The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**FCC Note:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: To assure continued compliance, follow the attached installation instructions and use only shielded interface cables when connecting to peripheral devices. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

# IMPORTANT SAFETY INSTRUCTIONS

Read these operating instructions carefully before using the unit. Follow the safety instructions on the unit and the applicable safety instructions listed below. Keep these operating instructions handy for future reference.

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11) Only use attachments/accessories specified by the manufacturer.
- 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
- 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

## Useful features

This DVD Video recorder records high quality images to rapid random access capable DVD-RAM. This has resulted in many new features that out perform older tape formats. The following information summarizes a few of these features.

### Instant recording

You no longer need to search for empty disc space. By pressing the recording button, the unit finds available recording space and begins recording right away. There is no need to worry about overwriting already recorded content.

### SD/PC card slots

This unit is equipped with interfaces that allow networking with digital equipment.

- The SD/PC card slots of this unit let you transfer (dub) digital camera photographs from a card to DVD-RAM for easy storage without using a computer.

### TV Guide On Screen™ system

The TV Guide On Screen™ system provides a handy electronic program guide (EPG) for checking what's on. Setting up to record a broadcast is easy too. Simply select the desired program from the displayed list. You can also search for desired programs alphabetically or by displaying only the programs in a certain category.

- This service may not be available in some areas.

## The remote control

### Batteries

- Insert so the poles (+ and -) match those in the remote control.
- Do not use rechargeable type batteries.
- Do not mix old and new batteries.
- Do not use different types at the same time.
- Do not heat or expose to flame.
- Do not take apart or short circuit.
- Do not attempt to recharge alkaline or manganese batteries.
- Do not use batteries if the covering has been peeled off.

Mishandling of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire.

Remove if the remote control is not going to be used for a long period of time. Store in a cool, dark place.

### Note

If you cannot operate the unit or television using the remote control after changing the batteries, please re-enter the codes (→ page 12, 13).

### Use

**The manufacturer accepts no responsibility and offers no compensation for loss of recorded or edited material due to a problem with the unit or recordable media, and accepts no responsibility and offers no compensation for any subsequent damage caused by such loss.**

#### Examples of causes of such losses are

- A disc recorded and edited with this unit is played in a DVD recorder or computer disc drive manufactured by another company.
- A disc used as described above and then played again in this unit.
- A disc recorded and edited with a DVD recorder or computer disc drive manufactured by another company is played in this unit.

# STEP 1 Connection

## ■ Examples of equipment you can connect to this unit's terminals

### Do not place the unit on amplifiers or equipment that may become hot.

The heat can damage the unit.

### ■ When the unit is not to be used for a long time

To save power, unplug it from the household AC outlet. This unit consumes a small amount of power, even when it is turned off (approx. 15 W).

- Note that the television program list is not downloaded while the unit is unplugged.

**Before moving the unit, ensure the disc tray is empty.**  
Failure to do so will risk severely damaging the disc and the unit.

- The equipment connections described are examples.
- Before connection, turn off all equipment and read the appropriate operating instructions.
- Peripheral equipment and optional cables sold separately unless otherwise indicated.

## Connecting a television and VCR

(A) to (X) are indexes for Spanish Quick Reference.

- (A) — indicates included accessories.  
 — indicates accessories not included.  
 ① - ④ are required connections. Connect in the numbered order.

Connecting a cable TV box  
 → page 8

### 75 Ω coaxial cable

The picture and sound signal from this unit does not go through the 75 Ω coaxial cable to the television. Make sure you connect one of the following terminals on this unit to the television: the AUDIO/VIDEO OUT terminal, the S-VIDEO OUT terminal or the COMPONENT VIDEO OUT terminal. If the television has none of these terminals, consult your local dealer.

- Refer to page 9 if the antenna connector doesn't match.

**Do not connect the unit through a video cassette recorder**  
 Video signals fed through video cassette recorders will be affected by copyright protection systems and the picture will not be shown correctly on the television.

- When connecting to a television with a built in VCR, connect to the input terminals on the television side, not the VCR side.

# STEP 1 Connection

## Connecting a cable TV box

- You need to subscribe to a cable TV service to enjoy viewing their programming.
- Consult your service provider regarding appropriate cable TV box.
- **If you receive your programming solely from a satellite service, the program guide in this unit will not receive program listings or channel information. Without this information, program-based recordings cannot be made. However, recordings can still be set manually.**

Ⓐ to Ⓚ are indexes for Spanish Quick Reference.

\* For more information on connections (→ page 7)

### Should I use the AUDIO/VIDEO OUT terminal or the RF OUT terminal?

If your cable TV box has both AUDIO/VIDEO OUT terminals and RF OUT terminals, we recommend connecting the AUDIO/VIDEO OUT terminal with the unit's IN3 (L3) terminal. Using this connection provides better picture quality.

- The S-VIDEO terminal achieves a more vivid picture than the VIDEO terminal.

### Setting the IR Blaster

Place the IR Blaster in front of the signal sensor of the cable TV box.

- Ⓜ Read the cable TV box operating instructions regarding positioning of the signal sensor.

- Ⓝ If necessary, use the double sided adhesive tape (included) to secure the IR Blaster to a flat surface.

Ⓞ e.g. Television stand surface

- Ⓟ If you peel off the adhesive tape, the surface may become damaged. Once you have confirmed the cable TV box is operating correctly, secure it by attaching the adhesive tape.

Ⓟ Cable TV box

## Connecting an amplifier or system component

### ■ Connection to a stereo amplifier

### ■ To enjoy multi-channel surround sound on DVD-Video

Connect an amplifier with a built-in decoder displaying these logo marks using an optical digital audio cable and change the settings in "Digital Audio Output" (→ page 44).

- You cannot use DTS Digital Surround decoders not suited to DVD.
- Even if using this connection, output will be only 2 channels when playing DVD-Audio.

## If the antenna connector doesn't match

### Other antenna connections to the unit

Use one of the following connections to suit the antenna lead.

- If your television has both lead and coaxial VHF terminals, use the lead connection to minimize signal loss.

#### ■ A single twin lead

#### ■ A twin lead and a coaxial cable

#### ■ Two twin leads

### Other antenna connections from the unit to the television

Use one of the following connections to suit the antenna terminals on your television. Refer to the television's operating instructions.

#### ■ A twin lead and coaxial plug terminal

#### ■ A twin lead terminal

#### ■ Two twin lead terminals

#### ■ Multiple antenna terminals

• Connect to one of the ANT terminals, then change the television's settings as necessary.

## STEP 2 Setting up the TV Guide On Screen™ system

After plugging the unit into your household AC outlet and pressing [DVD POWER] to turn the unit on for the first time, the unit starts TV Guide On Screen™ system setup.

**Even if you do not want to use the TV Guide On Screen™ system, complete the setup. You cannot use timer recording unless the setup is completed.**

**Only English is displayed in the TV Guide On Screen™ system. Other languages cannot be displayed.**

### TV Guide On Screen™ system

This unit downloads a free television program list from a TV station and displays the list on the television screen. The list offers you many convenient functions such as timer recording (➡ page 19) and so on (➡ page 23).

• If you receive your programming solely from a satellite service, the program guide in this unit will not receive program listings or channel information. Without this information, program-based recordings cannot be made. However, recordings can still be set manually.

### Downloading the television program list

- The unit downloads the television program list only when the unit is turned off.
- When the unit is connected to a cable TV box, the cable TV box must be turned on in order to download the television program list.
- In order to cool the circuits used for downloading the television program list, sometimes the cooling fan operates when the unit is turned off. This is not a malfunction.

### Preparation

- Turn on the television and select the appropriate video input to suit the connections to this unit.
- When using the cable TV box, check the following.
  - Make sure the IR Blaster is connected and positioned properly (➡ page 8).
  - Make sure the cable TV box is turned on.

## 1 Press [DVD POWER].

## 2 Following the on-screen messages, input the operating environment for your television.

- Move the cursor using [▲, ▼, ◀, ▶] and press [ENTER] to confirm.
- Press the numbered buttons to enter numbers.
- Press [ENTER] to advance to the next screen.
- Refer to the guidance on the bottom of the screen.

**4 Press [⏻ DVD POWER].**

Leave the unit turned off until the unit downloads the television program list. This may take up to a maximum of 24 hours.

**When the unit is connected to a cable TV box**

- The cable TV box must be turned on in order to download the television program list.
- Note that the television program list may not be downloaded correctly if you change the channel of the cable TV box while the unit is turned off.

If you find "There is no data for this screen" on the television when you turn the unit on, the unit has not yet downloaded the program list.

This unit may download more than one channel line-up. Follow the on-screen guidance and select one of the channel line-ups (➔ page 23).

**To use immediately (Manual Clock Setting)**

Set the clock manually.  
Please note that the program list is not displayed until the unit downloads it. Timer program recording is only possible manually.

- 1 Press [SETUP].**
- 2 Press [▲, ▼] to select "Set Up" and press [▶].**
- 3 Press [▲, ▼] to select "Manual Clock Setting" and press [ENTER].**

### Tips for making MP3 discs

- Discs must conform to ISO9660 level 1 or 2 (except for extended formats).
- Compatible compression rate: between 32 kbps and 320 kbps
- Compatible sampling rate:  
 16 kHz, 22.05 kHz, 24 kHz, 32 kHz, 44.1 kHz and 48 kHz
- Maximum number of tracks and groups recognizable:  
 999 tracks and 99 groups
- This unit is compatible with multi-session.
- This unit is not compatible with ID3 tags or packet writing.
- Depending on recording, some items may not be playable.
- Reading or play of the disc may take time if there are a lot of still pictures or sessions.
- The display order may differ from how the order is displayed on a computer.

### Naming folders and files

- MP3 files must have the extension “.MP3” or “.mp3”.
- At the time of recording, give folder and file names a 3-digit numeric prefix in the order you want them to play (this may not work at times).
- English alphabets and Arabic numerals are displayed correctly. Other characters may not be displayed correctly.

# Playing still pictures

## Regarding still pictures (JPEG, TIFF)

- Compatible formats: DCF\* compliant (Content recorded on a digital camera etc.)
- \* Design rule for Camera File system: unified standard established by Japan Electronics and Information Technology Industries Association (JEITA).
- File format: JPEG, TIFF (non-compressed RGB chunky format)
- Number of pixels: 34×34 to 6144×4096  
(Sub sampling is 4:2:2 or 4:2:0)
- This unit can handle a maximum of 3000 files and 300 folders (including higher folders).
- Operation may take time to complete when playing TIFF format still pictures, or when there are many files and/or folders, some files may not display or be playable.
- MOTION JPEG is not supported.

# Channel/Clock settings when TV Guide On Screen™ system is not used

Refer to the control reference on page 42.

## Preparation:

If the television program list has already been downloaded, return the unit to the factory preset condition using the steps indicated below.

When the unit is on and stopped

- ① **Press and hold** [V CH] and [^ CH] on the main unit for about five seconds.  
The unit turns off.
- ② **Press** [DVD POWER] to turn the unit on.
- ③ **Complete the TV Guide On Screen™ system setup** (until [ENTER] is pressed after the “Watch TV” message screen is displayed).

## Note

You can set timer recording only manually after you set the unit with “Auto Channel Setting”.

## Auto channel/clock settings

- 1 Press [SETUP].**
- 2 Press [▲, ▼] to select “Channel” and press [▶].**
- 3 Press [▲, ▼] to select “Auto Channel Setting” and press [ENTER].**
- 4 Press [◀, ▶] to select “Yes” and press [ENTER].**
- 5 Press [ENTER].**

Auto Channel Setting starts. This takes a few minutes.  
The unit then proceeds with Auto Clock Setting. The time is displayed when finished.

- DST, Daylight Saving Time, shows the summertime setting.
- TIME ZONE shows the time difference from Greenwich meantime (GMT).
  - EST (Eastern Standard Time) = GMT -5
  - CST (Central Standard Time) = GMT -6
  - MST (Mountain Standard Time) = GMT -7
  - PST (Pacific Standard Time) = GMT -8
  - AST (Alaska Standard Time) = GMT -9
  - HST (Hawaii Standard Time) = GMT -10
  - For other areas: xx hr
- If the Auto Clock Setting does not start automatically, select “Auto Clock Setting” from the “Set Up” tab.
- If the time was not set correctly, use manual clock setting (➔ page 11) or time zone adjust.

- 6 Press [ENTER].**

•The unit configures channels according to the Antenna System settings as follows.

Antenna system	Band	Channel
TV	VHF	2-13
	UHF	14-69
CATV	VHF	2-13
	CATV LOW BAND	95-99
	CATV MID/SUPER BAND	14-36
	CATV HYPER BAND	37-65
	ULTRA BAND	66-94 100-125
	SPECIAL CATV CHANNEL	1

### Time Zone Adjust

Adjust the time zone (-1 or +1) if it was not set correctly with auto clock setting.

You cannot change this setting if you set the clock manually.

- 1 Press [SETUP].**
- 2 Press [▲, ▼] to select “Set Up” and press [▶].**
- 3 Press [▲, ▼] to select “Time Zone Adjust” and press [ENTER].**

- 4 Press [▲, ▼] to select “-1” or “+1” and press [ENTER].**

### To exit the screen

Press [SETUP].

### To return to the previous screen

Press [RETURN].

### To cancel partway while Auto Channel/Clock Setting is taking place

Press [RETURN].

Refer to the control reference on page 42.

## Channel captions

You can use the preset captions, or manually enter new ones yourself.

The captions you enter are displayed when the channel is displayed and in the Direct Navigator screen.

- You can set channel captions only after “Auto Channel Setting” is completed.

### 1 Press [SETUP].

### 2 Press [▲, ▼] to select “Channel” and press [▶].

#### Preset Channel Captions

### 3 Press [▲, ▼] to select “Preset Channel Captions” and press [ENTER].

### 4 Press [▲, ▼] to select the caption and press [▶].

You can choose from the following captions.

ABC, PBS, CBS, CNN, FOX, ESPN, NBC, HBO, A&E, AMC, FAM, MAX, MTV, SHOW, TBS, USA, TNT, CBC, UPN, CTV, WB, TSN, DSC, GLOB

- When selecting the caption, press and hold [▲, ▼] to scroll up and down the screen.

### 5 Press [▲, ▼] to select the channel corresponding to the caption and press [◀].

- Channels are only displayed if they contain a station and if captions have not been added manually.
- To delete the channel number, press [\* CANCEL].

Repeat steps 4 and 5 to enter other channels.

### 6 Press [ENTER].

#### Manual Channel Captions

### 3 Press [▲, ▼] to select “Manual Channel Captions” and press [ENTER].

### 4 Press [▲, ▼] to select the channel and press [▶].

- Channels are only displayed if they contain a station and if preset captions have not been added.

### 5 Press [▲, ▼] to select the first character and press [▶].

- You can choose from the following characters: A–Z, 0–9, -, &, !, /, (space)
- To delete the caption, press [\* CANCEL].
- Repeat this step to enter the other characters.

### 6 Press [◀, ▶] to return to the “Channel Number” column.

Repeat steps 4–6 to enter other channels.

### 7 Press [ENTER].

#### To exit the screen

Press [SETUP].

#### To return to the previous screen

Press [RETURN].

## Bitstream

This is the digital form of multi-channel audio data (e.g., 5.1 channel) before it is decoded into its various channels.

## CPRM (Content Protection for Recordable Media)

CPRM is technology used to protect broadcasts that are allowed to be recorded only once. Such broadcasts can be recorded only with CPRM compatible recorders and discs.

## Dolby Digital

This is a method of coding digital signals developed by Dolby Laboratories. Apart from stereo (2-channel) audio, these signals can also be multi-channel audio. A large amount of audio information can be recorded on one disc using this method.

When recording on this unit Dolby Digital (2 channel) is the default audio.

## Down-mixing

This is the process of remixing the multi-channel audio found on some discs into two channels. It is useful when you want to listen to the 5.1-channel audio recorded on DVDs through your television's speakers. Some discs prohibit down-mixing and this unit can then only output the front two channels.

## DPOF (Digital Print Order Format)

DPOF is the standard printing format for still picture data taken by a digital camera, etc. It is used for automatic printing at a photo developing store or on your home printer.

## Drive

In the instance of this unit, this refers to the disc (DVD), SD card (SD) and PC card (PC). These perform the reading and writing of data.

## DTS (Digital Theater Systems)

This surround system is used in many movie theaters. There is good separation between the channels, so realistic sound effects are possible.

## Dynamic range

Dynamic range is the difference between the lowest level of sound that can be heard above the noise of the equipment and the highest level of sound before distortion occurs.

Dynamic range compression means reducing the gap between the loudest and softest sounds. This means you can listen at low volumes but still hear dialog clearly.

## Film and video

DVD-Video are recorded using either film or video. This unit can determine which type has been used, then uses the most suitable method of progressive output.

Film is 24 or 30 frames per second, with motion picture film generally being 24 frames per second.

Video is 60 fields per second (two fields making up one frame).

## Finalize

A process that makes play of a recorded CD-R, CD-RW, DVD-R, etc. possible on equipment that can play such media. You can finalize DVD-R on this unit.

After finalizing, the disc becomes play-only and you can no longer record or edit.

## Folder

This is a place on the disc or memory card where groups of data are stored together. In the case of this unit, it refers to the place where still pictures (JPEG, TIFF) are stored.

## Formatting

Formatting is the process of making media such as DVD-RAM recordable on recording equipment.

You can format DVD-RAM and memory cards on this unit.

Formatting irrevocably erases all contents.

## Frames and fields

Frames refer to the single images that constitute the video you see on your television. Each frame consists of two fields.

Frame

Field

Field

- A frame still shows two fields, so there may be some blurring, but picture quality is generally better.
- A field still shows less picture information so it may be rougher, but there is no blurring.

## JPEG (Joint Photographic Experts Group)

This is a system used for compressing/decoding color still pictures. If you select JPEG as the storage system on digital cameras etc., the data will be compressed to 1/10–1/100 of its original size. The feature of JPEG is less deterioration in picture quality considering the degree of compression.

## LPCM (Linear PCM)

These are uncompressed digital signals, similar to those found on CDs. LPCM sound is available when recording in XP mode.

## MP3 (MPEG Audio Layer 3)

An audio compression method that compresses audio to approximately one tenth of its size without any considerable loss of audio quality. You can play MP3 you have recorded onto CD-R and CD-RW.

## Pan&Scan/Letterbox

In general, DVD-Video are produced with the intention that they be viewed on a widescreen television (16:9 aspect ratio), so images often don't fit regular (4:3 aspect ratio) televisions. Two styles of picture, "Pan & Scan" and "Letterbox", deal with this problem.

Pan&Scan: The sides are cut off so the picture fills the screen.

Letterbox: Black bands appear at the top and bottom of the picture so the picture itself appears in an aspect ratio of 16:9.

## Playback control (PBC)

If a Video CD has playback control, you can select scenes and information with menus.

(This unit is compatible with version 2.0 and 1.1.)

## Progressive/Interlace

NTSC, the video signal standard, has 480 interlaced (I) scan lines, whereas progressive scanning uses twice the number of scan lines. This is called 480P.

Using progressive output, you can enjoy the high-resolution video recorded on media such as DVD-Video.

Your television must be compatible to enjoy progressive video.

## Protection

You can prevent accidental erasure by setting writing protection or erasure protection.

## Sampling frequency

Sampling is the process of converting the heights of sound wave (analog signal) samples taken at set periods into digits (digital encoding). Sampling frequency is the number of samples taken per second, so larger numbers mean more faithful reproduction of the original sound.

## Thumbnail

This refers to a miniature representation of a picture used to display multiple pictures in the form of a list.

## TIFF (Tag Image File Format)

This is a system used for compressing/decoding color still pictures. A common format for storing high quality images on digital cameras and other devices.

## VBR (Variable bitrate)

This is a method of video recording that adjusts the bit rate according to video signal.

# Troubleshooting guide

Before requesting service, make the following checks. If you are in doubt about some of the check points, or if the remedies indicated in the chart do not solve the problem, refer to the "Customer Services Directory" on page 55.

## The following do not indicate a problem with this unit:

- |   |   |
|---|---|
| <ul style="list-style-type: none"> <li>●Regular disc rotating sounds. The sound of the disc rotating may become louder especially when finalizing a DVD-R.</li> <li>●Poor reception due to atmospheric conditions.</li> </ul> | <ul style="list-style-type: none"> <li>●Image disturbance during search.</li> <li>●Interruptions in reception due to periodic satellite broadcasting breaks.</li> </ul> |
|---|---|

## Power

## Page

<b>No power.</b>	●Insert the AC power supply cord securely into a known active AC outlet.	7
<b>The unit switches to standby mode.</b>	●This is a power saving feature. Change "Off Timer" in the SETUP menu, if you would prefer.	42
	●One of the unit's safety devices is activated. Press [POWER ⏻/⏻] on the main unit to turn the unit on.	—
	●If the unit is not placed in the timer recording standby mode two minutes before the time when the timer recording is scheduled to commence, it turns off automatically and will be placed in the standby mode. (The "⏻" appears on the display.) If play or recording is being performed, it will be interrupted.	—

## Displays

<b>The display is dim.</b>	●Change "Front Display" in the SETUP menu.	44
<b>"12:00" is flashing on the unit's display.</b>	●Set the clock.	11
<b>Compared to the actual recorded time, the remaining time displayed is less.</b>	●The displayed recording/play time is converted from the number of frames at 29.97 frames (equal to 0.999 seconds) to one second. There will be a slight difference between the time displayed and the actual elapsed time (e.g., actual one-hour elapsed time may display as approximately 59 minutes 56 seconds). This does not affect the recording.	—
<b>The time recorded on the disc and the available time shown do not add up. The play time shown for MP3 does not agree with the actual time.</b>	●Times shown may disagree with actual times.	—
	●More disc space than the actual recording time is used after recording or editing the DVD-R 200 times or more.	—
	●While searching, the elapsed time may not display correctly. ●Even if you erase recorded content from the DVD-R, there is no increase in disc space.	—

## TV screen and video

<b>Television reception worsens after connecting the unit.</b>	●This can occur because the signals are being divided between the unit and other equipment. It can be solved by using a signal booster, available from audio-visual suppliers.	—
<b>Status messages do not appear.</b>	●Select "Automatic" in "Status Messages" in the SETUP menu.	44
<b>The blue background does not appear.</b>	●Select "On" in "Blue Background" in the SETUP menu.	44
<b>The 4:3 aspect ratio picture expands left and right.</b>	●Use the television to change the aspect. If your television does not have that function, set "Progressive" in the Video menu to "OFF".	31
	●Check the settings for "TV Type", "4:3 TV Settings for DVD-Video" or "4:3 TV Settings for DVD-RAM" in the SETUP menu.	44
<b>Screen size is wrong.</b>		
<b>There is a lot of after-image when playing video.</b>	●Change the settings for "3D NR" and "Integrated DNR" to "0" or turn "MPEG-DNR" off if it is on.	31
<b>When playing DVD-Video using progressive output, one part of the picture momentarily appears to be doubled up.</b>	●Set "Progressive" in the Video menu to "OFF". This problem is caused by the editing method or material used on DVD-Video, but should be corrected if you use interlace output.	31
<b>There is no apparent change in picture quality when adjusted with the Video menu in the on-screen menus.</b>	●The effect is less perceivable with some types of video.	—
<b>The images from this unit do not appear on the television.</b>	●Make sure that the television is connected to the VIDEO OUT terminal, S-VIDEO OUT terminal or COMPONENT VIDEO OUT terminals on this unit.	7
	●Make sure that the television's input setting (e.g., VIDEO 1) is correct.	—
<b>Picture is distorted.</b>	●The television isn't compatible with progressive signals. Press and hold [■] and [TIME SLIP] on the main unit at the same time for about 5 seconds. The setting will change to interlace.	—

## Product Service

- Damage requiring service**—The unit should be serviced by qualified service personnel if:
  - The AC power supply cord or AC adaptor has been damaged; or
  - Objects or liquids have gotten into the unit; or
  - The unit has been exposed to rain; or
  - The unit does not operate normally or exhibits a marked change in performance; or
  - The unit has been dropped or the cabinet damaged.
- Servicing**—Do not attempt to service the unit beyond that described in these operating instructions. Refer all other servicing to authorized servicing personnel.
- Replacement parts**—When parts need replacing ensure the servicer uses parts specified by the manufacturer or parts that have the same characteristics as the original parts. Unauthorized substitutes may result in fire, electric shock, or other hazards.
- Safety check**—After repairs or service, ask the servicer to perform safety checks to confirm that the unit is in proper working condition.

### Product information

For product information or assistance with product operation:

Refer to "Customer Services Directory" on page 55.

## Maintenance/Disc and card handling

### Unit care

The precision parts in this unit are readily affected by the environment, especially temperature, humidity, and dust. Cigarette smoke also can cause malfunction or breakdown.

To clean this unit, wipe with a soft, dry cloth.

- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically treated cloth, read the instructions that came with the cloth carefully.

Observe the following points to ensure continued listening and viewing pleasure.

Dust and dirt may adhere to the unit's lens over time, making it impossible to record or play discs.

Use the **DVD-RAM/PD lens cleaner (LF-K123LCA1, where available)** about once every year, depending on frequency of use and the operating environment. Read the lens cleaner's instructions carefully before use.

### Disc and card handling

#### How to hold a disc or card

Do not touch the recorded surface or the terminal surface.

#### If there is dirt or condensation on the disc

##### RAM DVD-R

- Clean with an optional DVD-RAM/PD disc cleaner (LF-K200DCA1, where available).
- Do not use cleaners for CDs or cloths.

##### DVD-A DVD-V VCD CD

Wipe with a damp cloth and then wipe dry.

#### Handling precautions

- Do not attach labels or stickers to discs. (This may cause disc warping and un-balanced rotation, rendering it unusable.)
- Do not write on the label side with a ball-point pen or other writing instrument.
- Do not use record cleaning sprays, benzine, thinner, static electricity prevention liquids or any other solvent.
- Do not use scratch-proof protectors or covers.
- Do not expose the terminals of the card to water, garbage or other strange things.
- Do not use the following discs:
  - Discs with exposed adhesive from removed stickers or labels (rented discs, etc).
  - Discs that are badly warped or cracked.
  - Irregularly shaped discs, such as heart shapes.
- Do not place in the following areas:
  - In direct sunlight.
  - In very dusty or humid areas.
  - Near a heater.
  - Where static electricity or electromagnetic waves occur.

## Panasonic DVD Recorder Limited Warranty

### Limited Warranty Coverage

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company or Panasonic Sales Company (collectively referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("warranty period"), at its option either (a) repair your product with new or refurbished parts, or (b) replace it with a new or a refurbished product. The decision to repair or replace will be made by the warrantor.

Product or Part Name	Parts	Labor
DVD Recorder	One (1) Year	One (1) Year
Rechargeable Batteries, DVD-RAM Disc (in exchange for defective item)	Ten (10) Days	Not Applicable

During the "Labor" warranty period there will be no charge for labor. During the "Parts" warranty period, there will be no charge for parts. You must carry-in or mail-in your product during the warranty period. If non-rechargeable batteries are included, they are not warranted. This warranty only applies to products purchased and serviced in the United States or Puerto Rico. This warranty is extended only to the original purchaser of a new product which was not sold "as is". A purchase receipt or other proof of the original purchase date is required for warranty service.

### Carry-In or Mail-In Service

For Carry-In or Mail-In Service in the United States call 1-800-211-PANA (7262) or visit Panasonic Web Site: <http://www.panasonic.com>  
For assistance in Puerto Rico call Panasonic Sales Company (787)-750-4300 or fax (787)-768-2910.

### Limited Warranty Limits And Exclusions

This warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accidents, misuse, abuse, neglect, mishandling, misapplication, alteration, faulty installation, set-up adjustments, misadjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, or commercial use (such as in a hotel, office, restaurant, or other business), rental use of the product, service by anyone other than a Factory Servicenter or other Authorized Servicer, or damage that is attributable to acts of God.

**THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY.** (As examples, this excludes damages for lost time, travel to and from the servicer, loss of media or images, data or other recorded content. The items listed are not exclusive, but are for illustration only.) **ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.**

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state. If a problem with this product develops during or after the warranty period, you may contact your dealer or Servicenter. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.

**PARTS AND SERVICE WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY ARE YOUR RESPONSIBILITY.**

### ■ Cable coaxial de 75 Ω

La señal de imagen y sonido procedente de este aparato no pasa a través del cable coaxial de 75 Ω al televisor. Asegúrese de conectar uno de los terminales siguientes de este aparato al televisor: el terminal AUDIO/VIDEO OUT, el terminal S-VIDEO OUT o el terminal COMPONENT VIDEO OUT. Si el televisor no tiene ninguno de estos terminales, consulte a su concesionario local.

### No conecte la unidad a través de una videograbadora

Las señales de vídeo que pasan a través de videograbadoras afectarán a los sistemas de protección del copyright, y la imagen no se mostrará correctamente en el televisor.

- Cuando conecte a un televisor con videograbadora incorporada, conecte a los terminales de entrada del televisor, no a los de la videograbadora.

## Conexión de un receptor de TV por cable

Consulte la ilustración que aparece en la página 8 de la sección en idioma inglés.

- Necesita suscribirse a los servicios de TV por cable para ver su programación.
- Consulte a su proveedor de servicios en cuanto al receptor de TV por cable apropiado.
- Si recibe únicamente su programación de un servicio de satélite, la guía de programas de esta unidad no recibirá las listas de programas ni la información de los canales. Sin esta información no se podrán hacer grabaciones basadas en programas. Sin embargo, sí se podrán hacer grabaciones manualmente.

### ■ ¿Debo usar el terminal AUDIO/VIDEO OUT o el RF OUT?

Si su receptor de TV por cable tiene terminales AUDIO/VIDEO OUT y RF OUT, le recomendamos conectar el terminal AUDIO/VIDEO OUT al terminal IN3 (L3) de la unidad. Esta conexión proporciona la mejor calidad de imagen.

- El terminal S-VIDEO proporciona una imagen más viva que la del terminal VIDEO.

### Ajuste del IR Blaster

Coloque el IR Blaster delante del sensor de señales del receptor de TV por cable.

(M)	Lea las instrucciones del receptor de TV por cable relacionadas con la posición del sensor de señales.
(N)	Si es necesario, utilice cinta con adhesivo en ambas caras (incluida) para asegurar el IR Blaster a una superficie plana.
(O)	Ej. Superficie de base de televisión
(P)	Receptor de TV por cable
(Q)	Si despegas la cinta adhesiva, la superficie podrá dañarse. Después de confirmar que el receptor de TV por cable esté funcionando correctamente, asegúrelo empleando la cinta adhesiva.

## Preparación del sistema de guía de TV en pantalla

Después de enchufar la unidad en una toma de CA de casa y pulsar [DVD POWER] para encender la unidad por primera vez, ésta inicia la preparación del sistema de guía de TV en pantalla.

**En el sistema de guía de TV en pantalla sólo se muestra inglés. No se pueden mostrar otros idiomas.**

### Preparación

- Encienda el televisor y seleccione la entrada de vídeo apropiada a las conexiones de esta unidad.
- Cuando use el receptor de TV por cable, compruebe lo siguiente.
  - Asegúrese de que IR Blaster esté conectado y posicionado correctamente (➔ páginas 8, 56).
  - Asegúrese de que el receptor de TV por cable esté encendido.

- 1 Pulse [DVD POWER].
- 2 Prepare el entorno de funcionamiento de su televisor siguiendo los mensajes de la pantalla.
  - Mueva el cursor con [▲, ▼, ◀, ▶] y pulse [ENTER] para confirmar.
  - Pulse los botones numerados para introducir números.
  - Pulse [ENTER] para avanzar a la pantalla siguiente.
  - Consulte las indicaciones de la parte inferior de la pantalla.

### Ajuste lo siguiente:

- País [USA (EE.UU.)/Canada (Canadá)]
- Código postal
- Servicio de TV por cable conectado a esta unidad [Yes (Sí)/No]
- Receptor de TV por cable conectado a esta unidad [Yes (Sí)/No]

Si está usando un receptor de TV por cable, ajuste lo siguiente:

- Canales de conexión del receptor de TV por cable (Ch2/Ch3/Ch4/L3)
  - Marca del receptor de TV por cable
  - Código de señal IR
- Asegúrese de que su receptor de TV por cable sintonice el canal que aparece en la pantalla y pulse [ENTER]. Se hace una prueba.

- Si el receptor de TV por cable ha cambiado al canal 09, seleccione “Yes” (Sí) y pulse [ENTER].
- Si el receptor de TV por cable sigue sintonizado al mismo canal, seleccione “No” y pulse [ENTER]. Repita este paso hasta que el receptor de TV por cable cambie al canal 09.

### El contenido ajustado se visualiza junto

Zip code - 11111 (USA)  
Cable - Yes  
Cable box - No

- Si la información es correcta, seleccione “Yes, end setup” (Sí, finalice la preparación) y pulse [ENTER].
- Si la información no es correcta, seleccione “No, repeat setup process” (No, repita el proceso de preparación) y pulse [ENTER] para iniciar de nuevo el ajuste.

Una vez confirmado el contenido introducido aparece la pantalla siguiente.
