Soldering zone ; 60sec MAX

(Notice)
Maximum 2-times soldering

5. 2. About mounting with Sn-Pb solder paste.

Mounting with Sn-Pb solder paste is not recommended because it has a possibility of reducing reliability to connect with Sn-3.0Ag-0.5Cu solder balls.

5. 3. The wave soldering method is not supported.

5. 4. Partical heat supply method (by soldering iron) is not supported.

7. Regarding the underfill material

There are some cases that the underfill material is applied as purpose to reinforce the soldered junction of the package.
Since the mount reliability depends on the resin material or coating condition , it may deteriorate on the contrary.
Therefore , it is necessary to evaluate it sufficiently for its application.
In term of the coating condition , it is preferable that there is an enough material beyond the each four sides of a packeage.

<Preferable example>

(There is a Underfill resin evenly at each four sides.)

<Non preferable example>

(There is little Underfill resin at one or two sides.)

8. External dimentions
