Note: *If any item contained is damaged or missing, please contact your local dealer immediately.*

② Hardware Installation

Attaching the Camera Stand

The Internet Camera comes with a camera stand, which has a swivel ball screw head that can be attached to the camera's screw hole on the top/bottom panel. Attach the camera stand to the camera and station it for your application.

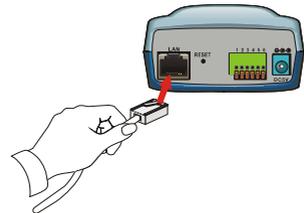

Attaching the Antenna (for wireless model)

From the rear panel of the camera, screw the provided external Antenna into the antenna connector.

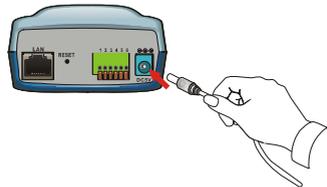

Connecting the Ethernet Cable

Connect an Ethernet cable to the network cable connector located on the camera's rear panel, and then connect it to the network.

Connecting the Power Supply

Connect the external power supply to the DC power input connector located on the camera's rear panel, and then connect it to your wall outlet.

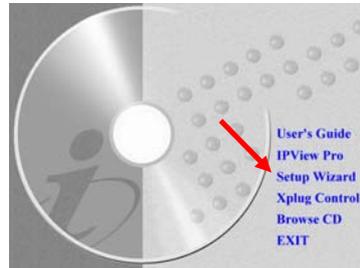

Tip: You can confirm the power source is supplied from the Power LED on the camera.

3 Running the Setup Wizard

The Setup Wizard is a convenient tool that will guide you through the installation of your camera easily and quickly. After connecting the camera to your computer, you can install the Setup Wizard and complete the configuration now.

1. Insert the Installation CD-ROM into your CD-ROM drive.

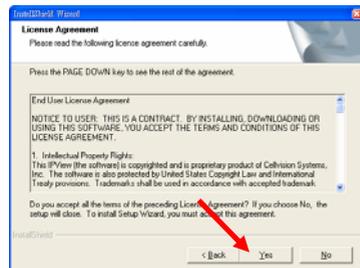

Click **Setup Wizard**.

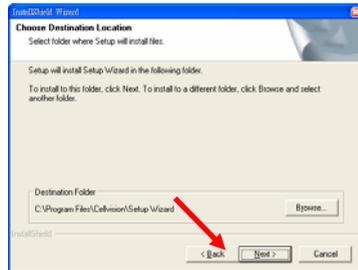

2. Click **Next**.

3. Click **Yes**.

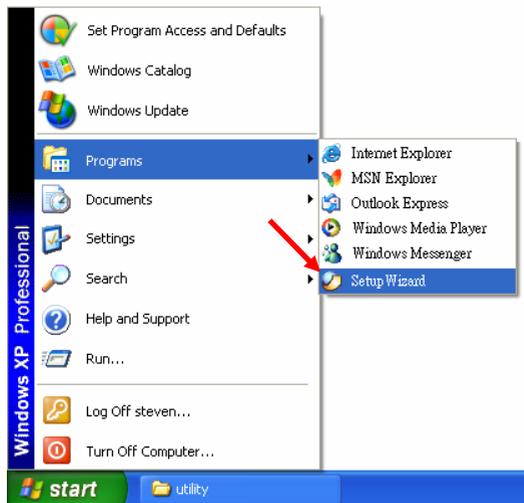

4. Click **Next**.

5. Click **Finish**.

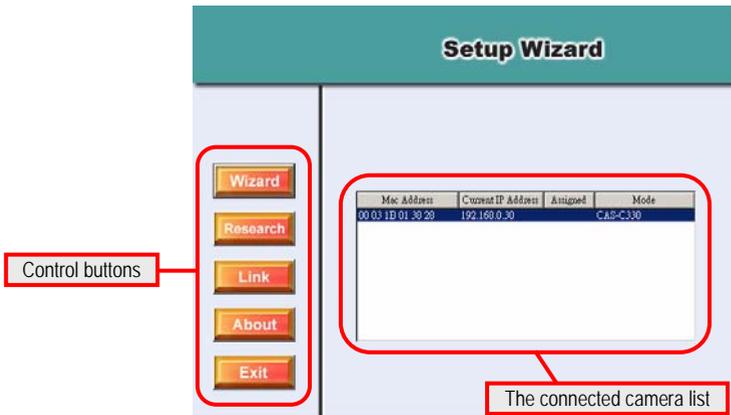

To run the Setup Wizard, click **Start -> Programs -> Setup Wizard**.

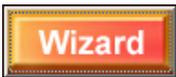

4

Using the Setup Wizard

When you launch the Setup Wizard, the main window will appear as shown, and the connected camera will be displayed in the list.

The components on the Setup Wizard:

Click **Wizard** to begin configuring the selected camera.

Click **Research** allows you to search the connected camera again.

Click **Link** to launch the web browser and view the images.

Click **About** to show the general information of the selected camera.

Click **Exit** to close the Setup Wizard.

Changing the Admin ID and Password

By default settings, the Admin ID and Password are blank. For security purpose, you are recommended to change the Admin ID and Password immediately.

Click **Wizard**. The dialog window appears as shown, asking you to enter the Admin ID and Password. If required, select the **Change** options and enter the new Admin ID and Password.

Enter **admin** in both boxes and then click **Next**.

The settings of IP Address, Subnet Mask and Default Gateway must correspond with your camera and networking settings. Please check with your network administrator for correct settings.

Click **Next**.

This step is for wireless model only. If you want to use wireless function, select the Enable option. Then, you have to set up the related settings in the following fields of the screen, including **Connection Mode**, **Network Name (SSID)**, **Wireless Channel**, **Security Mode**, and **Authentication**.

If you enable the **Security Mode**, you have to set up the configuration in the following window.

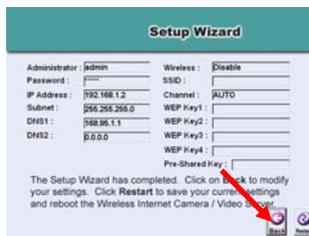

The screenshot shows the 'Setup Wizard' window with the title 'Enter the default ID and Password.' Below the title, it says 'Set up an Admin ID and Password to secure your camera. Click Next to continue.' There are two columns of input fields. The first column has 'Admin ID:' followed by a text box containing 'admin', and 'New ID:' followed by a text box. The second column has 'Password:' followed by a text box, 'New Password:' followed by a text box, and 'Reconfirm:' followed by a text box. There are checkboxes for 'Change' next to the 'New ID' and 'New Password' fields. At the bottom right, there are three buttons: 'Back', 'Next', and 'Exit'. A red arrow points to the 'Next' button.

The screenshot shows the 'Setup Wizard' window with the title 'Set IP Address'. It contains three input fields: 'IP Address' with the value '192.168.1.2', 'Subnet Mask' with the value '255.255.255.0', and 'Default Gateway' with the value '192.168.1.1'. At the bottom right, there are three buttons: 'Back', 'Next', and 'Exit'. A red arrow points to the 'Next' button.

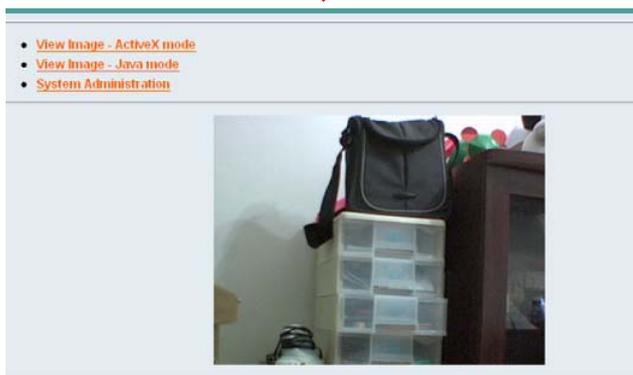

The screenshot shows the 'Setup Wizard' window with the title 'Wireless Interface'. It has a 'Wireless' checkbox that is checked. Below it, there are several settings: 'Connection mode' with radio buttons for 'Infrastructure' (selected) and 'Adhoc'; 'Network Name (SSID)' with a text box; 'Wireless Channel' with a dropdown menu; 'Security Mode' with a dropdown menu; and 'Authentication' with radio buttons for 'Open' (selected) and 'WEP'. At the bottom right, there are three buttons: 'Back', 'Next', and 'Exit'. A red arrow points to the 'Next' button.

This screenshot is a zoomed-in view of the 'Wireless Interface' screen, focusing on the 'Change Encryption WEP Key' section. It shows 'New Encryption WEP Key' and 'Reconfirm WEP Key' text boxes. There are also radio buttons for 'ASCII' and 'HEX'. At the bottom right, there are three buttons: 'Back', 'Next', and 'Exit'. A red arrow points to the 'Next' button.

This window displays the settings you set up. For any change, click **Back** to modify your settings. Otherwise, click **Restart** to save and apply the settings.

The configuration is completed, and you will return to the main window. Click **Link** to launch the web browser and view the images.

5 Tips

Software Information

Click About to show the general information of the selected camera.

Click **OK** to return to the main window.

Technical Support

For more information, please refer to the **User's Guide** located on the CD-ROM.
