TIMING DIAGRAMS

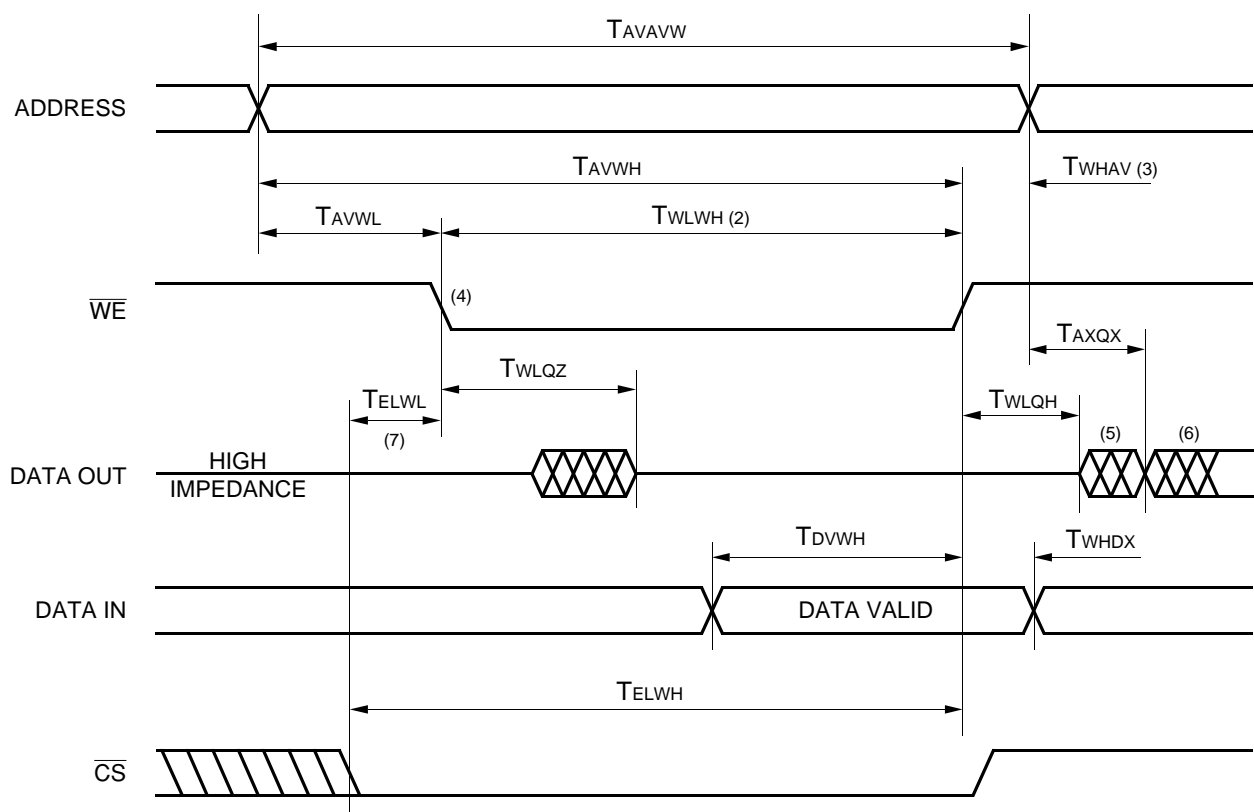

1. \overline{WE} is high for Read Cycle.
2. Address Valid prior to or coincident with \overline{CS} transition low.

Figure 11a: Read Cycle 1

1. \overline{WE} is high for Read Cycle.
2. Device is continually selected. \overline{CS} low.

Figure 11b: Read Cycle 2

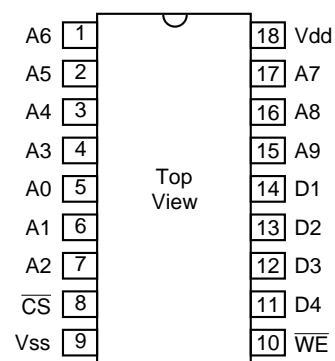

1. \overline{WE} must be high during all address transitions.
2. A write occurs during the overlap (T_{WLWH}) of a low \overline{CS} and a low \overline{WE} .
3. T_{WHAV} is measured from either \overline{CS} or \overline{WE} going high, whichever is the earlier, to the end of the write cycle.
4. If the \overline{CS} low transition occurs simultaneously with, or after, the \overline{WE} low transition, the output remains in the high impedance state.
5. DATA OUT is in the active state, so DATA IN must not be in opposing state.
6. DATA OUT is the write data of the current cycle, if selected.
7. DATA OUT is the read data of the next address, if selected.
8. T_{ELWL} must be met to prevent memory corruption.

RADIATION TOLERANCE

Total Dose Radiation Testing

For product procured to guaranteed total dose radiation levels, each wafer lot will be approved when all sample devices from each lot pass the total dose radiation test.

The sample devices will be subjected to the total dose radiation level (Cobalt-60 Source), defined by the ordering code, and must continue to meet the electrical parameters specified in the data sheet. Electrical tests, pre and post irradiation, will be read and recorded.

GEC Plessey Semiconductors can provide radiation testing compliant with MIL-STD-883 test method 1019, Ionizing Radiation (Total Dose).

Total Dose (Function to specification)*	1×10^5 Rad(Si)
Transient Upset (Stored data loss)	5×10^{10} Rad(Si)/sec
Transient Upset (Survivability)	$> 1 \times 10^{12}$ Rad(Si)/sec
Neutron Hardness (Function to specification)	$> 1 \times 10^{15}$ n/cm ²
Single Event Upset**	3.4×10^{-9} Errors/bit day
Latch Up	Not possible

* Other total dose radiation levels available on request

** Worst case galactic cosmic ray upset - interplanetary/high altitude orbit
