

Legend Commercial POWER DVD Quick Start V1.1

(Only For Computer with DVD-ROM)

Run

There is a shortcut icon  in the desktop, double click the icon to run it, then you get the following player interface:

The figure above shows the basic operation of the Power DVD, and you can click the '?' on the right bottom of the player to get detailed information.

Warning

A. About DVD title region

Most of DVD titles have a regional code for the purpose of copyright protection, and there are six regions over the world as following:

- 1: USA, Canada.
- 2: Western Europe, Japan and South Africa.
- 3: SE Asia.
- 4: Australia, South America.
- 5: Russia, Eastern Europe and Africa.
- 6: China.

B. Regional Code Settings

You can see a 'Region Playback Control' window the first time you insert a DVD title disc with regional code. Click 'OK' means setting regional code of Power DVD same to the inserted DVD title. Then you can play the DVD title with this player. If you click 'Cancel' means you can not play it.

If you insert a DVD title with a different regional code later, the 'Region Playback Control' window will popup again, asking you if you want change the regional code. You can choose changing the regional code of Power DVD the same as to that of the inserted DVD title and play it, or not changing it if you do not want to play the DVD title.

Caution:Power DVD will only allow you to change the regional setting five times and the regional code is fixed as the last setting. Once the region code is fixed, you can only playback the DVD titles with the same region code as the last setting or some DVD titles which are not region-specific.
