

Installation guide

ACS-CP-U control panel IP54 mounting platform kit (+J410)

Installation instruction

1. Drill holes to the installation plate using the mounting template on the next page.
2. Insert the lead-through rubber grommet to the mounting plate hole.
3. Fasten the control panel holder with the screws included in the kit. Tightening torque: 1.2 N·m
4. Ground the cable lug of the grounding cable with a fastening screw to an unpainted point.
5. Insert the plug to connector X7 in the control unit.
