

ECOM EN2

Portable Emission Analyzer

- Measures O₂, CO, NO, NO₂, SO₂ & Low NO_x
- Calculates CO₂, efficiency, losses excess air & O₂ correction
- Thermoelectric gas cooler & Moisture removal
- Automatic CO over-range protection
- High Speed thermal printer
- On-board flowmeter with digital read out
- Data processing Software with Bluetooth
- Backlit Display
- Ambient and Flue Gas temperature measurement
- Undercase removable storage container

The ECOM EN2 is a compact portable combustion analyzer, offering features found on larger, more expensive units.

The instrument is housed in a rugged aluminum frame and hard-side case and measures up to 4 gases, from O₂, CO, NO, NO₂, plus probes for temperature and stack draft / pressure. The EN2 also calculates CO₂, efficiency and excess air.

A strong, internal pump and peltier gas cooler with automatic condensate drain ensures proper sample conditioning, leading to better accuracy and longer sensor life. An on board printer, SD Memory Card and wireless Bluetooth are standard features.

Common applications for the EN2 include set-up, maintenance and emission monitoring of natural gas, diesel, and oil fired boilers, burners, and reciprocating engines. The compact size, simple operation, and long battery life make the EN2 a perfect tool for field technicians.
