BCS-1

OLYMPUS E-SYSTEM

EN INSTRUCTIONS

Thank you for purchasing the OLYMPUS Li-ion Battery Charger (BCS-1). To ensure your safety, please read this instruction manual before use, and keep it handy for future reference.

SAFETY PRECAUTIONS

This instruction manual uses a variety of common symbols and icons to assist you in proper handling and usage of this product properly, and to warn you of potential hazards to yourself and others, well as to property. These symbols and their significance are described below.

DANGER Failure to observe the procedures indicated by this symbol may result in serious injury or death.

WARNING Failure to observe the procedures indicated by this symbol may result in injury or property damage.

CAUTION Failure to observe the procedures indicated by this symbol may result in injury or property damage.

IMPORTANT

Prohibited

Disassembly prohibited

Alert

For customers in Europe

CE The "CE" mark indicates that this product complies with the European requirements for safety, health, environment and consumer protection. CE-mark products are for sale in Europe.

For customers in USA

FCC Notice

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any unauthorized changes or modifications to this equipment would void the user's authority to operate.

For customers in CANADA

This Class B digital apparatus complies with Canadian ICES-003.

This symbol (crossed-out wheelie bin WEEE Annex IV) indicates separate collection of waste electrical and electronic equipment in EU countries. Please do not throw the equipment into the domestic refuse. Please use the return and collection systems available in your country for the disposal of this product.

DANGER

The Li-ion battery charger is designed for use only with the BLS-1 battery. To avoid, overheating, explosion or fluid leak, do not attempt to charge any other type of dry cell or rechargeable battery.

IMPORTANT

Do not attempt to charge a battery that is damaged, leaking, or wet.

Do not use the battery charger for any purpose other than to charge the specified batteries. For example, do not use as a DC power source.

Never expose the battery charger to water or moisture including rain, seawater and animal urine. Do not handle the battery charger when it is wet or when your hands are wet. Do not use the battery charger in damp or humid conditions (such as in a bathroom).

To avoid fire, overheating or electric shock, do not insert a metallic object such as a wire into the battery charger.

Never solder the battery charger or attempt to repair, deform, modify or disassemble it.

Always power the battery charger with the voltage specified in this instruction manual.

Do not use, charge or store the battery charger where it may have direct contact with heat sources. For example, do not leave it on the dashboard of a car under direct sunlight or place it near heating equipment.

Do not use the battery charger in a place where heat may build up, such as under a cushion.

Never use the battery charger around flammable gas. Otherwise, explosion or fire may result.

Do not use a power cord other than the one provided or one that is designed for use with this battery charger.

Always insert the power plug completely and firmly into the outlet socket. Do not use the battery charger when the power plug is not fully inserted.

If do not load a battery into the charger with the +/- terminals upside down. If the battery does not fit properly into the battery charger, do not force fit the battery. Doing so could cause a fire, overheating, explosion, fluid leak or other damage.

WARNING

Do not touch the battery charger or Li-ion battery during charging. Extended contact could result in minor burns.

Do not use the battery charger if the battery, the power cord or the battery is damaged. To avoid electric shock or injury never internal parts that may have been exposed or the battery charger or power cord is damaged, unplug the power cord and contact your nearest Olympus service center for repairs.

Keep batteries out of reach of children. To avoid electric shock or injury, children should not use the battery charger unless they are carefully supervised by a parent or guardian.

CAUTION

Do not continue charging for more than 24 hours. Fire, overheating, explosion or leakage may result.

Do not shake the battery charger with a battery in. The battery could fly out of the charger and cause injury or damage.

Do not drop a heavy object on the battery charger or power cord. Also do not use or store the battery charger or power cord in a location from which they might easily fall, such as on top of a TV.

Do not store or use the battery charger where it may be exposed to moisture, or excessive dust. Be sure to remove dust from the power plug before plugging it into a power outlet.

Do not charge batteries in an extremely cold or hot environment. The optimum environmental temperature range when charging batteries is between 10 °C and 30 °C (50° and 68°F). Outside this range, a decrease in battery performance may result.

Keep the power cord unplugged from a power outlet unless it is being charged. On the power cord, there is an incandescent lamp which will turn on after about 10 hours. After the specified charge time, stop charging to avoid fire, overheating or explosion.

In this case, contact Olympus.

MAIN SPECIFICATIONS

Model Number: PS-BCS1

Rated power input: 120 V AC(60Hz)

other countries 100 to 240 V AC(50/60Hz)

Rated power output: 9.35 V DC, 400 mA

Charging time: Approx. 210 min. (Room temperature: with the BLS-1 battery)

Ambient temperatures: 0°C to 40°C (32 to 104°F) for operation, -20°C to 60°C (-4°F to 140°F) for storage.

Dimensions: Approx. 62 (W) x 83 (D) x 38 (H) mm.(2.4 x 3.3 x 1.5 in.)

Weight: Approx. 72 g (2 oz)(excluding the power cord)

* Design and specifications are subject to change without notice.

TECHNICAL DATA

Model number: PS-BCS1

Nennleitungslängen: 100 bis 240 V Wechselstrom (50/60 Hz)

Ladeadermtemperatur: 8,35 V Gleichstrom, 400 mA.

Abmessungen: Ca. 210 Min. (Zimmertemperatur für ABL-1).

Gewicht: Ca. 72 g (excl. Netzteil)
