#### Notes

- The operational distance is shortened when the signal sensor is directly exposed to strong light.
- Protect the remote control from shock and vibration to avoid damage.
- Do not place the remote control in hot or humid locations.
- Aim the transmitter on the remote control at the signal sensor and ensure there are no obstacles between the transmitter and sensor.

---

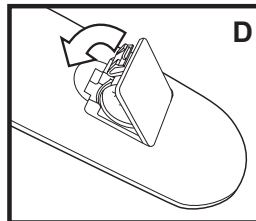

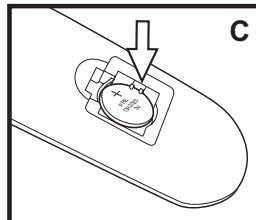

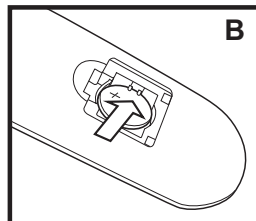

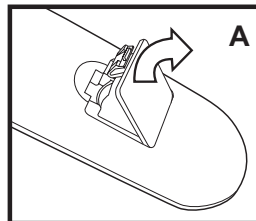

## Inserting the Remote Control Battery

- 1 Open the battery compartment cover at the back of the remote control (A).
- 2 Insert the battery paying attention to the polarity markings inside the battery compartment (B) and set the battery in place (C).
- 3 Replace the battery compartment cover (D).

### Caution

- If the remote control is not used for a long period, remove the battery and store them properly.
- Handle damaged or leaking battery carefully, and wash hands with soap if they come in contact with leaked chemical fluids.
- Refer to your local recycling or waste disposal rules and contact a local waste disposal vendor to dispose of used battery.
- Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the equipment manufacture. Discard used battery according to manufacturer's instructions.
- Check the remote control battery on a regular basis. Clean any stains on the rear battery cover immediately and use new battery if fluid is leaking from old battery.

Situation	Solution
Remote control doesn't work.	<ul style="list-style-type: none"><li>• Make sure the battery is inserted correctly.</li><li>• Replace the battery with a new one.</li><li>• Make sure the TV power cord is plugged in.</li><li>• Make sure the path between the remote control and the sensor is clear.</li><li>• Try operating the remote control at a closer distance to the TV. Don't exceed an angle of 30° from the sensor.</li></ul>
