

## STEVAL-ISA023V2

Flyback AC-DC converter evaluation board based on the VIPer53-E  
with 24 W negative output

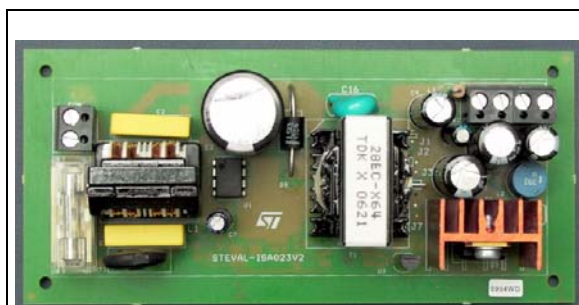

Data Brief

### Features

- Input voltage,  $V_{in}$ : from 90 to 265 V<sub>rms</sub>
- Negative output voltage: -5 V, -12 V
- Standby consumption: <1 W
- Total output power: 24 W
- EMI requirements: EN55022 Class B
- Safety: EN 60950

### Description

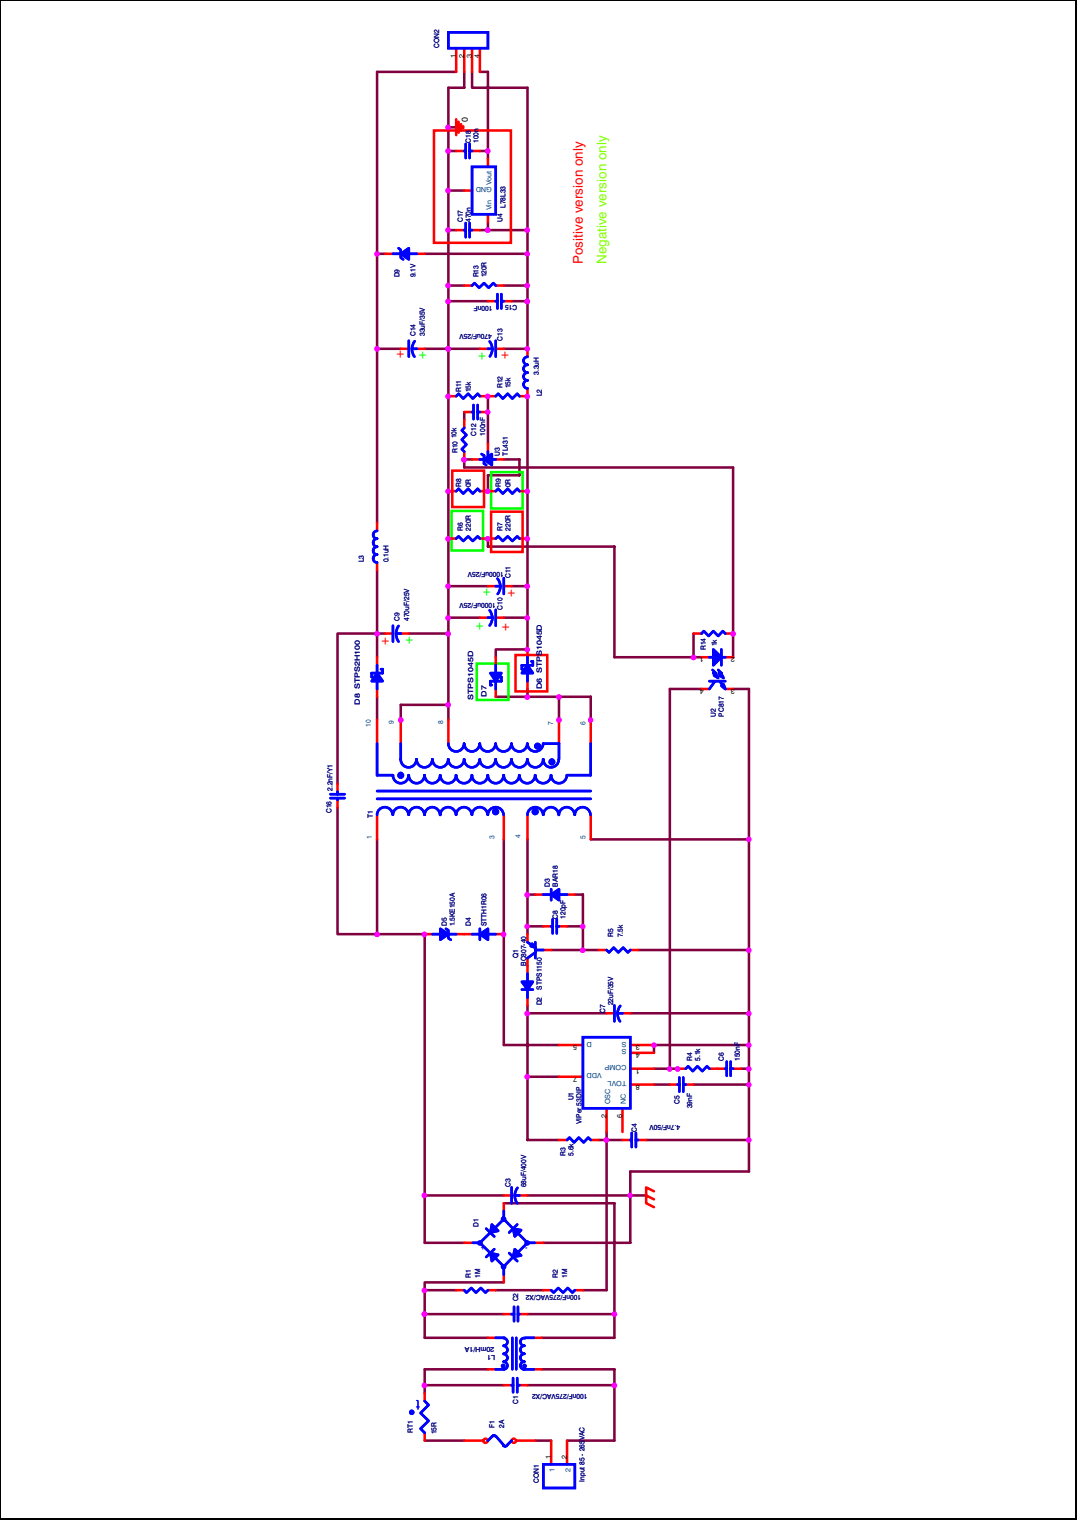

This is an ideal solution for a 25 W switch mode power supply (SMPS) dedicated to industrial or white-goods applications. The board accepts a wide range of input voltages (90 to 265 V<sub>rms</sub>) and delivers 2 negative output voltages. The switch-mode power supply (SMPS) is based on the VIPer53-E. The VIPer53-E combines an enhanced current-mode PWM controller with a high-voltage MDmesh™ Power MOSFET in the same package. The main characteristics of the evaluation board are its high efficiency and low standby consumption. These, combined with the minimal component count and global low cost approach, makes it an ideal solution for powering industrial or consumer equipment, while also meeting worldwide consumption requirements.
