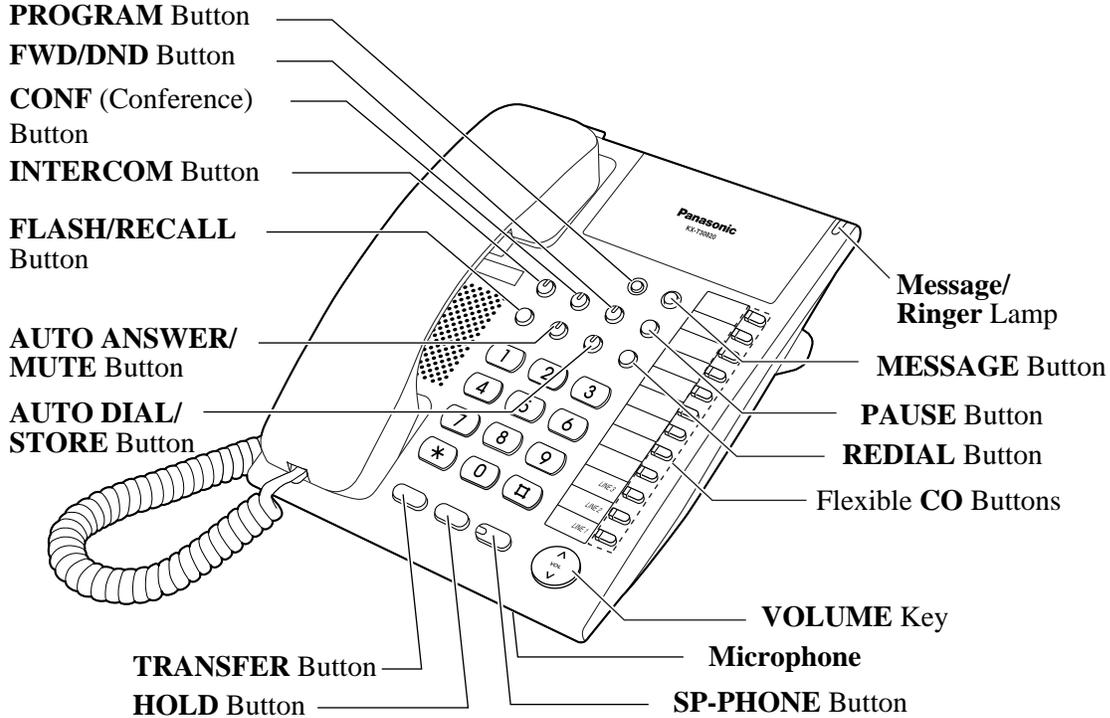

There are three PT models.

	KX-TA30820	KX-TA30830	KX-TA30850
Display	None	16 characters/1 line	None
Speakerphone	Yes	Yes	Monitor only
Flexible CO Buttons*	12	12	12

Fixed Feature Buttons	Refer to the “Fixed Buttons”(1.1 Configuration) section.		

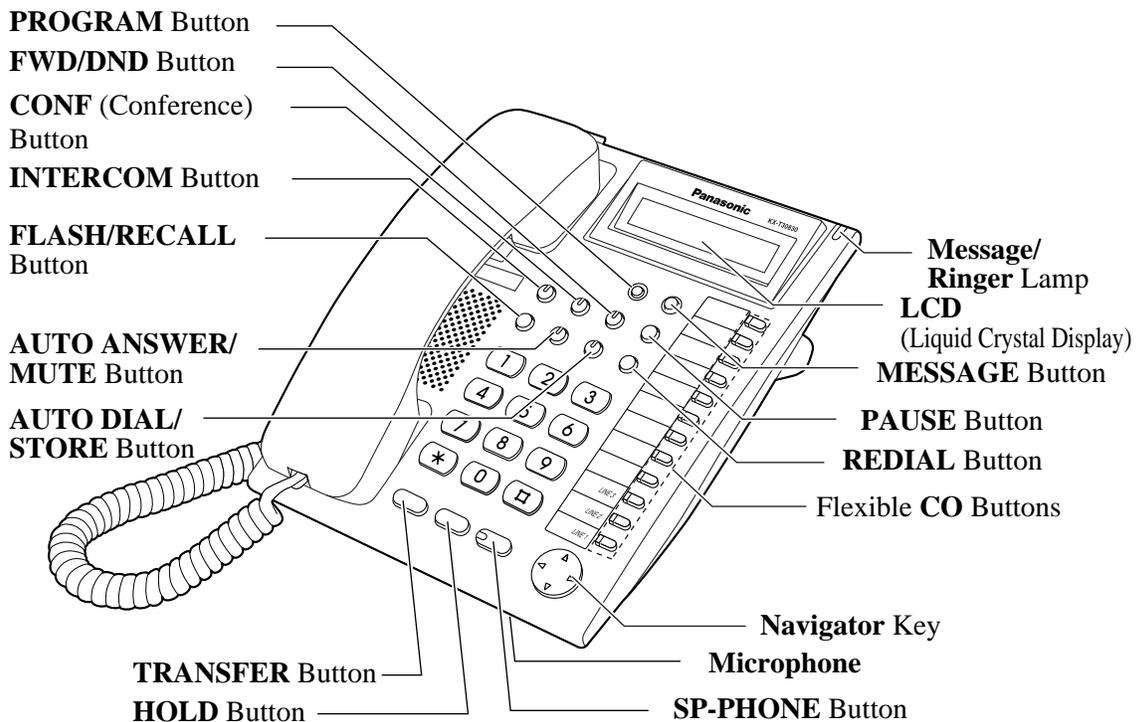

* For the default settings of the Flexible CO buttons, see the table on page 1-10.

Location of Controls

■ **KX-TA30820**

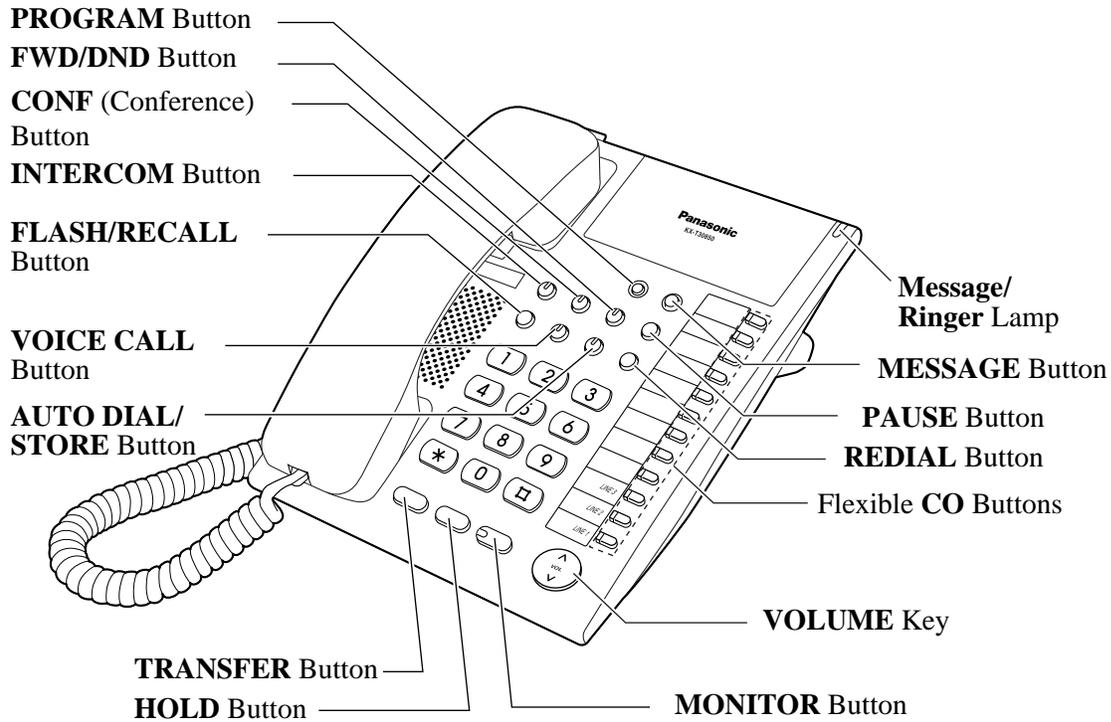

■ **KX-TA30830**

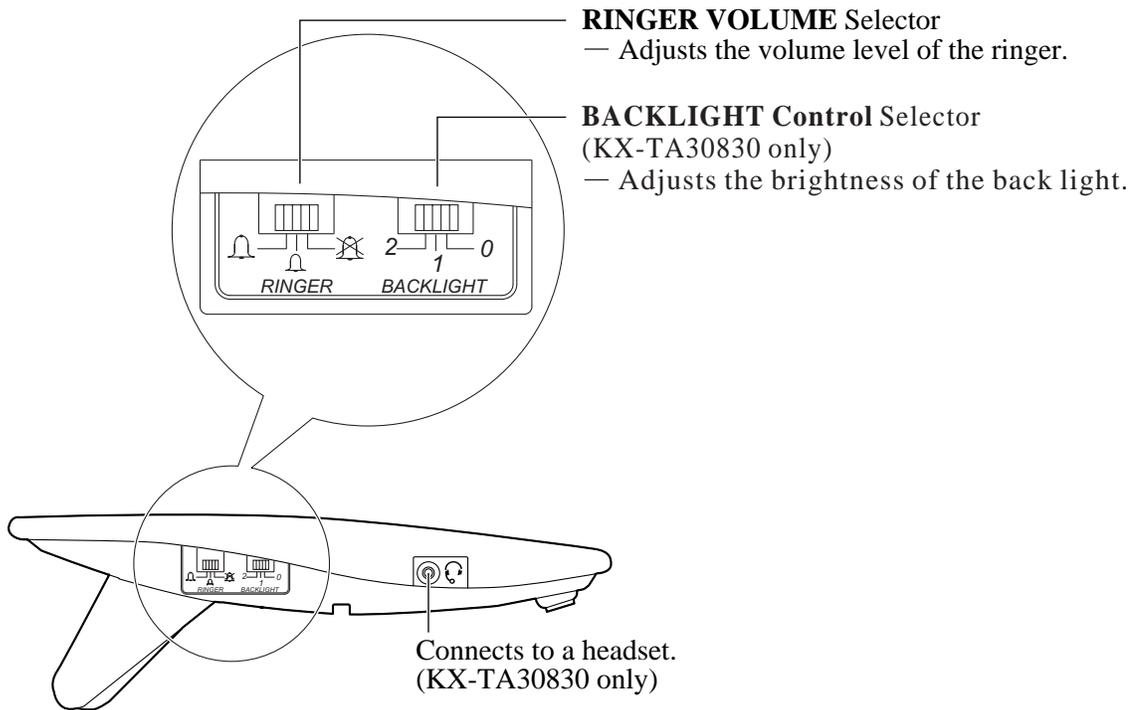

1.1

Configuration

■ KX-TA30850

<Side View of KX-TA30820, KX-TA30830 and KX-TA30850>

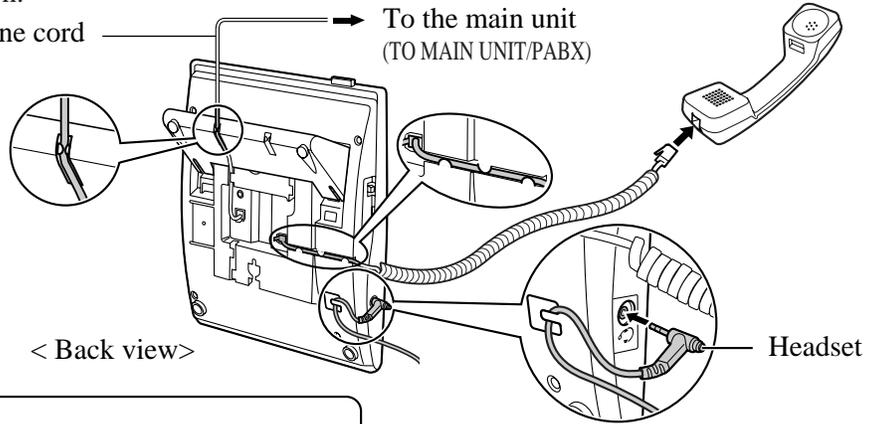

Connection

Connect as shown.

The telephone line cord
(included)

To the main unit
(TO MAIN UNIT/PABX)

CAUTION

Ensure the cord is inserted in the groove to prevent damage to the connector.

Feature Buttons

PTs have the following types of Feature Buttons.

- **Fixed Buttons**
- **Flexible CO Buttons**

Fixed Buttons

Fixed buttons have specific features permanently assigned to them. These default feature assignments cannot be changed. The following table lists the fixed buttons located on each PT model.

Feature Button	TA30830	TA30820	TA30850
AUTO ANSWER/MUTE	✓	✓	
AUTO DIAL/STORE	✓	✓	✓
CONF	✓	✓	✓
FLASH/RECALL❖	✓	✓	✓
FWD/DND	✓	✓	✓
HOLD❖	✓	✓	✓
INTERCOM	✓	✓	✓
MESSAGE❖	✓	✓	✓
MONITOR			✓
Navigator Key❖	✓		
PAUSE❖	✓	✓	✓
PROGRAM❖	✓	✓	✓
REDIAL❖	✓	✓	✓
SP-PHONE	✓	✓	
TRANSFER❖	✓	✓	✓
VOICE CALL			✓
Volume Key❖		✓	✓
Message/Ringer Lamp	✓	✓	✓

“✓” indicates the button is available.

❖: The button is not provided with an LED (Light Emitting Diode).

Usage

AUTO ANSWER/MUTE Button (KX-TA30820/KX-TA30830)

Used for answering an extension automatically, or turns the microphone off during a conversation.

AUTO DIAL/STORE Button

Used for System Speed Dialing or storing program changes.

CONF (Conference) Button

Used to establish a three-party conference.

FLASH/RECALL Button

Sends an External Feature Access signal to the central office or host PBX to access their system features. If a PBX is not being used, this button can be used to disconnect the current call and start another call without hanging up.

FWD/DND (Call Forwarding/Do Not Disturb) Button

Used to program the Call Forwarding feature or set the Do Not Disturb (DND) feature.

HOLD Button

Used to place a call on hold.

INTERCOM Button

Used to make or receive intercom calls.

MESSAGE Button

Used to call back the party who left a message waiting indication at your extension. The Message/Ringer Lamp lights when a message waiting indication is left at your extension.

MONITOR Button (KX-TA30850)

Used for a hands-free dialing operation.

PAUSE Button

Inserts a pause in speed dial numbers or in other numbers.

PROGRAM Button

Used to enter and exit the Programming mode.

REDIAL Button

Used for Last Number Redialing.

1.1

Configuration

SP-PHONE (Speakerphone) Button (KX-TA30820/KX-TA30830)

Used for a hands-free speakerphone operation.

TRANSFER Button

Transfers a call to another extension or external destination.

VOICE CALL Button (KX-TA30850)

Used to receive a notification via monitor in place of ringing.

Navigator Key (KX-TA30830)

Used to adjust the volume and the display contrast or select desired items for each function.

Volume Key (KX-TA30820/KX-TA30850)

Used to adjust the volume.

Message/Ringer Lamp

Used to inform you visually that you have an incoming call or message from an external party or extension.

The table below shows the lighting patterns for the Message/Ringer Lamp.

Lamp	Status
Flashing	You have an incoming call.
On	You have a message.

Flexible Buttons

Flexible Buttons do not have specific features permanently assigned to them. Features are assigned to Flexible Buttons through Station Programming. “Flexible Button Assignment” is addressed in Station Programming (Section 2). The two types of Flexible Buttons are as follows.

- **Flexible CO Buttons**
- **Flexible MESSAGE Button**

The following table outlines the features that can be assigned to the Flexible Buttons.

Feature (Buttons)	CO	MESSAGE
Group-CO (G-CO)	✓	—
Other-CO (O-CO)	✓	—
Single-CO (S-CO)	✓	—
Caller ID Indication — Common	✓	—
Caller ID Indication — Personal	✓	—
Caller ID Selection — Common	✓	—
Caller ID Selection — Personal	✓	—
Conference (CONF)	✓	—
FWD/DND	✓	—
Log-In/Log-Out	✓	—
SAVE	✓	—
Message Waiting (MESSAGE)	—	✓
Another Extension Message Waiting	✓	—
DSS	✓	—
One-Touch Dialing	✓	✓

“✓” indicates that the feature is available.

Ext. : Extension

* CO button numbers above 3 are not indicated on the KX-TA308XX series telephones.

Line Access Buttons

One of the following three types of CO buttons must be used to seize an outside (CO) line when making a call.

- **Group-CO (G-CO) button**
- **Other-CO (O-CO) button**
- **Single-CO (S-CO) button**

Conditions

- A Flexible CO button can be assigned as a Line Access Button (G-CO, O-CO or S-CO) in Station Programming. Once a Flexible CO button is assigned as a Line Access Button, it provides the line status using lighting patterns and color indication. Please refer to “LED Indication” in this section.
- You can set the G-CO and S-CO buttons on one telephone. Incoming and outgoing calls on the line are shown on the button in the following priority.
S-CO > G-CO

Group-CO (G-CO) Button

To use outside (CO) lines efficiently, a group of outside (CO) lines (outside (CO) line group) can be assigned to a CO button. This button is referred to as Group-CO (G-CO) button. Any incoming calls from any outside (CO) line in the outside (CO) line group arrive at the G-CO button. To make an outside call, you can access an idle outside (CO) line in the group by simply pressing the assigned G-CO button.

Conditions

- The same line can be assigned as an S-CO button and G-CO button.
- The extension for making and/or receiving calls in outside (CO) line groups must be programmed.
- When your extension is assigned as the incoming call destination for an outside (CO) line, you cannot receive any incoming outside calls unless a G-CO, O-CO or S-CO button associated with the line is assigned.

Outward Dialing, Line Access — Line Access, Automatic

Single-CO (S-CO) Button

An S-CO button is an outside (CO) line access button. This allows you to access a specific line by pressing an S-CO button. An incoming call can be directed to an S-CO button.

Conditions

- Only one S-CO button can be assigned to an outside (CO) line.
- The same outside (CO) line can be assigned as an S-CO button and G-CO button.

Initial Settings

Display Contrast Adjustment (KX-TA30830 only)*

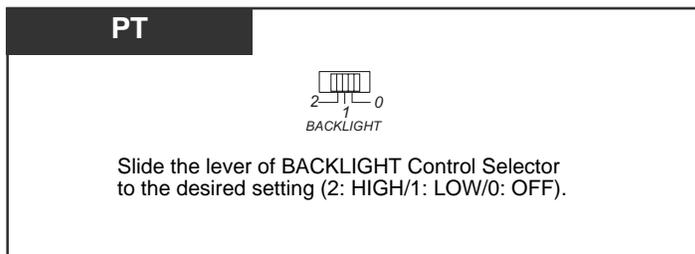

The Navigator key is used to adjust the display contrast.

* The above settings may be initialized to default settings after the telephone line cord is pulled off or the main unit's power is interrupted.

BACK LIGHT Adjustment (KX-TA30830 only)

The BACKLIGHT Control Selector is used to adjust the brightness of the BACKLIGHT.

Volume Control — Handset Receiver/Headset/Ringer/Speaker

Allows you to adjust the following volume settings as necessary.

- Handset Receiver volume
- Headset volume
- Ringer volume
- Speaker volume

To adjust the handset receiver/headset volume*

PT

While using a handset or headset

Press Up or Down.

<PT Display Example>

(-volume level 3)

— Adjusting the headset receiver is available only for the KX-TA30830.

* The above settings may be initialized to default settings after the telephone line cord is pulled off or the main unit's power is interrupted.

To adjust the ringer volume

PT

RINGER

Slide the lever of the RINGER Volume Selector to the desired setting (HIGH/LOW/OFF).

To adjust the speaker volume*

PT

While on-hook or during a conversation using a handset

SP-PHONE
OR
MONITOR

Press SP-PHONE or MONITOR.

➔

Press Up or Down.

<PT Display Example>

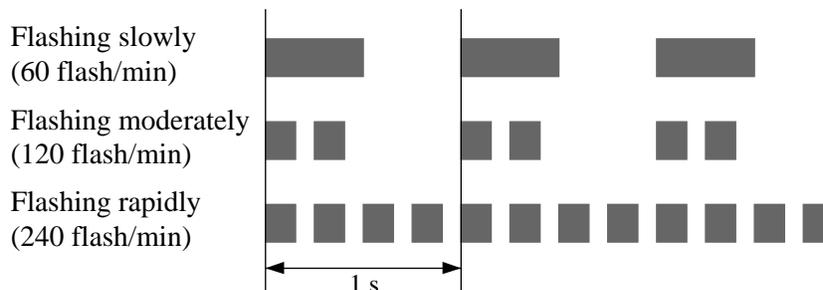

(-volume level 12)

* The above settings may be initialized to default settings after the telephone line cord is pulled off or the main unit's power is interrupted.

LED Indication

The Light Emitting Diode (LED) buttons indicate the line conditions with lighting patterns.

Flashing light patterns

LED Indication on the INTERCOM Button

The table below shows the lighting patterns for intercom line conditions.

INTERCOM Button	Intercom Line Condition
Off	Idle
Green On	Intercom call / Conference established
Flashing Green Slowly	Intercom call hold
Flashing Green Moderately	Intercom call exclusive hold
Flashing Green Rapidly	Incoming intercom/doorphone call

LED Indication on the CO Button

The table below shows the lighting patterns for outside (CO) line conditions.

CO Button	Outside (CO) Line Condition
Off	Idle
Green On	You are using the line.
Flashing Green Slowly	You have a held call or Hold Recall
Flashing Green Moderately	You have one of the following: (1) exclusive hold, (2) outside-to-outside (CO-to-CO) line call, or (3) Conference, Unattended.
Flashing Red Rapidly	Incoming call
Red On	Other-use
Flashing Red Slowly	Other-hold*
Flashing Red Moderately	Local Carrier-Based Voice Mail Service*

— Item with an * is only available on a Single-CO button.

BLF on DSS Button

The Busy Lamp Field (BLF) indicator button is red when the corresponding extension is busy. This is available for Flexible CO buttons assigned as DSS buttons on proprietary telephones.

LED Indication and LCD on the KX-T7885/KX-TD7895

The LED is off and LCD date and time line is not displayed while the phone is idle. To activate the LED and LCD, press the button specified in the “Operating Instructions” for the wireless phone.

Section 2
Station Programming
(Personal Programming)

Contents

<i>2.1</i>	<i>Station Programming Instructions</i>	<i>2-2</i>
<i>2.2</i>	<i>Station Programming (Personal Programming)</i>	<i>2-6</i>

2.1 Station Programming Instructions

Station Programming allows you, the proprietary telephone (PT) user, to program certain features from your telephone individually. During the programming mode, your telephone is busy to outside callers. If you want to make a normal call operation, you must finish the programming mode.

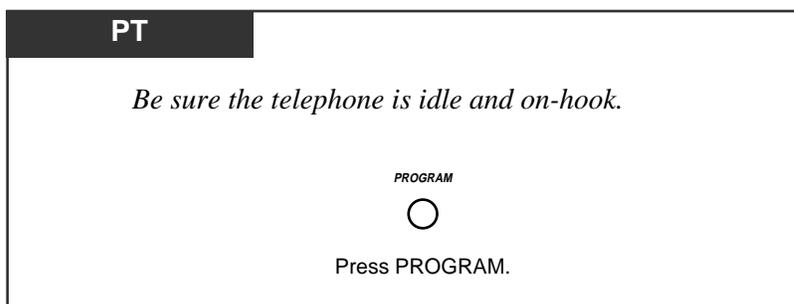

Programming Mode Display

When you enter the Station Programming mode, the display shows the following message as the initial programming mode.

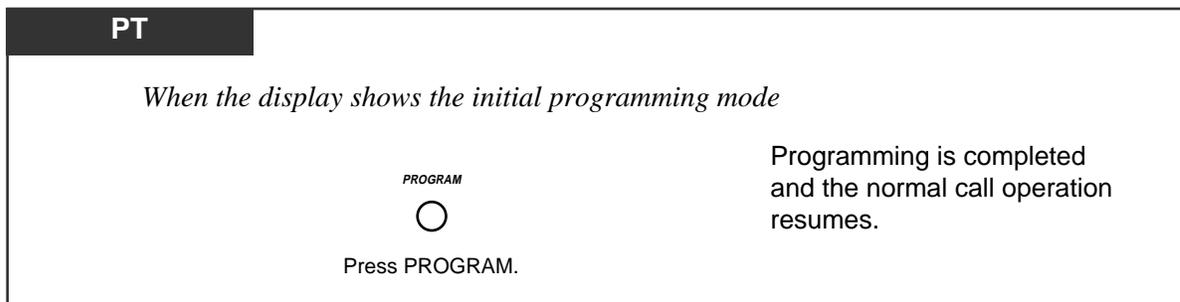

PITS-PGM NO? →

The display also gives you helpful or stored data information related to the programming steps. In this section, the display example in the programming steps are noted, if required. You can also refer to the “Display Examples” in the Appendix (Section 4).

To enter the Station Programming mode

To exit the Station Programming mode

When storing data

- After pressing the STORE button to store data, you may hear one of the following tones.
- Confirmation tone (one beep): storage is completed.
 - Confirmation tone (two beeps): the data is the same as the last entry.
 - Alarm tone (three beeps): the entry is not valid.

2.1 Station Programming Instructions

To confirm the assigned data

—Be sure that you are in the Station Programming mode. Press the PROGRAM button.

The diagram shows a display area labeled "PT" with a "program access number" field and a "HOLD" button. Below the field is the instruction "Enter the program access number." and below the button is "Press HOLD." A callout box contains a list of programming options and an example of the display showing "C.W. Tone-1" with the explanation "The Call Waiting tone is currently programmed to Tone 1."

PT

program access number

HOLD

Enter the program access number.

Press HOLD.

- The display shows the initial programming mode.
- Enter the **program access number*** as follows.
 - 1: Preferred Line Assignment — Outgoing
 - 2: Preferred Line Assignment — Incoming
 - 3: Outside (CO) Line Ringing Selection
 - 4: Intercom Alert Assignment
 - 5: Call Waiting Tone Type Assignment
 - 6: Self-Extension Number Confirmation (KX-TA30830 only)
 - 7: Extension Password Set (Manager only)
 - 8: Electronic Station Lockout — CANCEL ALL
 - 0: Date and Time Setting (Operator/Manager only)
 - # *: Station Programming Data Default Set
- The display shows the programmed data.

<PT Display Example>
When you press “5”, the display shows:

C.W. Tone-1 — The Call Waiting tone is currently programmed to Tone 1.

— To exit the Station Programming mode, press the PROGRAM button.

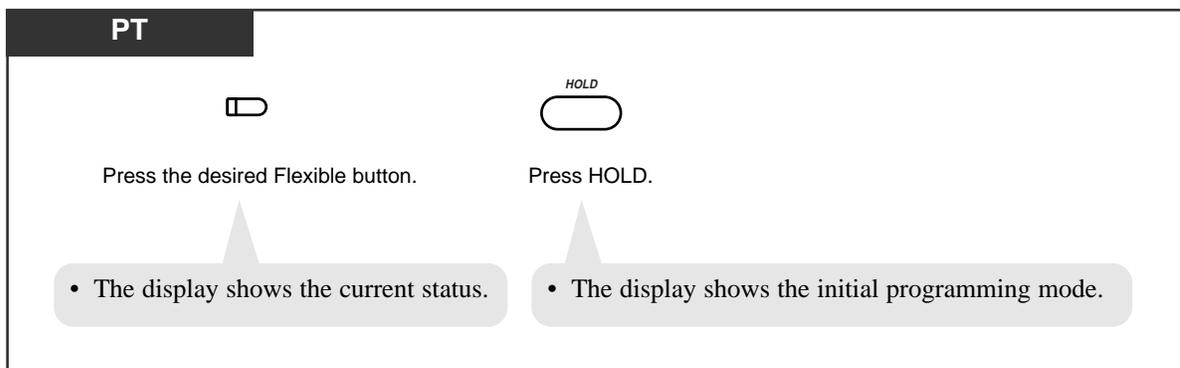

— If you wish to change the data, follow the programming procedure explained in this section.

* A **program access number** is required to program/confirm the data by Station Programming.

2.1 Station Programming Instructions

To confirm the assigned data on the Flexible button

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

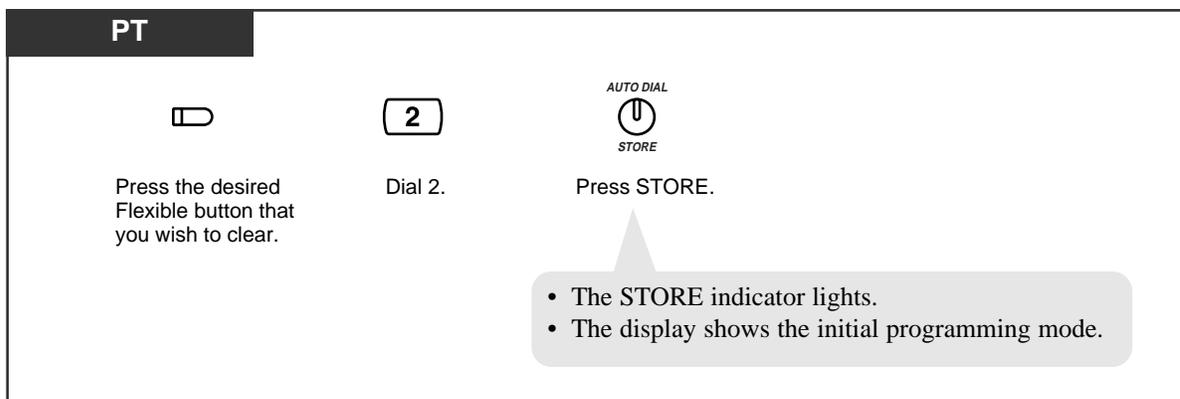

— To exit the Station Programming mode, press the PROGRAM button.

— If you wish to change the data, follow the programming procedure explained in this section.

To clear the data on the Flexible button

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

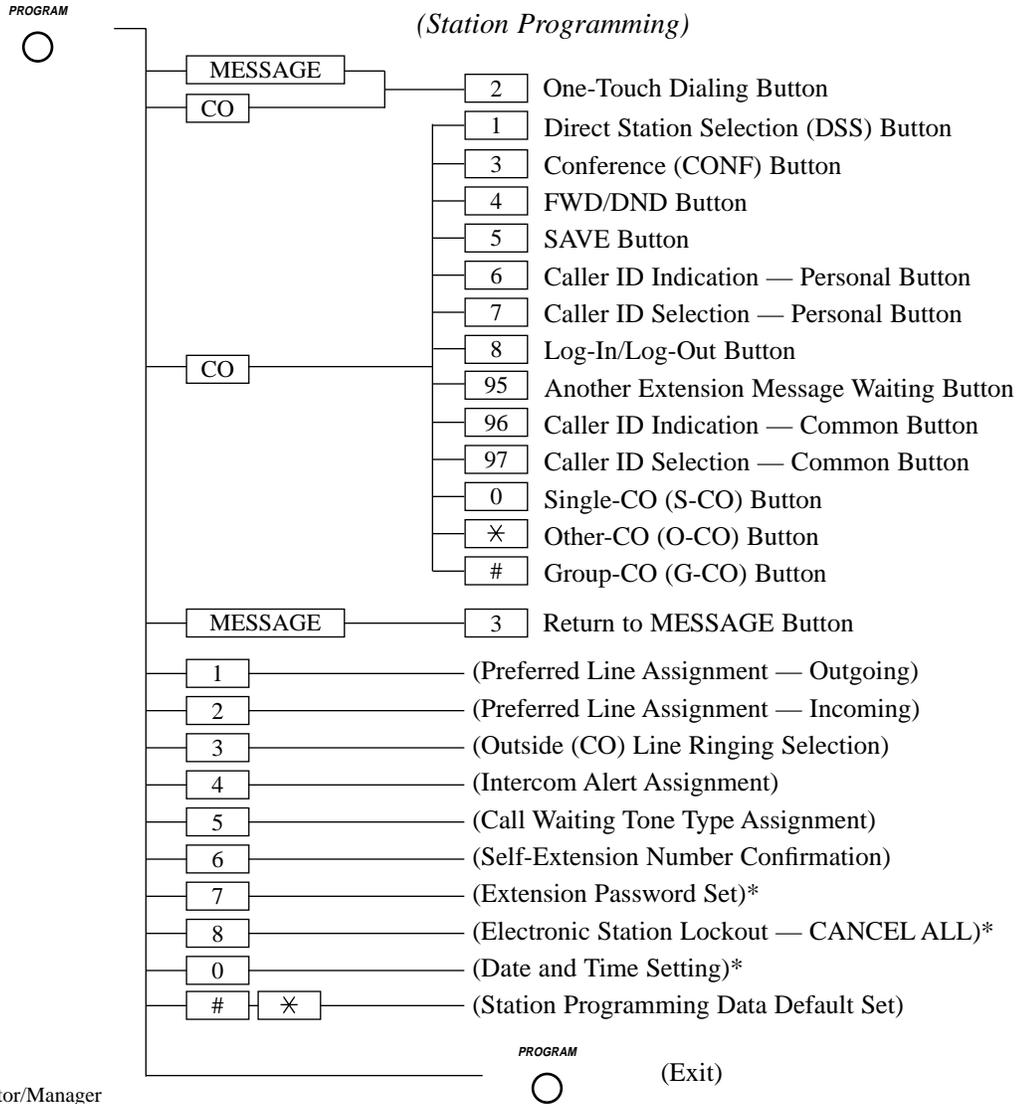

— To exit the Station Programming mode, press the PROGRAM button.

— The following outline contains the buttons and program access numbers used for Station Programming. Detailed operating instructions are explained in this section.

2.1

Station Programming Instructions

Station Programming Outline

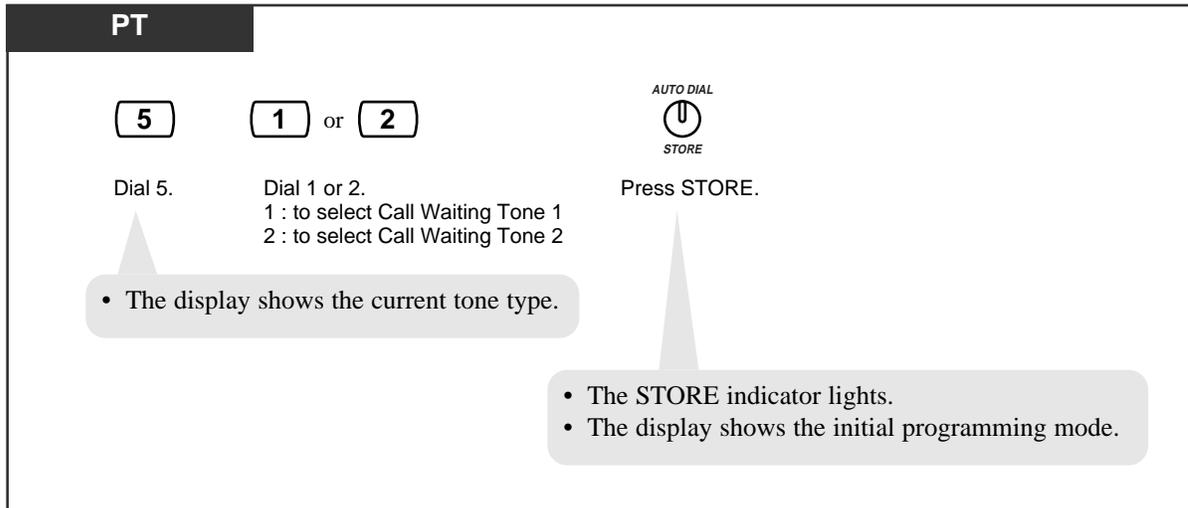

* See the "Operator/Manager Service Features" (Section 3.3).

2.2 Station Programming (Personal Programming)

Call Waiting Tone Type Assignment

Allows you to select the call waiting tone type (Tone 1 or Tone 2).

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

— To exit the Station Programming mode, press the PROGRAM button.

Conditions

- The tone type patterns are described in the Appendix (Section 4).
- The default is “Tone 1”.

Feature References

Busy Station Signaling (BSS)
Call Waiting

2.2 Station Programming (Personal Programming)

Flexible Button Assignment

Each Flexible button on your telephone and the console can be assigned as various feature buttons such as a DSS Button, FWD/DND Button, etc. The assignable features are limited by the button type. Please refer to “Flexible Buttons” in Section 1.1.

Another Extension Message Waiting Button (Assignment)

Allows you to assign a Flexible CO button as an Another Extension Message Waiting button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

The diagram illustrates the PT display interface during the assignment process. At the top left, the label "PT" is shown. Below it, a "CO" button icon is displayed. To the right, the numbers "9" and "5" are shown in separate boxes, with the instruction "Dial 95." below them. Further right, a box labeled "extension no." is shown, with the instruction "Enter the extension number (100 through 199)." below it. On the far right, the "AUTO DIAL STORE" button icon is shown, with the instruction "Press STORE." below it.

Two callout boxes provide additional information:

- The first callout, titled "<PT Display Example>", shows a display box containing "MW-".
- The second callout, titled "<PT Display Example>", shows a display box containing "MW-xxx", with a line pointing to "xxx" and the label "extension number". Below this callout is a bullet point: "• To erase an incorrect entry, press the TRANSFER (CLEAR) button. (The TRANSFER button becomes the CLEAR button during programming.)"

Additional instructions are provided in text boxes:

- "Press the desired Flexible CO button you wish to assign as an Another Extension Message Waiting button." (pointing to the CO button)
- "The STORE indicator lights." and "The display shows the initial programming mode." (pointing to the STORE button)

— To exit the Station Programming mode, press the PROGRAM button.

Feature Reference

Conference
Conference, Unattended

2.2 Station Programming (Personal Programming)

Direct Station Selection (DSS) Button (Assignment)

Allows you to assign a Flexible CO button as a DSS button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

The diagram illustrates the steps to assign a Flexible CO button as a DSS button on the PT display. It shows four main steps with corresponding icons and instructions:

- Step 1:** Press the desired Flexible CO button you wish to assign as a DSS button. The display shows "EXT-".
- Step 2:** Dial 1. The display shows "EXT-xxx".
- Step 3:** Enter the extension number (100 through 199). The display shows "EXT-xxx" with "extension number" below it.
- Step 4:** Press STORE. The display shows "EXT-xxx" with "extension number" below it.

Additional information:

- The STORE indicator lights.
- The display shows the initial programming mode.
- To erase an incorrect entry, press the TRANSFER (CLEAR) button. (The TRANSFER button becomes the CLEAR button during programming.)

— To exit the Station Programming mode, press the PROGRAM button.

2.2 Station Programming (Personal Programming)

FWD/DND Button (Assignment)

Allows you to assign a Flexible CO button as the FWD/DND button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

The diagram shows a PT display with a dark header. On the left, a 'CO' button icon is shown with the instruction: 'Press the desired Flexible CO button you wish to assign as the FWD/DND button.' Below this is a callout box labeled '<PT Display Example>' containing a rectangular display showing 'FWD/DND'. In the center, a '4' button icon is shown with the instruction: 'Dial 4.' Below this is a callout box labeled '<PT Display Example>' containing a rectangular display showing 'FWD/DND'. On the right, an 'AUTO DIAL STORE' button icon is shown with the instruction: 'Press STORE.' Below this is a callout box containing two bullet points: '• The STORE indicator lights.' and '• The display shows the initial programming mode.'

— To exit the Station Programming mode, press the PROGRAM button.

Feature References

Call Forwarding

Do Not Disturb (DND)

Group-CO (G-CO) Button (Assignment)

Allows you to assign a Flexible CO button as a Group-CO button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

The diagram shows a PT display with a dark header. On the left, a 'CO' button icon is shown with the instruction: 'Press the desired Flexible CO button you wish to assign as a G-CO button.' Below this is a callout box labeled '<PT Display Example>' containing a rectangular display showing 'TRG GRP-'. In the center, a 'Dial #' button icon is shown with the instruction: 'Dial #.' Below this is a callout box labeled '<PT Display Example>' containing a rectangular display showing 'TRG GRP-x' with a line pointing to the 'x' and the text 'outside (CO) line group number'. To the right of this callout is a bullet point: '• To erase an incorrect entry, press the TRANSFER (CLEAR) button. (The TRANSFER button becomes the CLEAR button during programming.)'. On the right, an 'AUTO DIAL STORE' button icon is shown with the instruction: 'Press STORE.' Below this is a callout box containing two bullet points: '• The STORE indicator lights.' and '• The display shows the initial programming mode.'

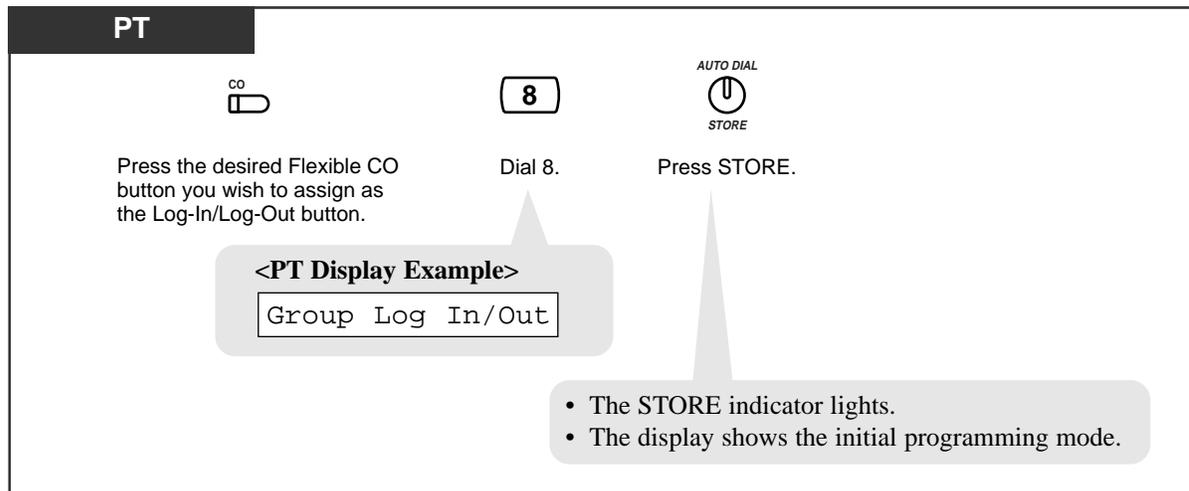

— To exit the Station Programming mode, press the PROGRAM button.

2.2 Station Programming (Personal Programming)

Log-In/Log-Out Button (Assignment)

Allows you to assign a Flexible CO button as the Log-In/Log-Out button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

— To exit the Station Programming mode, press the PROGRAM button.

Feature Reference

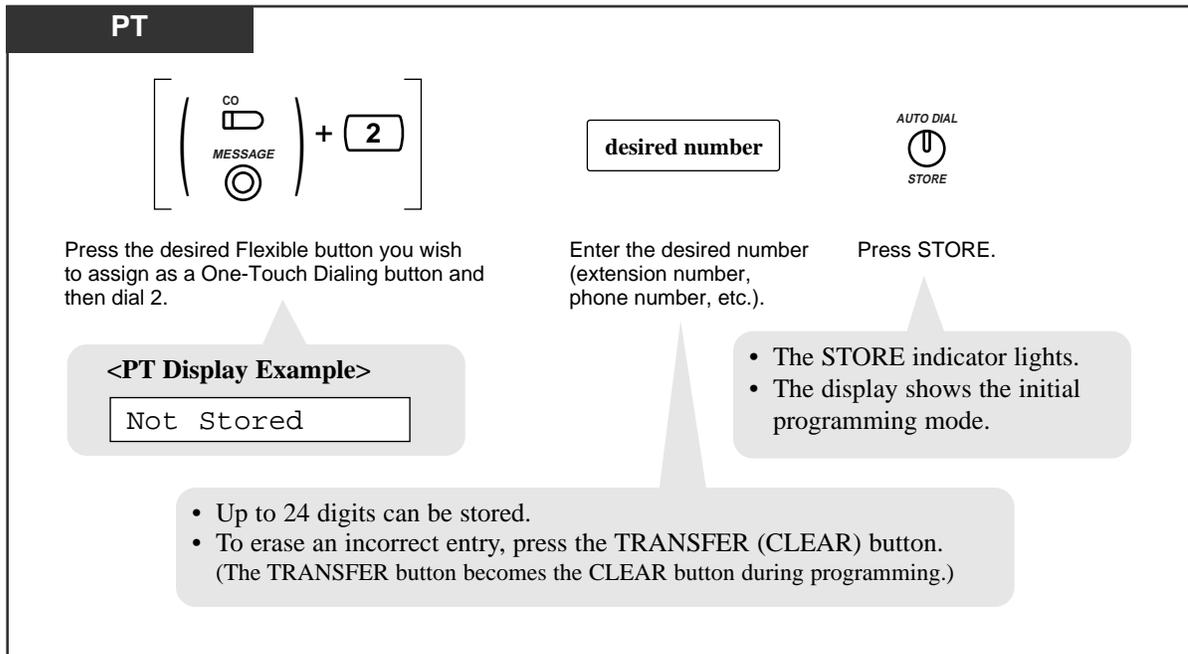

Log-In/Log-Out

2.2 Station Programming (Personal Programming)

One-Touch Dialing Button (Assignment)

Allows you to assign a Flexible button (CO, MESSAGE) as a One-Touch Dialing button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

— To exit the Station Programming mode, press the PROGRAM button.

Conditions

- The number can be an extension number, telephone number or feature number. Up to twenty-four digits can be stored in a One-Touch Dialing button.
- To store the telephone number of an external party, a line access code (9 or 81 through 83) must be stored as the first digit.
- You can store a number consisting of twenty-five digits or more by dividing and assigning it into two One-Touch Dialing buttons. In this case, the line access code should be stored in the first button.
- To store an account code, press * * and then enter the desired code. The account codes must be stored after the line access code.
- You can use 0 through 9, *, #, PAUSE and INTERCOM for storing.
 - * #: change the dialing mode (Pulse to Tone)
 - PAUSE: pause
 - INTERCOM: secret

2.2 Station Programming (Personal Programming)

Other-CO (O-CO) Button (Assignment)

Allows you to assign a Flexible CO button as the Other-CO button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

SAVE Button (Assignment)

Allows you to assign a Flexible CO button as the SAVE button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

— To exit the Station Programming mode, press the PROGRAM button.

Feature Reference

Redial, Saved Number

2.2 Station Programming (Personal Programming)

Single-CO (S-CO) Button (Assignment)

Allows you to assign a Flexible CO button as a Single-CO button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

PT

CO **0** **outside line (CO) no.** **AUTO DIAL STORE**

Press the desired Flexible CO button you wish to assign as an S-CO button.

Dial 0.

Enter the outside (CO) line number (1 through 3).

Press STORE.

<PT Display Example>
CO-

<PT Display Example>
CO-x
outside (CO) line number

- The STORE indicator lights.
- The display shows the initial programming mode.

- To erase an incorrect entry, press the TRANSFER (CLEAR) button. (The TRANSFER button becomes the CLEAR button during programming.)

— To exit the Station Programming mode, press the PROGRAM button.

Condition

- You can assign the same outside (CO) line to an S-CO and G-CO button.

2.2 Station Programming (Personal Programming)

Intercom Alert Assignment

Allows you to select the alert mode (tone/voice) when receiving an intercom (extension) call.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

The diagram shows a display screen with a dark header labeled "PT". Below the header, there are three main sections:

- Left Section:** A box containing the number "4". Below it, the text "Dial 4." is shown.
- Middle Section:** Two boxes containing the numbers "1" and "2" with the word "or" between them. Below this, the text "Dial 1 or 2." is shown, followed by "1 : to select the Ring-Calling (Tone Call) mode" and "2 : to select the Voice-Calling mode".
- Right Section:** A button labeled "AUTO DIAL" with a power symbol icon and "STORE" below it. Below the button, the text "Press STORE." is shown.

Callout boxes provide additional information:

- A callout from the "4" box: "• The display shows the current status. <PT Display Example>". Below this, two examples are shown: "Tone Call" and "Voice Call", each in a rectangular box.
- A callout from the "STORE" button: "• The STORE indicator lights." and "• The display shows the initial programming mode."

— To exit the Station Programming mode, press the PROGRAM button.

Condition

- The default is "Ring-Calling (Tone Call)".

2.2 Station Programming (Personal Programming)

Outside (CO) Line Ringing Selection

You can select whether the extension will ring or not when an outside call is received at your extension.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

The diagram illustrates the PT display interface for selecting outside (CO) line ringing. It is divided into three main sections:

- Left Section:** A button labeled '3' is shown. Below it, the text reads 'Dial 3.' A callout box titled '<PT Display Example>' shows the display text 'RNG: 1 , 2 , 3'.
- Middle Section:** A button labeled 'outside (CO) line no.' is shown. Below it, the text reads 'Enter the outside (CO) line numbers you want to ring (1 through 3).'
- Right Section:** A button labeled 'AUTO DIAL STORE' with a power symbol is shown. Below it, the text reads 'Press STORE.' A callout box lists two bullet points: '• The STORE indicator lights.' and '• The display shows the initial programming mode.'

— To exit the Station Programming mode, press the PROGRAM button.

Conditions

- The “Flexible Ringing Assignment” should be set to “Enable”. (Refer to System Programming.)
- When an outside call is received at extension but doesn’t ring, the CO indicator will flash. If you want to answer the outside call, press the flashing CO button.

Programming Reference

- System Programming — Installation Manual
[408]–[410] Flexible Ringing Assignment — Day/Night/Lunch

2.2 Station Programming (Personal Programming)

Preferred Line Assignment — Incoming

Allows you to select the method used to answer incoming outside calls from the following three line preferences.

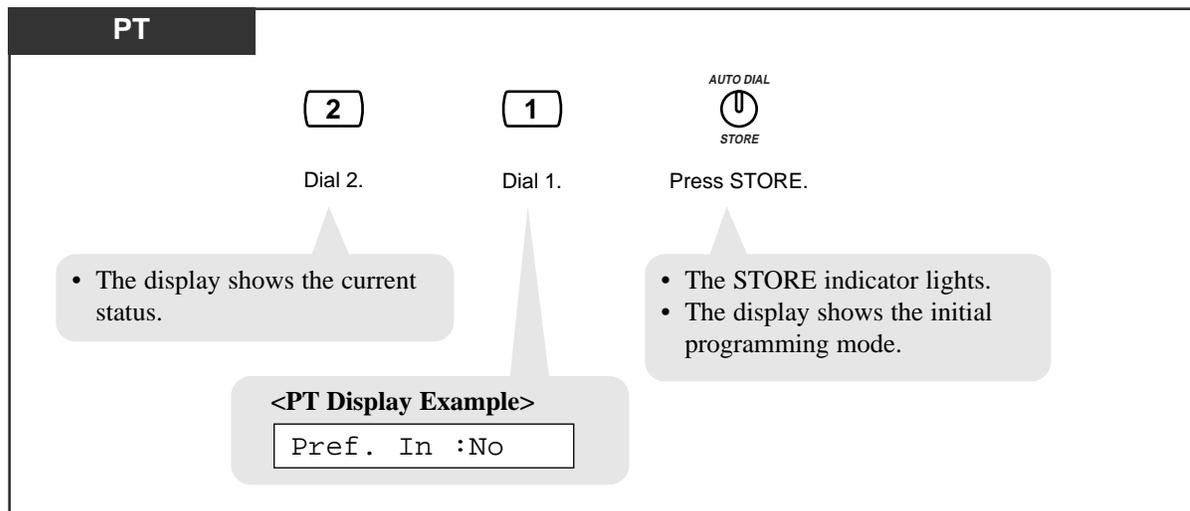

- 1.) No Line Preference
- 2.) Ringing Line Preference (— default)
- 3.) Prime Line Preference

Follow the corresponding programming procedure according to your selection.

No Line Preference — Incoming (Assignment)

No line is selected when you go off-hook. You must select a line to answer an incoming call by pressing a CO button.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

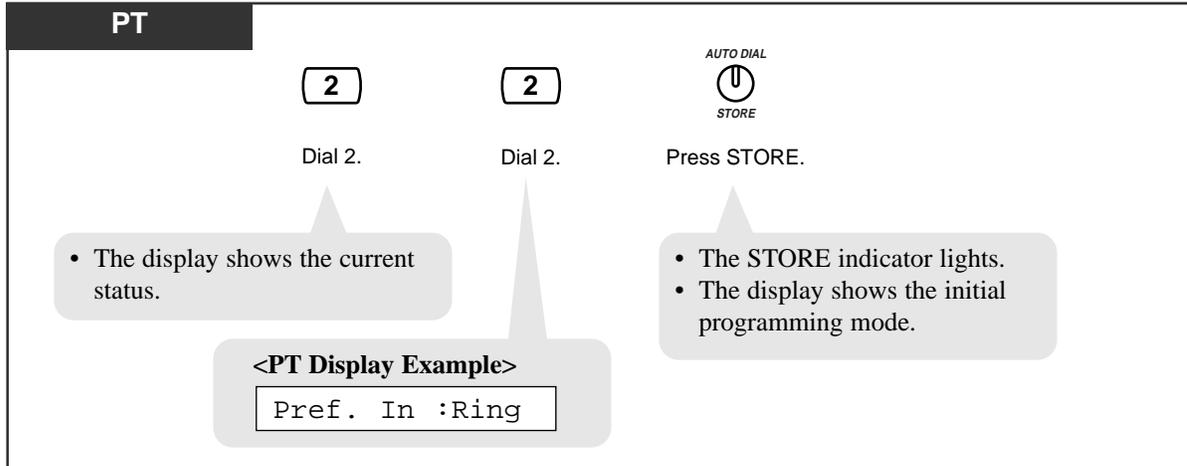

— To exit the Station Programming mode, press the PROGRAM button.

2.2 Station Programming (Personal Programming)

Ringling Line Preference — Incoming (Assignment)

When you go off-hook, you can answer any call ringing at your telephone.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

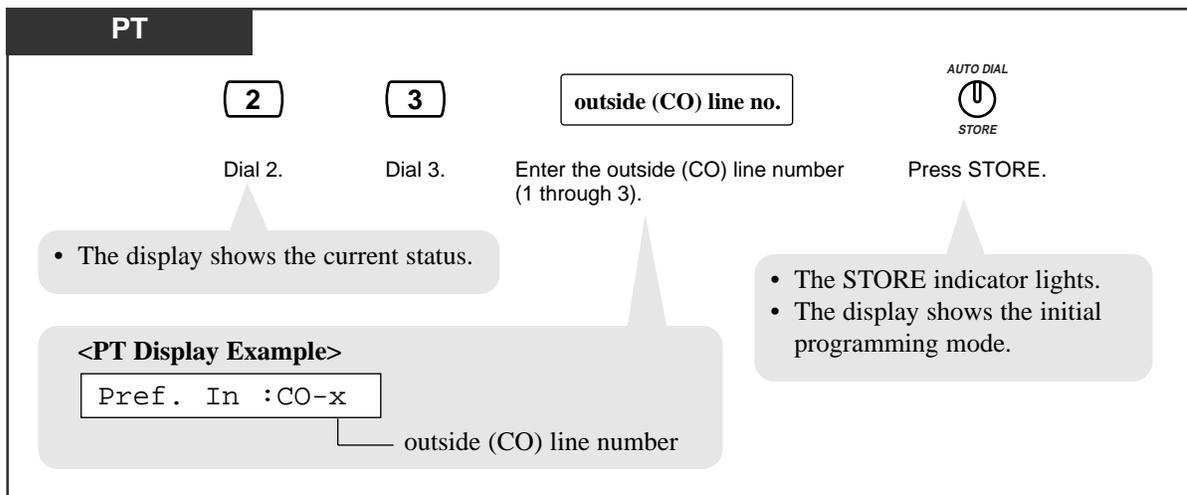

— To exit the Station Programming mode, press the PROGRAM button.

Prime Line Preference — Incoming (Assignment)

When you go off-hook, you can answer a call on the line which is assigned as the prime line.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

— To exit the Station Programming mode, press the PROGRAM button.

2.2 Station Programming (Personal Programming)

Preferred Line Assignment — Outgoing

Allows you to select the desired outgoing line preference to originate calls from the following three line preferences.

- 1.) No Line Preference (— default)
- 2.) Idle Line Preference
- 3.) Prime Line Preference

Follow the programming procedure according to your selection.

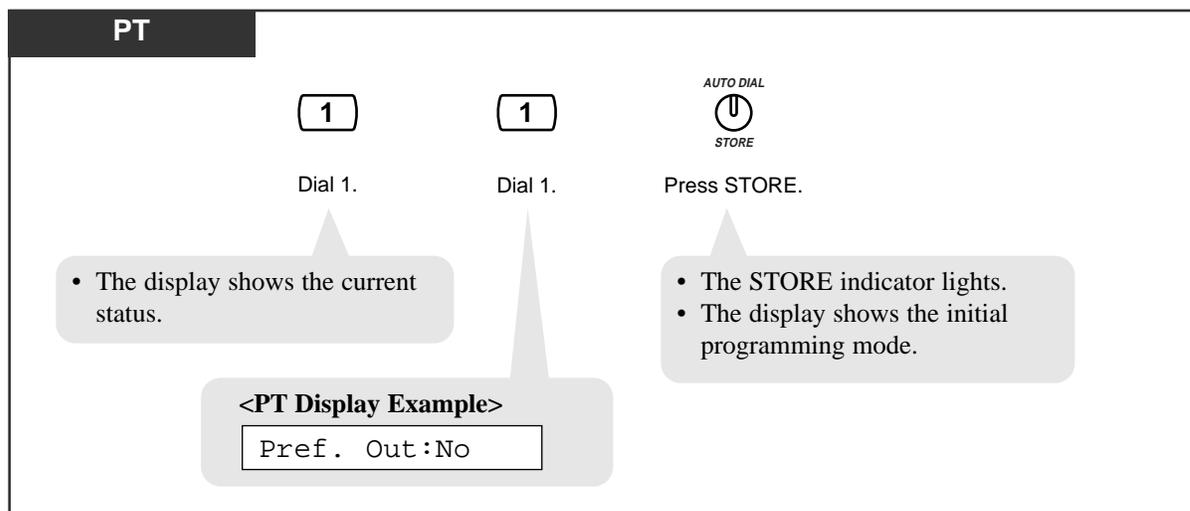

<Note>

When setting “Idle Line Preference” or “Prime Line Preference”, you **cannot** access any PT features after going off-hook. To access these PT features, press the INTERCOM button before or after going off-hook.

No Line Preference — Outgoing (Assignment)

When going off-hook, you are not connected to any line. You must choose the line.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

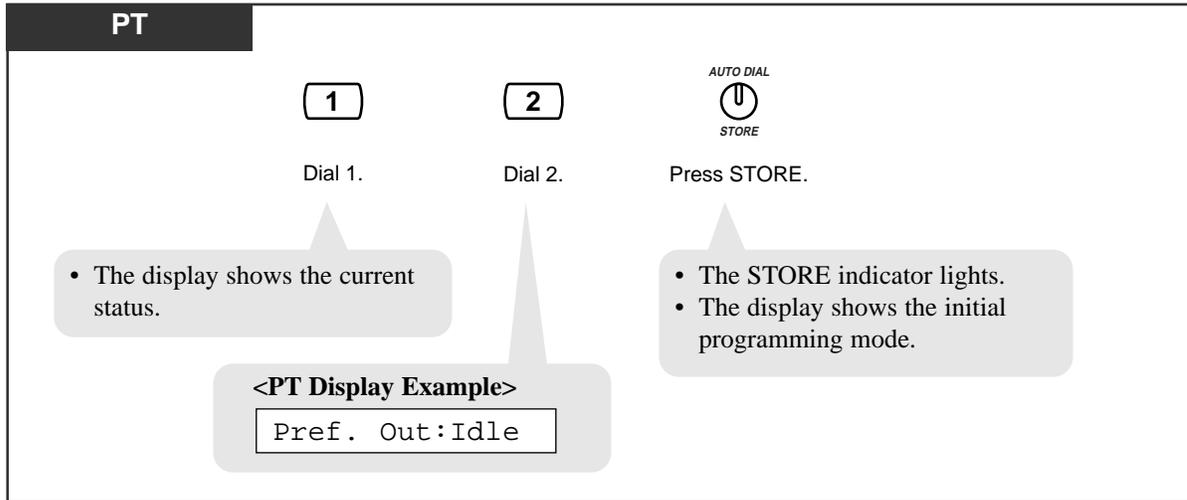

— To exit the Station Programming mode, press the PROGRAM button.

2.2 Station Programming (Personal Programming)

Idle Line Preference — Outgoing (Assignment)

When going off-hook, you are connected to an idle line.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

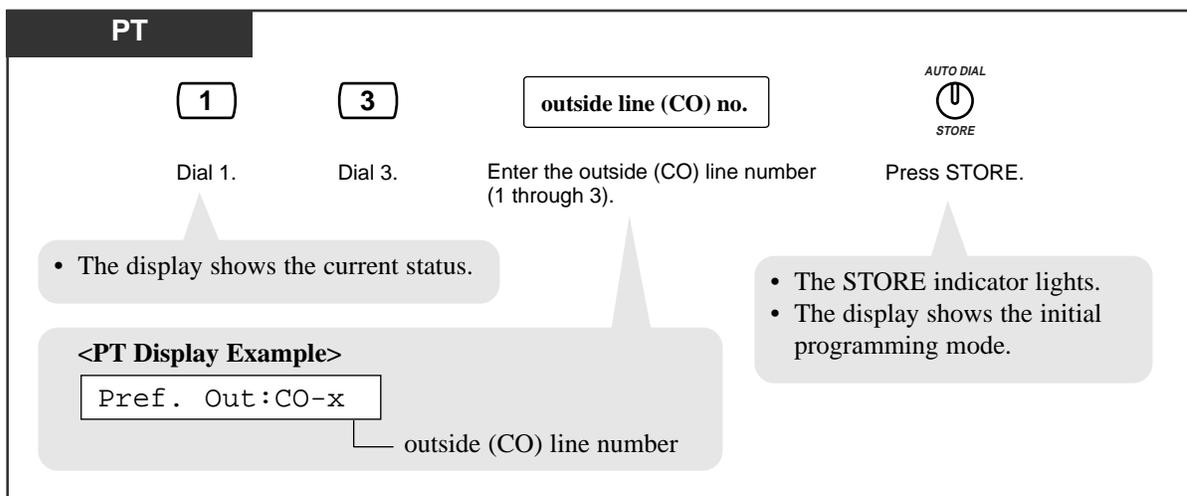

— To exit the Station Programming mode, press the PROGRAM button.

Prime Line Preference — Outgoing (Assignment)

When going off-hook, you are connected to a pre-assigned line.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

— To exit the Station Programming mode, press the PROGRAM button.

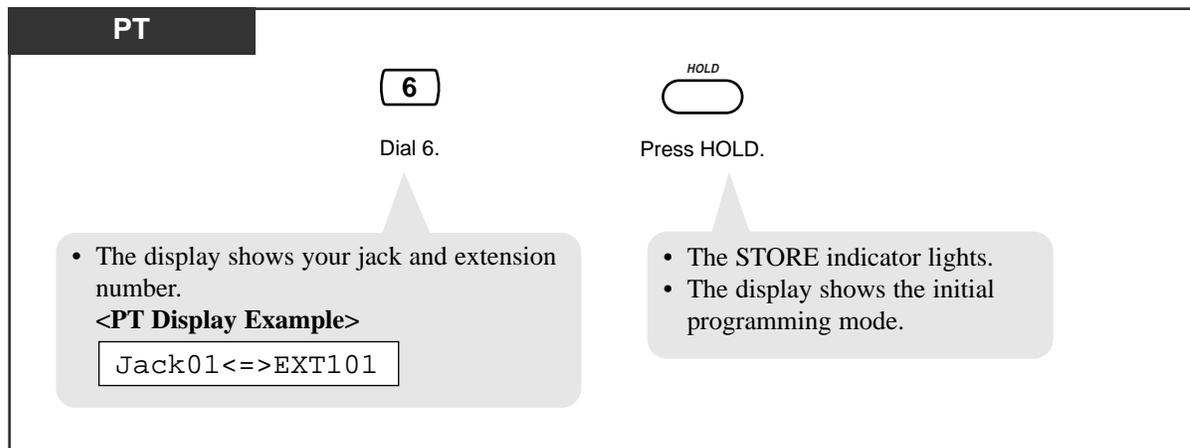

2.2 Station Programming (Personal Programming)

Self-Extension Number Confirmation

(KX-TA30830 only)

Allows you to display your jack and extension number.

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

— To exit the Station Programming mode, press the PROGRAM button.

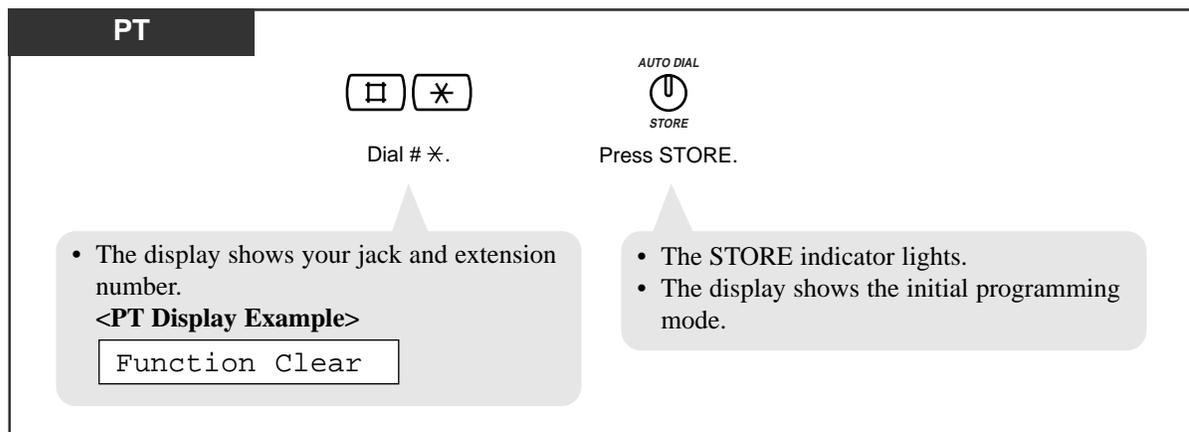

2.2 Station Programming (Personal Programming)

Station Programming Data Default Set

Allows you to return each of the following programmable items to their default settings.

- a) Call Waiting Tone Type Assignment (default: Tone 1)
- b) Intercom Alert Assignment (default: Ring-Calling (Tone Call))
- c) Outside (CO) Line Ringing Selection (default: Ring – all outside (CO) lines)
- d) Preferred Line Assignment — Incoming (default: Ringing Line Preference)
- e) Preferred Line Assignment — Outgoing (default: No Line Preference)

— Be sure that you are in the Station Programming mode. Press the PROGRAM button.

— To exit the Station Programming mode, press the PROGRAM button.

Condition

- This feature also cancels the Hands-free Answerback feature and pressing the AUTO ANSWER/MUTE button in the Room Monitor feature.

<Note>

When setting “Idle Line Preference — Outgoing” or “Prime Line Preference”, you **cannot** access any PT features after going off-hook. To access PT features, press the INTERCOM button before or after going off-hook.

If you use a rotary telephone:

It is not possible to access features that have “*” or “#” in their feature numbers except for the features where “0” can be used in place of “#”.

When the “Pickup Dialing (Hot Line)” feature is set on your single line telephone, the dialing sequence should be completed within a pre-determined time (Pickup Dial Waiting Time — default: 3 s) after lifting the handset.

To change the time, refer to System Programming in the Installation Manual.

Refer to Section 4 “Tone List” for tones.

Making Calls

Intercom Calling

Allows you to make a call to another extension.

Any Telephone

Lift the handset or press
SP-PHONE/MONITOR.

extension number

 or 

Enter an extension number (100 through 199).
or press the flexible button assigned as a DSS button.

- The INTERCOM indicator turns green.

Outward Dialing

Allows you to make a call to an external party using one of the following line access methods.

- 1.) Line Access, Automatic
- 2.) Line Access, Individual
- 3.) Line Access, Outside (CO) Line Group

Any Telephone

Lift the handset
or press
SP-PHONE/MONITOR.

line access code

 or 

Outside line
dial tone

phone number

Dial the phone number.

9: Line Access, Automatic
 CO: Line Access, Individual
 81 through 83: Line Access, Outside (CO) Line Group

Conditions

- PT • There are three types of Line Preference for outgoing calls (— Idle Line/No Line/Prime Line). Each preference can be selected by Station Programming.
- PT • Helpful hints for the Hands-free (speakerphone) operation are noted in the “Hands-free Operation” feature.
- PT • When the unit is not in use, the Liquid Crystal Display will show:
 - the month, day and present time
 - the month, day, year and day of the week
 - your extension number and name
- PT • A Flexible CO button can be assigned as a DSS button.

Absent Message Capability

Allows you to show the reason for your absence, if the calling extension uses a Panasonic proprietary telephone with a display.

This way the caller can know when or where you can be reached. You can choose one of six messages.

Message No.	Message
1	Will Return Soon
2	Gone Home
3	At Ext % % % └── Extension number
4	Back at % % : % % AM (or PM) └── Minute └── Hour
5	Out until % % / % % └── Day └── Month
6	In a Meeting

Note: Enter the desired value in the “%” space. You must make an entry in all of the %s using 0 through 9.

3.2 Telephone Features

A

Setting

Message 1. "Will Return Soon"

Any Telephone

The diagram shows the steps for setting Message 1. It starts with an icon of a handset being lifted, followed by the instruction 'Lift the handset or press SP-PHONE/MONITOR.' Next is a sequence of four boxes containing the digits 7, 5, 1, and a hash symbol (#), with the instruction 'Dial 751#.' This is followed by an icon of a handset with sound waves, labeled 'Confirmation tone and dial tone'. The final step is an icon of a handset with a downward arrow, labeled 'Hang up or press SP-PHONE/MONITOR.' A callout box at the bottom states: '• Single line telephone users can dial "0" instead of "#".'

Lift the handset or press SP-PHONE/MONITOR.

Dial 751#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial "0" instead of "#".

Message 2. "Gone Home"

Any Telephone

The diagram shows the steps for setting Message 2. It starts with an icon of a handset being lifted, followed by the instruction 'Lift the handset or press SP-PHONE/MONITOR.' Next is a sequence of four boxes containing the digits 7, 5, 2, and a hash symbol (#), with the instruction 'Dial 752#.' This is followed by an icon of a handset with sound waves, labeled 'Confirmation tone and dial tone'. The final step is an icon of a handset with a downward arrow, labeled 'Hang up or press SP-PHONE/MONITOR.' A callout box at the bottom states: '• Single line telephone users can dial "0" instead of "#".'

Lift the handset or press SP-PHONE/MONITOR.

Dial 752#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial "0" instead of "#".

Message 3. "At Ext %%" (extension number)

Any Telephone

The diagram shows the steps for setting Message 3. It starts with an icon of a handset being lifted, followed by the instruction 'Lift the handset or press SP-PHONE/MONITOR.' Next is a sequence of three boxes containing the digits 7, 5, and 3, with the instruction 'Dial 753.' This is followed by a box labeled 'extension no.' with the instruction 'Enter the extension number (100 through 199) where you will be.' Then is a box containing a hash symbol (#) with the instruction 'Dial #.' This is followed by an icon of a handset with sound waves, labeled 'Confirmation tone and dial tone'. The final step is an icon of a handset with a downward arrow, labeled 'Hang up or press SP-PHONE/MONITOR.' A callout box at the bottom states: '• Single line telephone users can dial "0" instead of "#".'

Lift the handset or press SP-PHONE/MONITOR.

Dial 753.

Enter the extension number (100 through 199) where you will be.

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial "0" instead of "#".

Message 4. "Back at % : % AM (or PM)" (time)

Any Telephone

The diagram shows the steps for setting Message 4. It starts with an icon of a handset being lifted, followed by the instruction 'Lift the handset or press SP-PHONE/MONITOR.' Next is a sequence of three boxes containing the digits 7, 5, and 4, with the instruction 'Dial 754.' This is followed by two boxes labeled 'hour' and 'minute' with the instruction 'Enter the hour (01 through 12) and minute (00 through 59).' Then is a box containing '0' or '1' with the instruction 'Dial 0 or 1. 0: for AM 1: for PM'. This is followed by a box containing a hash symbol (#) with the instruction 'Dial #.' This is followed by an icon of a handset with sound waves, labeled 'Confirmation tone and dial tone'. The final step is an icon of a handset with a downward arrow, labeled 'Hang up or press SP-PHONE/MONITOR.' A callout box at the bottom states: '• Single line telephone users can dial "0" instead of "#".'

Lift the handset or press SP-PHONE/MONITOR.

Dial 754.

Enter the hour (01 through 12) and minute (00 through 59).

Dial 0 or 1. 0: for AM 1: for PM

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial "0" instead of "#".

Message 5. "Out until %% / %%" (month/day)

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 755.

Enter the month (01 through 12) and day (01 through 31).

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial "0" instead of "#".

Message 6. "In a Meeting"

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 756#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial "0" instead of "#".

Canceling

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 750#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

Message Cancel

- Single line telephone users can dial "0" instead of "#".

Condition

- PT • To confirm the message, go off-hook. It will be displayed.

Account Code Entry

An account code is used to identify outside calls for accounting and billing purposes. The account code is appended to the “Station Message Detail Recording (SMDR)” call record. For incoming outside calls, account codes are not required. For outgoing outside calls, account codes are often required. You can enter account codes in the following four modes.

Verify - All mode: You must always enter a pre-assigned account code.

Verify - Toll mode: You can enter a pre-assigned account code so that you can override toll restriction.

Option mode: An account code can be entered when a record of the account code is required. It can be any number.

Forced mode: You must always enter an account code. It can be any number.

Making calls with account codes except in the Option mode

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

account code

Enter an account code (4 digits).

Dial tone

phone no.

Enter the phone number.

Making calls with account codes in the Option mode and receiving calls

PT

During a conversation or while hearing a reorder tone after the other party hangs up (within 30 seconds)

FWD/DND

Press FWD/DND.

account code

Enter an account code (4 digits).

- You can keep talking.

Conditions

- In the Verify-All mode, you must always enter a pre-assigned account code when making any of the following calls unless one has previously been stored in memory.
 - a) Call Forwarding — to an Outside (CO) Line
 - b) Manual Dialing (Selecting an outside (CO) line)
 - c) One-Touch Dialing (PT only)
 - d) Pickup Dialing (Hot Line) (SLT only)
 - e) Personal Speed Dialing
 - f) System Speed Dialing
- In the Verify-Toll mode, you can enter a pre-assigned account code only when you need to override toll restriction.
- In the Option mode, you can record a calling or called party's account code in the SMDR during a conversation or within thirty seconds after the other party hangs up.
- You do not need to make an account code entry when receiving incoming calls.
- You can clear and re-enter a number by pressing “* *” or the FWD/DND button while entering an account code.
- An account code can be stored into Memory Dialing (“One-Touch Dialing”, “Pickup Dialing (Hot Line)”, “System/Personal Speed Dialing”, “Call Forwarding — to Outside (CO) Line”). To store an account code, “* *” must be entered before the account code. Example (Pickup Dialing):
 — [Off-hook] [742] [Line Access Code] [* *] [Account Code] [Phone Number] [#]
 [On-hook]
- If an entered account code does not match the pre-assigned account code in the verify-all mode, when making an outside call, a reorder tone is heard.
- PT • An account code has four digits (0 through 9). FLASH/RECALL, PAUSE, etc., cannot be used.

Answering, Direct Outside (CO) Line

Allows you to answer an outside call by pressing a CO button. You do not have to lift the handset or press the SP-PHONE/MONITOR button.

To answer an incoming outside call

Conditions

- PT** • Specify which line is connected when multiple incoming outside calls arrive at the same time.
- PT** • There are three types of CO buttons: Group-CO (G-CO) button, Other-CO (O-CO) button and Single-CO (S-CO) button. These can be assigned to Flexible CO buttons by Station Programming.
- PT** • This feature is not available for the KX-TA30850.

Feature Reference

Hands-free Operation

Automatic Callback Busy (Camp-On)

Allows you to receive callback ringing when the dialed line becomes idle. When you answer the callback ringing;

For an extension: The called extension starts ringing without dialing.

For an outside (CO) line: The line is seized.

Setting

Any Telephone

If you hear a busy tone

Dial 6.

Confirmation tone and reorder tone

Hang up or press SP-PHONE/MONITOR.

Wait for the Camp-On recall.

<PT Display Example>

Callback Ext xxx

extension number

Answering an intercom recall

Any Telephone

If you hear the telephone ringing

Lift the handset or press SP-PHONE/MONITOR.

<PT Display Example>

xxx : Tony

extension number

- You hear a ringback tone and the called extension rings automatically.

3.2 Telephone Features

A

Answering an outside (CO) line recall

Any Telephone

If you hear the telephone ringing

 Lift the handset or press SP-PHONE/MONITOR .

 Dial tone

 Enter the phone number.

<PT Display Example>

CO x Free

outside (CO) line number

Canceling

Any Telephone

 Lift the handset or press SP-PHONE/MONITOR.

Condition

- If you do not answer within four callback ring signals (within 10 seconds), this feature will be canceled.

Background Music (BGM)

You can listen to background music through the built-in speaker of the telephone. An external music source, such as a radio, can be connected. The music stops whenever a call comes in, a page comes in, or you go off-hook.

Setting / Canceling

PT

When the handset is on the cradle and the SP-PHONE/MONITOR button is off

1
Dial 1.

- The display shows either of the following for three seconds depending on whether BGM is on or off:
<PT Display Example>

BGM on

or

BGM off

Busy Station Signaling (BSS)

The busy extension that you called will hear the assigned Call Waiting tone and know that you are waiting.

Any Telephone

If you make an intercom call and hear a busy tone

1

Wait for an answer and talk.

Dial 1.

Conditions

- To answer from the calling extension, see “Call Waiting” in this manual.
- If you hear a reorder tone when you set this feature, this feature cannot be operated with the called party. This feature is only available if the called extension has set the “Call Waiting” feature.

Feature Reference

Call Waiting

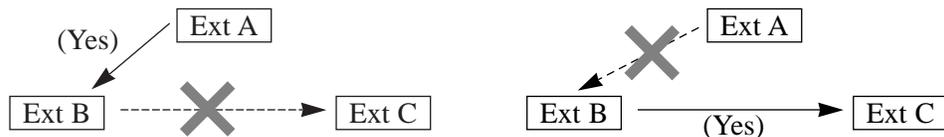

Call Forwarding — SUMMARY

Automatically transfers incoming calls to another extension or to an external destination. The following types are available.

Type	Description
Call Forwarding — All Calls	All incoming calls are forwarded to another extension.
Call Forwarding — Busy/No Answer	All incoming calls are forwarded to another extension when you do not answer or your extension is busy.
Call Forwarding — to Outside (CO) Line	All incoming calls are forwarded to an outside (CO) line.
Call Forwarding — Follow Me	Allows you to set the “Call Forwarding — All Calls” feature from another extension.

Conditions

- To cancel the Call Forwarding features, refer to “Call Forwarding — CANCEL” in this manual.
- Call Forwarding can only be extended to one target telephone. For example, extension A is forwarded to extension B, and if extension B tries to set Call Forwarding to extension C, an alarm tone will be heard and the setting will be rejected. If extension B has already set Call Forwarding to extension C, and extension A tries to set Call Forwarding to extension B, the setting will be also rejected.

- If the destination extension has already set “Do Not Disturb”, you cannot forward any calls to the extension.
- Setting a new “Call Forwarding” feature (All Calls, Busy/No Answer, etc.) cancels any other “Call Forwarding” features or the “Do Not Disturb (DND)” feature.
- If your entry is valid, confirmation tone 1 (one beep) is sent. If your entry is the same as previously programmed data, confirmation tone 2 (two beeps) is sent. Refer to the “Tone List” in the Appendix (Section 4).
- You can call the original extension from the Call Forwarding destination extension. (For example, Boss Secretary)
- Camp-On recall and Hold recall are not forwarded.

3.2 Telephone Features

C

- PT** • A Flexible CO button can be assigned as the FWD/DND button.
- PT** • The lighting patterns of the FWD/DND button are as follows.
 - Off: Both features are not set.
 - Red: DND mode
 - Flashing red slowly: FWD mode
- PT** • You can check the assignment by pressing the FWD/DND button while on-hook.

Programming Reference

- Station Programming (Section 2)
 - Flexible Button Assignment — FWD/DND Button

Feature References

- Call Forwarding — CANCEL
- Do Not Disturb (DND)

Call Forwarding — All Calls

You can re-direct all of your calls to another extension.

Setting

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 71.

For a PT [FWD/DND] For an SLT [7 1]

Dial 1. Enter the destination extension number (100 through 199).

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- You may press the flexible button assigned as the FWD/DND button instead.

<PT Display Example>
FWD(All) Extxxx
extension number where the call is to be forwarded

- The FWD/DND indicator flashes red slowly.
- Single line telephone users can dial "0" instead of "#".

Call Forwarding — Busy/No Answer

You can forward your calls to another extension when your extension is busy or if you do not answer the call within a pre-determined time.

Setting

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 71.

Dial 2. Enter the destination extension number (100 through 199).

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- You may press the flexible button assigned as the FWD/DND button instead.

<PT Display Example>

FWD(B/NA) Extxxx

extension number where the call is to be forwarded

- The FWD/DND indicator flashes red slowly.
- Single line telephone users can dial “0” instead of “#”.

3.2 Telephone Features

C

Call Forwarding — to an Outside (CO) Line

You can forward calls to an external party.
System programming is required to execute this feature.

Setting

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 7 1.

Dial 3.

Enter the line access code (9 or 81 through 83).

Enter the phone number.

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

- When you dial line access code “9”:
FWD(All) All COs
- When you dial line access code “81 through 83”:
FWD(All) CO Gx
outside (CO) line group number

- The FWD/DND indicator flashes red slowly.

Conditions

- If an incoming outside call is forwarded to an outside (CO) line, the “Outside-to-Outside (CO-to-CO) Line Call Duration Time” is applied to the call and the line will be disconnected when it expires (default: 10 minutes). An alarm tone is sent to both parties fifteen seconds before the assigned duration time limit.
- Up to thirty-two digits (including the line access code) can be programmed.
- If a CPC signal is sent to an outside (CO) line before the assigned duration time limit, a call between two external parties will be disconnected.
- This feature cannot be used for incoming outside calls from lines assigned as “Normal”, by System Programming.
- An account code must be entered by pressing “* *” and entering the account code after the line access code in the account code verify-all and forced modes.

Call Forwarding — CANCEL

There are two canceling methods for “Call Forwarding”. The canceling depends on the Call Forwarding type that has been assigned.

Canceling Call Forwarding at your (original) extension

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 71.

Dial 0. Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- You may press the flexible button assigned as the FWD/DND button instead.

<PT Display Example>

FWD/DND Cancel

- The FWD/DND indicator turns off.
- Single line telephone users can dial “0” instead of “#”.

Canceling Call Forwarding at the destination extension — “Follow Me (All Calls)” only

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 71.

Dial 8. Enter your extension number.

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- You may press the flexible button assigned as the FWD/DND button instead.

<PT Display Example>

FWD/DND Cancel

- The FWD/DND indicator turns off at your extension.
- Single line telephone users can dial “0” instead of “#”.

Call Hold

Allows you to place a call on hold.

To place a call on hold

PT	SLT
<p><i>During a conversation</i></p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>HOLD</p> <p>Press HOLD.</p> </div> <div style="text-align: center;">  <p>Confirmation tone and dial tone</p> </div> </div> <div style="margin-top: 20px;"> <ul style="list-style-type: none"> You may replace the handset. The corresponding CO or INTERCOM indicator flashes green slowly. </div>	<p><i>During a conversation</i></p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>Flash the hookswitch.</p> </div> <div style="text-align: center;">  <p>Confirmation tone and dial tone</p> </div> </div> <div style="margin-top: 20px;"> <ul style="list-style-type: none"> You may replace the handset. </div>

Retrieving a call on hold

PT	SLT
<p><i>At the holding extension</i></p> <div style="display: flex; justify-content: center; align-items: center; gap: 20px;"> <div style="text-align: center;">  <p>CO</p> </div> <div>OR</div> <div style="text-align: center;">  <p>INTERCOM</p> </div> </div> <p>Press the CO or INTERCOM which is flashing green slowly.</p> <div style="margin-top: 20px;"> <ul style="list-style-type: none"> The CO or INTERCOM indicator turns steady green. </div>	<p><i>At the holding extension</i></p> <div style="text-align: center;">  <p>Flash the hookswitch.</p> </div> <div style="margin-top: 20px;"> <ul style="list-style-type: none"> If the handset is replaced, just off-hook to retrieve the call. </div>

Conditions

- To retrieve a call on hold at another extension, refer to “Call Hold Retrieve” in this manual.
- If a held call is not retrieved within a pre-determined time (default: 30 seconds), “Hold Alarm/Hold Recall” occurs. If the hold recall time is set to “Disable”, it will not be recalled.
- If a held outside call is not answered within thirty minutes, it will be automatically disconnected.
- When going off-hook:
 - Before recalling: A dial tone will be heard while the call is on hold. You may dial another telephone number.
 - While recalling: Only the first call on hold will be released and enter the conversation mode.
- You cannot hold a doorphone call.
- PT • With outside calls, you can put multiple calls on hold. However, with intercom calls, you can put only one call on hold. One way around this is to use the Call Park feature.
- PT • If a call is placed on hold for more than the programmed time, ringing or an alarm tone will be heard (Hold Recall/Hold Alarm) and the following displays will be shown. While the alarm tone is being sent, the LCD will flash.
 - Example:
 - When holding extension 111, Mr. Brown: “111: Brown” will be displayed.
 - When holding outside (CO) line, CO 1: “Call on CO 1” will be displayed.
- SLT • If “Hold-2” or “Hold-3” is assigned by System Programming, you must dial “20” after flashing the hookswitch.
- SLT • Only an outside or intercom call can be placed on hold at one time. If you want to hold both calls, use the Call Park feature.

Call Information/Log, Incoming

Provides you with the caller's telephone number and name simultaneously on the outside (CO) line assigned to receive Caller ID service* calls. If the call is not answered, the call information is automatically recorded.

Display Operation (— for the KX-TA30830)

JOHN WHITE

While receiving an incoming outside call, the display shows the caller's telephone number or name.

- If you want to see other information, press the Caller ID Selection button or press #.
- The display changes as follows.

JOHN WHITE

(caller's name)

0111111111

(caller's telephone number)

Call on CO 1

(CO number)

1. Lift the **handset** or press the **SP-PHONE** button.
2. Press the **Caller ID Selection** button to see other information.
 - The display changes as follows.

JOHN WHITE

(caller's name)

0111111111

(caller's telephone number)

CO 1

0:01'52

(call duration)

* The Caller ID service provides you with the caller's information, such as the name and telephone number, on the outside (CO) line assigned to receive Caller ID service calls. Refer to the Installation Manual.

Conditions

- The Caller ID Indication button indicator may turn on when a call is received.
- Even if you answer a call, the call information can be recorded by pressing the Caller ID Indication button during the conversation.
- You can modify and call back the logged numbers. Refer to the “Call Log, Incoming” feature.
- A caller’s name will be displayed if the corresponding speed dial number has been assigned a name by System Programming.
- System Programming determines which is displayed first, the name or number.
- You can program by System Programming whether or not to print out a Caller ID number on the SMDR.
- You can also program by System Programming whether or not to print out a Caller ID number on the SMDR before the call is answered.
- If “OUT OF AREA” is displayed, the call may be from out of the calling area.
- If “LONG DISTANCE” is displayed, it may be a long distance call.
- If “PRIVATE” is displayed, the caller’s name and number was not sent by request of the caller.

Call Log, Incoming
Call Log Lock, Incoming in the Personal Area
Call Log Lock, Incoming in the Common Area (3.3 Operator/Manager Service Features)

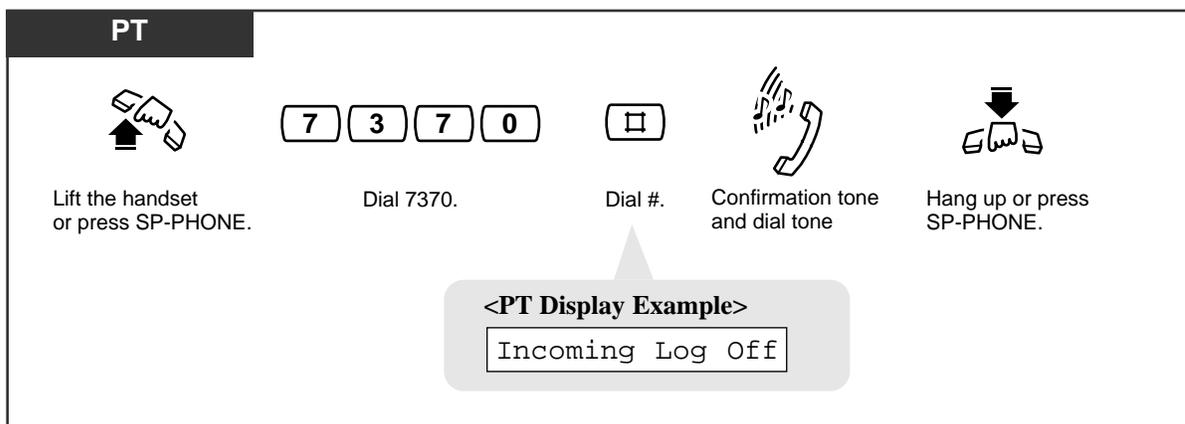

Call Log, Incoming

If a call is not answered, the incoming outside call information from the Caller ID service*¹ is automatically logged in the system and the Caller ID Indication button indicator lights. There are two kinds of call log areas available in the system. One is the personal area, which stores call logs for each extension. The other is the common area, which stores call logs for the system. A call comes directly to a certain extension is stored in the extension's personal area. A call for multiple extensions and a call via the DISA Intercept Routing feature is stored in the common area. To check the caller's information stored in the personal area, you need to assign the Caller ID Indication — Personal button. For common area, the Caller ID Indication — Common button is necessary. Up to 20 calls can be logged in each personal area and up to 300 calls in the common area. When the call log in the personal area is full (20 calls are stored), you can select how the 21st call is treated. Either a new call can be disregarded or the new call can overwrite the oldest call that have been already confirmed (Default: Record the new call.). As for the common area, only the operator or manager can control this. (Refer to “The 301st Call Log, Incoming in the Common Area Treatment” in section 3.3.)

Doorphone Call

Call Pickup, Group

Allows you to answer a call that is ringing at another telephone within your extension group.

Conditions

- You can pick up an incoming outside, intercom or doorphone call, but you cannot pickup a Camp-On recall and hold recall.
- You can hear a confirmation tone when the call is picked up. The tone can be disabled.
- If a ringing extension sets the Call Pickup Deny feature, you will hear a reorder tone.

Extension Group (→ See the Installation Manual.)

3.2 Telephone Features

C

Call Pickup Deny

Allows you to prevent another extension from picking up your calls with the “Call Pickup” feature.

Setting / Canceling

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

To set: Dial 721#.
To cancel: Dial 720#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

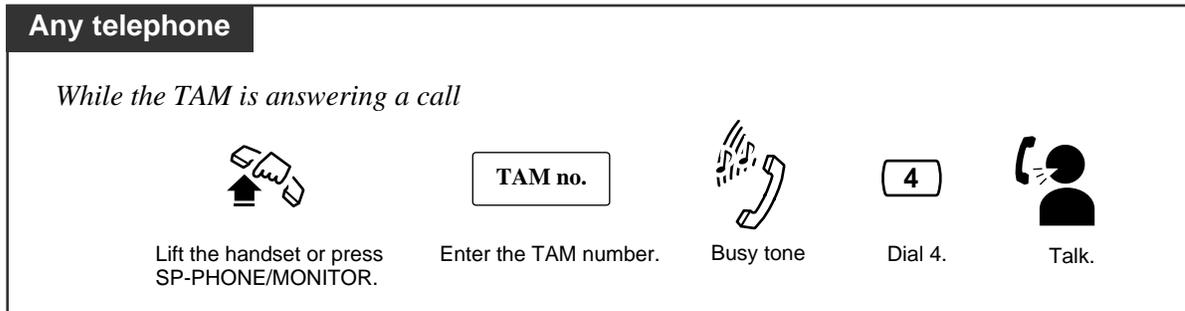

- When setting:
C.Pickup Deny
- When canceling:
C.Pickup Allow
- Single line telephone users can dial “0” instead of “#”.

Feature References

Call Pickup, Directed
Call Pickup, Group

Call Retrieving from a TAM (Telephone Answering Machine)

Allows you to answer an incoming call received by a TAM.
System Programming is required to use this feature.

Conditions

- When you try to pick up a call and hear a reorder tone, the TAM is not answering the call or the dialed extension is not the TAM extension.
- A TAM number is the 3-digit extension number of the TAM.

Programming Reference

- System Programming — Installation Manual
[611] TAM (Telephone Answering Machine) Extension

Call Splitting

Allows you to talk to two different parties alternately. If a call is received while you are already on the line, you can place the current call on hold and have a conversation with the other party.

Having a conversation while another call is on (exclusive) hold

PT

Between one extension and one outside (CO) line

  or 

Press HOLD. Press CO or INTERCOM.

- Repeating these operations (steps 1 and 2) alternates between the callers.

Between two outside (CO) lines

Press HOLD. Press CO.

- Repeating these operations (steps 1 and 2) alternates between the callers.

Between two extensions

Press HOLD.

- Pressing the HOLD button alternates between the callers.

SLT

Flash the hookswitch.

- The first held call is released.
- Flashing this switch alternates between the callers.

Condition

- This feature does not work during a doorphone call or paging.

Programming Reference

Call Transfer — to Extension

Allows you to transfer a received call to another extension. There are two ways.

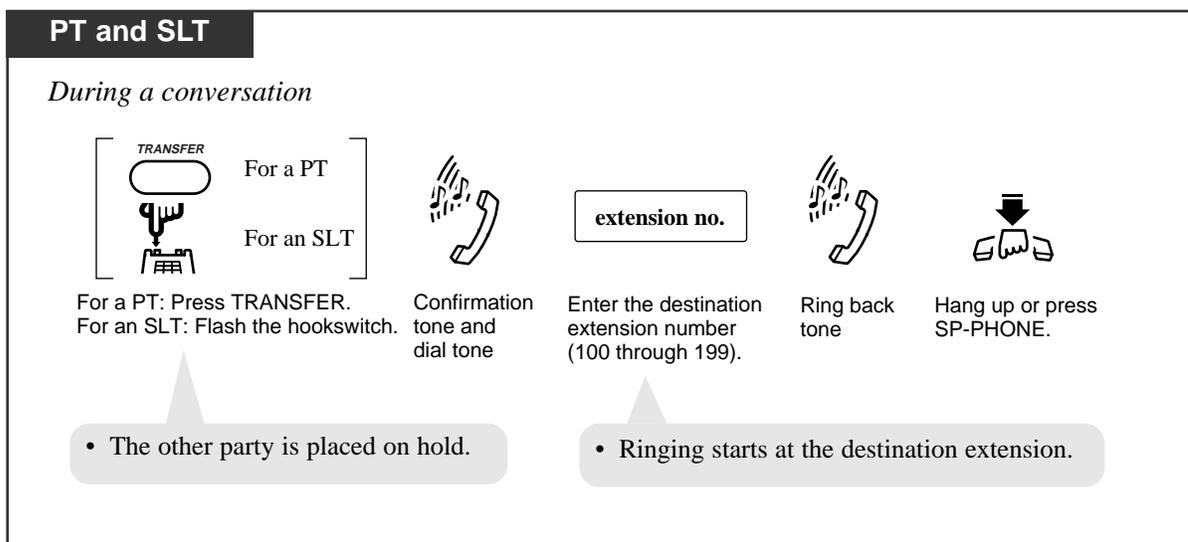

Screened Call Transfer: The destination confirms the transfer before sending.

Unscreened Call Transfer: The line is released after transferring the call without confirmation.

Screened Call Transfer

Unscreened Call Transfer

3.2 Telephone Features

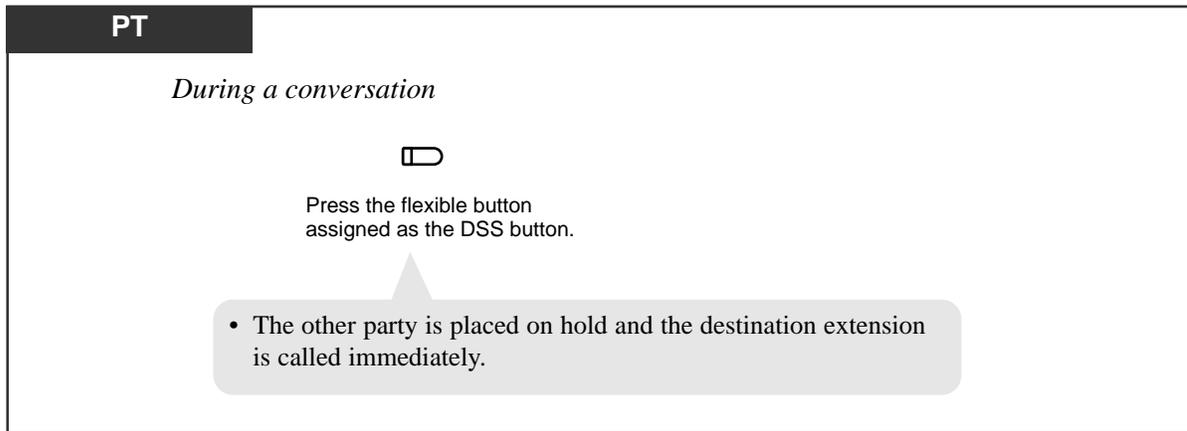

C

Call Transfer using a DSS button

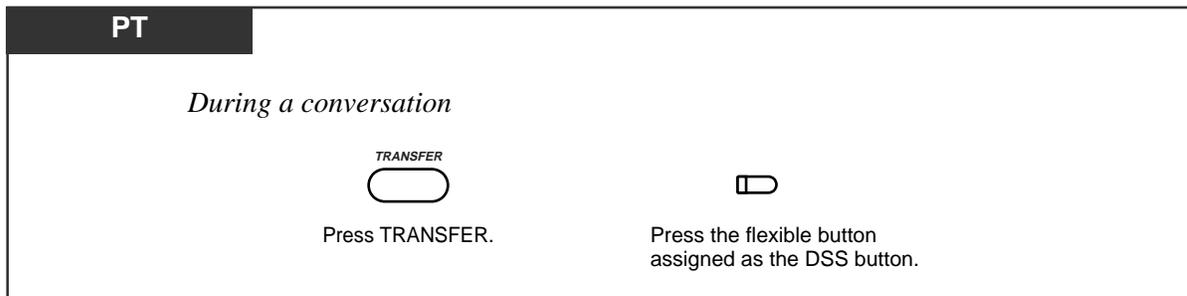

Allows you to perform a Screened or Unscreened Call Transfer by using a DSS button. There are two operations, depending on whether or not One-Touch Transfer* is set.

* **One-Touch Transfer** allows you to hold an outside call and transfer it to an extension by pressing one key. This feature provides automatic hold and transfer, without pressing the TRANSFER button. System Programming is required to use this feature.

“With Transfer” mode

“Without Transfer” mode

Conditions

- If the destination extension does not answer the call within a pre-determined time (default: 30 seconds), “Transfer Recall” occurs.
- If there is no answer within thirty minutes after “Transfer Recall” starts, the line will be disconnected.
- When the dialed extension is busy, you may access the extension by dialing “1” (Busy Station Signaling) or “2” (Executive Busy Override) and going on-hook.
- PT • If you want to return to the held call, press the TRANSFER button or corresponding CO or INTERCOM button before the destination extension answers.
- PT • When “Transfer Recall” occurs, the display will show the following:
<Example>

RCL: Ext 101
- PT • A Flexible CO button can be assigned as a DSS button.
- PT • To use “One-Touch Transfer”, System Programming is required.
- SLT • If you want to return to the held call, flash the hookswitch before the destination extension answers.
- SLT • If “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.

3.2 Telephone Features

C

Call Transfer — to an Outside (CO) Line

Allows you to transfer a received call to an external party.

Conditions

- PT** • If a CPC signal is sent to an outside (CO) line before the assigned time limit, a call between two external parties will be disconnected.
- PT** • System programming is required to execute this feature.
- PT** • If a call between two external parties is established, an alarm tone is sent to both parties fifteen seconds before the assigned time limit (default: 10 minutes). “Hold Alarm/Hold Recall” is sent to the transferring extension fifty seconds before the time-out.
- PT** • If you want to return to the held call, press the TRANSFER button or corresponding CO or INTERCOM button before the destination party answers.
- PT** • If you want to join the conversation after transferring the call, press the corresponding CO button. A conference call is established.
- PT** • To change the party where the call is transferred before hanging-up, press the CO button whose indicator is flashing slowly to retrieve the call, then repeat the Call Transfer procedure.

Call Waiting

During a conversation, a Call Waiting tone informs you that there is a call waiting. You can answer the second call by disconnecting the first call or placing it on hold.

Setting / Canceling for outside calls

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

7	3	1	1	#	To set.
7	3	1	0	#	To cancel.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

- When setting:

CW (CO) On
- When canceling:

CW (CO) Off
- Single line telephone users can dial "0" instead of "#".

Setting / Canceling for intercom calls and doorphone calls

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

7	3	2	1	#	To set.
7	3	2	0	#	To cancel.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

- When setting:

CW (Ext/Door) On
- When canceling:

CW (Ext/Door) Off
- Single line telephone users can dial "0" instead of "#".

3.2 Telephone Features

C

To talk to the new party by terminating the current call

PT	SLT
<p>While hearing a Call Waiting tone</p> <p> or </p> <p>Press the flashing CO or INTERCOM.</p> <p></p> <p>Talk to the new caller.</p> <p>• The current call is disconnected.</p>	<p>While hearing a Call Waiting tone</p> <p> </p> <p>Hang up. Lift the handset.</p> <p></p> <p>Talk to the new caller.</p> <p>• The current call is disconnected.</p>

To talk to the new party by holding the current call

PT	SLT
<p>While hearing the Call Waiting tone and the CO or INTERCOM indicator is flashing rapidly</p> <p> </p> <p>Press HOLD. Press the flashing CO or INTERCOM.</p> <p></p> <p>Talk to the new caller.</p> <p>• The current call is placed on hold.</p>	<p>While hearing a Call Waiting tone</p> <p>   </p> <p>Flash the hookswitch. Dial tone Hang up. Lift the handset.</p> <p></p> <p>Talk to the new caller.</p> <p>• The current call is placed on hold.</p>

— If both the current call and new call are extension calls, you do not have to press the INTERCOM button.

Conditions

- The default setting for Call Waiting is “disabled”.
- When Call Waiting is enabled, a Call Waiting tone is sent to the user under the following conditions.
 - 1) When an outside call is received,
 - 2) When another extension executes the “Busy Station Signaling (BSS)” feature, or
 - 3) When a doorphone call is received.
- Setting “Data Line Security” temporarily cancels this feature.
- PT • You can change the desired Call Waiting tone for an incoming outside call and intercom call (Tone 1 or Tone 2). As for a doorphone call, Tone 1 is used as a Call Waiting tone (not changeable).
- PT • If a Call Waiting tone is heard and the CO or INTERCOM indicator does not flash, this tone indicates Call Waiting from your telephone company. In this case, see “Call Waiting from a Central Office” or “External Feature Access”.
- SLT • If “Hold-2” or “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.
- SLT • You cannot transfer the new call while holding the current call. If you want to do so, first park the original call using the Call Park feature; then hang up; then take the new call.

External Feature Access

Caller ID Call Waiting

During a conversation, a Call Waiting tone offered by your Central Office informs you that there is a call waiting. If the Caller ID service provides you with a caller's information, such as the name and telephone number, the new caller's information will be displayed (flashing) on your extension (KX-TA30830 only) during the assigned time. You can answer the second call by disconnecting the first call or placing it on hold.

To talk to the new party by holding the current call

To talk to the new party by terminating the current call

Conditions

- PT • You can program the new caller information display timer. If you do not press the FLASH/RECALL button while the information is displayed (flashing), the display stops flashing. In this situation, the caller information is automatically recorded in your personal area and your Caller ID Indication — Personal button indicator lights if the call has been directed to your extension. A call directed to multiple extensions is automatically recorded in the common area and all corresponding Caller ID Indication — Common button indicators light.
- PT • This feature is available during a conversation with an external party except for the following cases: (1) during a conference, (2) during holding a call, (3) during transferring a call and (4) during an outside-to-outside (CO-to-CO) line call.
- PT • The TRANSFER button, HOLD button and Conference (CONF) button do not work while the new caller information is flashing.
- PT • A contract with your Central Office may be required for the Call Waiting service. Consult the Central Office for details.

Call Information/Log, Incoming

Conference

During a two-party conversation, you can add a third party to make a three-party conference. The members of a conference may be three extensions, one extension and two outside (CO) lines, or two extensions and one outside (CO) line.

To establish a conference

PT

During a two-party conversation

Press CONF.

phone no.

Enter the phone number of the third party.

Talk to the third party.

Press CONF.

Confirmation tone (optional)

A three-party conference is now established.

- The CONF indicator turns steady red.
- The corresponding CO or INTERCOM indicator turns green.

- You must dial the line access code (9 or 81 through 83) as the first digit when calling an external party.

- The current party is placed on hold.
- The CONF indicator flashes red slowly.

SLT

During a two-party conversation

Flash the hookswitch.

phone no.

Enter the phone number of the third party.

Talk to the third party.

Flash the hookswitch.

3

Dial 3.

Confirmation tone (optional)

A three-party conference is now established.

- You must dial the line access code (9 or 81 through 83) as the first digit when calling an external party.

- The other party is placed on hold.

3.2 Telephone Features

To leave the conference

Any telephone

Hang up or press SP-PHONE.

- The other two parties may continue their conversation.
- If the other two parties are both outside (CO) lines, they will be disconnected.

To talk to the original party while holding the third party

SLT

Flash the hookswitch.

Talk to the original party.

To terminate one party and talk to the other

PT

CO

or

INTERCOM

Press the CO or INTERCOM of the party to remain connected.

Talk.

- A conversation with the desired party is established and the other party is disconnected.

Conditions

- A conference call can also be established by “Executive Busy Override”.
- When a two-party call is changed to a three-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.
- PT • Pressing a CO button which is not in the conference allows you to exit from the conference, leaving the other two parties connected unless they are both outside (CO) lines.
If the other parties are both outside (CO) lines, they will be disconnected.
- PT • If the third party does not answer, press the CO button or INTERCOM button to return to the second party.
- PT • A Flexible CO button can be assigned as the Conference (CONF) button.
- SLT • You can return to the original party before the third party answers by flashing the hookswitch.
- SLT • If “Hold-2” or “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.

Feature References

Conference, Unattended
Executive Busy Override — Extension
Executive Busy Override — Outside (CO) Line

Conference, Unattended

When you are in a conference with two outside parties, you can leave the conference call allowing the other two parties to continue their conversation.

To establish an Unattended Conference

PT

During a conversation with two outside parties

Press CONF to leave the conference.

- An outside-to-outside (CO-to-CO) line call between the other two parties is established.

To return to the conference

PT

Press the CO flashing green moderately.

Conditions

- System Programming is required to execute this feature.
- PT** • When an Unattended Conference is established, an alarm tone is sent to both outside parties fifteen seconds before the assigned time limit (default: 10 minutes). “Hold Recall” is activated at the extension that leaves the conference fifty seconds before the time-out. The call is disconnected when the time-out expires unless the extension returns to the conference.
- PT** • For example, if you are on-hook and hear “Hold Recall” during the Unattended Conference mode, the display will show “CO 2 & CO 3” for fifty seconds before the time-out.

Data Line Security

Your extension can be protected against interruptions from the “Call Waiting”, “Hold Alarm/Hold Recall”, and “Executive Busy Override” features. Data communication devices, such as computers and facsimiles, can operate uninterrupted.

Setting / Canceling

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

[7 3 0 1 #] To set.
[7 3 0 0 #] To cancel.

To set: Dial 7301#.
To cancel: Dial 7300#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

- When setting:
Data Mode On
- When canceling:
Data Mode Off
- Single line telephone users can dial “0” instead of “#”.

Feature References

- Call Waiting
- Executive Busy Override — Extension
- Executive Busy Override — Outside (CO) Line

Direct Inward System Access (DISA)

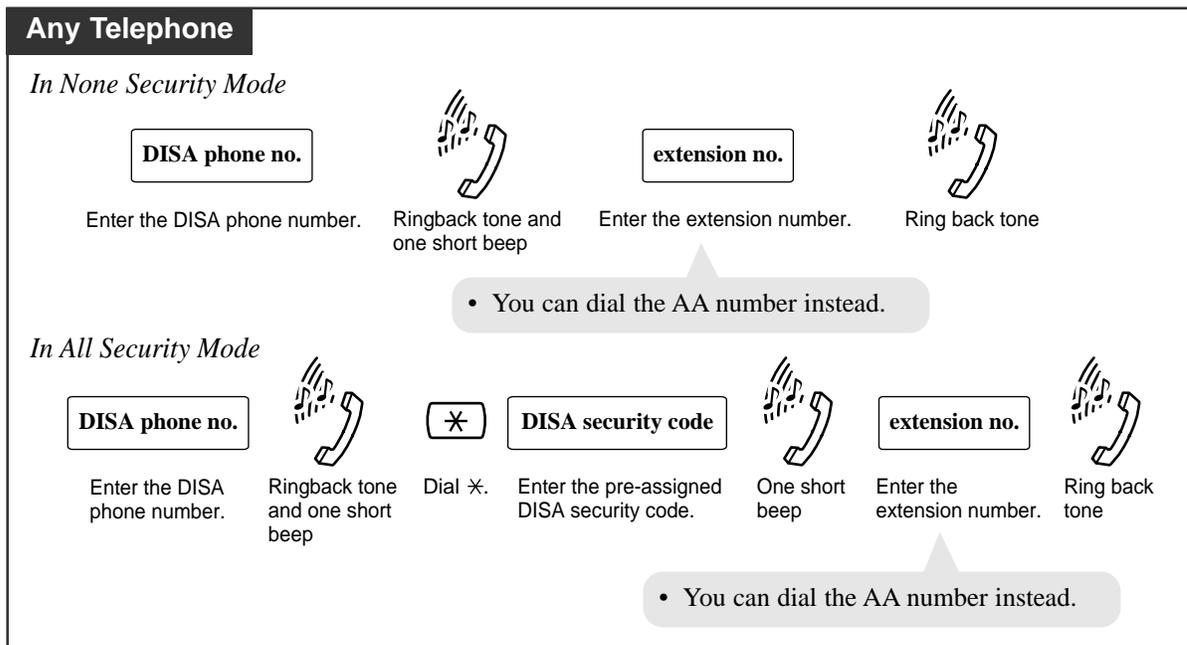

Allows an outside caller to access specific extensions or DISA built-in auto attendant (AA) numbers in the system after hearing a short beep, as if the caller is an extension in the system. A pre-assigned DISA security code may be necessary, depending on the mode, to access the features directly.

None Security mode: Any caller can make outside or intercom calls without entering a DISA security code.

Trunk Security mode (default): You need to enter a DISA security code when making outside calls.

All Security mode: You need to enter a DISA security code when making any call. You also have the option of calling an extension or ring group using a one digit number (DISA built-in auto attendant number) via DISA calls.

Calling an extension

Calling an external party

Any Telephone

In None Security Mode

<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">DISA phone no.</div>		<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">line access code</div>		<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">phone no.</div>
Enter the DISA phone number.	Ringback tone and one short beep	Enter a line access code (9 or 81 through 83).	Dial tone from the Central Office	Enter the phone number of the external party.

In Trunk Security Mode

<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">DISA phone no.</div>		<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">✳</div>	<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">DISA security code</div>		<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">line access code</div>		<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">phone no.</div>
Enter the DISA phone number.	Ringback tone and one short beep	Dial ✳.	Enter the pre-assigned DISA security code.	One short beep	Enter a line access code (9 or 81 through 83).	Dial tone from the Central Office	Enter the phone number of the external party.

In All Security Mode

<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">DISA phone no.</div>		<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">✳</div>	<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">DISA security code</div>		<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">line access code</div>		<div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">phone no.</div>
Enter the DISA phone number.	Ringback tone and one short beep	Dial ✳.	Enter the pre-assigned DISA security code.	One short beep	Enter a line access code (9 or 81 through 83).	Dial tone from the Central Office	Enter the phone number of the external party.

WARNING

When you enable the Outside - Outside Line Call feature of **Direct Inward System Access (DISA)** function, if a third party discovers the password (DISA security code) of the system, you have a risk that they will make illegal phone calls using your telephone line, and the cost may be charged to your account.

In order to avoid this problem, we strongly recommend the following points:

- 1: Carefully maintain the secrecy of the password.
- 2: Specify a complicated password as long and random as you can make it.
- 3: Change the password frequently.

Conditions

- When an incoming call is not answered before the “DISA Ringing Time before Intercept” (default: 20 seconds) expires, “Intercept Routing” starts or the call will be disconnected.
- “Intercept Routing” starts after the “Intercept Time for Internal DISA” expires (default: 3 seconds) pre-assigned in program [515], if nothing has been dialed. The call is disconnected when the “DISA Ringing Time after Intercept” (default: 20 seconds) expires, or when there is no destination for “Intercept Routing”.
- This system supports up to ten programmable DISA built-in auto attendant (AA) numbers. Each number must be one digit. You can access an extension or a ring group by entering a 1-digit AA number.
- You can store up to four programmable DISA security codes. The number of digits of the codes can be programmed (default: 4 digits). Each code must be different.
- When the “Outside-to-Outside (CO-to-CO) Line Duration Time Limit” (default: 10 minutes) expires, both lines are disconnected by the system. A warning tone is sent to both parties fifteen seconds before the time limit.
- If you dial the wrong DISA security code, three beeps will be heard. The call will be disconnected after three failed attempts. If you enter the security code a second and third time, you do not need to dial *.

Do Not Disturb (DND)

Allows you to prevent other parties from disturbing you. Your extension will not receive intercom or outside calls.

Setting / Canceling

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 71.

4 To set.
0 To cancel.

To set: Dial 4.
To cancel: Dial 0.

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- When setting, the FWD/DND indicator lights.
<PT Display Example>

Do Not Disturb
- When canceling, the FWD/DND indicator turns off.
<PT Display Example>

FWD/DND Cancel
- Single line telephone users can dial “0” instead of “#”.

Conditions

- A calling extension that has “Do Not Disturb (DND) Override” enabled can override your extension when the “Do Not Disturb (DND)” mode is set.
 - DND also inhibits for paging.
 - If the Call Forwarding feature has already been set, setting the DND feature will cancel Call Forwarding.
 - The Timed Reminder alarm and Hold Recall features override this feature.
- PT • A Flexible CO button can be assigned as the FWD/DND button.
- PT • If the “Do Not Disturb (DND)” mode is set, you can still answer a call by pressing the CO button.
- PT • The lighting patterns of the FWD/DND button are as follows.
- Off: Both features are not set.
 - Red: DND mode
 - Flashing red slowly: FWD mode

Programming Reference

- Station Programming (Section 2)
Flexible Button Assignment — FWD/DND Button

Feature References

Call Forwarding

Do Not Disturb (DND) Override

Do Not Disturb (DND) Override

Allows you to call an extension even though the “Do Not Disturb (DND)” feature is set. System Programming is required to use this feature.

Any Telephone

If you make an intercom call and hear a Do Not Disturb (DND) tone

DND tone

Dial 2.

Wait for an answer.

<PT Display Example>

101 : DND

Conditions

- If you hear a reorder tone after dialing 2, the “Do Not Disturb (DND) Override” feature is not set at your extension.
- If you hear a busy tone after dialing 2, the line is busy. You can use the Automatic Callback Busy (Camp-On) feature.

Programming Reference

- System Programming — Installation Manual
[609] Do Not Disturb Override

Feature References

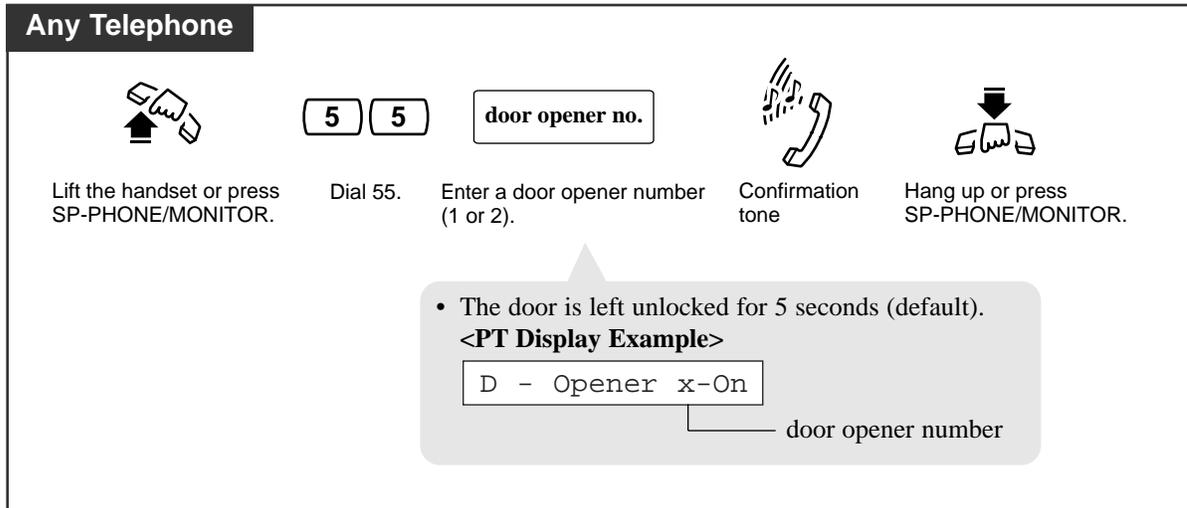

Automatic Callback Busy (Camp-On)
Do Not Disturb (DND)

Door Opener

Allows you to unlock the door from your telephone.
Up to two door openers can be connected to the system.

To unlock the door from an assigned extension

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 55.

Enter a door opener number (1 or 2).

Confirmation tone

Hang up or press SP-PHONE/MONITOR.

- The door is left unlocked for 5 seconds (default).

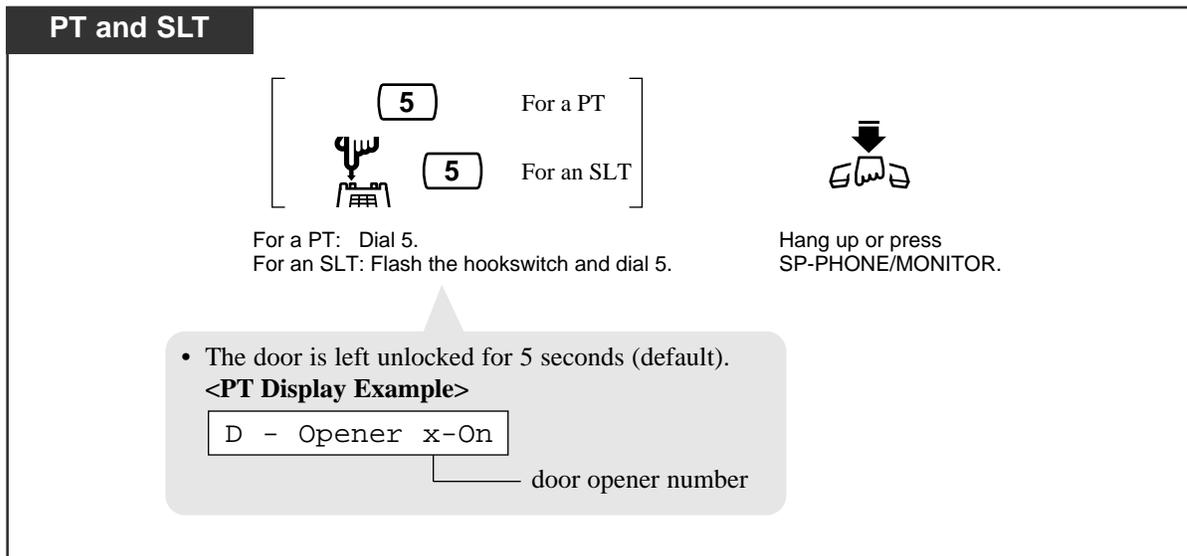

<PT Display Example>

```
D - Opener x-On
```

door opener number

To unlock the door while talking to the doorphone

PT and SLT

For a PT: Dial 5.

For an SLT: Flash the hookswitch and dial 5.

Hang up or press SP-PHONE/MONITOR.

- The door is left unlocked for 5 seconds (default).

<PT Display Example>

```
D - Opener x-On
```

door opener number

3.2 Telephone Features

D

Conditions

- If you dial 5 again while the door is open, the door will stay open for another five seconds (default).
- You must program the extensions which can open the doors for the day, night and lunch modes.
- You can modify the door opener timer through System Programming.
- The door opener will open the door, even if a doorphone is not installed.

Programming References

- System Programming — Installation Manual

 - [709] Door Opener Time

Doorphone Call

Allows you to have a conversation with a visitor at your doorphone.
Up to two doorphones can be connected to the system.

Calling an extension from a doorphone

Any Doorphone

Press the Doorphone button for one second.

Wait for an answer and talk.

Answering a doorphone call

Any Telephone

When you hear the doorphone ring tone at the extension

Lift the handset or press SP-PHONE.

Calling a doorphone

Any Telephone

Lift the handset or press SP-PHONE.

Dial 31.

Enter a doorphone number (1 or 2).

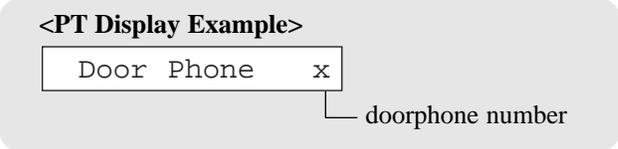

Confirmation tone

Talk.

<PT Display Example>

Door Phone x
doorphone number

Conditions

- Optional doorphones are necessary for this feature.
- If you do not answer an incoming doorphone call within fifteen or thirty seconds, the call will be canceled.
- You must program the extensions which can receive calls from each doorphone for the day, night and lunch modes.
- Any extension user can call a doorphone.
- Doorphones can also be used for the Room Monitor feature.

Programming References

- System Programming — Installation Manual
 - [700]–[702] Doorphone Ringing Assignment — Day/Night/Lunch
 - [706] Doorphone Ringing/Tone Pattern Selection
 - [707] Doorphone Access Tone Selection
 - [708] Doorphone Ringing Time

Feature References

Call Waiting
Room Monitor

Electronic Station Lockout

Allows you to lock your extension so that other users cannot make outside calls from your extension. This feature also works as Call Log Lock, Incoming in the Personal Area.

Locking

Any Telephone

Lift the handset or press SP-PHONE/MONITOR. Dial 77. Enter a 4-digit lock code (0000 through 9999) twice. Dial #. Confirmation tone and dial tone. Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

```
Locked : xxxx
```

Lock code

- Single line telephone users can dial “0” instead of “#”.

Unlocking

Any Telephone

Lift the handset or press SP-PHONE/MONITOR. Dial 77. Enter the same lock code you used to lock the extension. Dial #. Confirmation tone and dial tone. Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

```
Unlocked
```

- Single line telephone users can dial “0” instead of “#”.

Conditions

- If another user tries to access an outside (CO) line and presses a dial key from a locked extension, the user will hear a reorder tone and for PT users “Restricted” is shown on the display.
However, calls can be made at a locked extension depending on system programming. System programming determines which COS number applies to calls at the locked extension.
- An extension assigned as an operator or manager can cancel this feature for all extensions (Electronic Station Lockout — CANCEL ALL).
- The lock code must be four digits and must not have the “#” and “*” buttons.
- You can make intercom calls and receive intercom or outside calls at a locked extension.

3.2 Telephone Features

E

Executive Busy Override — Extension

Allows you to connect to an existing intercom (extension) call. System Programming is required to use this feature.

Any Telephone

If you make an intercom call and while hearing a busy tone

 Dial 2.

 Confirmation tone (optional)

A three-party conference is now established.

To leave the conference

Any Telephone

 Hang up or press SP-PHONE.

The other two parties continue their conversation.

To terminate one party and talk to the other

PT

 Press the CO or INTERCOM of the party to remain connected.

• If all three parties are extensions, this operation is not available.

Conditions

- This feature does not work when “Data Line Security” or “Executive Busy Override Deny” is set at either or both of the other parties.
- When a two-party call is changed to a three-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.

Programming References

- System Programming — Installation Manual
 - [105] Conference Tone
 - [608] Executive Busy Override

Feature References

Conference
Data Line Security
Executive Busy Override Deny

Executive Busy Override — Outside (CO) Line

Allows you to connect to an existing outside call or add a third party to your existing conversation. System Programming is required to use this feature.

PT		
		
Lift the handset or press SP-PHONE/MONITOR.	Press the desired CO whose indicator is lit red.	Confirmation tone (optional)

A three-party conference is now established.

To leave the conference

PT	
	The other two parties continue their conversation.
Hang up or press SP-PHONE/MONITOR.	

To terminate one party and talk to the other

PT	
	
Press the CO or INTERCOM of the party to remain connected.	

Conditions

- PT** • This feature does not work when “Data Line Security” or “Executive Busy Override Deny” is set at the extension engaged in the existing outside call.
- PT** • When a two-party call is changed to a three-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.

3.2 Telephone Features

E

Executive Busy Override Deny

Allows you to prevent other extension users from interrupting your conversation.

Setting / Canceling

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

[7 3 3 0] To set Deny.
[7 3 3 1] To set Allow.

To set Deny: Dial 7330#.
To set Allow: Dial 7331#.

Confirmation tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

- When setting Deny:
Busy Ovrde Deny
- When setting Allow:
Busy Ovrde Allow
- Single line telephone users can dial "0" instead of "#".

Programming Reference

- System Programming — Installation Manual

Feature References

- Executive Busy Override — Extension
- Executive Busy Override — Outside (CO) Line

External Feature Access

Allows you to access special features (e.g., Call Waiting) offered by a host PBX or Central Office. This feature is effective only during an outside call. You can access the feature by using either the FLASH/RECALL button or the feature number.

Using the FLASH/RECALL button

PT

During a conversation with an outside party

Press FLASH/RECALL. Enter the desired service code.

• The current call is placed on hold.

Using the feature number

SLT

During a conversation with an outside party

Flash the hookswitch. Dial 6. Enter the desired service code.

• The current call is placed on hold.

Conditions

-  • A “Flash Time” must be assigned as required by the host PBX, or outside (CO) line.
-  • You may access some features of the host PBX using the FLASH/RECALL button. If the system is connected to a host PBX and the flash operation is required, follow the flash operation procedure which is required by the host PBX.

Feature Reference

Flash

3.2 Telephone Features

F

Flash

Allows you to disconnect the current call and make another call without hanging up.

PT

While hearing any tone, dialing, or talking

 Press FLASH/RECALL.	 Dial tone	<div style="border: 1px solid black; padding: 2px 5px; display: inline-block;">phone no.</div> Enter the phone number.
--	--	---

Condition

- System Programming may be required to perform this feature properly.

Programming References

- System Programming — Installation Manual
 - [110] Flash Key Mode
 - [418] Flash Time

Feature Reference

External Feature Access

Hands-free Answerback

(— for KX-TA30820/KX-TA30830 only)

Allows you to answer an intercom call without lifting the handset.

Setting

PT

When the SP-PHONE and the AUTO ANSWER/MUTE indicators are off

AUTO ANS

MUTE

Press AUTO ANSWER/MUTE.

- The AUTO ANSWER/MUTE indicator turns on.

Canceling

PT

When the AUTO ANSWER/MUTE indicator is on

AUTO ANS

MUTE

Press AUTO ANSWER/MUTE.

- The AUTO ANSWER/MUTE indicator light turns off.

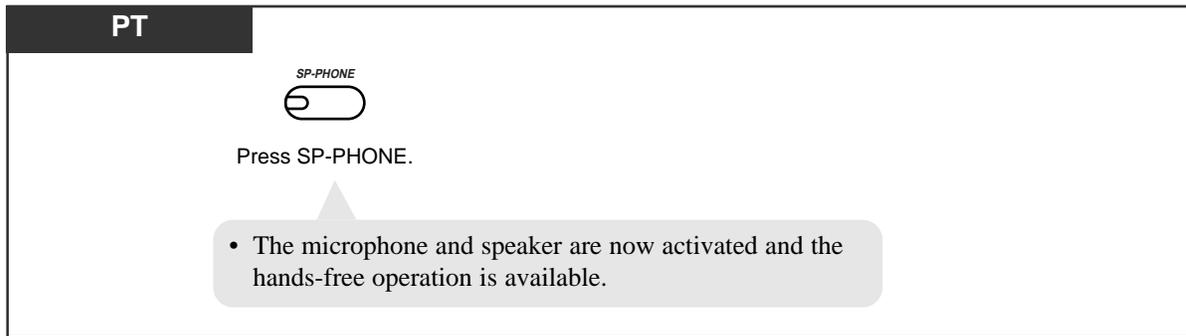

Conditions

- PT • This feature does not work for incoming outside calls or doorphone calls.
- PT • When an outside call is transferred to your extension, this feature is overridden and a ring tone is heard.

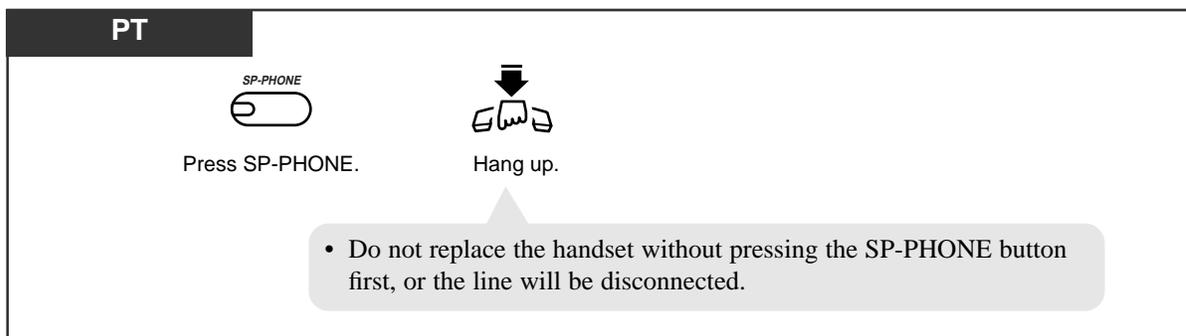

Hands-free Operation

(— for KX-TA30820/KX-TA30830 only)

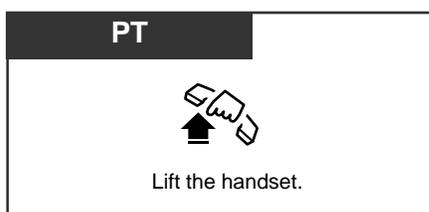

Allows you to dial and to talk to the other party without lifting the handset.

Switching from the handset to hands-free mode

Switching from hands-free to the handset mode

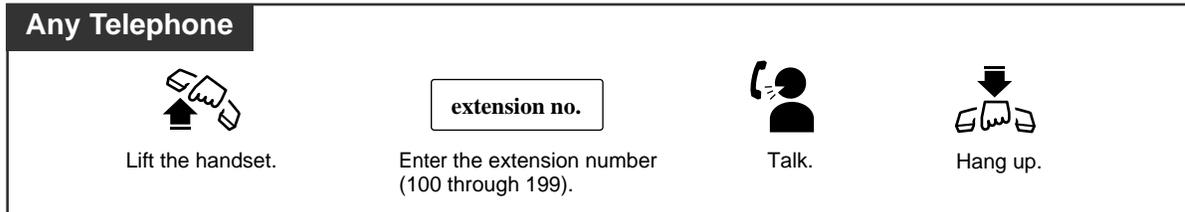

Conditions

- PT • Helpful hints for the Hands-free operation:
 - Use this unit in a quiet room for best performance.
 - If you and the other party talk at the same time, parts of your conversation will be lost. To avoid this, talk alternately.
- PT • The hands-free mode is canceled if you do not start dialing within ten seconds.
- PT • The KX-TA30850 has a MONITOR button instead of a SP-PHONE button. It can be used for hands-free dialing, etc., but it cannot be used for a hands-free conversation.
- PT • You can enable the hands-free mode by pressing a CO or INTERCOM button.

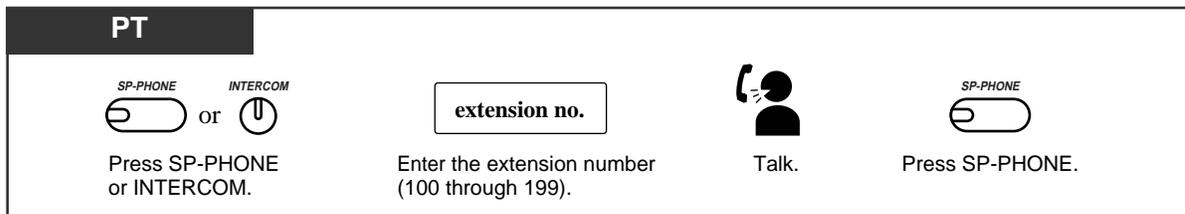

Intercom Calling

Allows you to make a call to another extension.

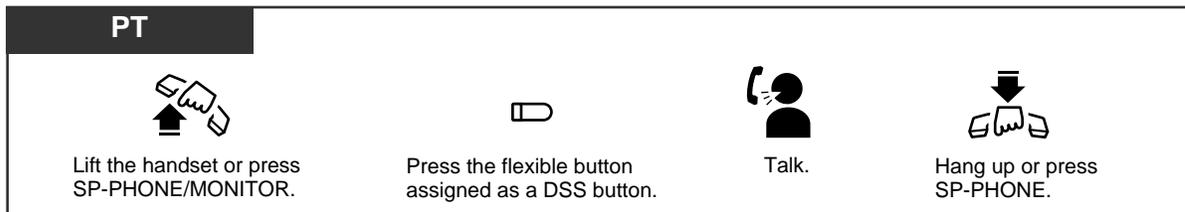

Using the handset

Using the Speakerphone

Using a DSS (Direct Station Selection) button

Conditions

- After dialing an extension number, you will hear one of the following tones.

Ringback tone: Indicates the destination extension is being called.

Confirmation tone: Indicates you can perform voice calling (e.g., Paging).

Busy tone: Indicates the destination extension is busy.

Do Not Disturb (DND) tone: Indicates the destination extension has set the “Do Not Disturb (DND)” feature.

- PT • An extension number and a name, if programmed, are shown on a display PT during an intercom call.
- PT • You can assign a DSS button on a flexible button through Station Programming. The stored number can be displayed by pressing the desired DSS button while on-hook.

Programming References

Local Carrier-Based Voice Mail Service

Allows you to receive an indication to notify you that a message is waiting from your telephone company's voice mail service. After subscription, the voice mail system can answer calls automatically when you are busy or calls are not answered, and callers can leave their messages in your mailbox of the voice mail system located at the telephone company. The Message/Ringer Lamp will light red and an S-CO button will flash red moderately after the mailbox has received messages, on a proprietary telephone (PT). This feature is available only for PTs.

Listening to a stored message

You can listen to the messages stored in your mailbox easily.

PT

When the Message/Ringer Lamp lights red and an S-CO button flashes red moderately

 Lift the handset or press SP-PHONE/MONITOR.	 Press flashing CO assigned as an S-CO button.	 Press MESSAGE.
--	--	---

• You can listen to the stored message by following the voice mail service announcement.

Conditions

- PT • If your telephone company sends a special signal (Stutter dial tone) when you seize the outside (CO) line, this is an indication that a new message was recorded. Approximately 5 seconds after the user hangs up one of the contracted outside (CO) lines, or approximately 3 minutes 46 seconds after the phone stops ringing, the PBX automatically seizes the line and checks if a message has been recorded. If a new message was recorded in the mailbox of the telephone company, the Message/Ringer Lamp lights red and the corresponding S-CO button flashes red moderately.
- PT • If your voice mail service uses a stutter dial tone and the recorded message is over 3 minutes long, in some cases the Message/Ringer Lamp may not light and the corresponding S-CO button may not flash.
- PT • A contract with your telephone company may be required for the Local Carrier-Based Voice Mail Service. Consult the telephone company for details.

Lockout

If one party in a conversation goes on-hook, both parties will be disconnected from the speech path automatically. A reorder tone is sent to the off-hook party before it is disconnected. No operation is necessary.

Log-In/Log-Out

Allows you to assign the Log-In mode or Log-Out mode within a hunting or ring group. When in the Log-Out mode, you can leave the group temporarily, preventing hunting calls from being sent to your extension. The lighting patterns of the Log-In/Log-Out button on a proprietary telephone and status are as follows.

- Off: Log-In mode
- Red: Log-Out mode

Log-In / Log-Out (Using the Log-In/Log-Out button)

PT

Lift the handset or press SP-PHONE/MONITOR.

Press the flexible button assigned as the Log-In/Log-Out button.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- The indicator turns off in Log-In mode or turns steady red in Log-Out mode.

Log-In / Log-Out (Using the feature number)

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

7	3	6	0	#	To Log-In.
7	3	6	1	#	To Log-Out.

For Log-In mode: Dial 7360#.
For Log-Out mode: Dial 7361#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

Group Log In

or

Group Log Out

- Single line telephone users can dial "0" instead of "#".

Conditions

- The default is “Log-In” mode.
 - There should be at least one extension that is in Log-In mode.
 - If every extension has logged out except one person, and that person tries to log out, their extensions will display “Not Valid”. In other words, the last member of the group cannot log out.
- PT • The Log-In/Log-Out button can be assigned to a Flexible CO button.

Message Waiting

When the called extension is busy or does not answer your call, you can leave a notification so that the called party may call you back.

As a message receiver, the lit Message/Ringer Lamp lets you know that a call has been received. If you receive notification, you can call back the original party by a simple operation. This operation is available only for proprietary telephones with MESSAGE buttons.

Setting

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 701.

Enter the extension number (100 through 199) where the message will be left.

Dial #.

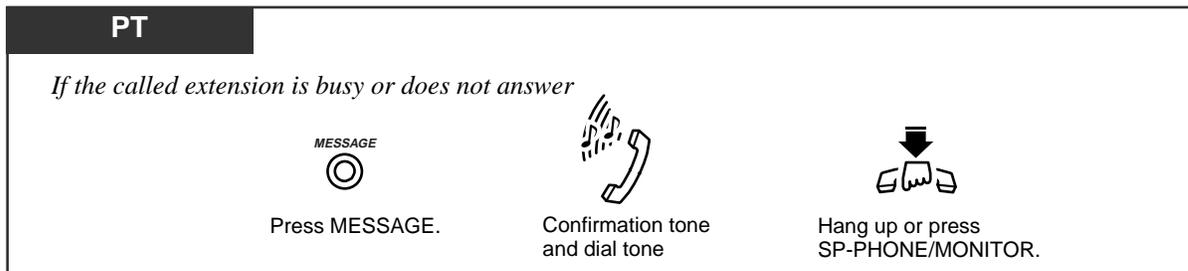

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial “0” instead of “#”.

PT

If the called extension is busy or does not answer

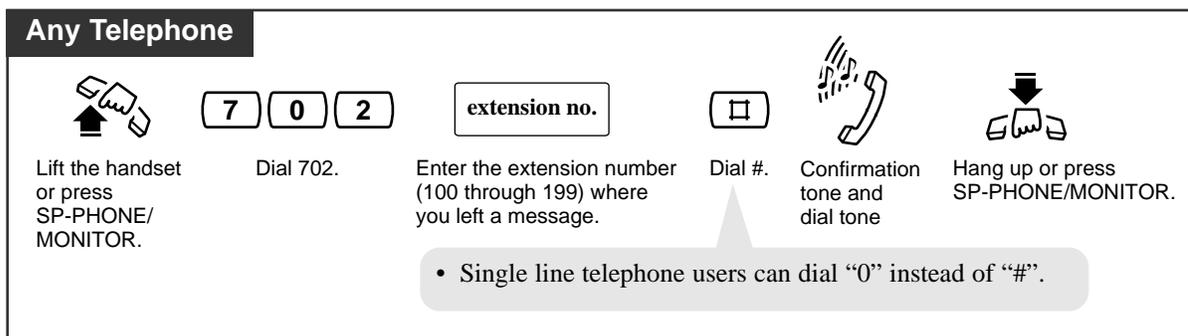

Press MESSAGE.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

Canceling

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 702.

Enter the extension number (100 through 199) where you left a message.

Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial “0” instead of “#”.

3.2 Telephone Features

Canceling using the MESSAGE button

PT

Lift the handset or press SP-PHONE/MONITOR.

Enter the extension number (100 through 199) where you left a message.

MESSAGE

MESSAGE

Press MESSAGE twice.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

Checking and Selecting a message notification by the message receiver

If there is a message, the Message/Ringer Lamp will light red.

PT

When the telephone is idle and on-hook

Press MESSAGE repeatedly until the desired message appears.

- The stored messages are shown on the display in the order they were received.
- When Tony at extension 123 left a message:

<PT Display Example>

Calling back the message notification sender

PT

Lift the handset or press SP-PHONE/MONITOR.

MESSAGE

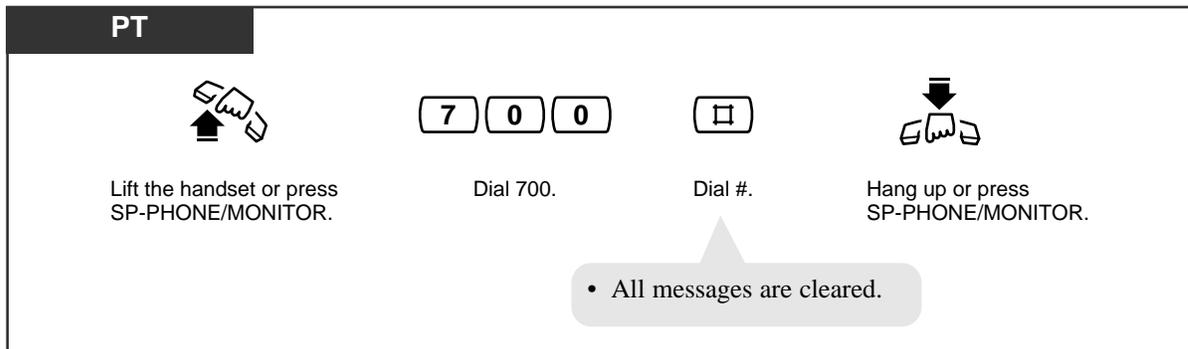

Press MESSAGE.

Talk.

- If you have more than one message at your extension, the line connects you to the selected message sender.
- The message is cleared after the conversation.

Clearing all message notifications by the message receiver

Conditions

- PT** • If the Message/Ringer Lamp does not go out after calling the extension which left the message, another message is waiting.
- PT** • If multiple message notifications are left at your extension, call back is executed in the order received.
- PT** • If you select a specific message to call back, the other call backs will be executed in the order received, starting with the one selected.
(ex.) 5 → 6 → 7 → 1 → 2 → 3 → 4

Programming Reference

Flexible Button Assignment — Return to Message Waiting (MESSAGE) Button

Feature Reference

Message Waiting for Another Extension

Message Waiting for Another Extension

Allows you to check messages left at another extension and call back the message sender. The Another Extension Message Waiting button light on your extension lets you know that another extension has a message waiting. You can call back the message sender by a simple operation. You can also clear all messages left at another extension. System Programming is required to use this feature.

Checking and Selecting a message notification at another extension

If there is a message at another extension, the message waiting lamp light (Another Extension Message Waiting button indicator) will be on.

PT

When the telephone is idle and on-hook

Press the Flexible CO button assigned as an Another Extension Message Waiting button repeatedly until the desired message appears.

- The stored messages are shown on the display in the order they were received.
- When Tony at extension 123 left a message:

<PT Display Example>

123 : Tony

Calling back the message notification sender for another extension

PT

Lift the handset or press SP-PHONE/MONITOR.

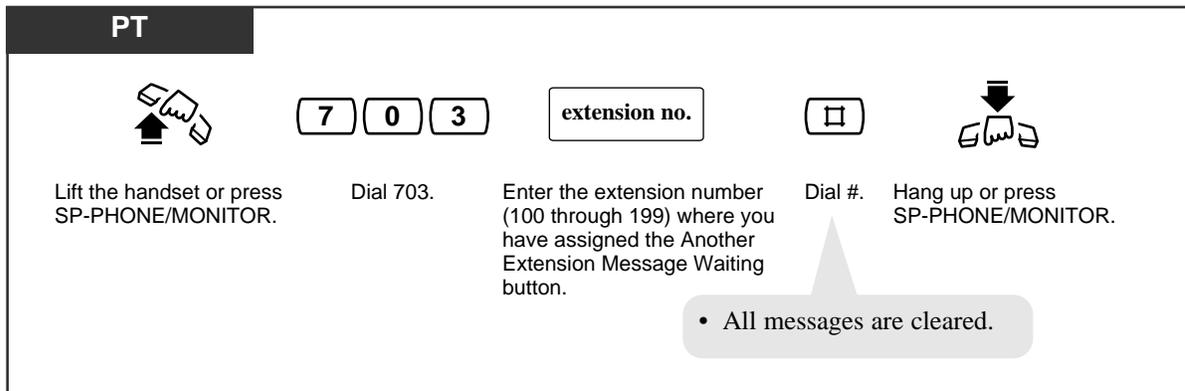

Press the Flexible CO button assigned as an Another Extension Message Waiting button.

Talk.

- If another extension has more than one message, the line connects you to the selected message sender.
- The message is cleared after the conversation.

Clearing all message notifications at another extension**Conditions**

- PT** • If the Another Extension Message Waiting button indicator does not go out after calling the extension which left the message, another message is waiting.
- PT** • If multiple message notifications are left at another extension, call back is executed in the order received.
- PT** • If you select a specific message to call back, the other call backs will be executed in the order received, starting with the one selected.
(ex.) 5 → 6 → 7 → 8 → 1 → 2 → 3 → 4
- PT** • The Another Extension Message Waiting button indicator will be on and off simultaneously with the Message/Ringer Lamp on another extension.

[618] Message Waiting for Another Extension

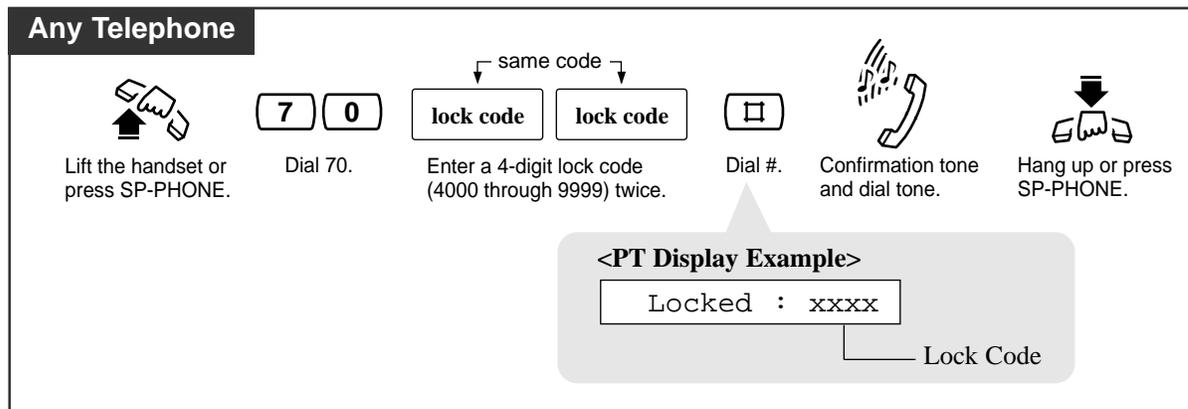

Feature Reference

Message Waiting

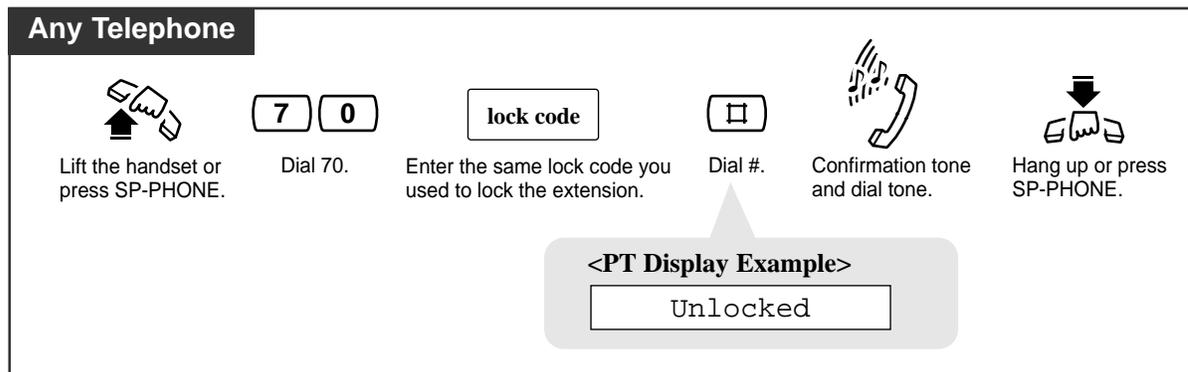

Message Waiting for Another Extension Lock

Allows you to lock the Message Waiting for Another Extension feature so that another extension cannot check messages left at your extension.

Locking

Unlocking

Conditions

- PT** • The operator or manager can cancel this feature for all other extensions (Electronic Station Lockout — CANCEL ALL).
- Another extension cannot clear message notifications at your extension while locked.
- Another Extension Message Waiting button indicator on another extension will light even if you have locked your extension, but another extension cannot check and call back messages left at your extension.
- Message Waiting feature at your extension is available even while locked.

Feature References

Message Waiting for Another Extension
Electronic Station Lockout — CANCEL ALL (3.3 Operator/Manager Service Features)

Microphone Mute

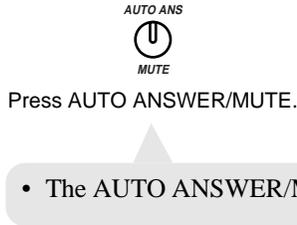

(— for KX-TA30820/KX-TA30830 only)

Allows you to turn off the microphone so you can consult privately with others in the room. You will still be able to hear the other party.

Setting

PT

During a conversation in the handsfree mode

AUTO ANS
MUTE

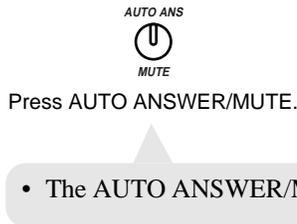

Press AUTO ANSWER/MUTE.

- The AUTO ANSWER/MUTE indicator flashes red slowly.

Canceling

PT

When microphone mute is established

AUTO ANS
MUTE

Press AUTO ANSWER/MUTE.

- The AUTO ANSWER/MUTE indicator turns off.

Condition

- PT** • This feature is only available during a hands-free conversation.

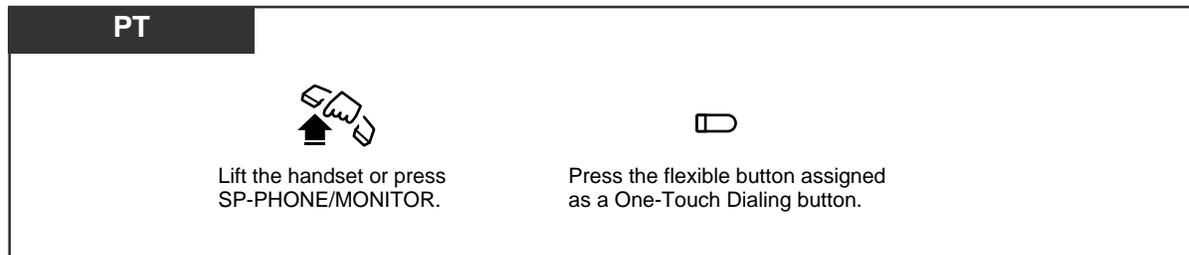

Mixed Station Dialing

Any telephone, either a KX-TA30820/KX-TA30830/KX-TA30850, single line rotary phone (10 pps, 20 pps) or single line touch tone telephone, may be used as an extension for the system.

One-Touch Dialing

Allows you to call a number or access a system feature with the touch of a button. This is done by storing an extension number, telephone number or feature number (up to twenty-four digits) in a One-Touch Dialing button.

Dialing

Conditions

- PT • The destination numbers are stored through Station Programming.
- PT • You may press a CO button to select a desired outside (CO) line before pressing the One-Touch Dialing button.
- PT • “Speed Dialing”, “One-Touch Dialing” and manual dialing can be used together.
- PT • You can store a number consisting of twenty-five digits or more by dividing and storing it into two One-Touch Dialing buttons.
- PT • The telephone number stored will be displayed on the LCD. Use the FWD/DND (→) or CONF (←) button to scroll the display to either side.
- PT • A pause is automatically entered after the stored line access code, 9 or 81 through 83, when dialing.
- PT • To confirm the current status of the button, press the button while on-hook.

Programming Reference

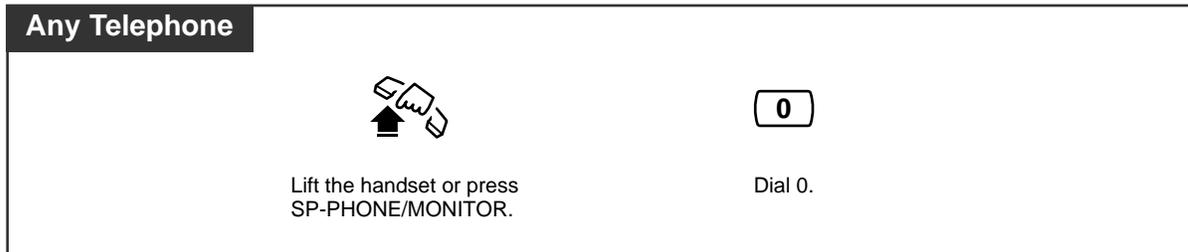

- Station Programming (Section 2)
Flexible Button Assignment — One-Touch Dialing Button

Feature Reference

- One-Touch Dialing (→ See the Installation Manual)

Operator Call

Allows you to call an operator within the system. One extension can be assigned as an operator.

Condition

- If an operator is not assigned, this feature is not available and you will hear a reorder tone.

Programming Reference

- System Programming — Installation Manual
[008] Operator Assignment

Outward Dialing, Line Access — SUMMARY

An outside (CO) line can be accessed in the following ways.

Line Access, Automatic	Dial the feature number (9) .
Line Access, Individual	Press a Single-CO (S-CO) button.
Line Access, Outside (CO) Line Group	Dial the feature number (8) and an outside (CO) line group number (1-3) . or Press a Group-CO (G-CO) button

Conditions

- After dialing the feature number or pressing the CO button, you will hear one of the following tones.

Dial tone: Indicates an idle outside (CO) line is accessed.

CO x

— is shown on a PT display. (x: outside (CO) line number)

Busy tone: Indicates the selected outside (CO) line is busy.

CO in Use

— is shown on a PT display.

Reorder tone:

- 1) Indicates the outside (CO) line you have attempted to access is not assigned.

CO Not Assigned

— is shown on a PT display.

- 2) Indicates access to outside (CO) lines is denied.

Restricted

— is shown on a PT display.

- **Restricted** may be displayed on a PT display and a reorder tone may sound due to the following.

- The extension has been locked by the owner (Electronic Station Lockout).
- The extension is restricted by the account code mode, “Verified - All”.
- The extension is restricted from making toll calls (Toll Restriction).

PT

- The CO button assignment on your telephone can be re-arranged as required. Refer to the “Flexible Button Assignment” in Station Programming (Section 2).

PT

- An outside (CO) line which is not assigned to a CO button cannot be dialed.

Feature References

Account Code Entry
 Electronic Station Lockout
 Toll Restriction (→ See the Installation Manual.)

Line Access, Automatic

Allows you to select an available outside (CO) line automatically.

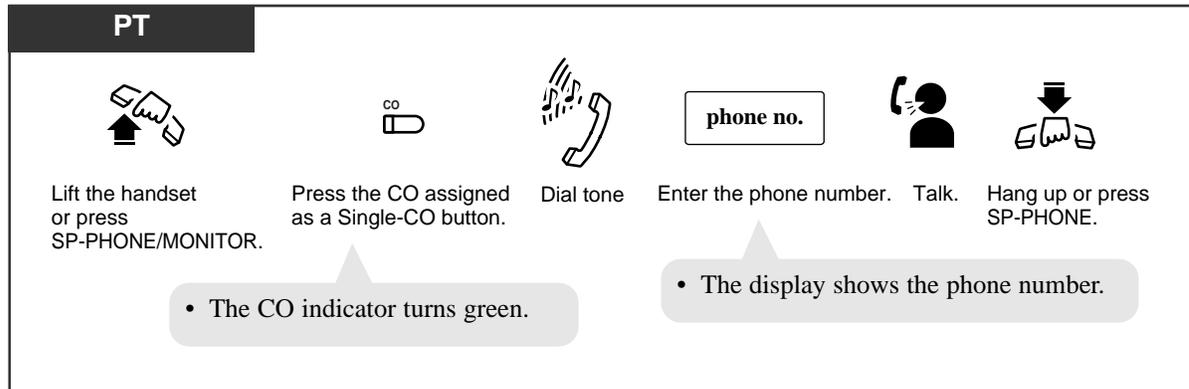

3.2 Telephone Features

0

Line Access, Individual

Allows you to select the desired outside (CO) line without dialing the line access code.

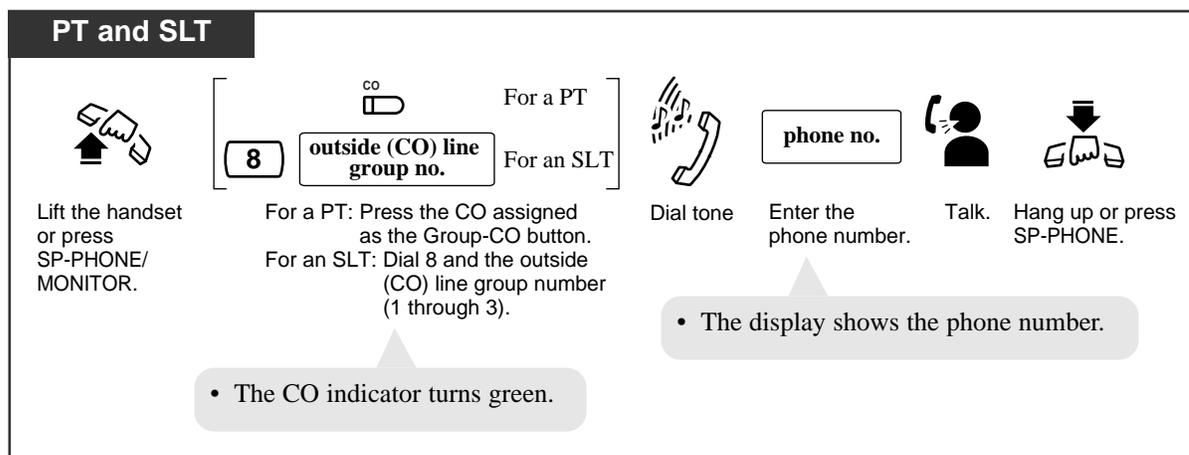

Condition

- PT** • You may skip off-hook and press the Single-CO (S-CO) button directly.

Line Access, Outside (CO) Line Group

Allows you to select an idle line within a designated outside (CO) line group. Through programming, outside (CO) lines can be divided into three line groups.

Condition

- PT** • You may press the Group-CO (G-CO) button directly without going off-hook.

Paging — SUMMARY

Allows you to make a voice announcement to several people at the same time. Your message is announced over the built-in speakers of proprietary telephones (PT) and/or an external speaker. The paged person can answer your page from a nearby telephone. You cannot be paged at a single line telephone, but you can answer a page, which is announced over nearby PTs or an external pager, from your single line telephone. There are three types of paging as shown below. You can select the appropriate type according to your needs.

Type	Description
Paging — All	Paging through both the built-in speakers and an external pager.
Paging — External	Paging to an external pager.
Paging — Group	Paging to all groups (all extensions) simultaneously.
	Paging to a particular group of extensions using the built-in speakers.

Conditions

- To answer the page, refer to “Paging — ANSWER”.
- The paged extension users hear a confirmation tone before the voice announcement.
- A confirmation tone is sent to the external pager (External Pager Confirmation Tone) before the voice announcement. The tone can be disabled.
- You can hear a confirmation tone before making the voice announcement.
- More than one person cannot use the paging feature at the same time.
- You cannot page extensions which have set the DND or Paging — DENY feature, or which are in use.

Programming References

Paging — DENY

3.2 Telephone Features

P

Paging — All

Allows you to make a voice announcement to all extensions. Your message is announced over the built-in speakers of proprietary telephones (PT) and the external pager.

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 33*.

Confirmation tone

Announce.

Wait for an answer.

Talk.

<PT Display Example>

Paging All

- You may dial “339” instead of “33*”, or press the Flexible CO button assigned as the One-Touch Dialing button*.

* For the default setting of the Flexible CO button, see the table on p.1-10.

Paging — External

Allows you to make a voice announcement over the external pager.

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 34.

Confirmation tone (optional)

Announce.

Wait for an answer.

Talk.

<PT Display Example>

External Page

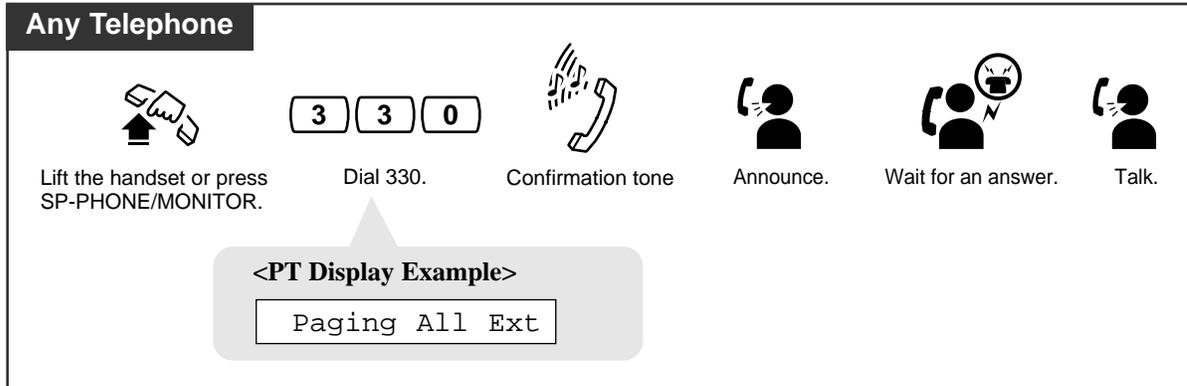

Conditions

- If the pager is in use, a busy tone will be heard.
- When the program [106] is set to “DISABLE”, the confirmation tone is not sent to the external pager.

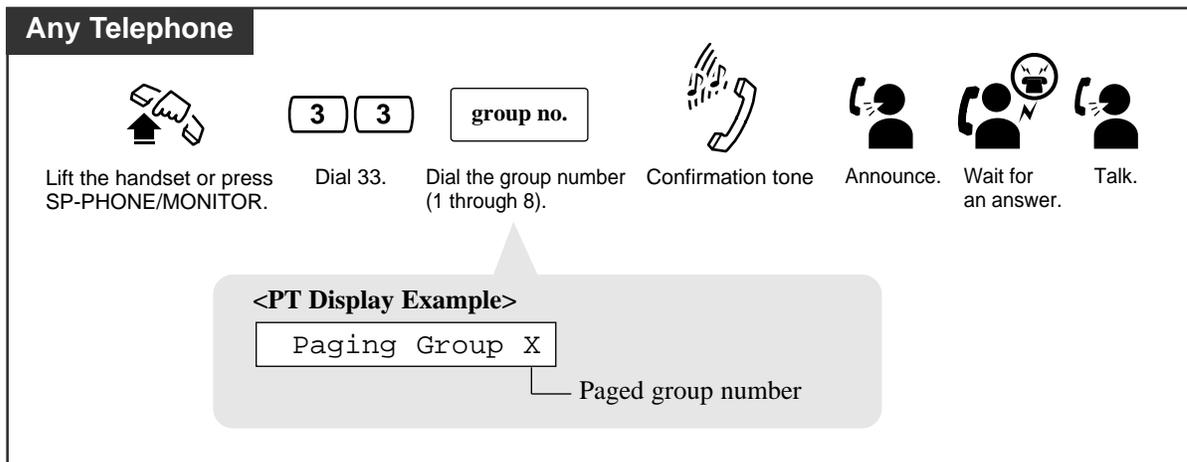

Paging — Group

Allows you to select an extension group and make a voice announcement. You can select all extension groups simultaneously. The announcement can only be heard through the extensions' built-in speakers.

To access all groups simultaneously

To access a particular group of extensions

Condition

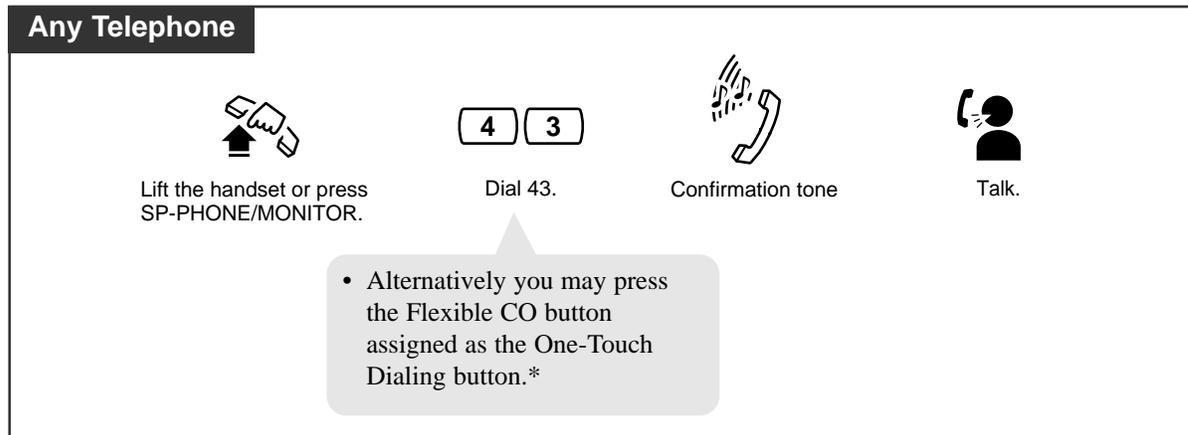

- There is a maximum of eight extension groups.

3.2 Telephone Features

P

Paging — ANSWER

Allows you to answer an announced page at any extension within the system.

* For the default setting of the Flexible CO button, see the table on p.1-10.

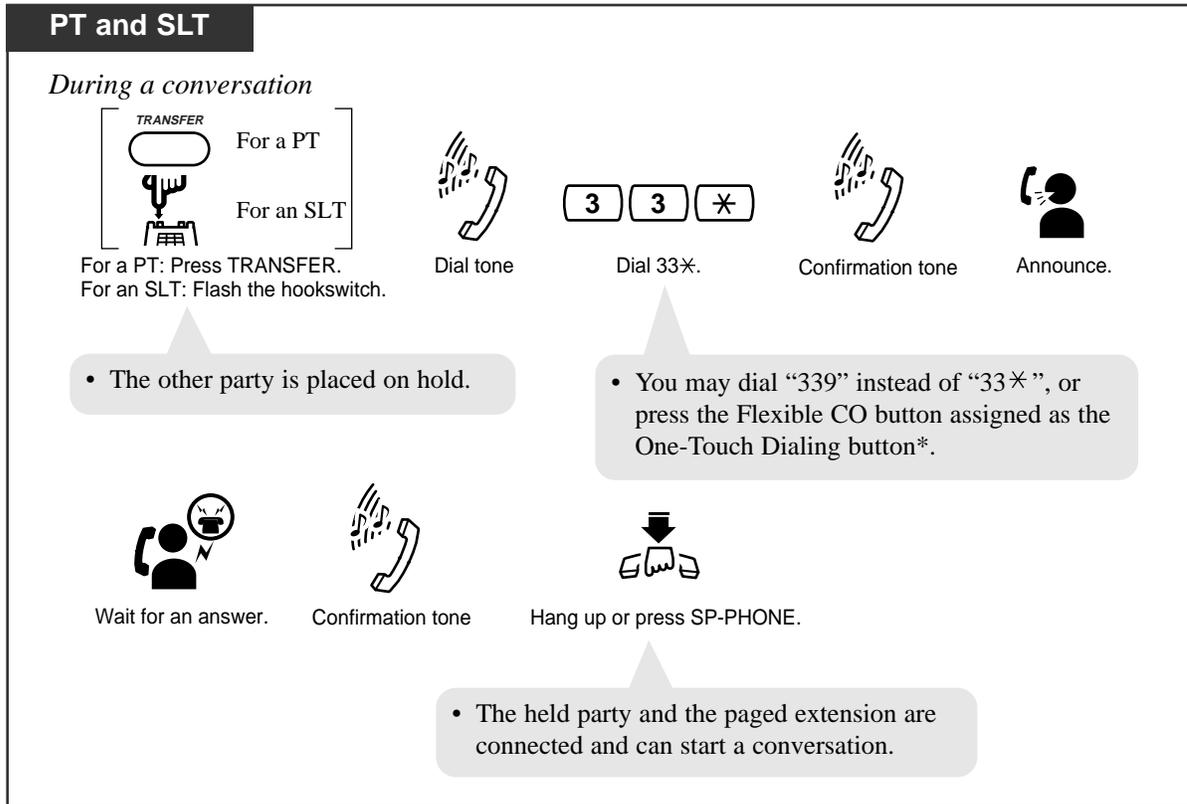

Conditions

- You can hear a confirmation tone when the page is answered.
- PT • If an outside call has been paged and transferred, you can answer the call by pressing the corresponding CO button whose indicator is flashing slowly.

Paging and Transfer

You can transfer a call using the paging feature (Paging — All, Paging — External, or Paging — Group).

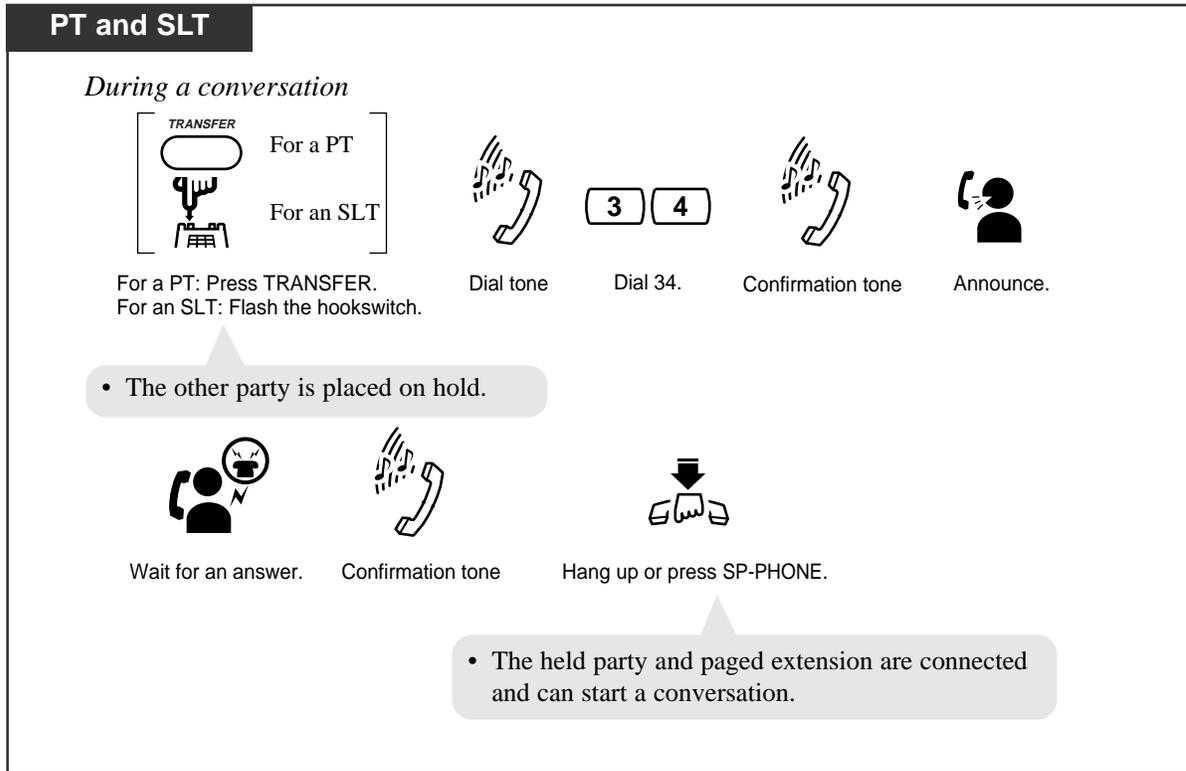

Using Paging — All

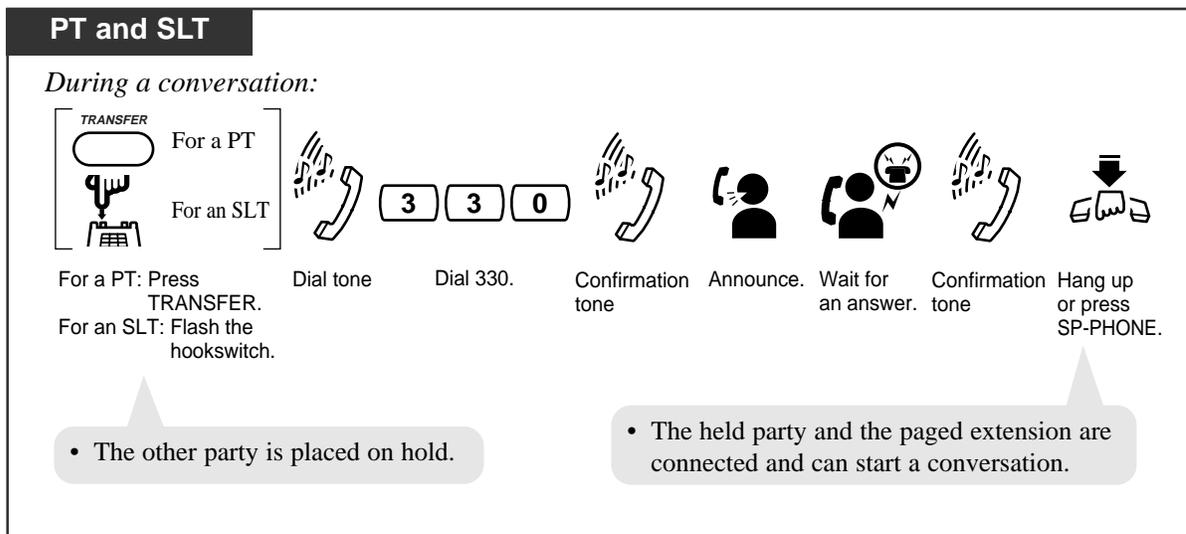

* For the default setting of the Flexible CO button, see the table on p.1-10.

3.2 Telephone Features

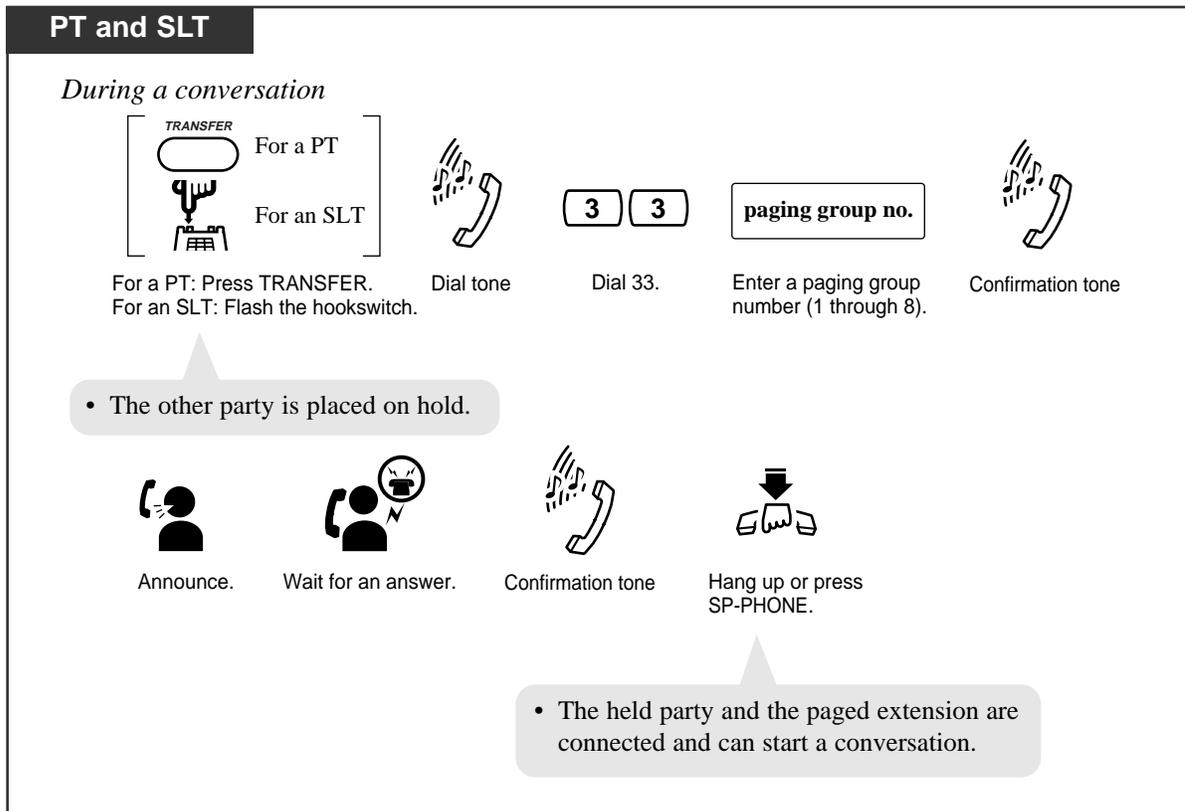

Using Paging — External: to an external pager

Using Paging — Group: to all extension groups

Using Paging — Group: to a particular extension group

Condition

- SLT • If “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.

Programming References

- System Programming — Installation Manual
 - [104] Hold Mode Selection
 - [600] Extension Group Assignment

3.2 Telephone Features

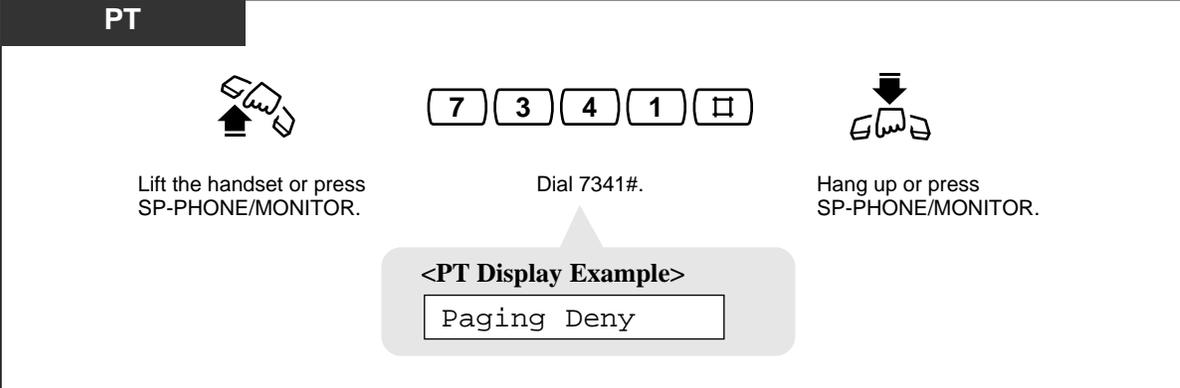

P

Paging — DENY

A page sent to a built-in speaker can be denied by any extension in the system.

Setting

PT

Lift the handset or press SP-PHONE/MONITOR.

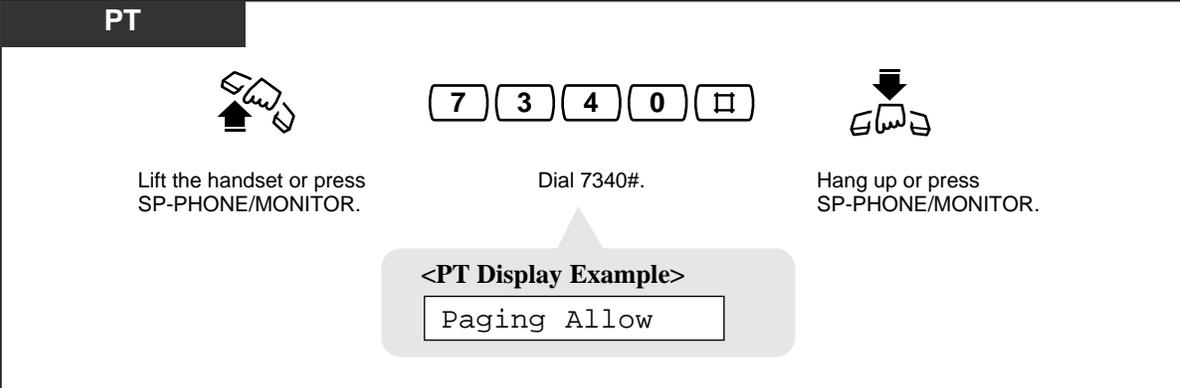

Dial 7341#.

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>
Paging Deny

Canceling

PT

Lift the handset or press SP-PHONE/MONITOR.

Dial 7340#.

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>
Paging Allow

Paralleled Telephone Connection

Any extension can be connected in parallel with a proprietary telephone and a single line telephone. In the event of a power failure, CO1 can be accessed using the single line telephone that is connected in parallel with the proprietary telephone to jack number 01. If the extension receives a call, ringing will be heard from the proprietary telephone and the single line telephone. You can answer the call by using either the proprietary telephone or the single line telephone. An answering machine, facsimile, MODEM (personal computer), etc., can be connected instead of a single line telephone. System Programming is required to enable this feature.

Conditions

- PT • A proprietary telephone LCD will show you a single line telephone is in use.
- SLT • The following features will not work with a single line telephone connected in parallel with a proprietary telephone.
 - Call Splitting
 - Caller ID Call Waiting
 - Conference
 - Door Opener while talking to the doorphone
 - External Feature Access
 - Pickup dialing
- SLT • A single line telephone connected in parallel with a proprietary telephone cannot make a call in the following cases.
 - The proprietary telephone is set to the BGM mode.
 - The proprietary telephone is receiving a page through the built-in speaker.
 - The proprietary telephone is set to the PROGRAM mode.
- SLT • A single line telephone connected in parallel with a proprietary telephone will not ring in the following cases.
 - The proprietary telephone is set to Hands-free Answerback.
 - The proprietary telephone is set to “Voice Call” in the Intercom Alert Assignment.
 - The proprietary telephone is receiving a call from a doorphone.

Programming Reference

- System Programming — Installation Manual
[610] Paralleled Telephone Connection

3.2 Telephone Features

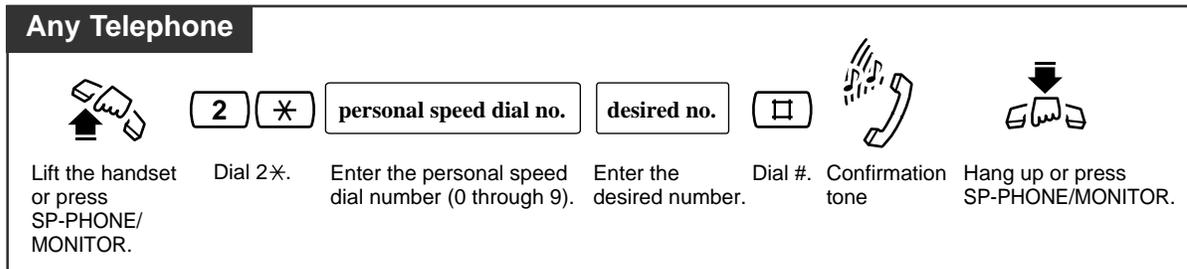

P

Personal Speed Dialing

Allows you to store up to ten speed dial numbers at your extension. These numbers are available for your extension only.

Storing a phone number

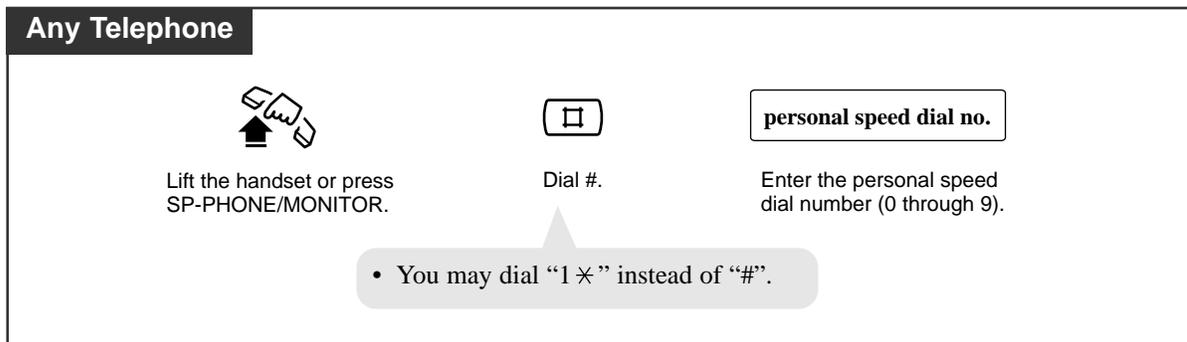

Any Telephone

Lift the handset or press SP-PHONE/MONITOR. Dial 2*. Enter the personal speed dial number (0 through 9). Enter the desired number. Dial #. Confirmation tone Hang up or press SP-PHONE/MONITOR.

Dialing

Any Telephone

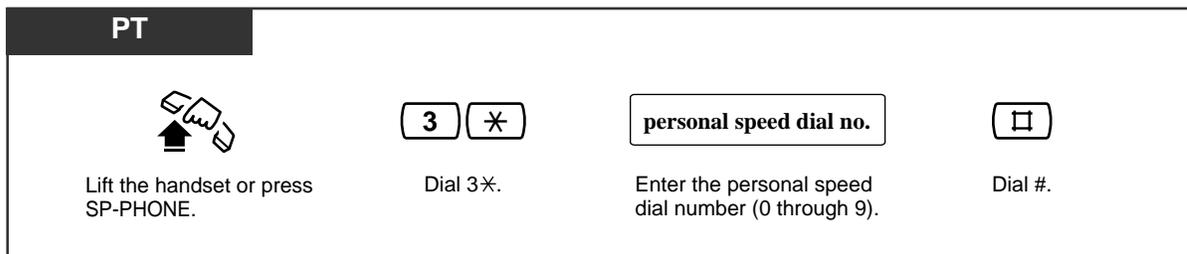

Lift the handset or press SP-PHONE/MONITOR. Dial #. Enter the personal speed dial number (0 through 9).

- You may dial “1 *” instead of “#”.

Checking the stored personal speed dialing numbers (with a display PT only)

PT

Lift the handset or press SP-PHONE. Dial 3*. Enter the personal speed dial number (0 through 9). Dial #.

Conditions

- An account code must be stored by pressing “* *” and entering the account code after the line access code in the account code verify-all and forced modes.
- You can store an extension number, telephone number, or feature number of up to twenty-four digits. Valid digits are “0 through 9”.
- A pause can be stored by pressing the * key. However, in the account code verify-all, verify-toll and forced modes, “*” is not regarded as a pause.
- To store the telephone number of an external party, a line access code (9 or 81 through 83) must be stored as the first digit.
- SLT • A rotary telephone cannot use this feature.

Programming Reference

- Station Programming (Section 2)
Flexible Button Assignment — One-Touch Dialing Button

3.2 Telephone Features

Pickup Dialing (Hot Line) (— Single Line Telephone only)

Allows you to make an outgoing call by just going off-hook.

Storing a phone number

SLT

Lift the handset or press SP-PHONE/MONITOR. Dial 742. Enter the phone number. Dial #.

Confirmation tone and dial tone Hang up or press SP-PHONE/MONITOR.

- You must dial a line access code (9 or 81 through 83) as the first digit when storing an external party phone number.

Setting / Canceling

SLT

Lift the handset or press SP-PHONE/MONITOR. To set: Dial 741#. Confirmation tone and dial tone Hang up or press SP-PHONE/MONITOR.

To cancel: Dial 740#.

Dialing

SLT

Lift the handset or press SP-PHONE/MONITOR. Wait for an answer. Talk.

Conditions

- This feature will not work if you answer an incoming call or retrieve a call on hold.
- Up to thirty-two digits, consisting of “0 through 9” and “*”, can be stored. The “*” button is used as a PAUSE. However, in the account code verify-all, verify-toll and forced modes, “*” is not regarded as a pause.
- An account code must be stored by pressing “* *” and entering the account code after the line access code in the account code verify-all and forced modes.
- During the waiting time after going off-hook, you can call another party and override this feature. You can change the waiting time between going off-hook and connecting with a called line by System Programming.
- A rotary telephone cannot use this feature.

Programming Reference

- System Programming — Installation Manual
[203] Pickup Dial Delay Time

Power Failure Transfer

During a power failure, the following outside (CO) line will be connected to an assigned extension.

Outside (CO) line 1: jack number 01

Conditions

- During a power failure, all features cannot be used except for incoming and outgoing outside calls from jack number 01.
- If jack number 01 is connected to a proprietary telephone, disconnect the unit and connect a single line telephone.

3.2 Telephone Features

P

Pulse to Tone Conversion

Allows you to change the dialing mode from Pulse to Tone to access services that require tones, such as computer telephone services.

Any Telephone		
<input type="text" value="phone no. (Pulse mode)"/>	<input type="text" value="*"/> <input type="text" value="#"/>	<input type="text" value="desired no. (Tone mode)"/>
Enter the phone number (Pulse mode).	Dial *#.	Enter the desired number (Tone mode).

Condition

- You cannot change from Tone to Pulse dialing mode.

Redial, Last Number

Automatically saves the last outside phone number dialed so that you can make a call to the same party later using a simple operation.

PT	SLT
 Lift the handset or press SP-PHONE/MONITOR.	 Lift the handset.
 Press REDIAL.	 Dial ## or 80.

Conditions

- Up to sixty-four digits can be stored and redialed. This does not include an outside (CO) line access code.
- If you hear a busy tone when attempting to redial, select another line and press the REDIAL button or feature number.
- The stored number will be replaced even if only one digit is dialed the next time an outside call is made. Dialing an outside (CO) line access code will not affect the stored number.
- PT • “*”, “#”, “PAUSE”, and “INTERCOM” (for secret dialing) are counted as one digit.
- PT • While calling or during a conversation, pressing the REDIAL button will disconnect the current call and redial the stored number in 3 seconds.
- PT • You can check the stored number. Press the REDIAL button while on-hook, and the stored number will be displayed.

Redial, Saved Number

Allows you to save the current external telephone number during a conversation, so that you can redial the same party later using a simple operation. The saved number can be redialed until another number is stored.

Storing

PT	
<i>During a conversation or while hearing a busy tone</i>	
	
Press AUTO DIAL/STORE.	Press the Flexible CO button assigned as the SAVE button.

Dialing

PT	
	
Lift the handset or press SP-PHONE/MONITOR.	Press the Flexible CO button assigned as the SAVE button.

Conditions

- PT** • Up to sixty-four digits can be stored and redialed. This does not include an outside (CO) line access code.
- PT** • “*”, “#”, “PAUSE”, and “INTERCOM” (for secret dialing) are counted as one digit.
- PT** • A flexible button can be assigned as the SAVE button.
- PT** • You can check the stored number. Press the pre-assigned SAVE button while on-hook, and the stored number will be displayed.
- PT** • You can change the outside (CO) line when dialing. You may press a CO button to select an outside (CO) line directly after going off-hook before pressing the pre-assigned SAVE button.

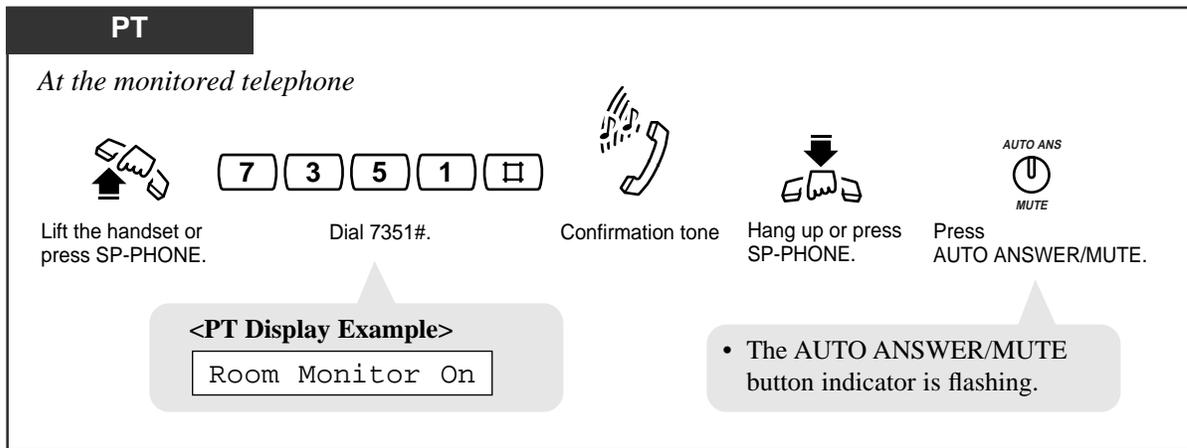

Programming Reference

- Station Programming (Section 2)
Flexible Button Assignment — SAVE Button

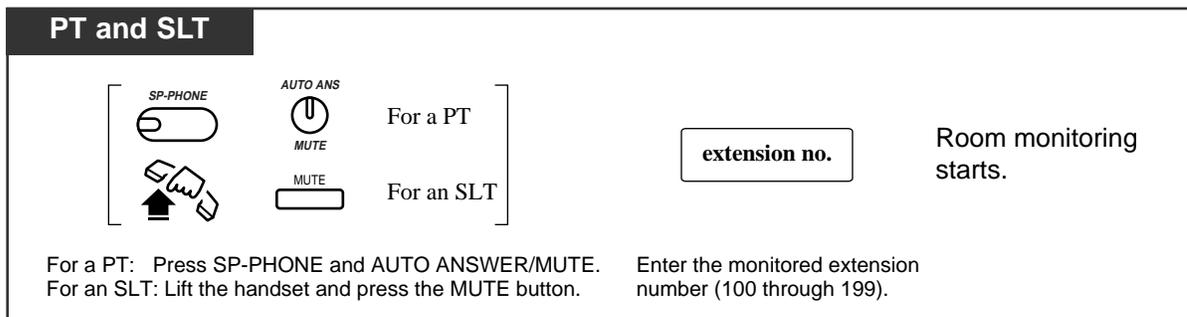

Room Monitor

Allows you to monitor a room through a proprietary telephone with an AUTO ANSWER/MUTE button. The proprietary telephone you want to monitor should be prepared for monitoring beforehand. You can also monitor through a doorphone. You can use a proprietary telephone with an AUTO ANSWER/MUTE button and single line telephone with a MUTE button for monitoring.

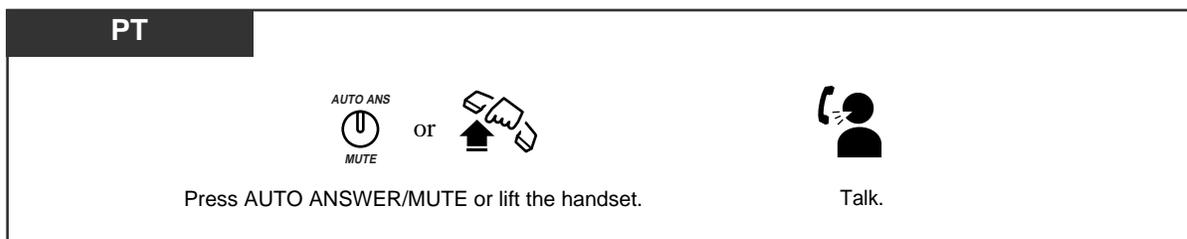

Setting a monitored PT

Secret Dialing

Allows you to conceal all or part(s) of a “System Speed Dialing” or “One-Touch Dialing” number assigned to a flexible button which normally appears on the display.

PT

When storing the phone number

INTERCOM

Press INTERCOM before and after the part you wish to conceal.

<PT Display Example>

9-1-[201] . . .

— “201” is not shown on the display when you dial.

Conditions

- PT • A secret code, “[” or “]” (pressing the INTERCOM button), are counted as one digit.
- PT • You can conceal one or more parts of a telephone number.
- PT • If the phone number “9-1-[201]-431-2111” has been stored, the display will show the following when the call is made.

1- . . . -431-2111
- PT • You can program whether to print out the concealed number(s) on the SMDR or not by System Programming.
- PT • Do not press the INTERCOM button before a line access number (9 or 81 through 83).

Station Feature Clear

Allows you to reset the following station features to the default settings.

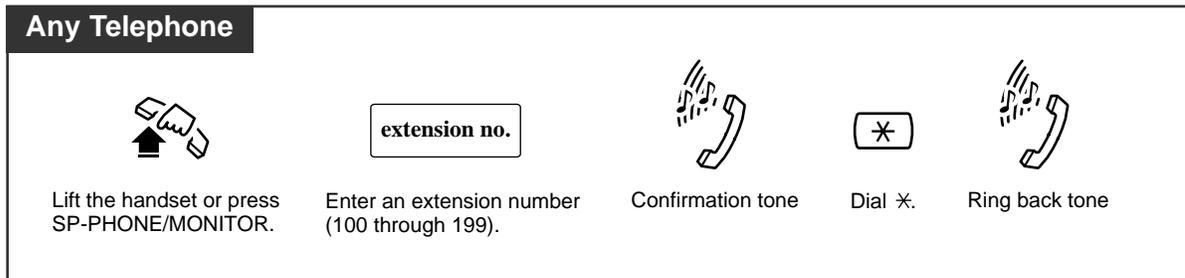

- a) Absent Message Capability
- b) Automatic Callback Busy (Camp-On)
- c) Background Music (BGM)
- d) Call Forwarding
- e) Call Log, Incoming
- f) Call Pickup Deny
- g) Call Waiting
- h) Data Line Security
- i) Do Not Disturb (DND)
- j) Executive Busy Override Deny
- k) Log-In/Log-Out
- l) Message Waiting – (All messages will be erased.)
- m) Paging — DENY
- n) Pickup Dialing (Hot Line) – (The stored telephone number will be erased.)
- o) Room Monitor
- p) Timed Reminder

Clearing the current feature settings

Switching to Tone Alert

“Voice Call” (through the built-in speaker) which is set at the called party’s extension can be switched to “Tone Call” (ringing). This feature must be set beforehand at the called party’s extension by Station Programming.

Condition

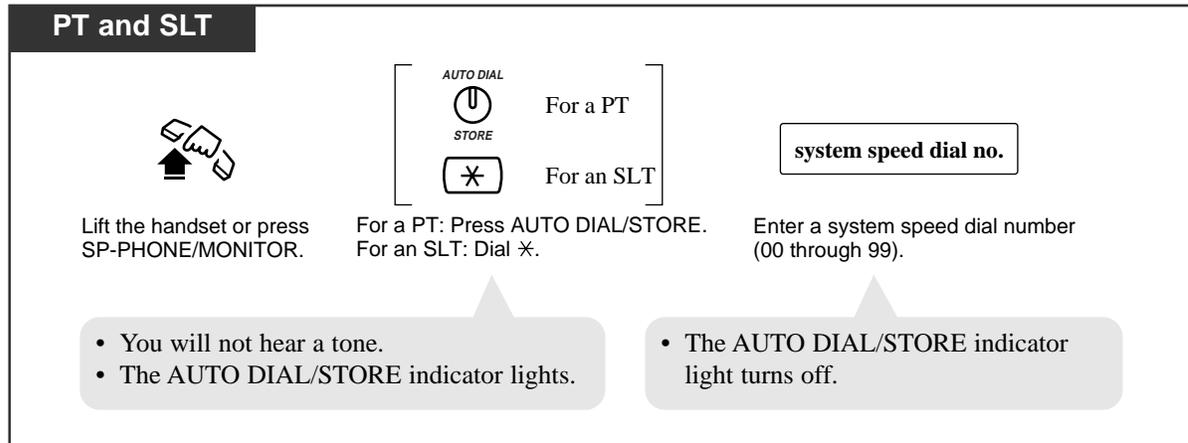

- This feature is not available for rotary telephones.

Programming Reference

- Station Programming (Section 2)
Intercom Alert Assignment

System Speed Dialing

Allows you to make a call using pre-programmed speed dial numbers. This system supports *one hundred* speed dial numbers which are available to all extension users.

- You will not hear a tone.
- The AUTO DIAL/STORE indicator lights.

- The AUTO DIAL/STORE indicator light turns off.

Conditions

- System Speed Dial numbers must be stored by System Programming.
- “Speed Dialing”, “One-Touch Dialing” and manual dialing can be used together.
- You may press a CO button or dial a line access code to select a desired outside (CO) line before pressing the AUTO DIAL/STORE button or dialing *.
- It is possible to change toll restriction COS number with this feature (Toll Restriction for System Speed Dialing). In this case, System Programming is necessary.

PT • A System Speed Dial number can be divided when stored.

<Example>

If the number is divided and stored in System Speed Dial numbers 01 and 02, press: [AUTO DIAL/STORE] [0] [1] [AUTO DIAL/STORE] [0] [2].

PT • The dialed number appears on the display. A caller’s name will be displayed instead if assigned by System Programming.

SLT • A rotary telephone cannot use this feature.

Time (Day/Night/Lunch) Service

This system supports the Day, Night and Lunch modes. The system operation for originating and receiving calls can be different in the day, night and lunch modes. “Time Service” can only be set by the operator and manager. For a PT user, even if your extension is not assigned as the operator or manager, you can use your display to check the current mode.

Confirming the current mode (with a display PT only)

Condition

- The Day/Night/Lunch mode is automatically switched at a predetermined time (default: 9:00 AM for every day, 5:00 PM for every night), if the automatic mode is selected.

3.2 Telephone Features

T

Timed Reminder

You can receive a ringback at your telephone to remind you of a meeting or appointment. Either one time or daily (everyday until canceled) is available at a pre-set time.

Setting

Any Telephone

 Lift the handset or press SP-PHONE/MONITOR.

 Dial 76.

 Enter the hour (01 through 12).

 Enter the minute (00 through 59).

 For AM: Dial 0. For PM: Dial 1.

 For a one time alarm*¹: Dial 1. For a daily alarm*²: Dial 2.

 Dial #.

 Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial “0” instead of “#”.

*¹ An alarm will be heard at the preset time and then the setting is cleared.
*² An alarm will be heard daily at the preset time until the setting is changed or canceled.

Canceling

Any Telephone

 Lift the handset or press SP-PHONE/MONITOR.

 Dial 762#.

 Confirmation tone and dial tone

 Hang up or press SP-PHONE/MONITOR.

<PT Display Example>
Alarm Cancel

- Single line telephone users can dial “0” instead of “#”.

Checking the set time (with a display PT only)

PT

Lift the handset or press
SP-PHONE/MONITOR.

7

6

3

□

Dial 763#.

Hang up or press
SP-PHONE/MONITOR.

- If “10:10 AM” has been set:

Toll Restriction Override

There are three types of toll restriction override.

- **Toll Restriction Override by Account Codes**
- **Toll Restriction for System Speed Dialing**
- **Toll Restriction — Station Lock Boundary Class**

Toll Restriction Override by Account Codes

Allows you to temporarily override toll restriction and make a toll call from a toll-restricted telephone assigned to the verify-toll mode. You can carry out this feature by entering a pre-assigned account code before dialing the telephone number. For the operation procedure, refer to “Account Code Entry”.

Conditions

- This feature changes the toll restriction COS number as follows.
 - When an account code is entered, the COS number is changed to the COS number 2. The COS numbers 1 and 2 will not be changed.
- If you do not enter an account code or enter an invalid one, a regular toll restriction check is done.
- You can enter an account code only when you need to override toll restriction.
- To override toll restriction in the option, forced or verify-all mode, use the Walking COS feature.

Programming References

Feature References

Account Code Entry
Toll Restriction (→ See the Installation Manual.)
Walking COS

Toll Restriction for System Speed Dialing

Allows you to change the toll restriction in “System Speed Dialing”. Normally, calls originated by “System Speed Dialing” are restricted depending on the extension’s toll restriction COS number. Once this option is set, the COS number is changed to the one assigned in the program [301]. You can select the toll restriction COS number by System Programming.

Programming Reference

- System Programming — Installation Manual
[301] Toll Restriction — System Speed Dialing Boundary Class

Feature References

System Speed Dialing
Toll Restriction (→ See the Installation Manual.)

Toll Restriction — Station Lock Boundary Class

Allows assigning a toll restriction class when the Electronic Station Lockout feature is set.

You usually cannot make an outside call at a locked extension, however if a toll restriction class is assigned in program [312], you can make an outside call at the locked extension.

Conditions

- The higher toll restriction COS number will take precedence.
For example, if toll restriction COS number 3 is assigned to an extension and the station lock boundary class is 4, you are allowed to make a call with toll restriction COS 4.

Programming Reference

- System Programming — Installation Manual

3.3

Operator/Manager Service Features

The system supports one operator and one manager. Any extension can be appointed as the operator and jack number 01 is appointed as the manager. System Programming is required to assign the operator. The manager can program a few System Program (see following “Manager Programming”) with their extension password. The operator and manager can perform the following features.

- 1) Call Log, Incoming in the Common Area — CLEAR ALL
- 2) Call Log Lock, Incoming in the Common Area
- 3) Date and Time Setting
- 4) Electronic Station Lockout — CANCEL ALL
- 5) The 301st Call Log, Incoming in the Common Area Treatment
- 6) Time (Day/Night/Lunch) Service Setting
- 7) Timed Reminder, Remote (Wake-Up Call)
- 8) Extension Password Set (Manager only)

Programming Reference

[008] Operator Assignment

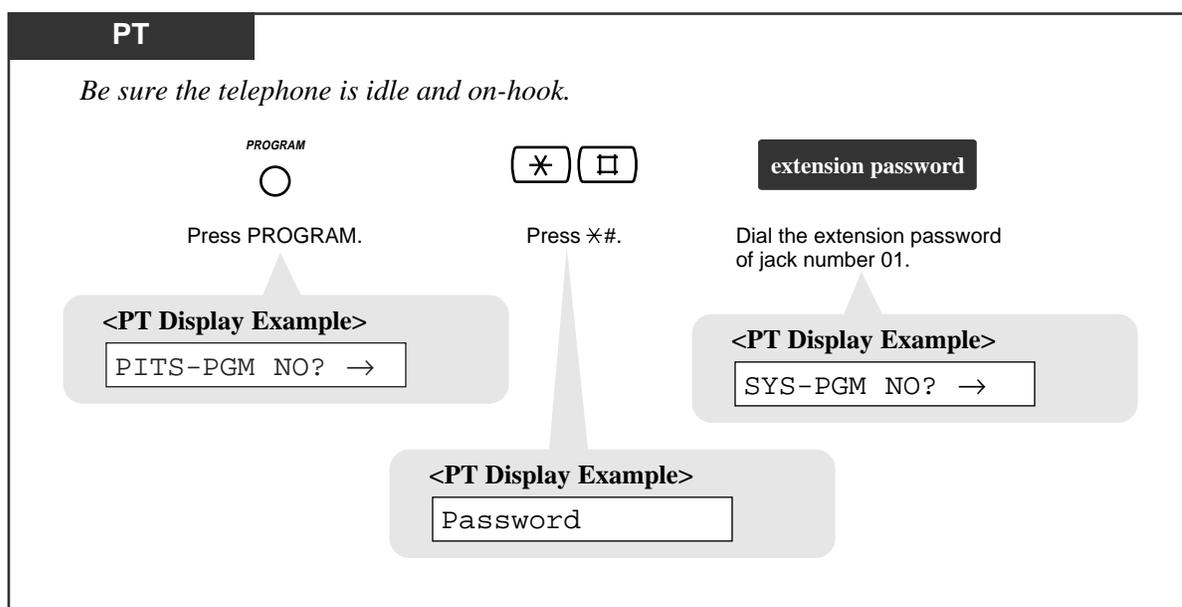

3.3 Operator/Manager Service Features

Manager Programming (Manager only)

The manager (jack number 01) can program the following System Programming with their extension password even when they do not know the system password for System Programming.

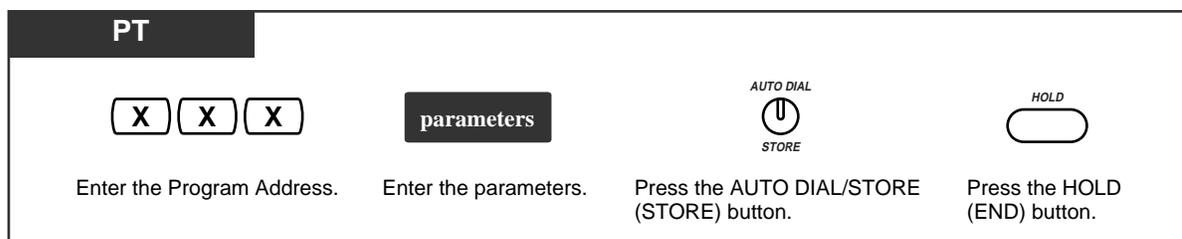

- [001] System Speed Dialing Entry
- [011] System Speed Dialing Name Setting
- [512] DISA Security Codes
- [530] DISA Security Codes Digits Selection

To enter the programming mode

Programming sequence

After entering the programming mode

After pressing the STORE button, you will hear one of the following tones.

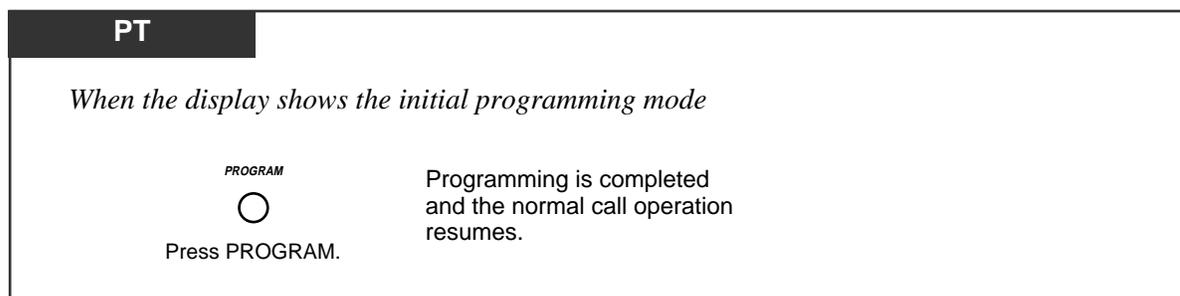

Confirmation tone (1 beep): This informs you that storing is completed. You can continue programming by entering the same or another program address

(2 beeps): This informs you that the parameter has already been stored.

Alarm tone (3 beeps): This informs you that the entry is invalid.

3.3 *Operator/Manager Service Features*

To exit the programming mode

Conditions

- PT** • During the programming mode, your extension is treated as a busy extension.
- PT** • If you enter the wrong extension password, you will hear an alarm tone (3 beeps). Try again.

Electronic Station Lockout
Message Waiting for Another Extension Lock

3.3 Operator/Manager Service Features

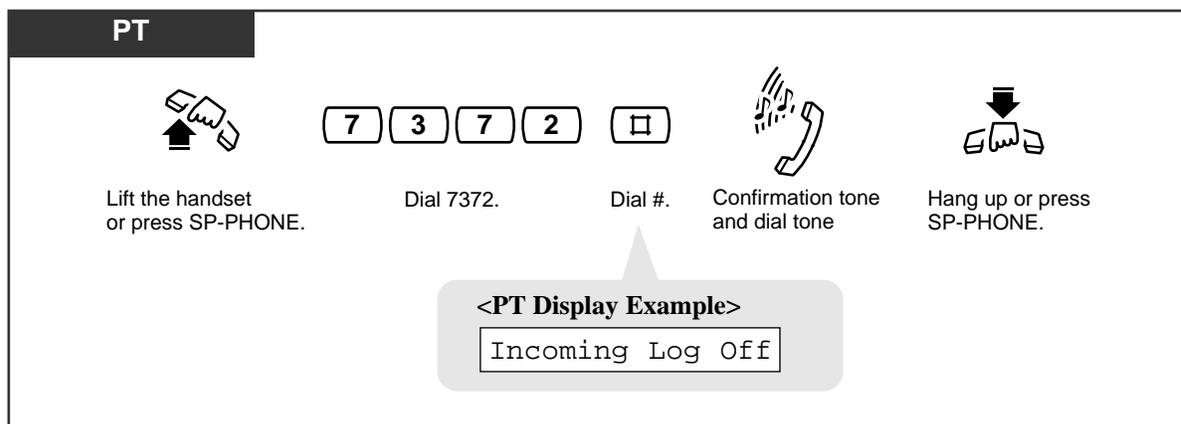

The 301st Call Log, Incoming in the Common Area Treatment

When the call log is full in the common area (300 calls are stored), you can select how the 301st call is treated. Either a new call can be disregarded or the new call can overwrite the oldest call that has been already confirmed (Default: Record the new call.).

Overwriting the call log in the common area

Disregarding the 301st call in the common area

Conditions

- PT** • When “Disregarding the 301st call in the common area” has been set and 300 calls are logged or all of the old information has been overwritten, the Caller ID Selection — Common button indicator lights and informs you that no more calls can be logged.

Feature Reference

Call Log, Incoming

3.3

Operator/Manager Service Features

Time (Day/Night/Lunch) Service Setting

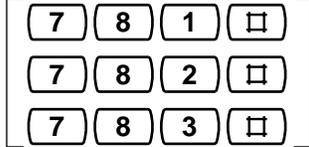

This system supports the Day, Night and Lunch modes. The system operation for originating and receiving calls can be different in the Day, Night and Lunch modes. Toll restriction can be programmed to prevent unauthorized toll calls for each mode.

Changing Day, Night or Lunch mode in manual or automatic mode

PT

Lift the handset or press SP-PHONE/MONITOR.

For manual-day mode: Dial 781#.
For manual-night mode: Dial 782#.
For manual-lunch mode: Dial 783#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- The display shows one of the following depending on whether the service is in the Day, Night or Lunch mode.

<PT Display Example>

Day Mode

or

Night Mode

or

Lunch Mode

Canceling the manual Day, Night or Lunch mode and returning to the automatic mode

PT

Lift the handset or press SP-PHONE/MONITOR.

Dial 780#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

Confirming the current mode (with a display PT only)

PT

When the telephone is idle

Press #.

- The display shows the current mode for 3 seconds.

3.3

Operator/Manager Service Features

Conditions

- Time (Day/Night/Lunch) Service has two modes of operation: (1) automatic mode, or (2) manual mode. This selection is made through System Programming.
- In the automatic mode, by default, Day Mode starts at 9:00 AM everyday and Night Mode starts at 5:00 PM everyday. These pre-set times can be adjusted through System Programming.
- Even if the automatic mode has been selected by System Programming, the operator or manager can change the day, night and lunch modes manually.
- The following programs have separate day, night and lunch programming.
 - 1) Delayed Ringing Assignment
 - 2) Door Opener Assignment
 - 3) Doorphone Ringing Assignment
 - 4) Flexible Outward Dialing Assignment
 - 5) Flexible Ringing Assignment
 - 6) Outside (CO) Line Mode
 - 7) TRS – Class of Service (COS) Assignment
- If the lunch mode is set using feature number 783# in the automatic mode, the mode will not be changed until the lunch mode is canceled using feature number 780#. The day and night modes are automatically changed at the programmed time even if feature number 780# is not entered.
- Feature number 780# is not accepted in the manual mode.
- If the day, night or lunch mode is changed manually in the automatic changing mode and the manager starts System Programming, the manual setting will be canceled after System Programming is completed. It will return to the automatic day, night or lunch mode.

Troubleshooting

If a power failure occurs...

Your system enables a conversation between a specific outside (CO) line and extension (Power Failure Transfer) and supports system data backup.

Power Failure Transfer

A specific extension can be automatically connected to a specific outside (CO) line. This provides outside (CO) line calls between the following extension and outside (CO) line.

Outside (CO) line 1 is connected to extension jack number 01.

- All other conversations will be disconnected during a power failure.
- Proprietary telephones (PT) cannot be used during a power failure. A single line telephone will work in the event of a power failure. Connect the single line telephone to extension jack number 01.
- When power is restored after a power failure, your system automatically restarts, maintaining as much of the previous system data as possible.

Problem	Probable Cause	Possible Solution
The unit does not ring.	<ul style="list-style-type: none"> • An outside (CO) line number is not programmed. • The Ringer Volume is set to "OFF". 	<ul style="list-style-type: none"> • To program outside (CO) line numbers, refer to the Installation Manual. • Increase the Ringer Volume. Refer to "Initial Settings" (Section 1.1).
The display flashes the following message. <div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 5px auto;">Set Time & Date</div>	The system internal clock is not working properly.	Consult with an authorized Panasonic Factory Servicenter.
