Manual for
FOMA® SO905i '07.11

SO905i

WORLD WING

3G+GSM

DCMX iD

NTT DoCoMo W-CDMA/GSM/GPRS System Mobile Phone

Thank you for your purchase of the new "FOMA SO905i" mobile phone.
For proper use of the FOMA SO905i, read this manual and each manual attached to devices such as the battery pack carefully before and while you use the FOMA SO905i. For more information on manuals, contact the inquiries on the backcover of this manual. The FOMA SO905i is the efficient partner of yours. Please handle the FOMA SO905i with care and use it regularly for a long time.

Before using the FOMA terminal

● Because a FOMA terminal operates using radio frequencies, it cannot be used inside a tunnel, underground, in a building or other locations where radio waves do not reach the FOMA terminal, in locations with weak radio wave condition, or outside of the FOMA's service area. The FOMA services may not be available on high upper floors of high-rise apartments or buildings, even if you can see no obstructions around you. On occasion, your calls may become disconnected even in areas with strong radio wave condition, even if you are not moving, or even if there are 3-antenna marks in the FOMA terminal's display.

● Please use discretion and mind your manners when using the FOMA terminal in public areas or crowded/quiet places to keep from bothering others.

● Note that because the FOMA terminal operates on radio frequencies, your calls are at risk of being intercepted by the third party. However, the W-CDMA/GSM/GPRS system automatically scrambles all calls through a private call feature. Therefore, even if the third party successfully intercepts your call, they will only hear noise.

● The FOMA terminal operates on radio frequencies by converting voice into digital signals. If the caller moves into an area of adverse radio wave condition, the digital signal may not be restored accurately, and the voice received in the call may differ slightly from the actual voice.

● The user hereby agrees that the user shall be solely responsible for the result of the use of SSL. Neither DoCoMo nor the certifiers as listed herein make any representation and warranty as for the security in the use of SSL. In the event that the user shall sustain damage or loss due to the use of SSL, neither DoCoMo nor the certifiers shall be responsible for any such damage or loss.
Certifiers: VeriSign Japan K.K., Cybertrust, Inc., GlobalSign K.K., RSA Security Inc., and SECOM Trust Systems Co., Ltd.

● The FOMA terminal has FOMA Plus-Area and FOMA HIGH-SPEED Area support.

● The FOMA terminal can be used only via the FOMA network provided by DoCoMo and DoCoMo's roaming area.

● Always keep the information you save in the FOMA terminal (e.g. phonebook entries, schedules, text memos, record messages, voice memos, videophone messages) in a separate note. Even if the data may be lost as a result of malfunction, repair, change, or other handling of the FOMA terminal, under no condition will DoCoMo be held liable for any lost data saved in the FOMA terminal.

● It is strongly recommended to save important data in the microSD memory card. Also, if you have a PC, you can transfer/save data such as phonebook entries, mail, schedules in your PC using the DoCoMo keitai datalink.

● Before using this manual
The FOMA terminal supports the Kisekae tool (P.115). When you use the Kisekae tool to change the design of the menu display, some menu types may change the menu structure depending on the frequency in use. The digits assigned to menu items may not be applied.
In this case, you cannot operate the FOMA terminal as explained in this manual, so please change the menu to the Standard menu or reset the menu settings (P.35, 116).

The latest information on this manual is ready for download at the NTT DoCoMo's website.

Information on Using the Manual and How to Look up in the Manual

This manual guides you through the operating instructions with step-by-step screen examples for each operating procedure to ensure that you operate the FOMA terminal properly.

■How to Look up in the Manual

This manual employs several search methods so that it can provide the most appropriate way to find a page relating to your desired function or service flexibly according to your need or situation.

For details, see the next page.

◆ Index (P.418)

Search by a function or service name known to you or a function name to be displayed on the FOMA terminal's display.

◆ Easy Search (P.4)

Search a function that you want to know or you consider useful to know from a listing sorted by purpose or by a function name.

◆ Headings on the cover (Cover page)

Search the description page of a desired function in the order of "Cover page" → "Chapter opening page (the first page of a chapter)" → "Description page". The opening page of each chapter contains detailed contents of the chapter.

◆ Contents (P.6)

Search by purpose or a function name starting from chapters that are categorized by functions.

◆ Main functions (P.8)

Search for main functions of SO905i, such as new and useful functions.
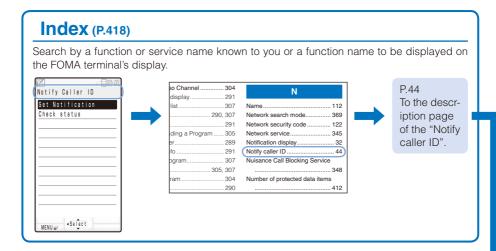

◆ List of menus (P.374)

The menu items, which appear on the display of the FOMA SO905i, and default settings at the time of purchase are listed.

◆ Quick Manual (P.426)

The basic operations of the FOMA terminal are explained briefly. Cut and fold these pages into a booklet and take it with you for convenient reference. The Quick Manual for "Overseas Use" is also included for convenient reference when the FOMA terminal is used abroad.
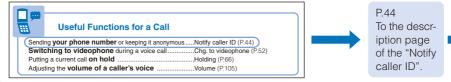

● Please note that "FOMA SO905i" is called the "FOMA terminal" in this "Manual for FOMA SO905i".
● This manual describes the functions that can be performed using the microSD memory card. To use these functions, you need the optional microSD memory card.
  ● About the microSD memory card (P.278)
● Reproduction or reprint of all or part of this manual without prior permission is forbidden.
● The contents of this manual are subject to change without notice.

A function, referred to as "Notify caller ID" here, can be searched in diverse ways as follows.

Index (P.418)

Search by a function or service name known to you or a function name to be displayed on the FOMA terminal's display.

Notify Caller ID
Set Notification
Check status

P.44
To the description page of the "Notify caller ID".

Easy Search (P.4)

Search a function that you want to know or you consider useful to know from a listing sorted by purpose or by a function name.
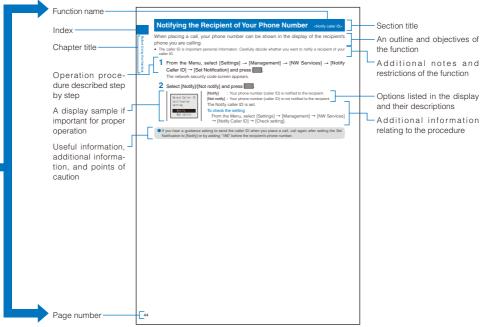

Useful Functions for a Call

Sending **your phone number** or keeping it anonymous .....Notify caller ID (P.44)
Switching to videophone during a voice call ....Chg. to videophone (P.52)
Putting a current call **on hold** ....Holding (P.66)
Adjusting the **volume of a caller's voice** ....Volume (P.105)

P.44
To the description page of the "Notify caller ID".

Headings on the cover (Cover page)

Search the description page of a desired function in the order of "Cover page" → "Chapter opening page (the first page of a chapter)" → "Description page". The opening page of each chapter contains detailed contents of the chapter.

Before Using the Handset

Notifying the Recipient of Your Phone Number <Notify caller ID>

When placing a call, your phone number can be shown in the display of the recipient's phone you are calling.
• The caller ID is important personal information. Carefully decide whether you want to notify a recipient of your caller ID.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Notify Caller ID] → [Set Notification] and press ▤.
The network security code screen appears.

2 Select [Notify]/[Not notify] and press ▤.

Select Caller ID notification setting

Notify
Not notify

[Notify] : Your phone number (caller ID) is notified to the recipient.
[Not notify] : Your phone number (caller ID) is not notified to the recipient.
The Notify caller ID is set.
To check the setting
From the Menu, select [Settings] → [Management] → [NW Services] → [Notify Caller ID] → [Check setting].

● If you hear a guidance asking to send the caller ID when you place a call, call again after setting the Set Notification to [Notify] or by adding "186" before the recipient's phone number.

What is i-mode mail?, Mail menu, Compose and send mail, Compose and send Deco-mail, Template, File attachment, Save mail, Receive option, Check new message, Received/sent/saved mail, Mail setting, MessageR/MessageF, Area Mail setting, Compose and send SMS, and so on...

Main Functions of the FOMA SO905i

"FOMA" is the name of NTT DoCoMo's mobile service based on the W-CDMA (Wideband Code Division Multiple Access) system, which has been approved as a global standard of third generation (3G) wireless communication systems (IMT-2000 or International Mobile Telecommunications-2000).

It's amazing because it's i-mode

i-mode is an online service that enables you to take advantage of valuable information from i-mode Menu sites (Program) and i-mode compatible sites. This service also enables you to exchange e-mail with great ease.

i-mode mail/Deco-mail/Deco mail pict.

Besides the main body of text, you can attach up to 10 files (JPEG, ToruCa, PDF, etc.) of up to 2M bytes in total. The FOMA terminal also supports Deco-mail and Deco-mail pictographs, allowing you to create and send more impressive mail by providing a diversity of expression, such as changing font color and size and using effect of background color on mail main body (P.178).

Mega i-αppli/Virtual game

By downloading i-αppli from a relevant site, you can enjoy games or obtain automatically updated information, such as about market shares and weather.

Mega i-αppli is supported, enabling you to enjoy games that require large amounts of memory, such as high resolution 3D games and full-featured role playing games. Additionally, the virtual games which are operated by sensuously such as "tilting" the mobile phone are also supported (P.206).

Compatible with High-Speed Communication

The FOMA HIGH-SPEED Area is supported and high-speed communication of the maximum reception speed 3.6Mbps and maximum transmission speed 384kbps can be achieved (P.358).

International Roaming

You can use the same FOMA terminal, phone number, and mail address as used in Japan when you are overseas (supported GSM/3G areas). A voice/videophone call, i-mode, i-mode mail, SMS, and network services are available (P.364).

GPS

You can use various services using the location information you obtain by GPS, such as viewing the map of your location, searching for information on your neighborhood, notifying your location information by attaching it to mail, letting the FOMA terminal to navigate you to the destination. The Map appli is preinstalled and allows you to use the high-definition map easily (P.228).

Chaku-Uta Full®/Uta-hodai/Music&Video Channel※/Video clip

※ Music&Video Channel is a paid service that requires a subscription.

Chaku-Uta Full® that allows you to download a whole track of music and Uta-hodai that allows you to enjoy favorite music as much as you want by the fixed fee are supported. Also, Music&Video Channel is supported to download a music program during the night only by setting it in advance and enjoy it. You can enjoy program with video by the SO905i. Moreover, because i-motion up to 10MB is supported, video clip which allows you to enjoy a music clip of a whole track of music is supported (P.304, 309).

Osaifu-Keitai/ToruCa

Once you download the Osaifu-Keitai-compatible i-αppli, you can use the FOMA terminal to deposit e-money to the IC card incorporated in the terminal as well as to check your credit balance and purchase history on a relevant site. Furthermore, the i-αppli for "DCMX" credit service provided by DoCoMo is preinstalled (P.212). The "iC transfer service" is also supported, which allows you to easily transfer data stored on the IC card to another one in a case such when replacing a FOMA terminal with a new model.

ToruCa is an e-card which you can obtain from a reading device (reader/writer) or site and exchanges with others easily using e-mail or infrared communication (P.220).

Kisekae Tool

You can download data such as a display of your favorite character from i-mode and change the stand-by display and menu display to the data at once. For SO905i, you can also change the orders of the menu items based on your usage and customize the menu display to your taste (P.115, 117).

Comprehensive Line-up of Network Services

- Voice Mail Service (Paid) (P.346)
- Call Forwarding Service (Free) (P.347)
- Caller ID Display Request Service (Free) (P.348)
- English Guidance Service (Free) (P.349)
- 2in1 (Paid) (P.352)
- Call Waiting Service (Paid) (P.347)
- Nuisance Call Blocking Service (Free) (P.348)
- Dual Network Service (Paid) (P.349)
- Multi Number Service (Paid) (P.350)

Camera Function

You can record still images and movies using two cameras, Out- and In-camera. This FOMA terminal has a wide range of installed camera functions including a scene selection function, an auto focus function, and a maximum 16:1 zoom function (P.138).

Out-camera : Effective number of pixels -- about 3,200,000 (Maximum number of recording pixels -- about 3,200,000)
In-camera : Effective number of pixels -- about 110,000 (Maximum number of recording pixels -- about 100,000)

microSD memory card

The small-sized microSD memory card is supported. You can copy the data, such as the FOMA terminal phonebook, mail, and images, to the microSD memory card and view the saved data on the FOMA terminal display.
You can also use the FOMA terminal as a microSD memory card reader/writer by connecting it to a PC (P.278, 285).

+JOG (Plus JOG)

You can select the items quickly by scrolling the JOG upward and downward. The JOG gives you more convenient operations with the 4-way keys (P.26).

"POBox Pro 2.0" and Convenient Text Input

The FOMA terminal is provided with the prediction conversion function "POBox Pro 2.0" (Predictive Operation Based On eXample Pro 2.0). Pressing ▲ ▼ ◀ ▶ allows you to move vertically and horizontally in the "POBox Pro 2.0", enabling to select the target word. Also, switching tabs allows you to enable the speedy selection of the matching words list (P.339).

TV Style

Using the 2 Step 1Seg Stand allows you to place the FOMA terminal in the horizontal orientation tilted with angles (of two levels: about 35 and 45 degrees) suitable for watching One Seg. Also, the Viewing Touch Key placed next to the display is available for using when watching One Seg in the TV style (P.27).

Stand-by books

There are five unique preinstalled Flash contents which display various information such as bits of knowledge, general knowledge, and picture books wave after wave every time when the stand-by display appears.
You can set your favorite content selecting from the [Preinstalled] folder in My picture of the Data Box and enjoy it (P.110).

High-Definition Wide VGA Liquid-Crystal Screen Display

A 3-inch high-resolution full wide liquid-crystal screen display is employed as the main display. Not only you can enjoy One Seg, but also perform mail and i-mode operations in the large screen comfortably. The same aspect ratio with wide-screen being employed, a full-screen view of wide pictures is available. Moreover, the organic EL display is employed as the sub-display, allowing a clear representation of the displayed contents such as text information and time.

RealityMAX

The high-resolution engine for mobile display based on the BRAVIA technology is employed. The contrast improvement and edge enhancement technologies enable the high contrast and sharply-edged screen image. Also, the rich color reproduction which is optimized for watching One Seg is achieved.

Lifetime Calendar

The Lifetime Calendar allows you to display an image, mail, Schedule, and Phonebook (birthday) data directly from the Calendar and provides you with more pleasant way of retrieving your memories saved in the FOMA terminal (P.318).

Quick deco. Mail Function

Fun Deco-mail is available with simple steps (P.182).

Infrared Communication/ Infrared Remote Control

You can exchange data with other FOMA terminals using the infrared communication function. You can also use the FOMA terminal to operate equipment such as a TV that is provided with infrared remote control. Moreover, the FOMA terminal supports the high-speed infrared communication standard IrSimple, allowing you to transfer high-quality images to compatible devices at a high speed (P.295, 298).

MUSIC Player

You can play back Chaku-Uta Full® and music data saved in the microSD memory card. You can operate the MUSIC Player using the Music Touch Key while the FOMA terminal is folded (P.307).

Multiaccess

You can use voice call and packet communication simultaneously. You can receive i-mode mail even when you are in a call and you can also make a call while you are using i-mode (P.316).

Security Settings (P.121)

Omakase Lock

If you misplace the FOMA terminal, it can be locked by your request. You can cancel the lock as well. See the contact address at the backcover of this manual for inquiries (P.127). Please note that Omakase Lock is a paid service*.

＊ When you subscribe to this service together with your request to suspend the FOMA terminal or while the FOMA terminal is suspended, the service charge is not required.

● Omakase Lock allows the FOMA terminal to be locked by a request from a subscriber of the UIM inserted in the FOMA terminal. Note that if the UIM subscriber and user of the FOMA terminal are different, the FOMA terminal may be locked without knowledge of the user by request of the subscriber.

Data Security Service

You can save the Phonebook, images, and mail of the FOMA terminal at the Data Security Service Center, and restore the data stored at the Center in case you lose any of it. You can also use a PC to edit/manage the data stored at the Center and update the FOMA terminal with newly edited data.
See the "Mobile Phone User's Guide【i-mode】FOMA version" to learn about the precautions and details on how to use the Data Security Service when you use this service. See the contact address at the backcover of this manual for inquiries. Data Security Service is a paid service that requires a subscription (P.135).

Making Full Use of SO905i !

Videophone

You can have a face-to-face conversation with a person in the distance. You can hear the person's voice from the speaker without changing any settings, so you can start a conversation soon. You can switch a call to a videophone call during a voice call without hanging up as well (P.48).

One Seg

You can watch One Seg that is the Terrestrial digital TV broadcasting designed for mobile devices. You can record a One Seg program while watching it or set a timer for watching/recording a One Seg program as well. Also, you can use convenient functions such as Time shift that allows you to pause a One Seg program temporarily and start watching it again from the point you paused and Rapid play with sound that allows you to play back a recorded video at about 1.3x speed (P.240).

When you watch One Seg in the TV style, using the 2 Step 1Seg Stand allows you to place the FOMA terminal on the flat surface in the horizontal orientation and watch One Seg with full-wide horizontal screen display.

Safety Precautions (Observe Strictly)

For safe and proper use of the FOMA terminal, please read the "Safety Precautions" prior to use. Keep the Manual in a safe place for future reference.
ALWAYS observe the safety precautions since they intend to prevent personal injury or property damage.

■ The following symbols indicate the different levels of injury or damage that may result if the guidelines are not observed and the FOMA terminal is used improperly.

⚠ DANGER	Failure to observe these guidelines may immediately result in death or serious injury.
⚠ WARNING	Failure to observe these guidelines may result in death or serious injury.
⚠ CAUTION	Failure to observe these guidelines may result in injury and property damage.

■ The following symbols indicate specific directions.

🚫 Don't	Indicates prohibited actions.
No Disassembly	Indicates not to disassemble.
No liquids	Indicates not to use where it could get wet.
No wet hands	Indicates not to handle with wet hands.
Do	Indicates compulsory actions in accordance with instructions.
Unplug	Indicates to remove the power plug from the outlet.

■ "Safety Precautions" are described in the following categories:

Handling the FOMA Terminal, Battery Pack, Adapter (including the charger), and UIM

⚠ DANGER

🚫 **Don't** Do not use, store, or leave the FOMA terminal, battery pack, adapter, or UIM in a place subject to high temperature such as close to fire, under direct sunlight, or in a car on an extremely hot day.

Doing so may cause the device to be deformed or damaged, or the battery pack to leak, overheat, explode, catch fire, or deteriorate in performance and longevity. Also, part of the case may heat up and cause burns.

No Disassembly Do not disassemble or modify the FOMA terminal, battery pack, or adapter and do not directly solder the battery pack to the FOMA terminal.

Doing so may cause accident such as fire, injury or electric shock, or malfunction. Also, it may cause the battery pack to leak, overheat, explode, or catch fire.

No liquids Do not get the FOMA terminal, battery pack, or adapter wet.

If liquids such as water or pet urine get into the device, it may cause overheating, electric shock, fire, malfunction, or injury. Be careful where and how you use the device.

Do Use the battery packs and adapters (including chargers) specified for the FOMA terminal by DoCoMo.

The use of products that are not specified may cause the FOMA terminal, battery pack, or other device to leak, overheat, explode, catch fire, or malfunction.

Battery Pack SO02, Desktop Holder SO07, FOMA AC Adapter 01/02, FOMA DC Adapter 01/02, FOMA Portable Charging Adapter 01, FOMA Dry Battery Adapter 01, FOMA AC Adapter 01 for Global use, FOMA USB Cable with Charge Function 01

※ Contact our service counter (DoCoMo shop, etc.) for information on other compatible products.

⚠ WARNING

🚫 **Don't**

Do not place the FOMA terminal, battery pack, adapter (including the charger), or UIM inside cooking appliance such as a microwave oven or high-pressure containers.

Doing so may cause the battery pack to leak, overheat, explode, or catch fire, or the FOMA terminal and adapter (including the charger) to overheat, smoke, catch fire, or damage the circuit parts.

🚫 **Don't**

Do not subject the FOMA terminal, battery pack, or adapter to excessive force or throw it.

Doing so may cause the battery pack to leak, overheat, explode, or catch fire, or cause the device to malfunction or catch fire.

🚫 **Don't**

Do not allow the charge and external connection terminals to come in contact with conducting foreign substances (a piece of metal, pencil lead, etc.). Never allow these objects to get into the FOMA terminal, battery pack, or adapter.

Doing so may cause fire or malfunction due to short circuits.

❗ **Do**

Power off the mobile phone before you step into a place where flammable gas can leak, such as gas stations.
Do not charge the battery as well because it may cause gas to ignite.

Keep the mobile phone powered off even when you use the Osaifu-Keitai in gas station premises or other similar place.
(When the IC card lock is set, cancel the lock and then power off the mobile phone.)

❗ **Do**

If you notice anything unusual about the FOMA terminal, battery pack, or adapter such as an unusual odor, overheating, discoloration or deformation during operation, charging or storage, immediately perform the following measures.

1. Remove the power plug from the power outlet or cigarette lighter socket.
2. Power off the FOMA terminal.
3. Remove the battery pack from the FOMA terminal.

Failure to do so may cause the device to overheat, explode, or catch fire, or the battery pack to leak.

⚠ CAUTION

🚫 **Don't**

Do not place on an unstable or inclined platform.

Doing so may cause the device to fall and cause injury or malfunction.

🚫 **Don't**

Do not keep in a place that is very humid, dusty, or subject to high temperature.

Doing so may cause malfunction.

❗ **Do**

If children use the FOMA terminal, parents or guardians should give them the proper instructions for use. Make sure that they use the FOMA terminal as instructed.

Failure to do so may cause injury.

❗ **Do**

Keep the FOMA terminal, battery pack, adapter, and UIM out of the reach of babies and infants.

Failure to do so may cause accidental swallowing or injury.

❗ **Do**

Be careful especially when you use the FOMA terminal while it has been continuously connected to the adapter (including the charger) for a long period of time.
If you continue using i-αppli, talking on the videophone, or watching One Seg for a long period of time with the battery being charged, the temperature of the FOMA terminal, battery pack, and adapter (including the charger) may rise.

If you are directly in contact with hot parts for a long period of time, it may cause your skin to become red, itch, or develop a rash depending on your physical condition and also it may cause low-temperature burn.

Handling the FOMA Terminal

⚠ WARNING

🚫 **Don't**
Do not aim the infrared data port towards eyes when using the infrared communication.

Doing so may affect your eyes. Also, aiming it towards other infrared devices may interfere with the operation of these devices.

🚫 **Don't**
Do not turn on the photo light with the lighting luminescence part close to the eyes.

Doing so may cause vision impairment or accident by dazzling eyes or surprising.

🚫 **Don't**
Do not leave the FOMA terminal in a place such as the dashboard near the automobile air bag, which can have an adverse effect on the phone when it inflates.

Doing so may cause accidents such as an injury, malfunction, or breakage, in case the air bag inflates.

🚫 **Don't**
Do not put the FOMA terminal in your breast pocket or inside pocket if you are wearing any electronic medical equipment.

If the FOMA terminal is used close to electronic medical equipment, it may cause malfunction.

🚫 **Don't**
Do not allow a foreign substance such as water and other liquids, metal parts, or flammables to get in the UIM or microSD memory card insertion slot on the FOMA terminal.

Doing so may cause fire, electric shock, or malfunction.

🚫 **Don't**
Do not turn on the light toward a driver such as of a car.

Doing so may disturb driving and cause an accident.

❗ **Do**
Power off the FOMA terminal in a place where the use is prohibited such as in airplane or hospital.

Failure to do so may affect electronic equipment and electronic medical equipment. If you set the automatic power-on function, cancel it before powering off the FOMA terminal.
Follow the instructions of each medical facility for the use of mobile phones on their premises.
Prohibited acts such as mobile phone usage on board an airplane may be punished by law.

❗ **Do**
Always keep the FOMA terminal away from your ear when you talk setting the hands-free function. Also, when you play game or play back music connecting the Earphone/Microphone to the FOMA terminal, adjust the volume adequately.

If the volume is too loud, it may cause difficulty in hearing.
Moreover, if you barely hear the surrounding sounds, it may cause an accident.

❗ **Do**
If you have a weak heart, set the vibrator or ring volume carefully.

Failure to do so may affect your heart.

❗ **Do**
If you hear thunder while using the FOMA terminal outdoors, put the antenna back, power off immediately, and take shelter in a safe place.

Failure to do so may cause injury or electric shock from the lightning.

❗ **Do**
Power off the FOMA terminal near electronic devices or equipment operating on high precision control or weak signals.

Failure to do so may interfere with the operation of electronic devices or equipment.

※ The followings are some electronic devices or equipment that you should be careful of:
Hearing aids, implantable cardiac pacemaker, implantable cardioverter defibrillator, other electronic medical equipment, fire detector, automatic door, and other automatically controlled devices or equipment.
If you use an implantable cardiac pacemaker, implantable cardioverter defibrillator, or other electronic medical equipment, check with the relevant medical electronic equipment manufacturer or vendor whether the operation can be affected by radio waves.

Do

Be careful about broken glasses or exposed internal from the FOMA terminal if the display or the camera lens is broken.

The display and the camera lens are designed not to be shattered when broken using the plastic panel. But they may cause injury if you touch a cut surface or exposed portion mistakenly.

⚠ CAUTION

Don't

Do not swing the FOMA terminal around by holding the antenna or the strap.

The FOMA terminal may hit you or others and doing so may cause accident such as injury or damage to the FOMA terminal or other property.

Don't

Do not use the FOMA terminal in crowded places.

The antenna may hit others and cause injury.

Don't

Do not use the FOMA terminal if the antenna is broken.

When a broken antenna contacts with the skin, it may cause injury such as burns.

Don't

To use the Motion tracking functions, make sure that your surroundings are safe to play, grip the FOMA terminal firmly, and do not shake it around unnecessarily.

Motion tracking is a function to operate the FOMA terminal by titling or shaking. If you shake it too much and it hits a person or objects, it may cause a serious accident or damage.

Don't

Do not hit a person or objects by the strap while using the Motion tracking functions when you attach the strap made of metal to the FOMA terminal.

Doing so may cause accidents such as malfunction or damage.

Don't

Do not place a magnetic card, etc. near the FOMA terminal or let it caught by the folded FOMA terminal.

Magnetic data on bankcards, credit cards, telephone cards, floppy disks, etc. may be erased.

Don't

Do not place magnetized devices near the FOMA terminal.

The strong magnetism may interfere with the operation.

Don't

If the display is mistakenly damaged and when the liquid crystal is broken, do not drink, absorb, or get it on your skin.
If the liquid crystal gets on your eye or mouth, rinse with clean running water, and get medical treatment immediately.
Also, if it gets on your skin or clothes, use something such as alcohol to wipe off and wash it with soap in clear water.

Failure to do so may cause blindness or injury on your skin.

Don't

Do not bring your ear closer to the speaker when the ring tone sounds or melody is played back on the FOMA terminal.

Doing so may cause difficulty in hearing.

Do

In rare cases, using the FOMA terminal may interfere with the operation of electronic devices in some types of vehicle.

If there is any interference, do not use the FOMA terminal when driving for safety reasons.

Do

The use of the FOMA terminal may cause itching, rashes, eczema, or other symptoms depending on the user's physical condition. Immediately stop using and get medical treatment in such a case.

Metals are used as listed below:

Where it is used	Material	Surface treatment
One Seg Antenna pipe	Stainless steel	Tin-cobalt alloy plating finishing
One Seg Antenna hinge (top)	Stainless steel	Tin-cobalt alloy plating finishing
One Seg Antenna hinge (bottom)	Brass	Tin-cobalt alloy plating finishing
Plus JOG	Aluminum base alloy	Anodized aluminum finishing

Do

Be careful not to get your finger or the strap caught in the folded FOMA terminal when you fold and open it.

Failure to do so may cause injury or damage.

Do

When you watch a One Seg program, watch in a bright place taking a safe distance from the display.

Failure to do so may damage your eyesight.

Handling the Battery Pack

■ Check the type of the battery by the label on the battery pack.

Display	Type of Battery
Li-ion	Lithium Ion Battery

⚠ DANGER

Don't
Do not touch the battery pack terminal with a metal object such as a wire. Also, do not carry or keep the battery pack together with metal objects such as a necklace.

Doing so may cause the battery pack to leak, overheat, explode, or catch fire.

Don't
Do not forcibly attach the battery pack to the FOMA terminal. Also, make sure to attach the battery pack in the correct direction.

Doing so may cause the battery pack to leak, overheat, explode, or catch fire.

Don't
Do not throw the battery pack into fire.

Doing so may cause the battery pack to leak, overheat, explode, or catch fire.

Don't
Do not stick a nail into the battery pack, hit it with a hammer, or step on it.

Doing so may cause the battery pack to leak, overheat, explode, or catch fire.

Do
If the battery fluid gets into your eyes, do not rub, rinse with clean running water, and get medical treatment immediately.

Failure to do so may cause blindness.

⚠ WARNING

Do
Stop charging if the FOMA terminal is not charged within the specified charging time.

Failure to do so may cause the battery pack to leak, overheat, explode, or catch fire.

Do
If the battery pack leaks or hears an unusual odor, immediately stop using and move it away from fire.

The leaking liquid may ignite fire, catch fire, or explode.

Do
If any abnormality caused by an external shock, such as deformation or damages by falling is found in the battery pack, stop using the battery pack immediately.

Failure to do so may cause the battery pack to leak, overheat, explode, or catch fire, or cause the device to malfunction or catch fire.

Do
Be careful about your pet not to bite the battery pack.

Failure to do so may cause the battery pack to leak, overheat, explode, or catch fire, or cause the device to malfunction or catch fire.

⚠ CAUTION

Don't
Do not dispose of the battery pack together with other garbage.

The battery pack may become the source of fire or environmental destruction. Take the used battery pack to our service counter (DoCoMo shop, etc.) after insulating it by affixing an adhesive tape on the terminal of it or follow the instructions of the local authorities in charge of collecting used battery packs.

Don't
Do not charge the wet battery pack.

Doing so may cause the battery pack to overheat, catch fire, or explode.

Do
If the battery fluid gets on your skin or clothes, immediately stop using the battery pack and rinse with clean running water thoroughly.

Failure to do so may cause injury on your skin.

Handling the Adapter (including the charger)

⚠ WARNING

Don't
Do not use the adapter (including the charger) if the cord of the adapter or the power cord is damaged.

Doing so may cause electric shock, overheating, or fire.

Don't
Do not use the AC adapter or desktop holder in a very humid or steamy place such as bathroom.

Doing so may cause electric shock.

Don't	The DC adapter is for use in vehicles with a negative ground. Do not use it in vehicles with a positive ground. Doing so may cause fire.
Don't	Do not touch the FOMA terminal and adapter (including the charger) if you hear thunder. Doing so may cause injury or electric shock from the lightning.
Don't	Do not short-circuit the charge terminal of the charger while the power plug is connected to the power outlet or cigarette lighter socket. Do not touch the charge terminal with your hands, fingers, or any part of your body. Doing so may cause fire, malfunction, electric shock, or injury.
Don't	Place the charger or the desktop holder on a stable platform while charging. Do not cover or wrap the charger or the desktop holder with a cloth or bedding. The FOMA terminal may fall off the charger or heat up and cause fire or malfunction.
Don't	Do not place any heavy objects on the cord of the adapter (including the charger) or the power cord. Doing so may cause electric shock or fire.
No wet hands	Do not touch the cord of the adapter (including the charger) or the power outlet with wet hands. Doing so may cause electric shock.

Do	Use the adapter only on the specified power supply and voltage.
	
	Failure to do so may cause fire or malfunction. Use the AC adapter available overseas when you use the phone overseas.
	AC adapter: AC 100 V
	DC adapter: DC 12 V/24 V
	   (exclusively used for vehicles with a negative ground)
	AC adapter available overseas:
	            AC 100 to 240 V
	   (Make sure to connect the adapter to a household AC power outlet.)

Do	If the fuse of the DC adapter is blown, replace it with the specified fuse. The use of a fuse other than specified one may cause fire or malfunction. See the user's manual supplied with the adapter for the specified fuse.
Do	Clean dust from the power plug. Failure to do so may cause fire.
Do	When you connect the AC adapter to the power outlet, make sure that it does not come in contact with a metal object such as a metal strap and insert it firmly. Failure to do so may cause electric shock, short circuit, or fire.
Do	Hold the power plug, not the cord of the adapter (including the charger) or the power cord, when you remove the adapter (including the charger) from the power outlet or cigarette lighter socket. Pulling the cord may damage it and cause electric shock or fire.
Unplug	Remove the power plug from the power outlet when not used for a long period of time. Failure to do so may cause electric shock, fire, or malfunction.
Unplug	If liquid such as water gets into the adapter, immediately remove it from the power outlet or cigarette lighter socket. Failure to do so may cause electric shock, smoking, or fire.
Unplug	Before cleaning, remove the power plug from the power outlet or cigarette lighter socket. Failure to do so may cause electric shock.

Handling the UIM

⚠ CAUTION

Do	Please be careful not to touch a cut surface, etc. when you remove the UIM (IC portion). Failure to do so may damage your hand or fingers.

Handling the FOMA Terminal Near Electronic Medical Equipment

■ The following instructions observe the guidelines of the Electromagnetic Compatibility Conference, Japan to protect electronic medical equipment from radio waves from mobile phones.

17

⚠ WARNING

Do

Please observe the following guidelines in medical facilities.

- Do not take the FOMA terminal into the operating rooms, ICU (Intensive Care Unit), or CCU (Coronary Care Unit).
- Power off the FOMA terminal inside hospital wards.
- Power off the FOMA terminal in the lobby and other places if there are any electronic medical equipment operating in the vicinity.
- Follow the instructions of each medical facility when they specify areas forbidding to use and carrying a mobile phone.
- If you set the automatic power-on function, cancel it before powering off the FOMA terminal.

Do

Power off the FOMA terminal in crowded places such as rush-hour trains. There may be a person with an implantable cardiac pacemaker or implantable cardioverter defibrillator near you.

The radio waves from the FOMA terminal may affect the operation of implantable cardiac pacemaker or implantable cardioverter defibrillator.

Do

If you use an implantable cardiac pacemaker or implantable cardioverter defibrillator, keep the FOMA terminal more than 22 cm away from the implant at all times.

The radio waves from the FOMA terminal may affect the operation of implantable cardiac pacemaker or implantable cardioverter defibrillator.

Do

If you need to use electronic medical equipment other than implantable cardiac pacemaker or implantable cardioverter defibrillator outside medical facilities such as treating at home, check with the relevant medical electronic equipment manufacturer or vendor whether the operation may be affected by radio waves.

The radio waves from the FOMA terminal may affect the operation of electronic medical equipment.

Handling Precautions

◆ Common Precautions

● Do not expose to water.

- The FOMA terminal, battery pack, adapter (including the charger), and UIM are not waterproof. Do not use them in a humid place such as bathroom or in the rain. If you carry the FOMA terminal on your body, perspiration may corrode the internal parts of the FOMA terminal and cause malfunction. Note that if a trouble is diagnosed as exposure to water or other liquid, repairs of the FOMA terminal may not be covered by the Warranty or it may not be possible to repair such phones. In that case, even if the FOMA terminal can be repaired, it is repaired at the owner's expense.

● Clean the FOMA terminal with a dry soft cloth (such as used for cleaning eyeglasses).

- The color liquid crystal display of the FOMA terminal has a special coating on it for better visibility. Do not use unnecessary force to wipe the display when you are cleaning it with a dry cloth. The display and its coating may be damaged. Handle the display with care and use a dry soft cloth (such as used for cleaning eyeglasses) to clean it. If the display is left with water drops or stains, stains may become permanent or the display coating may be peeled off.
- Do not use alcohol, thinner, benzene, cleaning detergent, etc. to clean the FOMA terminal. These chemicals may erase the printing on the FOMA terminal or cause discoloration.

● Clean the terminals occasionally with a dry cotton swab.

- Soiled terminals may cause poor connection and loss of power. If the terminals are dirty, use a dry cloth or cotton swab to wipe them clean.

● Do not leave the FOMA terminal near the air conditioning vent.

- Extreme temperature changes may produce condensation and corrode the internal parts of the FOMA terminal, causing it to malfunction.

● Make sure to use the FOMA terminal or battery pack without excessive force.

- If you put the FOMA terminal in a bag full of items or sit down with the FOMA terminal in the pocket of your clothe, it may damage the display, internal circuit board, and the battery pack and cause the FOMA terminal to malfunction. Also, while the external device is connected to the External connection terminal or Earphone/Microphone jack, it may damage the connector and cause malfunction.

● Make sure to see the user's manuals supplied with the FOMA terminal, battery pack, adapter (including the charger), and desktop holder.

● Do not rob or scratch the display with metal.

- The display may get scratched and it may cause malfunction or damage.

◆ FOMA Terminal Precautions

● Do not use the FOMA terminal in extremely hot or cold places.

Use the FOMA terminal within a temperature range of 5°C to 35°C and a humidity range of 45% to 85%.

- Using the FOMA terminal near ordinary phone, television or radio may cause interference in these electric appliances. Make sure to move far away from them when using the FOMA terminal.

- Note down the information saved in the FOMA terminal in a separate note and keep it safely.
  - Under no condition will DoCoMo be held liable for any damaged or lost data saved in the FOMA terminal.

- Do not plug the connector of the external device into the External connection terminal or Earphone/Microphone jack at the slant and pull it while connecting.
  - Doing so may cause malfunction or damage to the FOMA terminal.

- Do not fold the FOMA terminal with an object including the strap left inside.
  - Doing so may cause malfunction or damage to the FOMA terminal.

- The FOMA terminal could become warm while in use and charging. This condition is not abnormal and you can continue using the FOMA terminal.

- Do not leave the camera under direct sunlight.
  - If you do so, some of the phone parts may melt or become faded.

- Use the FOMA terminal with the covers of the Earphone/Microphone jack, External connection terminal, and microSD memory card slot closed.
  - Failure to do so may get dust or water inside and cause malfunction.

- Do not use the FOMA terminal without the back cover.
  - Doing so may cause the battery pack fall, malfunction, and damage.

- Do not stick extremely thick sticker on the display or keypad.
  - Doing so may cause malfunction.

- Do not rotate the display with the FOMA terminal folded.
  - Doing so may get the display or keypad scratched or cause malfunction or damage.

- Do not remove the microSD memory card or power off the FOMA terminal while using the microSD memory card.
  - Doing so may cause data loss or malfunction.

- If you conduct any criminal behavior using the FOMA terminal that is a nuisance to the public, you may be subjected to punishment by authorities in accordance with related laws or ordinances (nuisance prevention act, etc.).

⚠ Please be considerate of the privacy of individuals around you when taking and sending photos using camera-equipped mobile phones.

◆Battery Pack Precautions

- The battery pack is a consumable accessory.
  - Even if the operating time of the FOMA terminal varies depending on the operating conditions and other factors, when the length of time you can use the FOMA terminal with a fully charged battery becomes unusually short, it is time to replace the battery pack. Purchase the battery pack specified in this manual.

- Charge the battery pack in an environment with the proper ambient temperature (5°C to 35°C).

- Make sure to charge the battery pack before you use the FOMA terminal for the first time or when you have not been using it for a long period of time.

- The operating time of the battery pack varies depending on the operating environment and the secular degradation of the battery pack.

- Depending on the use condition, the battery pack may be inflated as it comes to the end of its life. This is not a malfunction.

- Do not store or leave the battery pack with the condition of which the battery level is 0.
  - Doing so may decrement the performance or shorten the life of the battery pack.

◆Adapter (including the charger) Precautions

- Charge the battery pack in an environment with the proper ambient temperature (5°C to 35°C).

- Do not charge in the following places.
  - Places that are very humid, dusty or exposed to strong vibrations.
  - Near ordinary phone, TV or radio.

- The adapter (including the charger) could become warm while charging. This condition is not abnormal and you can continue charging the battery.

- When you charge the battery pack using the DC adapter, keep the car engine running.
  - Charging the battery with the engine turned off may drain your car battery.

- When you use the power outlet with a mechanism to prevent the plug from being removed, follow the instructions on the outlet's user's manual.

- Do not give a strong impact to the adapter. Also, do not bend or deform the charging pins or pin guide on the adapter.
  - If you do so, the adapter may not work properly.

◆UIM Precautions

- Do not use unnecessary force to insert/remove the UIM.

- The UIM could become warm while it is in use. This condition is not abnormal and you can continue using the card.

● Do not insert and use the UIM with another IC card reader/writer. Please note that you are wholly liable for any damage or malfunction as a result of such action.

● Always keep the IC portion clean when you use the card.

● Use a dry soft cloth (such as used for cleaning eyeglasses) for cleaning and maintenance of the UIM.

● Note down the information saved in the UIM in a separate note and keep it safely.
• Under no condition will DoCoMo be held liable for any damaged or lost data saved in the UIM.

● Take an expended UIM to our service counter (DoCoMo shop, etc.) for proper disposal in order to protect the environment.

● Do not use the UIM in extremely high or low temperature.

● Do not carelessly damage, contact, or short circuit an IC.
• Doing so may cause data loss or malfunction.

● Do not drop a UIM or subject it to impact.
• Doing so may cause malfunction.

● Do not bend a UIM or place a heavy object on it.
• Doing so may cause malfunction.

● Do not insert the UIM on which any label or seal is stuck into the FOMA terminal.
• Doing so may cause malfunction.

◆ FeliCa Reader/Writer

● The FeliCa reader/writer function of the FOMA terminal uses extremely weak radio waves, so that no license is required for use as a radio station.

● The FeliCa reader/writer function of the FOMA terminal uses frequencies in the 13.56MHz range. If there is another reader/writer used in the neighborhood, keep enough distance from it. Attention should be also paid to assure that no other radio station which uses the same frequency range exists near the FOMA terminal.

◆ Caution

● Never use the modified FOMA terminal. Using the modified equipment is against the Radio Law.

The FOMA terminal satisfies certificates such as the technology standard agreement of the specific wireless equipment based on the Radio Law. The model sticker of the FOMA terminal shows "技適マーク⊖" as the proof of it.
If you modify the inside of the FOMA terminal by taking screws off, the certificates such as the technology standard agreement, are counted as invalid.
Using the FOMA terminal, while the certificates such as the technology standard agreement are invalid, is against the Radio Law, so that never use it under those conditions.

● Be careful using the FOMA terminal while driving a vehicle.
• Holding the mobile phone with a hand while driving applies the penal regulations.
When you are compelled to receive a call, tell "Call you back" to the caller using the hands-free funcion and park the vehicle in a safe place to place a call.

● Use the FeliCa reader/writer function only in Japan.
• The FeliCa reader/writer function of the FOMA terminal is designed to conform to the Japanese radio standard. Overseas use of this function may be subject to punishment.

● Use the IC card authentication function only in Japan.
• The IC card authentication function of the FOMA terminal is designed to conform to the Japanese radio standard. Overseas use of this function may be subject to punishment.

Intellectual Property Right

◆ Copyright and Right of Portrait

Copyrighted contents you recorded or obtained from sites or Internet home pages using this product by downloading or other means, such as documents, images, music data, software, are prohibited from reproduction, transformation and transmission over public lines without consent of the copyright holders, unless intended for personal use or any other purpose permitted by law.
Note that some performances, shows, and exhibitions may not allow photography, movie shooting, or sound recording even for personal use.
You should also refrain from taking a picture of other people and disclosing it by such means as posting it on a site on the Internet without their consent because of possible infringement of their right of portrait.

Before Using the Handset

Part Names and Functions

① Earpiece
The caller's voice is heard from here.

② Main Display (P.30)

③ Brightness Sensor
Adjust the main display light brightness and set ON/OFF of the keypad light automatically based on the Brightness Sensor to adapt for the surrounding brightness (P.113).
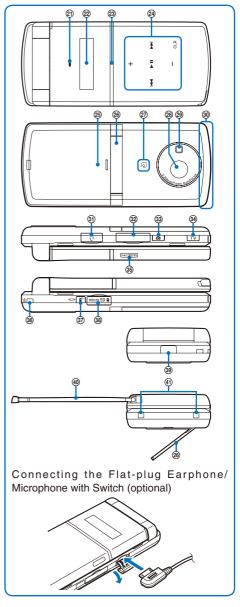

④ 3 Units Front Speaker
Sounds including the ring tone are heard from here (P.27).

⑤ ✉ Mail Key
In the stand-by display, press to display the Mail menu (P.178) and press for over a second to perform the Check new message (P.186, 199).
Press to select an item in the guide display (P.33).

Connecting the Flat-plug Earphone/Microphone with Switch (optional)

⑥ [MENU] MENU Key
Press to display the menu (P.34, 317).

⑦ [✆] Call/Hands-free Switch Key
Press to place a voice call or start talking on the phone of a voice call, videophone, or PushTalk call.
Press during a call to switch ON/OFF of the hands-free function (P.51).

⑧ **Keypad**
Enter phone numbers or text (P.382).
In the stand-by display, press ⑤ for over a second to display the Reset display (P.334).
In the stand-by display, press ⑧ for over a second and enter the Security code to display the 2in1 setting display (P.352).
In the stand-by display, press ⑨ for over a second to check your current location (P.228).

⑨ ⁎ ⁎/IC Card Lock Key
In the stand-by display, press for over a second to lock the IC card function or cancel the lock. To cancel the lock, enter the Security code (P.226).

⑩ Manner/ ▲ Key
In the stand-by display, press to display the Manner mode display (P.109) and press for over a second to set/cancel the Manner mode (P.108).
Press to scroll a page to the previous display.

⑪ **Microphone**
Picks up the sound of your voice. Do not cover it with your hand.

⑫ **In-Camera**
Use to record a still image or movie (P.142, 146) or send the image at your side during a videophone call (P.48).

⑬ **Viewing Touch Key**
Operates One Seg, Camera, or Full Browser when the FOMA terminal is in the TV style (P.148, 245, 253, 259).

⑭ **Plus JOG** (P.26)

⑮ ⓘ i-mode/i-αppli Key
In the stand-by display, press to display the i-mode menu (P.160) and press for over a second to display the i-αppli folder list display (P.208).
Press to select an item in the guide display (P.33).

⑯ i-Channel Key
Press to place or receive a videophone call (P.49, 63).
In the stand-by display, press to display the Channel list display (P.174) and press for over a second to activate the Camera mode (P.138).
Press to select an item in the guide display (P.33).

⑰ CLR Clear Key
Press to cancel the current operation.
In the i-αppli stand-by display, press to operate the software (P.214).
In the stand-by display, press for over a second to turn off the notification icon (P.32).

⑱ Power/End/Hold Key
Press to power on/off the FOMA terminal (P.42).
Press to hang up or end the multitask functions.
Press while receiving a voice or videophone call to put a call on hold (P.66).

⑲ # #/Public Mode (Drive Mode) Key
In the stand-by display, press for over a second to set/cancel the Public mode (Drive mode) (P.66).

⑳ Memo/ ▼ Key
In the stand-by display, press to display the Record msg display (P.70) and press for over a second to set/cancel the Record message (P.69).
Press to scroll a page to the next display.

㉑ **Charge Indicator/FeliCa Sign**
Lights in red while charging the battery (P.40).
Lights in green during iC communication or when the FOMA terminal comes within the communication range with the reading device (P.221, 299).

㉒ **Sub-display** (P.33)

㉓ **Incoming Indicator**
Flashes when receiving a call/mail. It flashes when there is a missed call or new mail/unread message (P.118).
Flashes while obtaining the location information using the GPS function (P.228).

㉔ **Music Touch Key**
Operates the MUSIC Player or Music&Video Channel while the FOMA terminal is folded (P.26).

㉕ **Back Cover** (P.38)

㉖ **2 Step 1Seg Stand**
Places the FOMA terminal in the horizontal orientation and allows you to watch One Seg in the TV style (P.29).

㉗ **FeliCa Mark**
Indication for a built-in IC card.
Hold this mark to the reading device to use the Osaifu-Keitai. You can send and receive data by placing the FeliCa mark of the FOMA terminal over that of another FOMA terminal provided with the iC communication function. You cannot remove the IC card (P.221, 299).

㉘ **Out-Camera**
Use to record a still image or movie (P.142, 146) or send the surrounding image during a videophone call (P.48).

㉙ **Photo Light/Auto Timer Indicator**
Turn this light on when recording (P.148).
Lights (low light) during the Camera mode. Flashes (low light) while recording or activating the Auto timer (P.138, 148).

㉚ **FOMA Antenna**
The antenna is incorporated in the main body. To talk on the phone with better condition, do not cover the antenna with your hands.

㉛ **Earphone/Microphone Jack**
Connect the Flat-plug Earphone/Microphone with Switch (optional), etc. Other traditional Earphone/Microphone with Switch (optional) is also available by connecting it through the Earphone Plug Adapter (optional) (P.332). Do not pull the cover forcibly.

㉜ **External Connection Terminal**
Connect the AC adapter (optional), FOMA USB Cable with Charge Function 01 (optional), etc. (P.40, 285). Do not pull the cover forcibly.

㉝ Shutter Key
In the stand-by display, press for over a second to activate the Camera mode (P.138).
Press to record using the camera (P.142, 146).
Press halfway down to perform the Auto focus when you are recording a still image (P.142).

㉞ TV TV Key
In the stand-by display, press for over a second to activate One Seg (P.245).

㉟ MUSIC/⏻ MUSIC/HOLD Key
Displays the sub-display or lock/cancel the Music Touch Key while the FOMA terminal is folded (P.130).
Press for over a second to activate the MUSIC Player when the sub-display appears while the FOMA terminal is folded (P.311).

㊱ **Strap Attachment**
Attach the strap here.

㊲ PushTalk Key
Press to originate or start talking on the phone of a PushTalk call with the FOMA terminal opened (P.80, 82).
In the stand-by display when using the Normal style, press to display the PushTalk phonebook (P.82).
Press while the FOMA terminal is folded to switch the display on the sub-display (P.33).

㊳ **microSD Memory Card Slot**
Insert a microSD memory card here (P.279). Do not pull the cover forcibly.
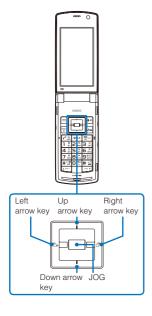

㊴ **Infrared Data Port**
When you perform infrared communication (P.295) or use the FOMA terminal as a remote control (P.298), point this port to the target device or equipment.

㊵ **One Seg Antenna**
Use when using the One Seg function (P.241).

㊶ **Charge Terminal Pins** (P.40)

Operation	Symbols in this manual	Description
Up arrow key	▲	Move the cursor upward. Press for over a second to move the cursor continuously. Press in the stand-by display to display the Data Box.
Down arrow key	▼	Move the cursor downward. Press for over a second to move the cursor continuously. Press in the stand-by display to display the Phonebook.
Left arrow key	◀	Move the cursor to the left. Press for over a second to move the cursor continuously. Or, press to return to the previous display. Press in the stand-by display to display the Received record.
Right arrow key	▶	Move the cursor to the right. Press for over a second to move the cursor continuously. Or, press to go to the next display. Press in the stand-by display to display the Redial record.
JOG	▤	Set a selected item. When you scroll it upward and downward, the cursor moves upward and downward. If you keep scrolling it, the cursor keeps moving. In the stand-by display, when you scroll it upward, the Data Box appears, and when you scroll it downward, the Phonebook appears. You can set the action of it in the matching words list while entering words (P.340).
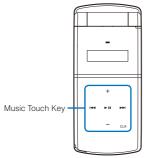

● You can set the scrolling amount of the JOG and functions to be activated when the JOG is scrolled in the stand-by display, and also preset the JOG to be disabled (P.333).

About Touch Key

You can operate the FOMA terminal by patting the lighted Touch Key while the FOMA terminal is folded or in the TV style.
The Touch Key is on the two places: back and main display.
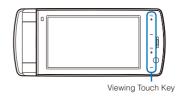

■Music Touch Key

Music Touch Key

■Viewing Touch Key

Viewing Touch Key

- The functions operated by the Music Touch Key while the FOMA terminal is folded are as follows.
  - Quit the MUSIC Player and operate it while playing back (P.311)
  - Operate while playing back Music&Video Channel (P.306)
- You can lock the Music Touch Key (P.130).

- The functions operated by the Viewing Touch Key are as follows.
  - Adjust volume or change channels while watching One Seg (P.245)
  - Change zoom, turn on/off the Photo light, and switch the Auto focus setting during the Camera mode (P.148, 150, 155)
  - Scroll during Full Browser (P.259)

■Usage precautions

- To prevent from causing malfunction, do not stick any seals on the Touch Key.
- The Touch Key only works when you pat it with your bare fingers. Use it after removing anything such as gloves from your fingers.
- Patting the Touch Key with wet or sweat fingers may cause malfunction. Wipe any moisture away from your fingers.
- If you keep patting the Touch Key, it may cause malfunction. Release your finger and then retry the operation.
- Please note that electrostatic action may cause malfunction.
- To prevent from interfering with the operation, use the FOMA terminal as follows when you put it in a bag, etc.
    - Music Touch Key   : Lock it.
    - Viewing Touch Key : Switch to the Normal style while using One Seg or activating the Camera or Full Browser.
- Do not place the metal devices near while using the Touch Key. It may interfere with the operation.

● When you pat the Touch Key, it vibrates. You can disable the setting (P.334).
● While activating the functions that can be operated by the Touch Key, such as the MUSIC Player, Music&Video Channel, or One Seg, the Touch Key lights. When the functions that cannot be operated by the Touch Key are activated, it does not light.
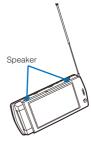

About the Style

You can use the FOMA terminal in the Normal style and TV style in which the terminal is placed horizontally.

■Normal style

Speaker

- You hear sounds from speakers of the both side in the Normal style.

■TV style

Speaker

When you watch One Seg in the TV style, using the 2 Step 1Seg Stand allows you to place the FOMA terminal on the flat surface in the horizontal orientation and watch One Seg with full-wide horizontal screen display.

- In the TV style, you hear sounds from two speakers placed in the upper side.
- The available functions when the TV style is used are as follows.
    - Watch/record a One Seg program (P.243, 252)
    - Shoot by photo (P.142)
    - Movie shoot (P.146)
    - Full Browser (P.259)
- When the TV style is used, you can only use the TV and 📷 keys and Touch Key VOL+ VOL−, CH+ / CH− .
- When you answer a phone call while watching One Seg with antenna extended, be very careful with the point of the antenna not to harm people around you or get into your eyes.

● You can set functions to be activated when switching to the TV style in the stand-by display (P.328).

■Switching to TV style

1 Hold the FOMA terminal and open the display straight.

2 Rotate the display 180 degrees clockwise.

3 Fold the FOMA terminal.

Cautions when rotating the display
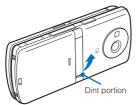

- When you rotate the display, be careful not to touch the corner of the display to the keys or body. Moreover, you cannot rotate the display counterclockwise or over 180 degrees. Forcing to rotate the display may cause damage or malfunction.

How to Use the 2 Step 1Seg Stand
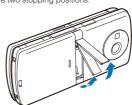

You can enjoy One Seg with two angles by placing the FOMA terminal horizontally in the TV style.

■How to place the 2 Step 1Seg Stand

1 Catch the dint portion with your finger and lift it forward.

Dint portion
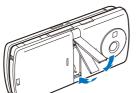

2 Lift it until it stops.

● There are two stopping positions.

■How to place the 2 Step 1Seg Stand back

1 Press the 2 Step 1Seg Stand toward the FOMA terminal.
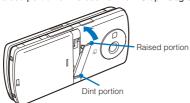

2 Push it until it clicks into place.

■When the 2 Step 1Seg Stand comes off

1 Insert the other side of the raised portion of the back of the 2 Step 1Seg Stand while aligning it with the dent portion of the FOMA terminal.

2 Push the raised portion of the back of the 2 Step 1Seg Stand until it clicks into the FOMA terminal.

Raised portion

Dint portion
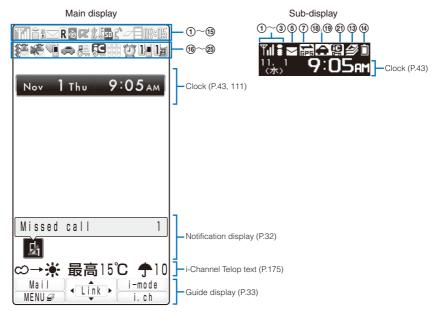

■ Usage precaution

● When you place/place back the 2 Step 1Seg Stand, do not force to do so. It may cause accident such as injury or malfunction.

Using the Displays

- For details on the icons in the Camera mode or while watching One Seg, see P.141 or P.243 respectively.
- The position of the clock in the main display can be changed (P.111).

Kisekae menu

Menu name	Description
My Selection	Used to access My Selection.
i-mode	Used to access an i-mode function.
Mail	Used to access an i-mode mail and SMS functions.
i α ppli	Used to access an i- α ppli function.
Phone	Used to access mainly related to Phone such as Phonebook, Call record, PushTalk phonebook, and Record message.
Data Box	Used to access data such as those saved in My picture, MUSIC, Music&Video Channel, i-motion, Melody, My document, Kisekae Tool, Chara-den, and 1Seg.
MUSIC	Used to access MUSIC player and Music&Video Channel functions.
Osaifu-Keitai	Used to access IC card content, DCMX, and ToruCa functions.
LifeKit	Used to access functions such as Bar code reader, Receive Ir data, microSD, Camera, Movie, Lifetime Calendar, Alarm, Schedule, Text Memo, Calculator, Data Security Service, and GPS.
Own number	Used to display the own phone number.
Settings	Used to set items such as Display, Call, Application, Lock/Security, and Management.
1Seg	Used to access a One Seg function.

- You can turn on/off the Standard menu guide by pressing <kbd>i</kbd> (Help ON)/ <kbd>i</kbd> (Help OFF).
- Functions displayed in gray are not available.
- When another function is activated or the FOMA terminal is connected to a PC while the USB mode setting is set to [MTP mode], the Standard menu is displayed by pressing <kbd>MENU</kbd>.
- The Kisekae menu at the time of purchase varies depending on the color of the FOMA terminal and the displayed menu changes based on the Kisekae Tool. The descriptions of this manual are written based on the Kisekae menu (Colorful White) of the main body color: White and the Color theme setting (White2).
- For the list of menus in the Standard menu, see P.374.

Selecting a Function from the Menu Display

A function can be executed easily by going through the menus.

1 Press <kbd>MENU</kbd> (MENU).

The menu display appears.

2 Use ▲ ▼ to select a menu and press ▤.

The function associated to the menu is selected.

● You can execute a function in the menu display by pressing a key on the keypad. For the functions that can be executed using a number key, see the list of menus (P.374).

Selecting a Function from the Function Menu

The Function menu is a menu that plays an auxiliary role for each function.
Whenever the Function menu is available, [Func] appears in the guide display. Press ✉ to display a list of available Function menus.

• The contents of the Function menu vary depending on the functions and displays. For details, see the description of operation for the individual option.
• When the numbers and symbols are displayed in the Function menu, press a key on the keypad to activate a function.

● Function menus displayed in gray are not available.

Switching the Menu Display

You can switch the menu (Kisekae menu, Standard menu, and My Selection) to be displayed temporarily.

• At the time of purchase, the activated menu when you press MENU in the stand-by display is the Kisekae menu. To change the activated menu, display the menu to be changed and press ✉ (Chg.MENU) for over a second.

1 Press MENU (MENU) in the stand-by display and press ✉ (Chg.MENU).

Kisekae menu

✉ (Chg.MENU)

Standard menu

✉ (Chg.MENU)

My Selection

✉ (Chg.MENU)

● When you use the Kisekae tool to change the design of the menu display, some menu types may change the menu structure depending on the frequency in use. The digits assigned to menu items may not be applied. In this case, you cannot operate the FOMA terminal as explained in this manual, so please change the menu to the Standard menu or reset the menu settings (P.116).

Using the UIM

The UIM (FOMA card) records user information such as your phone number. Insert a UIM in the FOMA terminal to use it.

Inserting/Removing the UIM

When inserting/removing the UIM (FOMA card), make sure to power off and fold the FOMA terminal, remove the battery pack, and perform the operation with the FOMA terminal held with your hand.

● If you insert the UIM forcibly, it may be damaged.

■Inserting the UIM

1 Open the stopper.

Open the stopper until it stops.

2 Insert the UIM into the slot with the IC side facing down.

3 Retrace the stopper to its original position

Insert until it clicks into place.

■Removing the UIM

1 Open the stopper.

2 Lift the 2 Step 1Seg Stand.

● See "How to place the 2 Step 1Seg Stand" (P.29).

3 Slide the UIM with your finger to take it out.

● Make sure to keep a removed UIM safely.

About the UIM Security Code

You can set two Security codes, namely "PIN1" and "PIN2", for the UIM (FOMA card). These codes are set to "0000" at the time of subscription. You can change them to any 4- to 8-digit number you want (P.125).

About the Function for Restricting UIM Operation

The FOMA terminal provides a function for restricting UIM (FOMA card) operation in order to protect your data and files. If you record a videophone message or download files or data from sites or mail while the UIM is inserted in the FOMA terminal, the UIM operation restriction function is automatically set for these data and files.

- When you replace the UIM with another one or if you do not have a UIM inserted in the FOMA terminal, you are unable to display or play back the data or files for which the UIM operation restriction function is set or if they are sent using the infrared or iC communication or attached to mail.
- The target data for operation restriction is as follows:
    - Image (including GIF animation, Flash, and Stamp&Frame)
    - Image downloaded from the Data Security Service Center
    - Downloaded Kisekae tool
    - Chaku-Uta®/Chaku-Uta Full®
    - File attached to i-mode mail (excluding a ToruCa card)
    - Message R/F attached file (melody/image)
    - Mail template (including target data for restriction)
    - Image inserted in Deco-mail or a signature
    - i-αppli (including i-αppli stand-by display)
    - Screen Memo (including target data for restriction)
    - Image trimmed from PDF data (downloaded PDF data only)
    - Deco-mail pictograph
    - Movie/i-motion
    - Chara-den
    - Image inserted in a ToruCa(detail) card
    - Melody
    - PDF data
    - Videophone message
    - Movable contents-compatible data
    - Downloaded dictionary
- " " appears for the data with UIM operation restriction. Depending on the data, " " may not appear and a message may appear instead when you select the data.
- "Chaku-Uta" is a registered trademark of Sony Music Entertainment Corporation.

- If you replace the UIM with another one or use the FOMA terminal without inserting a UIM when data targeted by the UIM operation restriction function is set for the stand-by display, call image, and ring tone, then the sound and image settings are reset to the default settings. In this case, the sound and image you have set and the actual sound and image may be different.
- You cannot set the UIM operation restriction function for data received using the infrared or iC communication, the microSD memory card, or DoCoMo keitai datalink or images recorded with the built-in camera.
- If you use the UIM on another i-Channel-compatible terminal, the Telop text does not appear. When the information is automatically updated or if you press (i.ch) to receive latest information, the Telop text starts running automatically.

Settings Saved in the UIM

The following settings are saved in the UIM (FOMA card). If you replace the UIM with another one, the settings in the new UIM come into effect.

- Select language
- SSL certificate
- SMS setting
- UIM setting

About the Differences in UIM Functions

A UIM (FOMA card) (blue) has the following functional differences from a UIM (green/white).

Item	UIM (blue)	UIM (green/white)	Page
Number of digits that can be saved for a phone number in the UIM phonebook	Maximum 20 digits	Maximum 26 digits	P.93
User certificate operation for using FirstPass	Unavailable	Available	P.171
Use of WORLD WING service	Unavailable	Available	P.38
Service Numbers (Use of [ドコモ故障問合せ] (Contact for Repairs) and [ドコモ総合案内·受付] (General Inquiries))	Unavailable	Available	P.349

WORLD WING

WORLD WING is the DoCoMo's FOMA international roaming service that enables you to place or receive a call using the same mobile phone number even if you are overseas, just by using the UIM (green/white) and a WORLD WING service-compatible FOMA terminal.

※ If you subscribed to the FOMA services after September 1, 2005, you already have WORLD WING and no application is required. If you declined to use WORLD WING when you subscribed to the FOMA services or cancel the WORLD WING service halfway, you need to make an application again to use WORLD WING.

※ If you subscribed to the FOMA services before August 31, 2005 and did not make an application to "WORLD WING", you need to make a separate application.

● This service is not available in some service charge plans.

● If you should lose your UIM (green/white) or have it stolen abroad, please report it to DoCoMo and take steps to cancel the use of the UIM as soon as possible. For information on where to call, see "General Inquiries" on the backcover of this manual. Note that you are still liable for the call and communication charge incurred after the loss or theft occurred.

Attaching and Removing the Battery Pack

When attaching/removing the battery pack, make sure to power off and fold the FOMA terminal.

● If you attach the battery pack forcibly, the terminal on the FOMA terminal may be damaged.

● Holding too hard or attaching/removing the back cover in a manner other than described below may damage it.

■ Attaching the battery pack

1 Slide to remove the back cover in the direction of the arrow.

2 Hold the battery pack with the recycle-mark side up, align the terminal of the battery pack with that of the FOMA terminal, and push it into place.

Terminal

3 Align the back cover with the grooves on the FOMA terminal while holding it almost closed (about 3 mm clearance) and slide it in the direction of the arrow.

■ Removing the battery pack

1 Slide to remove the back cover in the direction of the arrow.

2 Raise to remove the battery pack in the direction of the arrow by holding it by the tab.

Tab

● When you attach the battery pack, make sure that the stopper of the UIM tray is closed. If the stopper is not closed completely, it prevents the insertion of the battery pack. If you use force to attach the battery pack, the UIM or stopper may be damaged.

- The continuous stand-by time is an estimated battery time available on the FOMA terminal when it is folded and can receive radio waves properly. The continuous stand-by time during the stationary state indicates the average battery time available on the FOMA terminal that is placed stationary when it is folded and can receive radio waves properly. The continuous stand-by time during the moving state indicates the average battery time available on the FOMA terminal that is placed in mixture of the following states: "stationary", "moving", and "outside of the service area" when it is folded and within an area where it can receive radio waves properly.
- Note that the call (communication) time and stand-by time may be reduced to about half of the time indicated above depending on the operating environment such as the charge level of the battery, how functions are set, and temperature, and radio wave condition in the area where a call is placed (outside of the service area or area with weak radio wave condition). Similarly, the call (communication) time and stand-by time become shorter than the above when you use i-mode communication. Besides calls and i-mode communication, the battery time is also reduced when you are composing i-mode mail, starting a downloaded i-αppli or i-αppli stand-by display, performing data communication, executing multiaccess, using the camera, watching/recording a One Seg program, and using the MUSIC Player.
- Note that One Seg watching time may be reduced depending on the battery charge condition, function settings, operating environment such as temperature, and radio wave condition in the area where One Seg is used (outside of the service area or area with weak radio wave condition).

How to Charge the FOMA Terminal
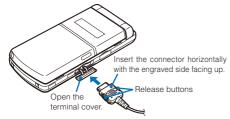

Charge the battery pack using the optional Desktop Holder SO07 with the FOMA AC Adapter 01/02 connected. Make sure to see the user's manuals of the Desktop Holder and AC Adapter. The battery pack cannot be charged alone.

1 Insert the connector of the AC adapter horizontally with the engraved side facing up into the terminal (the side labeled "ACアダプタ") of the desktop holder.

2 Lift the power plug of the AC adapter and plug it into an AC 100 V outlet.

3 Insert the FOMA terminal, which has the battery pack attached, to the desktop holder and push it into place.
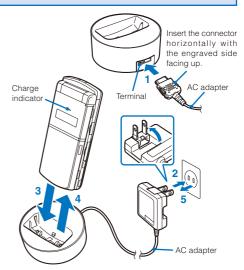

Charging starts and the red charge indicator is turned on. The indicator is turned off when charging is completed.

When you charge while the FOMA terminal is powered on
The battery level icon flashes and the Charge sound is heard. When charging is completed, the icon changes from flashing to lighting and the Charge sound is heard.
- You can set to mute the Charge sound with the Set basic tone (P.104).

4 When the charging is completed, lift to remove the FOMA terminal while holding the desktop holder.

5 Remove the power plug of the AC adapter from the AC 100 V outlet.

■Charging with the AC adapter only

Insert the connector horizontally with the engraved side facing up.

Open the terminal cover.
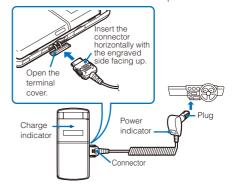

Release buttons

- To remove the AC adapter, make sure to pull it horizontally while holding the release buttons pressed. Pulling it forcibly may cause malfunction.

Insert the connector horizontally with the engraved side facing up.

Charge indicator

Terminal

AC adapter

AC adapter

■Charging with the DC adapter
With the optional FOMA DC Adapter 01/02, you can charge the battery pack by using the cigarette lighter socket of a vehicle (12 V/24 V). For details, see the user's manual of the DC adapter.

Insert the connector horizontally with the engraved side facing up.

Open the terminal cover.

Charge indicator

Power indicator

Plug

Connector

● During iC communication or when the FOMA terminal comes within the communication range with the reading device while charging the battery, the Charge indicator and FeliCa Sign light at the same time.
● When not using the AC adapter for a long period of time, remove its power plug from the AC outlet.
● Make sure that the phone strap, etc. does not get caught in between the FOMA terminal and the desktop holder.
● The fuse (2.0 A) of the DC adapter is a consumable part. Purchase an equivalent fuse from an automobile parts store when it is necessary to replace the fuse.

Checking the Battery Level

<Battery level>

The estimated battery level is indicated in the display.

Display	Charge level
	Sufficiently charged.
	Slightly low.
	Very low. Charge.
(Flashes)	The battery level is 0. Charge.
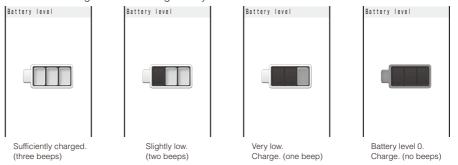

● When the battery level becomes nearly 0, the screen shown to the right appears and warning sound is heard. The sound may be suppressed by other sound, etc. in operation. It is heard again when the battery level is 0 and the function you are performing is terminated. During a call, the warning sound is heard from the earpiece and the call is terminated when another warning sound is heard after about 20 seconds. If you do not charge the battery, the FOMA terminal is automatically powered off after about 60 seconds.

Checking the Battery Level with the Sound and Display

● The confirmation beep does not sound when the volume of the keypad sound is [OFF] (P.104).

1 From the Menu, select [Settings] → [Management] → [Battery level] and press ▭.

The current battery level is displayed using bars in the display and the confirmation beep sounds according to the remaining battery level.

Sufficiently charged. (three beeps)

Slightly low. (two beeps)

Very low. Charge. (one beep)

Battery level 0. Charge. (no beeps)

Powering On/Off

<Power on/off>

● When you power on the FOMA terminal, the screen informing to execute the software update automatically may appear (P.402).

1 Press ⌒ (PWR) for over two seconds.

Nov 1 Thu 9:05 AM	The FOMA terminal is powered on, the display and the keypad lights are turned on, and an animation is displayed. After a while, the stand-by display appears.

● If you have set the PIN1 code setting to [ON], the PIN1 code input screen appears. Enter the PIN1 code and press ▤ (OK) (P.123).

To power off

Press ⌒ (PWR) for over two seconds.

● If you replace the UIM with another one (except when the Omakase Lock is set), you need to enter a 4- to 8-digit Security code when the FOMA terminal is powered on. When the entered code is correct, the stand-by display appears. If you enter a wrong Security code five times consecutively, the FOMA terminal is powered off. (You can still power on the FOMA terminal, however.)

Setting the Basic Functions

<Initial setting>

The Initial setting can be used to make basic settings such as the Date/time and Security code. See the respective pages for details about the settings.

■Available setting items

Item	Description
Date/time	Set the date and time of the FOMA terminal (P.43).
Change code	Change the Security code (P.124).
Keypad sound	Set the volume of the tone to sound when you press the key (P.104).
Location request	Set whether to provide positioning information (P.234).
All font size setting	Set the size of fonts to be used for displaying the Phonebook, Call record, Mail, i-mode sites, and Input text display (P.119).

1 From the Menu, select [Settings] → [Management] → [Initial setting] and press ▤.

```
Initial setting
Date/time
Change code          Yet
Keypad sound          1
Location request
                     Yet
All font size setting
                     Yet
```

2 Set each item.

● If you perform the Reset all data&set or do not change the Security code of the FOMA terminal or settings of the Location request or All font size setting, the message "Initial setting is incomplete. Execute?" appears when you power on the FOMA terminal. When you select [Yes], the display in step 1 appears and you can perform the initial setting.

Setting the Date and Time

You can set the date and time either by automatically correcting the time based on the time information obtained from the DoCoMo network or by manually setting the time.

Example: Correcting the time automatically

1 From the Menu, select [Settings] → [Management] → [Date/time] and press ▤.

```
Date/time
Auto time adjust
              ON ▾
Manual clock set
```

[Auto time adjust] : Set the time automatically.

[Manual clock set] : Enter the time manually. When you set the time using the Manual clock set, the Auto time adjust is set to [OFF].

2 Select [ON] at [Auto time adjust].

[ON] : Correct the date and time automatically.

[OFF] : Do not correct the date and time automatically. Set the time using the Manual clock set.

To set the time manually

Select [Manual clock set] → [Yes] and enter the year and date within the range from 2000/01/01 to 2050/12/31, the time in 24-hour format (00:00 to 23:59), and select time zone. Press ▤ (Complete).

● When you set the Auto time adjust to [ON], the date and time are corrected automatically when the FOMA terminal is powered on with a UIM installed. Note, however, that there may be an error lasting several seconds. The time cannot be automatically corrected in the following cases.
- Outside of the service area (The time may not be corrected automatically even inside the service area depending on the radio wave condition.)
- While i-αppli is running

● The date and time settings are retained even when you replace the battery pack. However, if you leave the FOMA terminal without a battery pack or with a fully expended battery pack, the date and time may be reset to "----/--/-- --:--". In this case, set the date and time once again.

● If the date and time are not set, functions that use the clock, such as the current time icon, Schedule, Alarm, Booking program, Timer recording, i-αppli Auto-start, and calendar/clock display cannot be used. The date and time for the Redial/Received record and the date and time on images shot with the camera are also not recorded.

● When you receive time correction information from the network of the carrier to which the FOMA terminal is connected during international roaming, the time is automatically corrected when the Auto time adjust is set to [ON].
When the time is corrected to the local time, the date and time used for the Redial/Received record and sent/received mail also are corrected to the local time and "⏱" appears. Note, however, that some overseas networks may not perform time correction.

Notifying the Recipient of Your Phone Number <Notify caller ID>

When placing a call, your phone number can be shown in the display of the recipient's phone you are calling.

- The caller ID is important personal information. Carefully decide whether you notify a recipient of your caller ID.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Notify Caller ID] → [Set Notification] and press ▤.

2 Select [Notify]/[Not notify] and press ▤.

The Notify caller ID is set.

To check the setting

From the Menu, select [Settings] → [Management] → [NW Services] → [Notify Caller ID] → [Check setting].

- The setting, whether to originate a PushTalk call with/without the caller ID, follows this setting.
- If you hear a guidance asking to send the caller ID when you place a call, call again after setting the Set Notification to [Notify] or by adding "186" before the recipient's phone number. The caller ID is not displayed even if you add "186" when you originate a PushTalk call.
- You cannot set the Notify Caller ID when the FOMA terminal is outside of the service area.

Checking Your Own Phone Number <Own number>

Your phone number can be checked. You can also save your name, mail address, etc.

- If the Own number is saved as Secret, the data other than your phone number is not displayed. Set the Secret display to [ON] to display all data.
- Number B does not appear on the Own number display of the B mode at the time of purchase. To display Number B, perform the Check service (P.46).

1 From the Menu, select [Own number] and press ▤.

Your phone number appears at [📧]. If the data other than a phone number is saved, that data also appears.

To place a call

Press ▶, move the cursor to a phone number, and press 📞.

To originate a PushTalk call

Press ▶, move the cursor to a phone number, and press ℗.

To send i-mode mail

Press ▶, move the cursor to a mail address, and press ▤ (Mail).

To check the image

Press ▶, move the cursor to the image, and press ▤ (Play).

To switch the Own number display between the A and B modes when 2in1 is set to the Dual mode

Press 🔘 (Number A)/ 🔘 (Number B).

- You cannot originate a PushTalk call from the Own number display of the B mode.
- When you replace the UIM (From 2in1 subscriber to 2in1 subscriber) while 2in1 is used, to obtain a correct Number B, you need to perform the 2in1 function OFF (P.353) first, and then set the 2in1 to ON again. When you replace the UIM (From 2in1 subscriber to 2in1 non-subscriber), perform the 2in1 function OFF.
- When you replace the UIM while 2in1 is used, you need to reset all the items of the personal data at the B mode (P.46).

Saving Your Personal Data

You can save your personal data such as your name, postal address, and mail address, and check saved data in the Own number display and quote this data in the text input display.

1 Press ⓘ (Edit) in the Own number display.

```
Basic        Detail
090XXXXXXXX

🏠	Enter the postal code of your home address within seven half-width digits.
🏠	Enter the postal address of your home within 64 full-width or 128 half-width characters.
🏠	Enter your home phone number within 26 digits.
🏠	Enter your home mail address within 50 half-width alphanumeric characters and symbols.
📄	Enter the name of your office within 64 full-width or 128 half-width characters.
📄	Enter the postal code of your office address within seven half-width digits.
📄	Enter the postal address of your office within 64 full-width or 128 half-width characters.
📄	Enter your office phone number within 26 digits.
📄	Enter your office mail address within 50 half-width alphanumeric characters and symbols.
🎂	Enter your birthday within the range from 1900/01/01 to 2050/12/31.

4 Press ⓘ (Complete).

Your personal data is saved.

To reset to the default settings

From the Function menu in the Own number display, select [Reset all] → [Yes].

To register Number B at the Own number display of the B mode

In the Own number display of the B mode, from the Function menu, select [Check service].

● At [📱] your phone number is displayed and at [📱] and [📱] Additional Nos. set for the Multi Number Service are displayed. These numbers cannot be edited or deleted.

● At the time of purchase, your mail address does not appear. Check your mail address by selecting ⓘ (i-mode) → [i Menu] → [English iMenu] → [Options] → [Mail Settings] → [Confirm Mail Address]. When you change your mail address, edit the Own number display accordingly.

● When you replace the UIM while 2in1 is used, you need to reset all the items of the personal data at the B mode (P.45).

Voice/Videophone Calls

What is Videophone?

You can use the videophone function between DoCoMo videophone compatible terminals. You can use videophone to talk to the recipient/caller while looking at each other's image. You can send a still image, substitute image, or Chara-den character instead of your own.

DoCoMo's videophone complies with "3G-324M[1] standardized by 3GPP[2] for global standard". The FOMA terminal cannot be connected to a videophone that uses a different system.

※1 3G-324M
　　Global standard for third-generation mobile videophones.

※2 3GPP (3rd Generation Partnership Project)
　　Local standardization committee set up for development of common technology specifications related to third-generation mobile wireless communication systems (IMT-2000).

Using the Display during a Videophone Call

Operations during a Videophone Call

Operation	Key operation
Switch between camera image/substitute image	Press ▤ (MySide/Sub). Every time you press the key, the display is switched between camera image/substitute image.
Switch cameras	Press 📷 (In/Out). Every time you press the key, the camera is switched between the In-/Out-camera.
Switch ON/OFF of the hands-free operation	Press 📞 (🔊). Every time you press the key, the ON/OFF setting is switched.
Zoom-in/-out image	Press ▶ (Zoom in) / ◀ (Zoom out) when recording with the Out-camera.
Put a call on hold	From the Function menu, select [Holding]. To cancel this function, press 📞.
Switch the display	From the Function menu, select [Display setting].
Switch the quality of the outgoing image	From the Function menu, select [Visual preference]. When you finish a call, the image quality set for the Visual preference of the Videophone setting is restored.
Select a substitute image	From the Function menu, select [Select sub image].
Switch ON/OFF of the photo light	From the Function menu, select [Photo light] (when using the Out-camera only).
Display your phone number	From the Function menu, select [Own number].
Switch to a voice call	From the Function menu, select [Chg. to voice call] (when placing a videophone call only).

Placing a Voice/Videophone Call

Check the radio wave condition and enter a phone number.

Example: Placing a voice call

1 Enter a phone number in the stand-by display.

090XXXXXXXX

- You can enter a phone number of up to 80 digits.
- Make sure to include the area code, even for a local call.

When you press the wrong number

Press CLR to delete the entered digits one by one from the right. Press CLR for over a second to delete all digits.

2 Press ⌢.

Calling

−090XXXXXXXX−

Calling

A ringing sound is heard when the call is connected.

To place a videophone call

Press ch (V.phone). When the call is answered, your image is sent to the recipient and the call is switched to the hands-free operation that allows you to hear the recipient's voice from the speaker.

When 2in1 is set to the Dual mode

Select [Number A]/[Number B] (P.352).

When a busy tone sounds

The line is busy. Press ⌢ to hang up and call again after a while.

When you hear a guidance

Call again according to the guidance.

3 Press ⌢ to hang up.

● See P.56 for sending the Chaku-moji and P.57 for placing a voice or videophone call by specifying the condition.

● For a voice call, you can also place it in the order of step 2 → step 1. Press ⌒ and enter a phone number, and the call is dialed automatically after about five seconds.

● You are charged for digital communication even if you send a substitute image during a call.

● If the videophone call is not connected, the following messages appear in the display. The displayed message may not correctly represent the status of the recipient depending on the type of the phone of the recipient or whether the recipient has subscribed to any network service.

Message	Description
Check number, then redial	The phone number is no longer in use.
Busy	The recipient is talking on the phone. (This message may appear also during packet communication on some recipient's terminals.)
Busy with packet transmission	The recipient is using packet communication.
Outside of service area/power off	The recipient is in a place where radio waves do not reach or the phone is powered off.
Set Caller ID to ON	This message appears when the call was connected without a Caller ID (when a call is placed to Visual Net or other sites).
Please try voice call	This message appears when the Call Forwarding Service is set on the recipient's phone and the terminal to which the call was forwarded is not equipped with the videophone function. (As of October 2007, this message may appear also when the Voice Mail Service is set on the recipient's phone.)
Connection failed	This message appears when none of the above reasons apply.
Please make your call from the i-mode web page	To view V-Live contents, visit and view an official i-mode site once, and then place a videophone call.
Upper limit has been exceeded. Connection failed	The upper limit set to the plan with a Limit (Type Limit or Family Wide Limit) has been exceeded.

● If you use the FOMA terminal to place a videophone call to emergency numbers (110, 119, and 118), it automatically switches to voice call dialing.

● When you place a videophone call to a terminal that is not equipped with a videophone function, or when a recipient is outside of the service area or the phone is powered off (even if the FOMA terminal has the videophone function), your call is not connected. When you place a videophone call to a terminal that is not equipped with a videophone function and the Auto redial(voice) is set to [ON], the recipient's terminal disconnects your videophone call before it is connected, and the FOMA terminal redials the call as a voice call. If, however, you dial a wrong number such as an ISDN synchronous 64kbps or PIAFS access points, or ISDN videophone that is not 3G-324M (as of October 2007) compatible, the above operations may not take place. Note also that you may be charged for the call.

Using the Hands-free Function

When you switch to the hands-free operation during a call, you can hear the caller's voice from the speaker and talk hands-free.

Example: Switching to the hands-free operation during a voice call

1 Press 📞 (📢) during a call.

```
┌─────────────────────┐
│ Talking        📢  │
│                     │
│  03XXXXXXXX        │
│                     │
│ Call duration  0:03 │
│                     │
│                     │
│                     │
│         📲          │
│                     │
└─────────────────────┘
```

The call is switched to the hands-free operation and "📢" appears.

To cancel the hands-free function
Press 📞 (📢) again.
- When you finish the call, the hands-free operation is automatically canceled.

● Talk into the FOMA terminal from a distance of 30 cm or less.

Entering a Pause, Timer, or +

You can include a pause, timer, or + in a phone number (within 80 digits in all) to place a call.
The phone number and pause, timer, or + can be saved together in the Phonebook.
- Pause and timer are valid only for a voice call.

Entering a pause "P"

If you enter "P (pause)" between the phone number and touch-tones when you book a ticket or play back your home answering machine, the touch-tones are sent by separating the numbers at the pause (P).

1 Press ✕モ▾ in the phone number input display.

"P" is entered.

To send touch-tones saved in the Phonebook
When the touch-tones are displayed after you place a call from the Phonebook, press ☰ (Call).

● Some receiver devices may not be able to accept touch-tones.

Entering a timer "T"

To dial an inside line number following an outside line number, enter "T (timer)" between the outside and inside line numbers. After a preset interval in seconds, the inside line number is dialed following the outside line number. An interval of about one second is added for every timer (T) entry. You can enter "T" consecutively to make the interval longer.

1 Press ✕モ▾ for over a second in the phone number input display.

"T" is entered.

Entering a "+"

If you enter "+" at the beginning of a phone number when the Auto conversion of the Int'l dial assist setting is set to [ON], a call is dialed by automatically adding the set international access number (set to "009130010" at the time of purchase).

1 Press **0** for over a second in the stand-by display.

"+" is entered.

● You may not be able to place the call if you enter other than a phone number after "+" or enter only "+".

Switching to/from Voice/Videophone Call <Chg. to videophone/Chg. to voice call>

A caller can switch to/from voice/videophone call during a call.

● This function can be used only between terminals that can switch between voice and videophone calls. A recipient must preset the V.ph switch notice to [Indication ON] (P.76).

Example: Switching from voice call to videophone call

1 Press ✉ (Func) during a voice call, select [Chg. to videophone], and press ▤.

```
Change to
videophone?

    Yes
    No
```

[Yes] : Switch the call from voice call to videophone call.

[No] : Return to the voice call without switching the call.

To switch from videophone call to voice call

From the Function menu, select [Chg. to voice call] → [Yes]. When the call is switched to the voice call, the hands-free operation is canceled.

2 Select [Yes] and press ▤.

Chg. to videophone
090XXXXXXXX
SWITCHING

テレビ電話接続
Connected to videophone
00:00:01

00:00:05
DTMF

The recipient's image
A substitute image may appear according to the setting on the recipient's terminal.

While the call is switched, an animation is displayed and you hear a guidance notifying you that a call is switched.

When the call is switched to the videophone call, your image is sent to the recipient and the call is switched to the hands-free operation that allows you to hear the recipient's voice from the speaker.

● If packet communication is in progress, it is disconnected and the FOMA terminal is switched to videophone.

● When the call is put on hold on the recipient or while the recipient is performing packet communication, you cannot switch to videophone.

● The switching operation takes about five seconds. It may take time depending on the radio wave condition.

● Switching to/from voice/videophone call may not be performed in some radio wave condition, and the phone may be disconnected.

● You are not charged while "Chg. to videophone"/"Chg. to voice call" is displayed.

● Every time you switch, the call duration starts from 0 seconds. When you finish the call, the total call duration is displayed for each of the voice and videophone calls.

Using the Redial/Received Record

<Redial record/Received record>

Up to 30 previously placed/received calls are saved as call records with their dates/times, phone numbers, and names. The phone numbers or names appear in descending order from the most recent call. For a PushTalk call, the group name or the first member's name appears.

- When 2in1 is used, up to 30 redial/received records of Number A and Number B can be saved for each separately. When 2in1 is set to the Dual mode or OFF, up to 30 redial/received records of both numbers appear in descending order from the most recent call at once.
- The call records of Number A and Number B are defined by different colors for each. The displayed color varies depending on the Color theme setting of the Kisekae setting (P.116).
  Also, you can set the color for Number B from [dark]/[light] at the Disp. call/rcv. No. of 2in1 (P.353).

Redial record

Dial frequency record

Received record

① Call type

▮ / ▮※	Placed/received voice call / Missed voice call (" 🕮 " appears in case of the Dial frequency record)
▣ / ▣※	Placed/received videophone call / Missed videophone call (" 🕮 " appears in case of the Dial frequency record)
64K / 64K	Received 64K data communication / Missed 64K data communication
⟐ / ⟐	Originated/received PushTalk call / Missed PushTalk call
⟐ / ⟐ / ⟐	PushTalk type (to one person)/(to multiple persons)/(PushTalkPlus)
✎	With Chaku-moji (Displayed only in the Received record)

※ " 💬 " appears when the Record message/Videophone message is recorded.

② Phone type

📱	Mobile1	📱	Mobile2	📞	Public phone
📹	Videophone	🏠	Home phone	🏢	Office phone
📠	Home FAX	📠	Office FAX	📻	QUICKCAST

- The phone type icons do not appear when the Personal data lock is set.

Example: Displaying the Redial record

1 Press ▶ (🗔) in the stand-by display.

The Redial record display appears.

To display the Received record
  Press ◀ (🗔) in the stand-by display.

To display the Dial frequency record
  Press ◀ in the Redial record display.

To display phone numbers
  When saved in the Phonebook, the name and phone type of a recipient are displayed instead of the phone number. Press # to switch the display temporarily between names and phone numbers. The display is not switched when a group name for a PushTalk call is displayed.

To place a voice call
  Move the cursor to a call record and press 📞 .

To place a videophone call
Move the cursor to a call record and press ⎗ch⎘ (V.phone).

To originate a PushTalk call
Move the cursor to a call record and press ⎗🄿⎘.

To send mail
You can send mail to a person whose phone number and mail address are saved in the Phonebook. Move the cursor to a call record and from the Function menu, select [Reply by mail] → a mail address. Compose mail and send it.

To save in a group of the PushTalk phonebook
When you perform PushTalk communication among several persons saved in the PushTalk phonebook, move the cursor to a received record of the PushTalk call (🄿), press ⎗ⅰ⎘ (Save), select a group, and press ⎗ⅰ⎘ (Complete).

● If the same phone number has been repeatedly called, only the most recent call is saved in the Redial record. Note, however, that when you originate a PushTalk call, individual PushTalk communication among several persons are recorded.

● If you switch the call between voice and videophone during a call, the call you placed/received first is saved in the Redial/Received record.

● When a caller uses a "Dial-in" phone number, the phone number displayed may be different from the caller's dial-in number.

● When you place a voice or videophone call from the Received record, a Chaku-moji recorded in the Received record is not sent.

● When the date and time are corrected to the local time during international roaming, "🔍" appears next to the name/phone number (P.43).
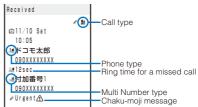

Displaying the Detailed Information of the Redial/Received Record

1 From the call record display, select a call record and press ▤ (Detail).

Redial record

```

```

• The following icons show the Multi Number type.

	基本契約番号 (Basic Number)		付加番号1 (Additional No.1)		付加番号2 (Additional No.2)

● When you select a call record of a PushTalk call, [🄶🄿] group name, [👤] caller name (Received record only), and all members are displayed.

Deleting the Redial/Received Record

The call records are retained even if the FOMA terminal is powered off. If you do not wish others to know the previously dialed records, delete one or all of the call records.

• If you delete either a redial record or a dial frequency record, both records are deleted.

Example: Deleting a call record

1 From the call record display, select a call record and press ✉ (Func).

The Function menu appears.

To delete several call records

From the Function menu, select [Delete] → [Select&delete], select call records, press ⓘ (Complete), and select [Yes].

To delete all call records

From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

2 Select [Delete] → [Delete one] → [Yes] and press ▤.

The selected call record is deleted.

● If you perform the Delete all when 2in1 is used, all the Call records of Number A and Number B are deleted, regardless of the 2in1 mode.

Setting the Chaku-moji   <Chaku-moji>

When you place a voice or videophone call, you can send a message (Chaku-moji) that is displayed in the recipient's Incoming call display in order to notify the purpose of the call even before this recipient answers.

```
┌─────────────────────┐
│Incoming call        │
│                     │
│ 090XXXXXXXX         │
│                     │── Chaku-moji
│ ✎Urgent⚠            │   Chaku-moji disappears when you start talking on the phone.
│                     │   Chaku-moji can be checked in the detailed information display of the Received Record (P.54).
│                     │
│                     │
│  ▪▪▪ Calling ▪▪▪    │
└─────────────────────┘
```

- For more details about the Chaku-moji or compatible models, see the DoCoMo's website or "Mobile Phone User's Guide【Network services】".
- Charge is required for the Chaku-moji sender, but no charge for a recipient.
- Chaku-moji cannot be used for PushTalk calls.
- When you use the FOMA terminal overseas, you cannot send or receive a Chaku-moji message.

Editing Chaku-moji Messages

You can save up to 10 Chaku-moji messages.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Chaku-moji] → [Create message] and press ▤.

To delete a Chaku-moji message

Move the cursor to a Chaku-moji message and from the Function menu, select [Delete one] → [Yes]. To delete all Chaku-moji messages, from the Function menu, select [Delete all], enter the Security code, and select [Yes].

2 Press ⓘ (Edit) and enter a Chaku-moji message.

Enter a message within 10 characters regardless of pictographs, symbols, full-width, or half-width. The Chaku-moji message is saved.

Setting the Display for Chaku-moji Being Received

You can set the display style to be used when you receive a Chaku-moji message.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Chaku-moji] → [Set Message display] and press ▬.

```
Set Message display

Display all Msgs
Only numbers in PB
Only calls w/ID
Hide all messages
```

[Display all Msgs]   : Receive and display all Chaku-moji.
[Only numbers in PB] : Receive and display Chaku-moji sent only from callers who are saved in the Phonebook. You cannot receive Chaku-moji from a caller who is saved in the Phonebook as Secret unless the Secret display is set to [ON].
[Only calls w/ID]   : Receive and display Chaku-moji sent only from callers who notify their caller IDs.
[Hide all messages]   : Do not receive or display any Chaku-moji.

2 Select the Chaku-moji display style and press ▬.

The display style for Chaku-moji is set.

Placing a Call with a Chaku-moji Message

You can place a voice or videophone call together with a Chaku-moji message.

1 Enter a phone number in the stand-by display and press ✉ (Option).

The Call menu appears.

2 Select [Chaku-moji] and press ▬.

```
Select the way
to input
chaku-moji

None specified
Create message
Select message
```

[None specified]   : Place a call without a Chaku-moji message.
[Create message] : Create a Chaku-moji message and place a call. Enter a message within 10 characters regardless of pictographs, symbols, full-width, or half-width.
[Select message] : Select a saved Chaku-moji message and place a call. (This menu appears only when the Chaku-moji message is saved.)
[Sent messages]   : Select a sent Chaku-moji message and place a call. Up to 10 Chaku-moji messages can be saved. (This menu appears only when there is a sent Chaku-moji message.)

3 Compose/Select a Chaku-moji message.

The Chaku-moji message is composed/selected.

4 Select another call condition and press � 📞 (Call).

```
Calling

-090XXXXXXXX-
✎Urgent⚠

Calling
```

The call is dialed according to the selected Chaku-moji message and call condition.

- When a Chaku-moji is received by the recipient, "🖊" appears in the sender's terminal display and charge is required.
- If the recipient does not receive the Chaku-moji, "🖊" appears. In this case, there is no charge. (For example, when the recipient's terminal does not have Chaku-moji support or if the Chaku-moji was received in a condition other than that set using the Set Message display menu.)
- If the recipient's terminal has the following settings or conditions, Chaku-moji cannot be delivered to this recipient and the call is not saved in the Received record of the recipient's terminal. "🖊" or "🖊" is not displayed on the sender's terminal and there is no charge for this transmission.
  - When the recipient's terminal is outside of the service area
  - When the recipient's terminal is powered off
  - When the Public mode (Drive mode) is set
  - When the To answer the Record message is set to 0 seconds, etc.
- Even if a Chaku-moji was delivered successfully to the recipient, "🖊" or "🖊" may not be displayed in the sender's terminal display depending on the radio wave condition. In this case, charge is required.
- If you place a videophone call with a Chaku-moji while the Auto redial(voice) is set to [ON], the Chaku-moji is sent even when this call is redialed as a voice call.

Changing the Caller ID Setting ON/OFF for an Individual Call <186/184>

You can choose whether to notify a recipient of your phone number (caller ID) every time you place a call.

- The caller ID is important personal information. Carefully decide whether you want to notify a recipient of your caller ID.

You can use the following methods to notify or not notify your caller ID.

Presetting for all calls	Use the Set Notification to set [Notify]/[Not notify] (P.44).
Setting in the Phonebook	Add "186/184" to the recipient's phone number when you save it in the Phonebook (P.91).
Setting when you place a call	Set [Call with ID]/[Call without ID] at the Caller ID of the Option call display after dialing a recipient's phone number (P.57). Enter "186/184" before dialing a recipient's phone number (P.49). To notify the caller ID Press 186 + Phone number + 📞. Not to notify the caller ID Press 184 + Phone number + 📞.

- When you place a call by pressing 📞 after dialing a phone number with "186/184", the phone number is saved in the Redial record with "186/184".
- You cannot set whether to notify the caller ID when you originate a PushTalk call even when you add "186/184".

Placing a Call by Specifying a Condition

When you place a call, you can set a call condition at the Option call display such as selecting a call type or whether to notify a recipient of your phone number for each call.

1 Enter a phone number in the stand-by display and press ✉ (Option).

```
Option call
Phone number
090XXXXXXXX
Call method
           Voice call ▾
Caller ID
    None specified ▾
V.phone outgoing img
     My side
Chaku-moji
    None specified
Prefix
                    ▾
```

[Call method]   : Select [Voice call]/[Videophone]/[PushTalk]/[SMS].

[Caller ID]   : Select whether to notify your phone number to the recipient. When you select [None specified], follow the setting of the Set Notification.

[V.phone outgoing img] :
                      Select an image to be sent when placing a videophone call.

[Chaku-moji]   : Compose/select a Chaku-moji message (P.56).

[Prefix]   : Place a voice or videophone call by selecting a saved prefix (P.58). (This item appears only when a prefix is saved.)

[Int'l prefix]   : Place a voice or videophone call by selecting a saved international access number (P.60). (This item appears only when you enter a phone number with a preceding "+".)

[Country code]   : Place a voice or videophone call by selecting a saved country code (P.60).

[2in1 call number] : Select a Caller ID when 2in1 is set to the Dual mode.

[Multi Number]   : Select a Caller ID when the Multi Number call is set to [ON].

2 Set each item.

3 Press 📞 (Call).

The call is dialed according to the set call condition.

● A call condition which cannot be set does not appear.
● You cannot place a call even if you set [Prefix], [Int'l prefix], or [Country code] from the Call condition if a phone number you dialed exceeds 81 digits when the call condition is added.

Setting a Prefix   <Prefix setting>

You can save up to three specific numbers (prefixes) to be added at the beginning of a phone number when you place a call.

1 From the Menu, select [Settings] → [Call] → [Call assist] → [Prefix setting] and press ▤.

```
Prefix setting
Number ❶

Number ②

Number ③

```

2 Select a number and press ▤.

The number input display appears.

3 Enter a prefix and press ▤ (OK).

Enter a prefix within 26 digits.

Placing an International Call <WORLD CALL>

With WORLD CALL, you can place an international call from a DoCoMo mobile phone.

- The users who subscribe to the FOMA services are automatically signed up for the "WORLD CALL" service when the agreement is concluded. (Excluding users who choose to refuse the WORLD CALL service.)

■Placing an international call by entering a phone number

| 009130 | — | 010 | — | Country code | — | Area code (City code) | — | Phone number | 📞 |

- You can save the above procedure in the Phonebook of the FOMA terminal.
- If an area code begins with "0", omit the "0" when dialing (except when calling ordinary phones, etc. in Italy).

■Placing an international call by using "+"

When you enter "+" at the beginning of a phone number, you can place an international call without entering an international access number such as "009130010" (P.52).

- The Auto conversion of the Int'l dial assist is set to [ON] at the time of purchase. An international access number is entered automatically.

| 0 (for over a second) | — | Country code | — | Area code (City code) | — | Phone number | 📞 |

- You can save the above procedure in the Phonebook of the FOMA terminal.
- If an area code begins with "0", omit the "0" when dialing (except when calling ordinary phones, etc. in Italy).
- You can place calls to about 240 countries and regions in the world.
- Charges for this service are billed together with the monthly call charges.
- No application fees or monthly basic charges are required.
- This service is not available in some service charge plans.
- Change in the dial procedure for international calls.
  Since mobile communication such as mobile phones is beyond the scope of the "MYLINE" service, "MYLINE" service is not available also for WORLD CALL. With the introduction of "MYLINE" service, however, the dial procedure for international calls on mobile phones has been changed. Note that the old dial procedure (excluding "010" from the above mentioned dial procedure) is not available.
- For the WORLD CALL details, call the "General Inquiries" on the backcover of this manual.
- To use an international call service company other than DoCoMo, contact them directly.
- If you have an overseas specific 3G mobile phone, you can connect to an international videophone by selecting videophone after the above dialing method.
  ※ See the NTT DoCoMo's website for information about countries to which a videophone call can be connected and telecommunication companies.
  ※ A recipient's image displayed on the FOMA terminal may be fuzzy or a call may not be connected successfully depending on the terminal to which the international videophone is connected.

Setting a Number Other Than WORLD CALL

You can save up to three international access numbers and up to 30 country codes to be added at the beginning of a phone number in order to place an international call from Japan. You can automatically add the international access number by entering "+" when you place a call. You can automatically convert the first digit "0" of the phone number to a country code when you place a call from the Phonebook, etc.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l dial assist] and press ⬓.

Int'l dial assist
Auto conversion
ON ▾
Int'l prefix
World Call
Country code
日本

[Auto conversion] : Set whether an international access number is automatically added.

[Int'l prefix] : Save an international access number and set the Auto assist number. You can also add an international access number by selecting [Int'l prefix] at the Option call display when you place a call.

[Country code] : Save a country code. You can add a country code by selecting [Country code] at the Option call display when you place a call.

2 Select [ON]/[OFF] at [Auto conversion].

[ON] : Automatically add the additional number you set for the Int'l prefix.

[OFF] : Do not automatically add the additional number.

3 Select [Int'l prefix] and press ⬓.

The Int'l prefix setting display appears.

4 Select an input field and press ⬓.

Int'l call1
Name
World Call
Int'l access No.
009130010

5 Enter a name in the name field and an international access number in the international access number field.

Enter a name within 10 full-width characters or 20 half-width characters and an international access number within 10 digits.

6 Press 🛈 (Complete) and press ◀.

The international access number is saved.

To set the Auto assist number

Move the cursor to the input field and press 🛈 (Auto). " ▶ " appears to the left of the Auto assist number.

7 Select [Country code] and press ⬓.

The Set country code display appears.

8 Select an input field and press ⬓.

Country code23
Country Name
Country code

9 Enter a country name in the country name field and a country code in the country code field.

Enter a country name within seven full-width characters or 14 half-width characters and a country code within five digits.

● "+" is already entered in the country code field.

10 Press 🛈 (Complete).

The country code is saved.

To set the Auto assist number

Move the cursor to the input field and press 🛈 (Auto). " ▶ " appears to the left of the Auto assist number.

Placing a Call by Specifying a Sub-address   <Sub-address>

You can set to place a call to a specific phone or communication device by specifying a sub-address.

● The sub-address is also used when you select a content in V-Live.

1 From the Menu, select [Settings] → [Call] → [Call assist] → [Sub-address] and press ▤.

[ON] : Recognize the numbers after "＊" as a sub-address.

[OFF] : Do not recognize the numbers after "＊" as a sub-address.

2 Select [ON]/[OFF] and press ▤.

The Sub-address is set.

To place a call by specifying a sub-address

In the stand-by display, enter a phone number + ＊ + sub-address and press either 📞 or 📺 (V.phone).

● Even if the Sub-address is set to ON, "＊" is not recognized as the sub-address separator but as part of a phone number in the following cases: where it is at the beginning of a phone number and immediately after a number entered using Prefix/Int'l prefix/Country code of the Option call display for placing a call.

Setting the Alarm When Reconnecting a Dropped Call   <Reconnect alarm>

This function automatically reconnects the call interrupted during a voice, videophone, or PushTalk call due to the radio wave condition, such as in a tunnel or between buildings, right after the radio wave condition is recovered. You can set an alarm tone when a call is reconnected.

1 From the Menu, select [Settings] → [Call] → [Call setting] → [Recnct ALM] and press ▤.

[High] : Sound the high alarm tone.

[Low] : Sound the low alarm tone.

[OFF] : Do not sound the alarm tone.

2 Select the type of the alarm tone and press ▤.

The alarm tone during reconnection is set.

● The recipient does not hear any sound while the radio wave is interrupted.

● The time required for reconnection depends on the usage and radio wave condition. The average reconnection time is about 10 seconds and the caller is charged for the time spent for reconnection.

Improving Voice Clarity by Suppressing Background Noise <Reduce noise>

You can suppress background noise during a voice or videophone call or during playing back an answering message set for the record message.

1 From the Menu, select [Settings] → [Call] → [Call quality] → [Reduce noise] and press ▤.

[ON]   : Suppress background noise.
[OFF] : Do not suppress background noise.

2 Select [ON]/[OFF] and press ▤.

The Reduce noise is set.

Talking Hands-free While Driving <Hands-free mode>

You can place or receive a voice call using a hands-free device by connecting the FOMA terminal to a device such as the In-Car Hands-Free Kit 01 (optional) or car navigation system.

For details about the operation of the hands-free device, see the user's manual of the device. When you use the In-car Hands-free Kit, you need the FOMA In-Car Hands-Free Cable 01 (optional).

● The incoming call display and ring tone operation follow the FOMA terminal settings.
● When a setting is made for hearing sound from the hands-free device, a ring tone sounds from the hands-free device even if the FOMA terminal is set to the Manner mode or its Ring volume is set to [OFF].
● Even if you connect the FOMA terminal to a hands-free device, the Public mode (Drive mode) and Record message function operate normally.
● When a setting is made for hearing sound from the FOMA terminal, the operation when the FOMA terminal is folded or changed to the TV style during a call follows the Setting when folded. When a setting is made for hearing sound from the hands-free device, the call continues even if the FOMA terminal is folded or changed to the TV style regardless of the setting of the Setting when folded.
● When you use the In-Car Hands-Free Kit 01, "⬚" appears. If you use any other commercially available car adapter, "⬚" may appear.

Receiving a Voice/Videophone Call

When you receive a voice or videophone call, you are notified by flashing indicator, ring tone, vibrator, etc. The operation for an incoming call varies depending on the settings of the Incoming set, Manner mode, etc.

Example: Receiving a voice call

1 When receiving a call, press ⌒.

```
Incoming call

090XXXXXXXX
✎Urgent⚠

▓▓▓ Calling ▓▓▓
```
└─ Chaku-moji (P.55)

```
Talking

090XXXXXXXX
Call duration        0:03
```

A phone number appears in the display when a caller sends it.

When you receive a videophone call
　Your image is sent to the caller and the call is switched to the hands-free operation that allows you to hear the caller's voice from the speaker.

When the caller notifies you of the phone number
　When saved in the Phonebook, the name and phone number of a caller are displayed. If you saved the same phone number for several names in the Phonebook, the name stored using the smallest memory number is displayed. The Des phone tone, Des call display, and Select phone Illum. saved in the Phonebook are used.

When the caller does not notify you of the phone number
　The reason why the phone number is not displayed appears.

Non-display reason	Description
User Unset	When a call is received from a caller who does not notify the caller's phone number intentionally.
PublicPhone	When a call is received from a public phone, etc.
Unavailable	When a call is received from a caller who cannot notify the caller's phone number, such as from overseas and from an ordinary phone through call forwarding services (however, the caller's phone number may be displayed depending on the intermediary telephone company).

To connect a call to the Voice Mail Service Center
　From the Function menu, select [FWD to Voice Mail].

To forward a call to a forwarding number
　From the Function menu, select [Call Forwarding].

To reject a call
　From the Function menu, select [Call Rejection].

2 Press ⌒ to hang up.

- When you receive a voice call, you can answer it by pressing ▤ (Call) instead of ⌒. When you set the Any key answer to [ON], you can also press ⓪ to ⑨, ＊, or ＃ to answer a call (P.64).
- When you receive a videophone call, you can answer it by pressing ⒞ (V.phone) instead of ⌒. To answer a call with a substitute image, press ▤ (Sub) (P.74).
- If you receive a videophone call while the Manner mode is set, the screen for confirming whether the hands-free operation is set to ON appears. If you do not want to use the hands-free operation, select [No].
- You can preset the hands-free function of a videophone call to [OFF] (P.75).
- You may hear beeps (ring tone during a call) while talking on the FOMA terminal.
  If [Answer] is set for the Arrival Call Act with the Voice Mail Service, the Call Forwarding Service, or the Call Waiting Service subscribed, the beeps (the ring tone during a call) sound and the following operations are available when there is another incoming call during a call:
  <Contents of subscription>
  - The Voice Mail Service............ Forward a call to the Voice Mail Service Center.
  - The Call Forwarding Service... Forward a call to a forwarding number.
  - The Call Waiting Service......... Put the active call on hold and answer the incoming call.

Receiving a Call by Switching to/from Voice/Videophone Call

A caller can switch between voice and videophone calls during a call. When the caller switches the voice call to the videophone call, a recipient can select whether to send a camera image.

- This function can be used only between terminals that can switch between voice and videophone calls. Preset the V.ph switch notice to [Indication ON] (P.76).

Example: When the voice call is switched to the videophone call

1 When the screen for confirming whether to send your own image appears during a voice call, select [Yes] and press ▭.

Chg. to videophone

090XXXXXXXX

SWITCHING

While the call is switched, an animation is displayed and you hear a guidance notifying you that a call is switched.

Send camera image

Yes
No

[Yes] : Send a camera image to the caller's phone display.
[No] : Send a preinstalled image to the caller.

When the videophone call is switched to the voice call

The call is automatically switched to the voice call. When the call is switched to the voice call, the hands-free operation is canceled.

When the call is switched to the videophone call, your image is sent to the caller and the call is switched to the hands-free operation that allows you to hear the caller's voice from the speaker.

Pressing a Key on the Keypad to Receive a Call <Any key answer>

You can set to answer a call by pressing a key on the keypad instead of pressing [📞] when you receive a voice or PushTalk call.

1 From the Menu, select [Settings] → [Call] → [Call assist] → [Any key ans] and press ▭.

[ON] : Enable to answer a voice or PushTalk call also by pressing [0] to [9], [*], or [#].
[OFF] : Disable to answer a voice or PushTalk call by pressing [0] to [9], [*], or [#].
To answer a voice call, press [📞] or ▭ (Call) ([📞], [📲], or ▭ (Answer) for a PushTalk call).

2 Select [ON]/[OFF] and press ▭.

The Any key ans is set.

Setting the Operation for the FOMA Terminal Being Folded during a Call <Setting when folded>

You can end a call or put a call on hold by just folding the FOMA terminal during a voice or videophone call. You can also end a call or switch a call to the hands-free operation by folding the FOMA terminal during PushTalk communication.

1 From the Menu, select [Settings] → [Call] → [Call setting] → [Setting when folded] and press ▤.

```
Setting when folded
Voice call/V. phone
        Disconnect ▾
PushTalk
        Speaker call ▾
```

[Voice call/V.phone] : Set the operation for the FOMA terminal being folded during a voice/videophone call.

[PushTalk] : Set the operation for the FOMA terminal being folded during PushTalk communication (P.88).

2 Select an operation to be set at [Voice call/V.phone].

[Holding] : Put the call on hold. Both you and the recipient hear the melody "Hamabe no uta". During a videophone call, the preinstalled image is sent to the recipient.

[Mute] : Put the call on hold with the voice muted. During a videophone call, a substitute image is sent to the recipient (P.74).

[Disconnect] : Hang up the call.

The operation to be performed when you fold the FOMA terminal during a voice or videophone call is set.

- The operation when the FOMA terminal is changed to the TV style during a voice/videophone call or PushTalk communication follows the Setting when folded.
- When the Flat-plug Earphone/Microphone with Switch (optional) is connected, the Setting when folded is disabled and the call continues even if you fold the FOMA terminal. If it is during a videophone call that you fold the FOMA terminal, a substitute image is sent.

Using the Low Voice Feature <Whisper mode>

You can set the FOMA terminal so that the recipient can hear your voice at a normal volume level even if you speak in low voice during a voice call.

1 Press ▲マナー during a call.

```
Talking

03XXXXXXXX

Whisper mode    12:34
```

The call is switched to the Whisper mode and the message "Whisper mode" is displayed.

To cancel the Whisper mode

Press ▲マナー again.

- When you finish a call, the Whisper mode is canceled automatically.

Putting a Call on Hold during a Call <Holding>

The call can be put on hold during a voice or videophone call so that your voice cannot be heard by the recipient.

● Even if the call is put on hold, the caller is charged for the call.

1 Press ✉ (Func) during a call, select [Holding], and press ▤.

Both you and the recipient hear the melody "Hamabe no uta". During a videophone call, a preinstalled image is sent to the recipient.

To cancel the Holding
Press 📞.

Putting a Call on Hold <On hold>

If you cannot answer a voice or videophone call immediately, you can put the call on hold.

● Even if the answer is put on hold, the caller is charged for the calling charge.

Example: Putting a voice call on hold

1 When receiving a call, press 📞 (HLD).

On hold

03XXXXXXXX

Call duration   0:03

The answer is put on hold.
The guidance to inform the caller that you are currently unable to answer the call is played back. During a videophone call, a preinstalled image is sent to the recipient.

● If you press 📞 while the call is put on hold, the call on hold is disconnected.

2 When ready to answer the call, press 📞.

The On hold is canceled and you can talk.

● If you have signed up for the Voice Mail or Call Forwarding Service, you can select [FWD to Voice Mail] or [Call Forwarding] from the Function menu while you are receiving a call, in order to use those services.

Using the Public Mode (Drive Mode) <Public mode (Drive mode)>

The Public mode is an automated answering service which takes into account the manners in highly public places. When the Public mode is set, the guidance is played back to inform the caller that you are unable to answer the call because you are driving or in a place where talking on a mobile phone should be avoided (trains, buses, or movie theaters), and then the call is disconnected.

● The Public mode can be set or canceled even if "📶×" is displayed.
● The Public mode cannot be used during data communication.

1 Press ⌗ (🚗) for over a second in the stand-by display.

The Public mode is set and "🚗" appears.

● When the Manner mode and the Public mode are set simultaneously, the Public mode has priority.

To cancel the Public mode

Press ⌗ (🚗) for over a second in the stand-by display. The Public mode is canceled and "🚗" disappears.

■When the Public mode (Drive mode) is set

● Even if there is an incoming call, the ring tone does not sound and you cannot answer it. The notification icon of missed call appears and the call is saved in the Received record. The guidance for the Public mode is played back to inform the caller that you are unable to answer the call because you are driving or in a place where talking on a mobile phone should be avoided (trains, buses, or movie theaters), and then the call is disconnected.

● Even if there is an incoming PushTalk call, you cannot answer it. The notification icon of missed call appears and the call is saved in the Received record. If the received call is for the PushTalk communication among several persons, the message "Driving" appears in the On PushTalk display of the members.

● The call can be placed normally.

● The following tones do not sound and the vibrator, etc. does not operate.
  - Ring tone
  - Battery alarm
  - Charge sound
  - Position location sound
  - Loc. provide/check tone
  - Alarm tone
  - Alarm for the Call cost limit
  - ToruCa receive completion tone
  - Location notice sound
  - Schedule alarm
  - i-αppli software sound
  - Booking alarm
  - Loc. provide/accept tone

■Operation for an incoming call when network services and the Public mode (Drive mode) are set

FOMA terminal's operations for an incoming call while the Public mode is set depend on what network services are used, as follows.

Service	When a voice call is received	When a videophone call is received
The Voice Mail Service※1	After the guidance for the Public mode is played back, the call is connected to the Voice Mail Service Center.	The video guidance for the Public mode is not played back and the call is connected to the Voice Mail Service Center.
The Call Forwarding Service※1※2	After the guidance for the Public mode is played back, the call is forwarded to a forwarding number.	The video guidance for the Public mode is not played back and the call is forwarded to a forwarding number. If the forwarding number of the phone does not support a videophone call, the call is disconnected.
The Call Waiting Service	After the guidance for the Public mode is played back, the call is disconnected.	After the video guidance for the Public mode is played back, the call is disconnected.
The Nuisance Call Blocking Service	After the guidance is played back to inform the caller that the call is not able to be connected, the call is disconnected if the caller is saved as a nuisance caller.	After the video guidance is played back to inform the caller that the call is not able to be connected, the call is disconnected if the caller is saved as a nuisance caller.
The Caller ID Display Request Service	● After the caller ID request guidance is played back, the call is disconnected if the caller does not notify the phone number. ● After the guidance for the Public mode is played back, the call is disconnected if the caller notifies the phone number.	● After the video guidance for the caller ID request is played back to the caller, the call is disconnected if the caller does not notify the phone number. ● After the video guidance for the Public mode is played back to the caller, the call is disconnected if the caller notifies the phone number.

※1 If you set the ring time of the Voice Mail or Call Forwarding Service to 0 seconds, the guidance for the Public mode is not played back and a call is not saved in the Received record, either.

※2 You can set whether the guidance is played back to a caller with the "1429" setting of the Call Forwarding Service.

Using the Public Mode (Power off)

<Public mode (Power off)>

The Public mode (Power off) is an automated answering service which takes into account the manners in highly public places. When the Public mode (Power off) is set, the guidance is played back to inform the caller that you are unable to answer the call because you are in a place where it is required to power off a mobile phone (such as in hospitals, airplanes, and near priority seats in trains), provided that there is an incoming call when the FOMA terminal is powered off, and then the call is disconnected.

1 Press ✳ 2 5 2 5 1 + 📞 .

The Public mode (Power off) is set. (No change appears on the stand-by display.)

To cancel the Public mode (Power off)
Press ✳ 2 5 2 5 0 + 📞 .

To check the setting
Press ✳ 2 5 2 5 9 + 📞 .

■When the Public mode (Power off) is set

● If there is an incoming call when the FOMA terminal is powered off or you are outside of the service area or in a location without the radio wave, the guidance for the Public mode (Power off) is played back to inform the caller that you are unable to answer the call because you are in a place where it is required to power off a mobile phone, and then the call is disconnected.

● You cannot answer an incoming PushTalk call. If the received call is for the PushTalk communication among several persons, the message "✖ Disconnect" appears in the On PushTalk display of the members.

■Operation for an incoming call when network services and the Public mode (Power off) are set

FOMA terminal's operations for an incoming call while the Public mode (Power off) is set depend on what network services are used, as follows.

Service	When a voice call is received	When a videophone call is received
The Voice Mail Service	After the guidance for the Public mode (Power off) is played back, the call is connected to the Voice Mail Service Center.	The video guidance for the Public mode (Power off) is not played back and the call is connected to the Voice Mail Service Center.
The Call Forwarding Service※	After the guidance for the Public mode (Power off) is played back, the call is forwarded to a forwarding number.	The video guidance for the Public mode (Power off) is not played back and the call is forwarded to a forwarding number. If the forwarding number of the phone does not support a videophone call, the call is disconnected.
The Nuisance Call Blocking Service	After the guidance is played back to inform the caller that the call is not able to be connected, the call is disconnected if the caller is saved as a nuisance caller.	After the video guidance is played back to inform the caller that the call is not able to be connected, the call is disconnected if the caller is saved as a nuisance caller.
The Caller ID Display Request Service	● After the caller ID request guidance is played back, the call is disconnected if the caller does not notify the phone number. ● After the guidance for the Public mode (Power off) is played back, the call is disconnected if the caller notifies the phone number.	● After the video guidance for the caller ID request is played back to the caller, the call is disconnected if the caller does not notify the phone number. ● After the video guidance for the Public mode (Power off) is played back to the caller, the call is disconnected if the caller notifies the phone number.

※ You can set whether the guidance is played back to a caller with the "1429" setting of the Call Forwarding Service.

Checking the Missed Calls

<Missed call>

When you are unable to answer an incoming call or receive new mail, the notification icon (P.32) appears in the stand-by display.

If a voice, videophone, or PushTalk call or 64K data communication is not answered, " " appears in the stand-by display. The received record shows the date/time and the person who called (P.53).

1 Press (Link) in the stand-by display and select the notification icon.

The text information for the notification icon appears.

To check the Received record
Select " " (Missed call).

To delete the notification icon
Press CLR for over a second. " " also disappears when the Received record is displayed.

Nov 1 Thu 9:05 AM

Missed call 1 — Text information
— Notification icon

Recording Caller's Messages When Unable to Answer Calls <Record message/Videophone message>

When the Record message/Videophone message is set, the FOMA terminal can record a caller's message when you are unable to answer a call.

- The FOMA terminal can record up to three record messages and videophone messages, each for up to about 15 seconds. If three record messages have been recorded, the Record message does not function. Similarly, when three videophone messages have been recorded, the Videophone message does not function. Delete unnecessary record messages or videophone messages.
- When the Public mode (Drive mode) is set, the Record message/Videophone message dose not operate.

1 Press for over a second in the stand-by display.

Nov 1 Thu 9:05 AM

The Record message/Videophone message is set and " "/" " appears.

To cancel the Record message/Videophone message
Press for over a second in the stand-by display. The Record message/Videophone message is canceled.

● When you are outside of the service area, the Record message does not function. Use the Voice Mail Service (Paid).

Voice/Videophone Calls

4 Select an image to be sent when recording the caller's image from My picture of the Data Box at [Record img(V.phone)].

- You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 50K bytes	Max. [QCIF(W176×H144)]

※ You cannot set an image with file restrictions or a frame image.

5 Press [✉] (Complete).

The operation of the Record message is set.

● When the Voice Mail or Call Forwarding Service and the Record message are set simultaneously, and if you want to give priority to the Record message, set the time before starting the answering message for the Record message shorter than the ring time for the Voice Mail or Call Forwarding Service.

Recording a Caller's Message When Unable to Answer a Call Just Receiving <Quick record message>

You can start the Record message for temporary use when you receive a voice or videophone call even if the Record message is [OFF].

- If three record messages are recorded when the FOMA terminal receives a voice call, the Quick record message function cannot be operated. Similarly, if three videophone messages are recorded when it receives a videophone call, the Quick record message function cannot be operated.

1 Press [メモ▼] while receiving a call.

The answering message is played back to the caller.

To talk to a caller
Press [📞].

When you receive a videophone call
The answering message is played back and the answering image is displayed to the caller. Press [ch] (V.phone) to talk to the caller. If you press ▤ (Sub), you can answer the call with a substitute image.

Playing Back/Deleting a Record Message/Videophone Message/Voice Memo

You can play back or delete a recorded record message/videophone message and voice memo (P.328).

Playing Back a Record Message/Videophone Message/Voice Memo

Example: Playing back a record message

1 Press 〔メモ〕 in the stand-by display, select [Play rec msg], and press ▤.

Play record message
❶ 11/12 9:35
📼 ドコモ一郎
② 11/ 5 22:00
   User Unset
③ 11/ 5 7:50
📼 携帯あき子

To play back a videophone message
Press 〔メモ〕 in the stand-by display and select [Play Vphone msg].

To play back a voice memo
Press 〔メモ〕 in the stand-by display and select [Play voice memo].

To display phone numbers
When saved in the Phonebook, the name and phone type of a caller are displayed instead of the phone number. Press 〔#〕 to switch the display temporarily between names and phone numbers. The display is not switched when a voice memo is displayed.

2 Select a record message and press ▤ (Play).

Play record message
① 11/12 9:35
📼 ドコモ一郎

PLAYING
▶PLAY ━━━━━ =0:05

The record message is played back.

To stop the playback
Press ▤ (Stop).

To play back the previous/next record message
Use ◀ during playback to play back the previous record message and ▶ during playback to play back the next record message.

Deleting a Record Message/Videophone Message/Voice Memo

You can record up to three record messages, three videophone messages, and three voice memos. Delete unnecessary record/videophone messages or voice memos.

Example: Deleting a record message

1 Press 〔メモ〕 in the stand-by display, select [Play rec msg], and press ▤.

To delete a videophone message
Press 〔メモ〕 in the stand-by display and select [Play Vphone msg].

To delete a voice memo
Press 〔メモ〕 in the stand-by display and select [Play voice memo].

To delete all record messages
From the Function menu, select [Delete all], enter the Security code, and select [Yes].

2 Select a record message and press 〔✉〕 (Func).

The Function menu appears.

3 Select [Delete one] → [Yes] and press ▤.

The selected record message is deleted.

Using Chara-den

When you place a videophone call, you can send a character instead of a camera image. You can press keys on the keypad to move a character or some character's mouth to correspond to the voice on the microphone.

• For details about the action lists of the preinstalled Chara-den characters, see P.274.

1 Press ▲ (☐) in the stand-by display, select [Chara-den], and press ▤.
The Chara-den list appears.

2 Select a Chara-den file, press ✉ (Func), select [Call Chara-den], and press ▤.
The screen for selecting the method of entering the phone number appears.

3 Select the method, press ▤, and enter the phone number.

4 Press ⟦ch⟧ (V.phone).

The videophone call is dialed with a Chara-den character set as the substitute image.

To switch between the full-body action and parts action modes
    Press ⟦ch⟧ (Change).
To display the action list
    Press ⟦ i ⟧ (List).
To switch to the mode for sending touch-tones (DTMF)
    From the Function menu, select [DTMF send mode].
To switch to the Chara-den action operating mode
    From the Function menu, select [Action input mode].

©SEGA

● When the mode for sending touch-tones (DTMF) is set, the Chara-den action cannot be operated.

73

Setting the Videophone Operation

<Videophone setting>

Setting the Display to Be Used in a Videophone Call

You can set the image to be displayed on the videophone images (Large) and (Small) during a videophone call.

1 From the Menu, select [Settings] → [Call] → [Videophone] → [Display setting] and press ▤.

[Main-Other side] : Display the recipient's/caller's image on the videophone image (Large) and your image on the videophone image (Small).

[Main-My side] : Display your image on the videophone image (Large) and the recipient's/caller's image on the videophone image (Small).

[Other side only] : Display the recipient's/caller's image only on the videophone image (Large).

[My side only] : Display your image only on the videophone image (Large).

2 Select a display method and press ▤.

The Display setting is set.

Setting a Video to Be Sent to the Recipient/Caller

You can set whether to send a camera image to the recipient when you place a videophone call. You can also set an image from either My picture or Chara-den as a substitute image if you do not want to send a camera image.

1 From the Menu, select [Settings] → [Call] → [Videophone] → [Set outgoing image] and press ▤.

```
Set outgoing image
Camera image     ON ▼
Substitute image
        アイアイ
```

2 Select [ON]/[OFF] at [Camera image].

[ON] : Send a camera image to the recipient when you place a videophone call.

[OFF] : Send a substitute image to the recipient when you place a videophone call.

3 Select a substitute image from My picture/Chara-den of the Data Box at [Substitute image].

● You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 50K bytes	Max. [QCIF(W176×H144)]
Chara-den	—	Max. 100K bytes	—

※ You cannot set an image with file restrictions or a frame image.

The Set outgoing image is set.

Setting the Videophone Image Quality

You can set the quality of an image to be sent to the recipient.

1 From the Menu, select [Settings] → [Call] → [Videophone] → [Visual preference] and press ▤.

[Prefer img qual] : Send an image with priority on image quality.
[Normal]　　　　 : Send an image by keeping a balance between image quality and movement.
[Prefer motion]　 : Send an image with priority on movement.

2 Select the quality of an image to be sent and press ▤.

The Visual preference is set.

Redialing by Voice Call When the Videophone Is Not Connected

When the videophone call is not connected, the FOMA terminal automatically redials by voice call. When the videophone call is connected successfully, the FOMA terminal does not redial by voice call.

1 From the Menu, select [Settings] → [Call] → [Videophone] → [Auto redial(voice)] and press ▤.

[ON]　: Redial by voice call.
[OFF] : Do not redial by voice call.

2 Select [ON]/[OFF] and press ▤.

The Auto redial(voice) is set.

● You are charged for a call instead of digital communication when you redial by voice call.

Using the Hands-free Function

You can set whether to use the hands-free function during a videophone call.

1 From the Menu, select [Settings] → [Call] → [Videophone] → [Hands-free] and press ▤.

[ON]　: You hear the recipient's/caller's voice from the speaker during a videophone call.
[OFF] : You hear the recipient's/caller's voice from the earpiece during a videophone call.

2 Select [ON]/[OFF] and press ▤.

The Hands-free is set.

● When the Flat-plug Earphone/Microphone with Switch (optional) is connected to the FOMA terminal, you hear a recipient's voice from the Earphone/Microphone, regardless of the Hands-free setting.

Setting How to Answer a Videophone Call during i-mode

You can set how to answer a videophone call received during i-mode or packet communication, for example, sending or receiving mail.

1 From the Menu, select [Settings] → [Call] → [Videophone] → [V.ph while packet] and press ▤.

[Prefer V.phone] : Receive a videophone call. When you answer the videophone call, the packet communication in progress is disconnected.

[Prefer packet] : Continue the packet communication without receiving a videophone call. The received call is saved in the Received record.

[V.ph voicemail] : Connect a received videophone call to the Voice Mail Service Center.

[Call forwarding] : Connect a received videophone call to a forwarding phone number.

2 Select the operation to be performed when you receive a videophone call during i-mode communication and press ▤.

The V.ph while packet is set.

Setting Notice for Switching between Voice and Videophone Calls <Videophone switch notice>

You can set whether to notify the recipient/caller that the FOMA terminal is capable of switching between voice and videophone calls.

● You cannot perform this setting when you are outside of the service area or in a place where radio waves do not reach, or during a voice or videophone call.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [V.ph switch notice] and press ▤.

```
V.ph switch notice
Indication ON
Indication OFF
Check setting
```

2 Select [Indication ON] → [Yes] and press ▤.

When you do not want to notify
Select [Indication OFF] → [Yes].

To check the setting
Select [Check setting].

PushTalk

What is PushTalk?

You can communicate among several persons (up to five persons including yourself) with a simple operation of pressing 🄿 to display the PushTalk phonebook, selecting recipients, and pressing 🄿. Every time you press 🄿 (speak), you are charged for PushTalk communication.
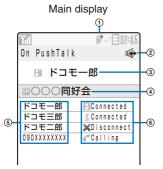

● For more details on PushTalk or compatible models, see the DoCoMo's website or "Mobile Phone User's Guide 【Network services】".

PushTalkPlus

The PushTalkPlus is a service that allows you to communicate simultaneously with up to 20 persons (including yourself). It also allows you to use PushTalk more conveniently by using the shared phonebook on the network or checking the status of members.

※ For details about operations, see the general information which you are handed when you subscribe to the service.

※ You need to subscribe to PushTalkPlus separately.

Using the Display during PushTalk Communication

Main display

Sub-display

① 📢 : During PushTalk communication

② 🔊 : Hands-free ON

③ Active speaker
The phone number (or the member name when the speaker is saved in the Phonebook) appears
[Myself]   : You are currently the active speaker (you can speak)
[User Unset]   : The Caller ID of the caller is set to [OFF]
[?]   : The active speaker is not identified
(No indication) : There is no active speaker (open status)※
※ When there is no active speaker, the group name appears in the sub-display.

④ Group name
Displayed only in the display of the caller who originated a call using a group

⑤ Members
The phone number (or the member name when the member is saved in the Phonebook) appears
[User Unset]   : The Caller ID of the caller is set to [OFF]

⑥ Communication status
🔲 Connected   : The caller who originated a PushTalk call
👤 Connected   : Currently participating in the PushTalk communication
📞 Calling※   : The recipient's terminal is ringing
✖ Disconnect※ : The recipient ended the PushTalk session, does not answer the call, or is outside of the service area. Otherwise the recipient's terminal is powered off
🚗 Driving※   : Public mode (Drive mode) is set
※ These icons appear only when PushTalk communication is performed among several persons.

Operations during PushTalk Communication

Operation	Key operation
Speak	When the floor is open, you can speak only while you press and hold 🄿. While another member has the floor, you cannot get it even if you press 🄿.
Add a member	Press ✉ (Add). This operation is enabled only when you originate a PushTalk call.
Switch ON/OFF of the hands-free operation	Press 📞 (🔊). Every time you press the key, the ON/OFF setting is switched.
Adjust the volume of the caller's voice	Press ▲ ▼.
Terminate a PushTalk call	Press 📞.
Receive a voice call	Press 📞 (P.63). If you receive a voice call, the PushTalk communication is terminated. The operation for an incoming voice call while using PushTalk can be customized (P.87).

● Each speech session granted by obtaining the floor is time limited. The obtained floor is released after the time limit. The PushTalk communication is terminated if no member takes over the floor within a certain interval.

● When there is any change in PushTalk communication status or a member takes over the floor, the signal tone sounds.

● You cannot use i-mode during PushTalk communication.

● When other functions are activated, you cannot obtain the floor. However, when you activate a function while you have the floor, you can speak while you press and hold 🄿.

● When you receive a videophone call, data communication, or a PushTalk call during PushTalk communication, a new call is saved in the Received record and the current PushTalk call is continued.

Originating a PushTalk Call

- You cannot originate a PushTalk call during a voice call, a videophone call, or data communication, or while the B mode is set in 2in1.
- If you originate a PushTalk call during i-mode communication, the i-mode communication is terminated. Originating a PushTalk call while running i-αppli also stops the i-αppli.
- Number B of 2in1 cannot be used for PushTalk and PushTalkPlus services.

1 Enter a phone number in the stand-by display.

2 Press 🄟.

```
Dialing PushTalk  📢
📠
📇 090XXXXXXXX

        📸
```

When you originate a PushTalk call, it is switched to the hands-free operation that allows you to hear the signal tone from the speaker.

```

To speak

Press 🄟 while the floor is open. You can speak while you press and hold 🄟.

3 Press 📞 to end the communication.

- ● You cannot use PushTalk to place a call to emergency numbers (110, 119, and 118).
- ● You cannot set whether to notify the caller ID when you originate a PushTalk call even if you add "186/184".
- ● The setting whether to originate a PushTalk call with/without the caller ID follows the setting of the Set Notification (P.44).
- ● When you set the Set Notification to [Notify], all members including added members are notified the phone numbers of the person who originates and all members. When you set it to [Not notify], [User Unset] is displayed in the fields of the speaker and all members including added members.
- ● If you set [Call with ID]/[Call without ID] of the caller ID at the Option call display when you originate a PushTalk call, the phone numbers of yours and all members are/are not notified to all members based on the selected call condition.
- ● When you originate a PushTalk call, if the Set Notification is set as well as the Call condition is set at the Option call display, the following priority is applied.
  1. Call condition selected at the Option call display when originating a PushTalk call
  2. Set Notification

Originating a PushTalk Call from the Call Record

You can originate a PushTalk call using the Redial and Received records.

- You cannot originate a PushTalk call using the call records of Number B when 2in1 is used.

Example: Originating a PushTalk call from the Received record

1 Press ◀ (📇) in the stand-by display.

The Received record display appears.

80

2 Select a received record and press 📱.

When a PushTalk call is originated, the signal tone sounds.

● If a member is disconnected during PushTalk communication among several persons, the disconnected member can come back to the session using the Redial/Received record as long as the other members continue it. When the PushTalk communication is already ended, the call is going to be a new one.

Adding a Member during PushTalk Communication

If you originate a PushTalk call, you can add a member during PushTalk communication. You can add members up to the maximum number allowed for communication (up to five persons including yourself) and also place a second call to a non-participating member.

Example: Selecting a member from the PushTalk phonebook

1 Press ✉ (Add) during PushTalk communication.

The screen for selecting the method of adding a member appears.
[View PushTalk PB] : Select a member from the PushTalk phonebook.
[View phonebook]　 : Select a member from the FOMA terminal phonebook.
[Direct input]　　 : Enter a phone number directly.

2 Select [View PushTalk PB] and press ▤.

The FOMA terminal starts calling the selected member.

● Members added during PushTalk communication are not displayed in the detailed information of the Redial/Received record.
● You can add a party who uses a PushTalk-compatible model, as a PushTalk group member. However, this added member is not displayed on the displays of non-compatible models and the signal tone does not sound either.

PushTalk

81

Receiving a PushTalk Call

When you receive a PushTalk call, you are notified by flashing indicator, ring tone, vibrator, etc. The operation for an incoming PushTalk call varies depending on the settings of the Incoming set, Manner mode, etc.

- If you receive a PushTalk call during a voice call, the PushTalk call is not connected. The notification icon of missed call appears and the call is saved in the Received record. A PushTalk call received during a videophone call or data communication is not connected, either. The call is not saved in the Received record.
- When receiving a PushTalk call during i-mode communication, the setting for the i-mode arrival act is applied.

1 When you receive a PushTalk call, press ⓟ or ⌒.

The names of the members appear. If the member is not saved in the Phonebook, this member's phone number appears instead.

- When the person who originates a PushTalk call sets the Set Notification to [Notify], all members including added members are notified the phone numbers of the person who originates and all members. When the person sets it to [Not notify], all members are displayed as [User Unset].

To speak
Press ⓟ while the floor is open. You can speak while you press and hold ⓟ.

2 Press 🔺 to end the communication.

- You can answer a PushTalk call by pressing ☰ (Answer) instead of ⓟ or ⌒. When you set the Any key answer to [ON], you can also press ⓪ to ⑨, ✳, or ＃ to answer a PushTalk call (P.64).
- A PushTalk call cannot be put on hold.
- When you receive a PushTalk call originated from a caller who is saved as a nuisance caller, the call is rejected. The notification icon of missed call appears and the call is saved in the Received record.

Saving Data in the PushTalk Phonebook

You can save up to 1,000 members in the PushTalk phonebook.
Members you want to save in the PushTalk phonebook must be also saved in the FOMA terminal phonebook. You can save only one phone number in the PushTalk phonebook for each FOMA terminal phonebook entry. The name of a member displayed in the PushTalk phonebook is diverted from that saved in the FOMA terminal phonebook.

- When 2in1 is set to the B mode, you cannot save data in the PushTalk phonebook.
- When 2in1 is set to the Dual mode, you cannot save the phonebook data for which the Phonebook 2in1 setting is set to [B] in the PushTalk phonebook.
- When 2in1 is set to the A mode, the member for which the Phonebook 2in1 setting is set to [B] is not displayed.

1 Press [📱] in the stand-by display and press [✉] (Func).

The Function menu appears.

2 Select [Create] and press [▦].

The screen for selecting the saving method appears.

[View phonebook] : Select from the FOMA terminal phonebook.

[Direct input] : Save new data in the FOMA terminal phonebook and then save it in the PushTalk phonebook.
- Follow the same steps as in "Add to FOMA terminal phonebook" (P.91, step 3 to 6).

3 Select [View phonebook] and press [▦].

The FOMA terminal phonebook appears.

4 Select an entry → a phone number and press [▦].

Basic	Detail	Setting

● When originating a PushTalk call to a group, you can originate a call to up to four members even if more than five members are saved in the group.

Deleting a PushTalk Phonebook Entry

You can delete members saved in the PushTalk phonebook using three methods.

Example: Deleting a member

1 Press 🅿 in the stand-by display.

To delete several members

From the Function menu, select [Delete] → [Select&delete], select members, press ⓘ (Delete), and select [Yes]/[Delete from main].

To delete all members

From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes]/[Delete from main].

● When 2in1 is used, the screen informing to delete members of all modes of the Phonebook 2in1 setting appears. If you select [Yes], the members of all modes of the Phonebook 2in1 setting are deleted.

To reset a group to the default setting

Press 🔲 (Group), move the cursor to a group and from the Function menu, select [Reset group] → [Yes].

2 Select a member and press ✉ (Func).

The Function menu appears.

3 Select [Delete] → [Delete one] → [Yes] and press ▤.

The selected member is deleted.

To delete the selected member from the FOMA terminal phonebook

Select [Delete] → [Delete one] → [Delete from main].

Using the PushTalk Phonebook   <PushTalkPlus>

You can connect to the network and use the PushTalkPlus service (P.78).

● To use the PushTalkPlus service, you must subscribe to this service.

1 Press 🅿 in the stand-by display and press ✉ (Func).

The Function menu appears.

2 Select [NW connection] → [Yes] and press ▤.

The call is connected to the network.

Setting the PushTalk Operation

<PushTalk setting>

Setting Whether to Answer a Call Automatically

You can set whether to answer an incoming PushTalk call automatically using the hands-free function.

1 From the Menu, select [Settings] → [Application] → [PushTalk] → [Auto answer setting] and press ▤.

    [ON] : A PushTalk call you receive is answered automatically using the hands-free function. When the Manner mode is set, the call is not answered automatically.

    [OFF] : A PushTalk call you receive is answered by pressing ▢, ▢, etc.

2 Select [ON]/[OFF] and press ▤.

    The Auto answer setting is set.

Setting the Ring Time

If you select [OFF] for the Auto answer setting, set the ring time of the PushTalk call.

1 From the Menu, select [Settings] → [Application] → [PushTalk] → [Set ring time] and press ▤.

    Enter the ring time within 01 to 60 seconds.

2 Enter the Push Talk ring time.

    The Set ring time is set.

Setting How to Answer a Voice Call during PushTalk Communication

You can set how to answer a voice call when you receive it during PushTalk communication.

1 From the Menu, select [Settings] → [Application] → [PushTalk] → [P-Talk arrival act] and press ▤.

    [Answer] : Receive a voice call and you can answer it.

    [Call Rejection] : Reject an incoming voice call. The missed call notification icon appears and the call is saved in the Received record.

    [Voice Mail] : Connect an incoming voice call to the Voice Mail Service Center.

    [Call Forwarding] : Connect an incoming voice call to a forwarding number.

2 Select the operation to be performed when you receive a voice call during PushTalk communication and press ▤.

    The P-Talk arrival act is set.

PushTalk

Setting Whether to Receive a PushTalk Call during i-mode

You can set whether to receive a PushTalk call by disconnecting i-mode if there is any incoming PushTalk call during i-mode or i-mode communication.

1 From the Menu, select [Settings] → [Application] → [PushTalk] → [i-mode arrival act] and press ▤.

[Prefer PushTalk] : Receive the PushTalk call and disconnect i-mode. After the PushTalk call is finished, the previous display reappears.

[Prefer i-mode] : Continue i-mode without receiving a PushTalk call. The missed PushTalk call is not saved in the Received record.

2 Select the preferred function and press ▤.

The i-mode arrival act is set.

Using the Hands-free Function

You can set whether to use the hands-free function during PushTalk communication.

1 From the Menu, select [Settings] → [Application] → [PushTalk] → [Hands-free] and press ▤.

[ON] : You hear a member's voice from the speaker during PushTalk communication.

[OFF] : You hear a member's voice from the earpiece during PushTalk communication.

2 Select [ON]/[OFF] and press ▤.

The Hands-free is set.

● When the Flat-plug Earphone/Microphone with Switch (optional) is connected to the FOMA terminal, you hear a member's voice from the Earphone/Microphone, regardless of the Hands-free setting.

● When the FOMA terminal is folded or used in the TV style, the hands-free call is performed regardless of the Hands-free setting.

● When the FOMA terminal is opened while the Manner mode is set, you cannot answer a call using the hands-free function regardless of the Hands-free setting.

Setting the Operation for the FOMA Terminal Being Folded during PushTalk Communication

You can end a call or switch a call to the hands-free operation by folding the FOMA terminal during PushTalk communication.

1 From the Menu, select [Settings] → [Application] → [PushTalk] → [Setting when folded] and press ▤.

[Speaker call] : You hear a member's voice from the speaker during PushTalk communication.

[Finish] : Hang up the PushTalk call.

2 Select [Speaker call]/[Finish] and press ▤.

The Setting when folded is set.

● The operation when the FOMA terminal is changed to the TV style during PushTalk communication follows the Setting when folded.

● The Setting when folded is disabled when the Flat-plug Earphone/Microphone with Switch (optional) is connected to the FOMA terminal and the call remains connected through the Earphone/Microphone even if you fold the FOMA terminal.

Phonebook

Phonebooks the FOMA Terminal Can Use

The FOMA terminal is equipped with two types of phonebooks, the FOMA terminal phonebook, which you can set up with various functions, and the UIM (FOMA card) phonebook, which can be used with other FOMA terminals. Use either phonebook to your convenience.

- You can also use the PushTalk phonebook dedicated for PushTalk that can be created using data saved in the FOMA terminal phonebook (P.82).

The table below shows the data you can save in each phonebook.

Data to be saved	FOMA terminal phonebook	UIM phonebook
Number of data entries	You can save up to 1,000 entries.	You can save up to 50 entries.
Group	You can sort entries in groups from Group 0 to 19.	You can sort entries in groups from Group 0 to 10.
Phone number to be saved	You can save up to three numbers for each phonebook entry and a total of up to 3,000 numbers in the Phonebook. You can save one number for each phonebook entry in the PushTalk phonebook.	You can save one number for each phonebook entry.
	You can select from nine types of icons, such as [Public] and [Mobile1].	You cannot select icons. "📱" is saved automatically.
Mail address to be saved	You can save up to three addresses for each phonebook entry and a total of up to 3,000 addresses in the Phonebook. You can also save one Secret code for each address.	You can save one address for each phonebook entry.
	You can select from five types of icons, such as [Mobile1] and [Home].	You cannot select icons. "📧" is saved automatically.
Image to be saved	You can save one Des call display and one Des substitute image for each phonebook entry. You can save up to 1,000 each of still image and Chara-den files in the Phonebook.	You cannot save images.
Other data to be saved	You can save one name, reading, memory number, location information, postal code, postal address, and birthday for each phonebook entry. You can also set one type of Des phone tone, Des mail tone, Select phone Illum., Select mail Illum., and Secret for each phonebook entry.	You can save one name and reading for each phonebook entry.
Group to be saved	You can save one group name and group icon for each group.	You can save one group name for each group. You cannot change a group name with [0グループなし]. You cannot select icons.
	You can also set one type of Des call display, Des phone tone, Des mail tone, Select phone Illum., and Select mail Illum. for each group.	Unavailable

- You can use phonebook data saved in your UIM when this UIM is used on another FOMA terminal.

- For the order of priority between call image, ring tone, and incoming indicator color, see P.104.
- When you receive a call or mail from a person saved as Secret, the regular ring tone, incoming image and incoming indicator color are used, and a name of the caller/sender is not displayed. To enable the settings of a person saved as Secret or a group that includes a person saved as Secret, set the Secret display to [ON].
- When 2in1 is used, the phonebook is automatically switched to the available one according to the 2in1 modes. When you save data in the phonebook, the Phonebook 2in1 setting is automatically set according to a compatible 2in1 mode. You can also change the Phonebook 2in1 setting by each data or group (P.352).
- Please note that when you change models and attempt to transfer the saved data to a new mobile phone at our service counter (DoCoMo shop, etc.), you may not be able to copy it to the FOMA terminal depending on the specifications of your new phone.

90

Saving an Entry in the FOMA Terminal Phonebook <Add to FOMA terminal phonebook>

Up to 1,000 entries can be saved in the FOMA terminal phonebook.

1 Press ▼ (📖) in the stand-by display and press 🛈 (Create).

2 Select [Main memory] and press ▤.

3 Save each item at the Basic display.

Icon	Settings
🔤	Enter a name within 16 full-width or 32 half-width characters.
カナ	When entering a name, the reading is automatically entered. • To edit the reading, enter the reading within 32 half-width characters.
NO	Enter a memory number from 000 to 999. The smallest available memory number is automatically entered. Enter a name/phone number/mail address to change it.
GP	Select a group. [0グループなし] is automatically entered. Enter a name/phone number/mail address to change it.
☎	Enter within 26 digits per phone number. You can save the pause (P), timer (T), "+", "#", and sub-address separator (＊). • If a phone number is saved with the "184" or "186", SMS cannot be sent to this phone number even if you select it.
📇	Select a phone number type icon. [Public] is automatically entered. Enter a phone number to change it.
✉	Enter within 50 half-width alphanumeric characters and symbols per mail address. • When sending mail to an i-mode terminal (including a Mova terminal), you need to specify only the mail address portion before the @ mark.
✉	Select a mail address type icon. [Mobile1] is automatically entered. Enter a mail address to change it.
🔑	When the recipient saves a Secret code in a mail address (phone number@docomo.ne.jp), enter the Secret code. When sending mail, the Secret code is automatically added. • When you save a mail address as "phone number + Secret code@docomo.ne.jp" in the Phonebook, if you save a Secret code, you cannot send mail or reply mail to this address. To avoid this problem, change the mail address to "phone number@docomo.ne.jp" and save a Secret code. • The Secret code is masked by "＊＊＊＊". Only when the Secret display is set to [ON], it is displayed in numbers. • To save your Secret code, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".
🔑	Select [ON]/[OFF] of the Secret. • To display the entry saved as Secret, set the Secret display to [ON].

Phonebook

4 Press ▶ and save each item at the Detail display.

You can select a Chaku-Uta® from [i-motion]. {TABLE4} ※ Some files may not be set. When you select a Chaku-Uta Full® that has a choice of specified playback ranges from [MUSIC], the screen for selecting a type of setting appears. If you select [Full song], the entire track of Chaku-Uta Full® is set for the ring tone. If you select [Point], the specified playback range of Chaku-Uta Full® is set for the ring tone. • To specify no ring tone, select [None]. • To mute the ring tone, select [Silent]. • To check the ring tone, move the cursor to the ring tone and press 🎬 (Play).
💡 ✉	Select a color for the Select phone/mail Illum. that flashes when receiving a voice or videophone call and right after receiving mail. When you move the cursor to a color, the incoming indicator flashes accordingly. • To specify no color, select [None].

TABLE3:

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 50K bytes	Max. [QCIF(176×144)]
Chara-den	—	Max. 100K bytes	—

TABLE4:

Category	File format	File size	Image size
MUSIC※	AAC-LC/HE-AAC	Max. 5M bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640×480)]
Melody	SMF/MFi	Max. 350K bytes	—

6 Press 🔲 (Complete).

The entered data is saved in the FOMA terminal phonebook.

- If you set [None] for the Des call display, Des phone/mail tone, or Select phone/mail Illum., then the call image, ring tone, and indicator color saved for the Group setting are automatically used for the respective function. If these settings are not saved in the Group setting, the Incoming set (P.102) or Animation (P.112) is used.
- If you set an i-motion with video and sound tracks for the Des mail tone, the i-motion image appears when mail reception is completed.
- If you set an i-motion for the Des call display, the image set for the Animation is displayed when you place a voice or videophone call.
- If you set an i-motion or Chaku-Uta Full® for the Des phone/mail tone or set an i-motion for the Des call display, the settings may be changed in some cases.

Saving an Entry in the UIM Phonebook <Add to UIM phonebook>

Up to 50 entries can be saved in the UIM (FOMA card) phonebook.

1 Press ▼ (🕮) in the stand-by display and press 🔲 (Create).

2 Select [UIM] and press ▤.

Basic
NA ME
カナ
GP 0 グループなし
📞
✉

To save an entry in the FOMA terminal phonebook
Select [Main memory] (P.91).

3 Save each item.

Icon	Settings
NA ME	Enter a name within 10 full-width or 21 half-width characters. If you use a mixture of full-width and half-width characters or half-width katakana characters for the name, the number of characters that you can save is limited to 10 characters.
カナ	When entering a name, the reading is automatically entered. • To edit the reading, enter the reading within 12 full-width katakana characters or 25 half-width alphanumeric characters. If you use a mixture of full-width and half-width characters for the reading, the number of characters that you can save is limited to 12 characters.
GP	Select a group. When entering a name/phone number/mail address, group [0 グループなし] is automatically entered.
📞	Enter a phone number within 26 digits (20 digits for some types of UIM).
✉	Enter a mail address within 50 half-width alphanumeric characters and symbols. If you use symbols for the mail address, you may not be able to save up to the maximum allowable number of characters. • When sending mail to an i-mode terminal (including a Mova terminal), you need to specify only the mail address portion before the @ mark.

4 Press 🔲 (Complete).

The entered data is saved in the UIM phonebook.

- Data copied from the FOMA terminal phonebook or received using a function such as the infrared or iC communication may not be saved correctly.

Saving the Redial/Received Record in the Phonebook

A phone number saved in the record can be directly added to the Phonebook.

Example: Saving a received record in the FOMA terminal phonebook as a new entry

1 Press ◀ (🗐) in the stand-by display.

To save a number from the redial record
Press ▶ (🗐) in the stand-by display.

2 Select a received record and press 🛋 (Save).

The screen for selecting where to save appears.

3 Select [Ordinary PB] and press ▭.

The screen for selecting how to save to the Phonebook appears.
To save data in the PushTalk phonebook
Select [PushTalk PB] → a PushTalk phone number.

4 Select [New] and press ▭.

The screen for selecting where to save appears.
When you select [Add]
Select an entry to which you want to add from the Phonebook.

5 Select [Main memory] and press ▭.

The Edit phonebook display appears.
To save to the UIM phonebook
Select [UIM].

6 Save other items.

- Follow the same steps as in "Add to FOMA terminal phonebook" (P.91, step 3 to 5) or in "Add to UIM phonebook" (P.93, step 3).

7 Press 🛋 (Complete).

The entry is saved in the FOMA terminal phonebook.

Saving a Group

<Group setting>

Up to 20 groups can be saved in the FOMA terminal phonebook, and up to 10 groups can be saved in the UIM (FOMA card) phonebook.

- You cannot change [**0** グループなし] in the UIM phonebook.

Example: Saving a group in the FOMA terminal phonebook

1 Press ⌨ (Func) in the Phonebook.

The Function menu appears.

2 Select [Group setting] and press ▤.

To display group numbers

When saved, group icons are displayed instead of group numbers. Press # to switch the display temporarily between group icons and group numbers.

To reorder a group

Press ⬚ (Reorder), select a group, move the cursor to the place to move to, press ▤ (Move), and press ⬚ (Complete).

3 Select a group and press ▤.

4 Enter a group name at [NA/ME].

Enter a group name within 10 full-width or 21 half-width characters. For data in the UIM phonebook, if you use a mixture of full-width and half-width characters or half-width katakana characters for the group name, the number of characters that you can save is limited to 10 characters.

- For data in the UIM phonebook, go to step 7.

5 Select a group icon at [😊].

6 Press ▶ and save the Des call display, Des phone tone, and Select phone Illum.

- Follow the same steps as those for the Des call display, Des phone/mail tone, and Select phone/mail Illum. described in the Add to FOMA terminal phonebook (P.91, step 3 to 5).

7 Press ⬚ (Complete).

The group is set.

● When the Des call display, Des phone/mail tone, or Select phone/mail Illum. is set for both the Phonebook and Group setting, the setting for the Phonebook has higher priority.

Displaying the Phonebook

You can use the Phonebook to perform various operations.

Example: Displaying the FOMA terminal phonebook

1 Press ▼ (📖) in the stand-by display.

To change the phonebook being displayed
From the Function menu, select [Change to UIM]/[Change to Main]. "🔳" appears in the UIM phonebook.

To switch the display style
Press 🔲 (Display), select [Alphabet]/[Group]/[Number]/[Phone number].

To attach a Phonebook entry to mail
Move the cursor to data and from the Function menu, select [Attach to mail].

To place a voice call
Move the cursor to data and press 📞.

2 Select an entry and press ▤.

To place a videophone call
Move the cursor to a phone number and press 🔲 (V.phone).

To originate a PushTalk call
Move the cursor to a phone number and press 📱.

To send mail
Move the cursor to a mail address and press ▤ (Mail).

To check the call image
Press ▶, move the cursor to a call image and press ▤ (Play).

To use the location information
Press ▶, move the cursor to [📲 Has loc. info], and press ▤.

To display the detailed location information
Press ▶, move the cursor to [📲 Has loc. info], and press 🔲 (Detail).

To check the Des substitute image
Press ◀ and move the cursor to the Des substitute image and press ▤ (Play).

To check a ring tone
Press ◀ and move the cursor to a ring tone and press ▤ (Play).

To check an incoming indicator
Press ◀ and move the cursor to an incoming indicator and press ▤ (Check).

To turn on/off the image display
Press # to temporarily turn on/off an image.

● When 2in1 is set to the Dual mode, you can select a caller ID at the Option call display before placing a call (P.57).

Searching the Phonebook <Search phonebook>

You can search the desired data of the Phonebook by entering a reading, memory number, and phone number.

Example: Phonebook is ordered alphabetically

1 Press ▼ (📖) in the stand-by display.

2 Enter a reading.

Every time you enter a letter, the cursor moves to the data which is the closest one to the entered reading.

When the Phonebook is ordered by the group

Enter a reading. Every time you enter a letter, the cursor moves to the data which is the closest one to the entered reading within the group.

When the Phonebook is ordered by the memory number

Enter a memory number. Every time you enter a digit, the cursor moves to the data which is the closest one to the entered memory number.

When the Phonebook is ordered by the phone number

Enter a phone number. Every time you enter a digit, the cursor moves to the data which is the closest one to the entered phone number.

Setting the Display of the Phonebook <Phonebook setting>

You can set the type of a phonebook to be displayed and font size to be used for the Phonebook when you display it and whether to display an image when you display a single entry of the Phonebook.

1 Press ✉ (Func) in the Phonebook.

The Function menu appears.

2 Select [PB setting] and press ▤.

[Which PB to use] : Select a phonebook to be displayed when you display the Phonebook.

[Font size] : Select the font size of the Phonebook from [Extra extra large], [Extra large], [Large], or [Medium].

[Set image display] : Select whether to display the Des call display that was saved when a single entry of the Phonebook is displayed.

[Save/attach image] : Select whether to save an image that is set for the Des call display to the microSD memory card when you save Phonebook data or attach to mail.

3 Select [Phonebook]/[UIM phonebook] at [Which PB to use].

4 Select [ON]/[OFF] at [Set image display].

5 Select [Valid]/[Invalid] at [Save/attach image].

[Valid] : Save an image.

[Invalid] : Do not save an image.

The Phonebook setting is set.

Phonebook

97

Editing a Phonebook Entry

<Edit phonebook>

1 From the Phonebook, select an entry and press ▤.

2 Press 🗊 (Edit).

The Edit phonebook display appears.

3 Edit each item.

- Follow the same steps as in "Add to FOMA terminal phonebook" (P.91, step 3 to 5) or in "Add to UIM phonebook" (P.93, step 3).

4 Press 🗊 (Complete).

The edited data is saved in the Phonebook.

Deleting a Phonebook Entry

<Delete phonebook>
You can delete Phonebook entries using three methods.

- When the Phonebook is ordered by the phone number, [Delete one] and [Select&delete] cannot be selected.

Example: Deleting an entry

1 Press ▼ (📖) in the stand-by display.

か	さ	◀た▶	な	は	ま	や	ら
ドコモ一郎
ドコモ三郎
ドコモ二郎
ドコモ太郎

To delete several entries

From the Function menu, select [Delete] → [Select&delete], select entries, press 🗊 (Complete), and select [Yes].

- Every time you enter a letter or digit in the Data selection display, the cursor moves to the data which is the closest one to the entered reading or memory number.

To delete all Phonebook entries

From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

2 Select an entry and press ✉ (Func).

The Function menu appears.

3 Select [Delete] → [Delete one] → [Yes] and press ▤.

The selected entry is deleted.

● When an entry to be deleted is also saved in the PushTalk phonebook, it is automatically deleted from the PushTalk phonebook. When you delete all data of the FOMA terminal phonebook, the Group setting of the PushTalk phonebook is reset to the default setting.

Checking the Number of Entries Saved <Memory status>

You can check the number of entries saved in the FOMA terminal phonebook and UIM (FOMA card) phonebook and entries saved as Secret.

1 Press ✉ (Func) in the Phonebook.

The Function menu appears.

2 Select [Memory status] and press ▭.

```
Memory status
Used              450
Secret              5
Used(UIM)          20
```

[Used]   : Display the number of entries saved in the FOMA terminal phonebook (including entries saved as Secret).

[Secret]   : Display the number of entries saved as Secret in the FOMA terminal phonebook (this data is displayed only when the Secret display is set to [ON]).

[Used(UIM)] : Display the number of entries saved in the UIM phonebook.

Dialing Quickly to Frequently Called Numbers <2-touch dial>
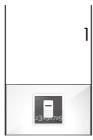

A call can be placed easily to the recipients saved in memory numbers from 000 to 009 by using a shortcut.
It is useful to save frequently used phone numbers in memory numbers from 000 to 009.

● When the Secret display is set to [OFF], the 2-touch dial cannot be used to place a call to a phone number saved as Secret.

Example: Placing a call to the recipient saved in the memory number 001

1 Enter the last one digit of the memory number (0 to 9) in the stand-by display.

To check a recipient's data saved in a memory number

Enter the memory number (one or two digits) and press ▲ or ▼. A list of used memory numbers and their associated entries appears with the entered memory number highlighted.

2 Press 📞.

After about five seconds, the call is connected to the first phone number of the recipient saved in memory number 001.

To place a videophone call

Press ⓒʰ (V.phone).

To send mail

Press ✉ (Mail).

To send SMS

Press ✉ (Mail) for over a second.

● The call can be placed or SMS can be sent to the recipients saved in memory numbers from 010 to 099 by entering the last two digits (10 to 99) of the memory numbers.

Storing (Restoring/Updating) the Phonebook at the Data Security Service Center <Data Security Service>

You can use the Data Security Service to store the FOMA terminal phonebook at the Data Security Service Center. You can update or restore the stored Phonebook by connecting to the Data Security Service Center.

- Data Security Service is a paid service that requires a subscription. For details on this service, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".
- You cannot save the UIM phonebook at the Center.

Storing/Updating/Restoring the Phonebook

1 From the Menu, select [LifeKit] → [Data Security Service] → [Connect to Center] and press ▤.

The Security code screen appears.

To connect to the Data Security Service Center from the Phonebook
From the Function menu in the Phonebook, select [Cnct to Center].

2 Enter the Security code and press ▤ (OK).

The screen for confirming whether to connect to the Data Security Service Center appears.

3 Select [Yes] and press ▤.

The call is connected to the Data Security Service Center and the data is updated. When the update is completed, the update result screen appears.

● The automatic update of the Phonebook may fail when another function is executed. In this case, "▨" (PB update failed) appears in the stand-by display.

Setting Whether to Send Images of the Phonebook

You can set whether to send a Des call display (JPEG/GIF image) saved in the Phonebook to the Data Security Service Center.

1 From the Menu, select [LifeKit] → [Data Security Service] → [Service setting] and press ▤.

The Service setting display appears.

2 Select [Send]/[Unsend] at [Send phonebook img].

The Send phonebook img is set.

Displaying the Communication History

You can save up to 30 history records of communication with the Data Security Service Center.

- When the number of communication history records exceeds 30, the records with the oldest date/time are overwritten, in that order.

1 From the Menu, select [LifeKit] → [Data Security Service] → [Exchanging history] and press ▤.

The Exchanging history display appears.

2 Select a record and press ▤.

The update result screen appears.

Sound/Display/

Setting the Ring Tone/Image/Indicator Color for Incoming Call and Mail   <Incoming set>

You can set a ring tone, ring volume, incoming image, vibration pattern, and incoming indicator color for each type of incoming transmission (voice, videophone, or PushTalk call, or mail, etc.).

Example: Performing incoming mail settings

1 From the Menu, select [Settings] → [Call] → [Incoming set] and press ▤.

```
Incoming set
Incoming call
Incoming V. phone
PushTalk
Mail
MessageR
MessageF
```

2 Select [Mail] and press ▤.

```
Mail
<Receiving setting>
Receiving img
          Colorful White
<Complete setting>
Received image
          Colorful White
Ring tone
          着信音1
Ring volume        4
Vibrator          OFF
Color             C9
Ring time         04s
```

To perform the settings for an incoming videophone call
If you set [Link incoming call] to [ON], the settings for the incoming call are applied.

To perform the settings for an incoming Message R/Message F
If you set [Link receive mail] to [ON], the settings for the incoming mail are applied.

3 Select an image from the Data Box at [Receiving img].

- You can set the following files.

Incoming call/Incoming V.phone

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stand-by(480×864)], Max. W480×H288 for GIF animation
	SWF	Max. 100K bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640×480)]

Mail/MessageR/MessageF

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stand-by(480×864)], Max. W480×H288 for GIF animation
	SWF	Max. 100K bytes	—

※ Some i-motion may not be set.

To check the incoming image
Move the cursor to the incoming image and press [ch] (Play).

4 Select an image from the Data Box at [Received image].

- You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stand-by(480×864)], Max. W480×H288 for GIF animation
	SWF	Max. 100K bytes	—

To check the Received image
Move the cursor to the Received image and press [ch] (Play).

5 Select a ring tone from MUSIC/i-motion/Melody of the Data Box at [Ring tone].

● You can set the following files. You can select a Chaku-Uta® from [i-motion].

Category	File format	File size	Image size
MUSIC※	AAC-LC/HE-AAC	Max. 5M bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640×480)]
Melody	SMF/MFi	Max. 350K bytes	—

※ Some files may not be set. You cannot set an i-motion with video track only. You can set only an i-motion with sound track only (i-motion without video track, such as singer's voice) for incoming PushTalk calls.

When you select a Chaku-Uta Full® that has a choice of specified playback ranges from [MUSIC]
The screen for selecting a type of setting appears. If you select [Full song], the entire track of Chaku-Uta Full® is set for the ring tone. If you select [Point], the specified playback range of Chaku-Uta Full® is set for the ring tone.

To mute the ring tone
Select [Silent].

To check the ring tone
Move the cursor to the ring tone and press ⌗ (Play).

6 Set the volume of the ring tone at [Ring volume].

Select from [OFF] and [1 to 6].

● For an incoming voice, videophone, or PushTalk call, you can set [STEP DOWN] and [STEP UP]. [STEP DOWN] turns down the volume every six seconds and [STEP UP] turns up the volume every six seconds.

To set the ring tone volume to [OFF]
Press ▼ at level 1. When you set the ring tone volume for incoming calls, incoming mail, or both incoming calls and mail to [OFF], "🔇", "🔇", or "🔇" appears in the stand-by display respectively.

7 Set a vibration pattern at [Vibrator].

```
Select vibrator

   Pattern1
   Pattern2
   Link melody
   OFF
```

[Pattern1]   : Set a short intermittent vibration.

[Pattern2]   : Set a long intermittent vibration.

[Link melody] : Set vibration to be synchronized with the vibration pattern of the melody. When you set the ring tone to [Silent] or the melody is not specified with a vibration pattern, [Pattern1] is used.

[OFF]   : Do not set the vibrator.

When you set the vibrator for incoming calls, incoming mail, or both incoming calls and mail, "📳", "📳", or "📳" appears in the stand-by display respectively.

To check the vibration
Move the cursor to the vibration pattern and press 🔘 (Confirm).

8 Select an indicator color at [Color].

Select from 12 colors plus [C13:ALL] (in which the 12 colors flash in turn).
When you move the cursor through the colors, the incoming indicator flashes accordingly.

9 Select [Ring time] and press ▭.

● You can set the ring time for incoming mail, Message R, and Message F.

10 Select [ON]/[OFF] of the ring tone at [Set].

11 Enter the duration for sounding the ring tone at [Ring time].

Enter the duration within the range from 01 to 30 seconds.

12 Press 🔘 (Complete).

The Ring time is set.

What Can U Do (Mashup Style)

※ 3D sound support (P.104)

- If several ring tones, call images, and incoming indicator colors are set for voice/videophone call/mail, the following priority is applied.
  1. Ring tone of Number Setting (When you receive a call to an Additional No. for the Multi Number)
  2. Des phone tone, Des call display, and Select phone/mail Illum. of an entry saved in the Phonebook
  3. Des phone tone, Des call display, and Select phone/mail Illum. of the Group setting
  4. Ring tone of the Ringtone for Number B of 2in1
  5. Ring tone, incoming image, and indicator color of the Incoming set
  However, when you set an i-motion or Chaku-Uta Full® for the ring tone or an i-motion for the incoming image, the order of priority may vary.
- You can adjust the ring volume while receiving a call. The volume last set is applied regardless of whether you adjust the volume in advance or while receiving a call.
- When you set an i-motion or Chaku-Uta Full® for the ring tone or set an i-motion for the incoming image, the settings may be changed in some cases.

Setting the Sounds of the FOMA Terminal <Set basic tone>

You can set to turn on/off the sound effect that can be used when charging starts and is completed. You can also set whether the 3D sound is played back through the stereo speaker and set the keypad sound volume.

1 From the Menu, select [Settings] → [Management] → [Set basic tone] and press ▤.

Set basic tone	
Keypad sound	1
Stereo&3D	ON ▾
Charge sound	ON ▾

[Keypad sound] : Set the volume of the keypad sound to be heard when you press a key.

[Stereo&3D] : Set whether to play back 3D sound with 3-dimensional stereophonic reproduction through the stereo speaker.

[Charge sound] : Set whether the sound effect is heard when charging starts and is completed.

2 Set the volume of the keypad sound at [Keypad sound].

Select from [OFF] and [1 to 2].

3 Select [ON]/[OFF] at [Stereo&3D].

4 Select [ON]/[OFF] at [Charge sound].

The sounds of the FOMA terminal are set.

- The keypad and Charge sounds may not be heard under some conditions, such as when another sound is active.
- The 3D sound function reproduces a 3-dimensional stereophonic sound or space-wise moving sound, over the stereo speaker (or the Flat-Plug Stereo Earphone Set (optional)). This function lets you enjoy 3D sound i-αppli games and ring tones with realistic sound. You can feel the effect of this function when you hold the FOMA terminal about 40 cm (this distance depends on the sense of an individual) away and facing toward you. Note that if the FOMA terminal is moved left or right or the distance between the terminal and you is not suitable, you cannot enjoy the effect. The perception of this 3D effect varies depending on the senses of an individual. If you feel uncomfortable in any way, set the Stereo&3D to [OFF].

Adjusting the Volume of Caller's Voice <Volume>

The volume of caller's voice during a voice, videophone, or PushTalk call can be adjusted in six levels from level 1 (smallest) to level 6 (largest).

1 From the Menu, select [Settings] → [Call] → [Call setting] → [Volume] and press �.

The Volume display appears.

2 Use ▲ ▼ to adjust the volume and press � (OK).

Select from [1 to 6].
The volume of caller's voice is set.

● The volume can be adjusted by pressing ▲ ▼ during a call. Whichever way you may take, the most recently adjusted volume is used until it is adjusted next time.

Adjusting the Volume While Playing Flash Movie <Sound effect>

The sound volume while playing Flash movie can be adjusted in seven levels: OFF (silent), level 1 (smallest) to level 6 (largest).

1 From the i-mode menu, select [i-mode setting] → [Sound effect] and press �.

2 Set the sound effect volume.

Select from [OFF] and [1 to 6].
The sound volume while playing Flash movie is set.

● You can also adjust the volume by selecting [Sound effect] from the Function menu while playing Flash movie (P.163).
● The sound effect may not be heard depending on Flash movie.

Adjusting the Volume While Running i-αppli Software <Volume setting>

The sound volume while running i-αppli software can be adjusted in seven levels: OFF (silent), level 1 (lowest) to level 6 (highest).

1 From the Menu, select [i-appli] → [i αppli setting] → [Volume setting] and press �.

The Volume setting display appears.

2 Set the software volume.

Select from [OFF] and [1 to 6].
The sound volume while running i-αppli software is set.

Setting Whether to Prioritize the i-αppli Sound <Pref. i αppli sound>

You can set whether to prioritize the i-αppli sound when One Seg, MUSIC Player, and i-αppli are activated simultaneously.

1 From the Menu, select [i-appli] → [i αppli setting] → [Pref. i αppli sound] and press ▤.

2 Select [preference]/[unpreference] and press ▤.

[preference] : You hear the i-αppli sound.
[unpreference] : You hear the sound of One Seg, MUSIC Player, or Music&Video Channel.

● Even if you select [unpreference], you hear the i-αppli sound when the sound of One Seg, MUSIC Player, or Music&Video Channel is muted.

Setting the Sound/Indicator While Using the GPS Function

You can set the sound volume to be used and the vibrator and incoming indicator operations to be performed when you position and notify your current location and when you are requested to provide your location information.

Example: Setting the sound/indicator of the Position location

1 From the Menu, select [LifeKit] → [GPS] → [GPS settings] → [Sound/Color setting] and press ▤.

```
Sound/color setting
Position location
Location notice
Loc. provide/accept
Loc. provide/check
```

[Position location] : Set the operation to be performed when the current location is determined.

[Location notice] : Set the operation to be performed when the current location is notified.

[Loc. provide/accept] : Set the operation to be performed when you are requested to provide location information when the settings for using each service is set to "許可" (accept).

[Loc. provide/check] : Set the operation to be performed when you are requested to provide location information when the settings for using each service is set to "毎回確認" (Check every time).

2 Select [Position location] and press ▤.

```
Position location
Volume      OFF
Vibrator    OFF ▼
Color       ON  ▼
```

3 Select the sound volume at [Volume].

Select from [OFF] and [1 to 6].
To set the volume to [OFF]
Press ▼ at level 1.

4 Select [ON]/[OFF] of the vibrator at [Vibrator].

5 Select [ON]/[OFF] of the incoming indicator at [Color].

● You can set the incoming indicator to the Position location and Location notice functions.

6 Press ▤ (Complete).

The sound volume level and incoming indicator ON/OFF settings to be applied when you use the GPS function are set.

Setting the Poor Signal Quality Alert <Quality alarm>

You can set to inform you with alarm of the possibility of the call being disconnected during a voice call due to the radio wave condition.

1 From the Menu, select [Settings] → [Call] → [Call quality] → [Quality alarm] and press ▭.

[High] : Sound a high alarm tone.
[Low] : Sound a low alarm tone.
[OFF] : Do not sound an alarm tone.

2 Select the type of alarm tones and press ▭.

The Quality alarm is set.

● If the radio wave condition becomes weak suddenly, the call may be disconnected with no alarm.

Setting Earphone Only for the Ring Tone <Headset usage setting>

You can set the position where the ring tone sounds when the Flat-plug Earphone/Microphone with Switch (optional) is connected to the FOMA terminal. The other tones, such as the Alarm, Schedule alarm, and Booking alarm tone also sound from the position you set for the ring tone.

● Even if [Headset only] is set, the ring tone of a voice, videophone, PushTalk call sounds from both the earphone and speaker about 20 seconds later after it starts sounding.

1 From the Menu, select [Settings] → [Call] → [Headset setting] → [Headset usage setting] and press ▭.

[Headset only] : The tone sounds only from the earphone.
[Headset+speaker] : The tone sounds from both the earphone and the speaker.

2 Select [Headset only] and press ▭.

The tone sounds only from the earphone.

Changing the Ringing Sound <Melody Call>

You can change the ringing sound which a caller hears to a melody with sense of the season or popular music, etc.

● This service is a paid service that requires a subscription. For more details about this service, see the "Mobile Phone User's Guide【Network services】".

1 From the Menu, select [Settings] → [Call] → [Melody Call] and press ▭.

The screen for confirming whether to connect a site appears.

2 Select [Yes] and press ▭.

The Melody Call site is connected.

3 Set each item.

● For details how to set, see the "Mobile Phone User's Guide【Network services】".

● When a call is a videophone or PushTalk call, the Melody call does not sound.
● When you select the Melody Call, the FOMA terminal is connected to the i-mode site and packet communication charge is required. However, the packet communication of the setting site is free of charge.

Sound/Display/Light Settings

Muting the Ring Tone

<Manner mode>

All sounds from the FOMA terminal can be disabled to avoid disturbing others by using the Manner mode.

There are three types of the Manner mode. Set the mode by using the Manner mode setting (P.109).

● Even if the Manner mode is set, the shutter sound of the camera can be heard.

1 Press ◢ マナー for over a second in the stand-by display.

The Manner mode is set and the icon for the current type appears.

📳	Manner (♥ is pink)
🔇	Silent
📳	Original manner (♥ is blue)

To cancel the Manner mode

Press ◢ マナー for over a second in the stand-by display. The Manner mode is canceled and "📳/🔇/📳" disappears.

■Functions of each mode

	📳 Manner	🔇 Silent	📳 Original manner	
			Initial setting	Setting range
Vibrator (P.103)※1	Follow each setting (Vibrates in Pattern1 when [OFF] is set.)	OFF	OFF	Pattern1/Pattern2/ Link melody/Follow each setting/OFF

Alarm volume (P.321, 324)	OFF	OFF	4	6 to 1/OFF
Keypad sound (P.104)※4	OFF	OFF	1	2 to 1/OFF
Charge sound (P.104)	OFF	OFF	ON	ON/OFF
Battery ALM (P.41)※5	OFF + Vibrator	OFF	ON※6	ON/OFF※6
Whisper mode (P.65)	ON	OFF	OFF	ON/OFF

※1 Vibrator setting common to voice, videophone, and PushTalk calls, mail, Message R/F, Alarm, Schedule alarm, and Booking alarm.

※2 Setting common to the ring volume for voice, videophone, and PushTalk calls and the alarm for the Call cost limit.

※3 Setting common to the ring volume for mail and Message R/F.

※4 Setting common to the battery level confirmation beep.

※5 During a call, the battery alarm is heared from the earpiece regardless of the setting. When a call is put on hold, however, only the display is provided and the battery alarm does not sound.

※6 When the Battery ALM is set to [ON], the vibrator operates regardless of the Vibrator setting.

● Press ◢ マナー during a voice call to set the Whisper mode and press it again to cancel the Whisper mode.

Changing the Manner Mode Settings

<Manner mode setting>

The Manner mode can be selected from three types: "Manner", "Silent", and "Original manner".

1 Press ▲マナー in the stand-by display.

```
Manner mode
Set                OFF ▾
Mode
     Manner            ▾
Original manner
```

2 Select the type of the Manner mode at [Mode].

3 Press 🔳 (Complete).

The type of the Manner mode is changed.

Changing the Original Manner

The operations of the Original manner can be customized. For the items you can set, see "Functions of each mode" (P.108).

Example: Setting the battery alarm

1 Press ▲マナー in the stand-by display, select [Original manner], and press ▤.

```
Original manner
Vibrator
                   OFF
Phone volume       SD
Mail volume        4
Alarm volume       4
Keypad sound       1
Charge sound       ON ▾
Battery ALM        ON ▾
Whisper mode       OFF ▾
```

2 Select [ON]/[OFF] at [Battery ALM].

The battery alarm setting is changed.

Setting the Stand-by Display <Stand-by display>

You can set the image for the stand-by display, image quality, Calendar/Clock display, whether to show or hide the guide display, and functions to be activated when switching to the TV style in stand-by status.

1 From the Menu, select [Settings] → [Display] → [Stand-by display] and press ▤.

```
Stand-by display
Stand-by
        Colorful White
Image quality
              Sharp  ▾
Calendar/Clock
Soft key        ON ▾
Display rotated appli
        Activate 1Seg ▾
```

[Stand-by] : Set an image or i-αppli software to be displayed in the stand-by display.

[Image quality] : Set an image quality of an image to be displayed in the stand-by display.

[Calendar/Clock] : Set the type of calendar and clock to be displayed in the stand-by display and also set the font color, display style, and position of the clock.

[Soft key] : Set whether to display the guide display in the stand-by display.

[Display rotated appli] : Set the functions to be activated when switching to the TV style in stand-by status (P.328).

2 Select an image from My picture/i-motion of the Data Box at [Stand-by].

- You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 500K bytes	Max. [1M(1280×960)]
	SWF	Max. 100K bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640×480)]

※ Some i-motion may not be set.

When you select a JPEG image
The screen for selecting a display pattern appears. Select [V]/[H] at [Direction] and [True img]/[Screen size]/[Twice the size] at [Size] and press 🛈 (Complete).

To set the i-αppli stand-by display
Select [i αppli list] and a software supporting i-αppli stand-by display from the list of i-αppli software.

To set Stand-by books
Select [Preinstall] and select from [世界遺産1], [世界遺産2], [四字熟語], [花言葉], or [競技種目].

To display no image
Select [None specified].

To check the image
Move the cursor to the image and press 🖿 (Play).

3 Select an image quality at [Image quality].

[Sharp] : Sharply edged image quality.
[Normal] : The standard image quality emphasized naturalness.
[Dynamic] : The clear image quality in which an edge and contrast of an image is emphasized.

4 Select [Calendar/Clock] and press ▤.

```
Calendar/Clock
Calendar
        OFF            ▾
Cal. font color  Blk ▾
Clock
        Digital clock1 ▾
Clock style     12h ▾
Arrangement setting
```

5 Select the type of calendar at [Calendar].

    [LTC 1Week]   : Display the one-week Lifetime Calendar.
    [LTC 1Month]   : Display the one-month Lifetime Calendar.
    [Cal. 1Month(S)] : Display the one-month calendar (small).
    [Cal. 1Month(L)] : Display the one-month calendar (large).
    [Cal. 2Months]   : Display the two-month calendar.
    [OFF]   : Do not display the calendar.

6 Select the font color of the calendar at [Cal. font color].

- You cannot change the font color of Saturdays and holidays.

7 Select a clock type at [Clock].

Select from [Digital clock1 to 5], [Analog clock], [Pict clock], or [OFF].

8 Select the format to display the clock in the main display at [Clock style].

    [12h] : Display in 12-hour format.
    [24h] : Display in 24-hour format.

9 Select [Arrangement setting] and press ▤.

The screen for selecting a position appears.

Press ▤ (Change) to switch between calendar and clock, and then press ▲ ▼ ◀ ▶ to select a position to be displayed.

10 Press 🖭 (Complete).

The position of calendar/clock is set.

11 Press ◀ and select [ON]/[OFF] at [Soft key].

The Soft key is set.

- If you change the setting so that the i-Channel Telop text is displayed when an i-motion or i-αppli is set for the stand-by display, the screen for confirming whether to cancel the setting for the stand-by display appears. If you select [Yes], the i-motion or i-αppli set for the stand-by display is canceled and the image for the stand-by display is changed to that of the Kisekae menu.
- If you set an i-motion or i-αppli for the stand-by display when the i-Channel Telop text is displayed, the screen for confirming whether to cancel the display of the Telop text appears. If you select [Yes], the Telop text is turned off. When you change the setting for the stand-by display to other than an i-motion or i-αppli, the display of the Telop text is automatically restored.
- Even if the Soft key is set to [OFF], you can operate the FOMA terminal normally.
- If you set an i-motion for the stand-by display, the playback starts in the case, such as when you open the FOMA terminal, return to the stand-by display, or press CLR in the stand-by display, and the first frame of it is displayed as the stand-by display image. While the i-motion is played back, the setting of the Calendar is not displayed.
- If you set a Flash movie or GIF animation for the stand-by display, the playback starts in the case, such as when you open the FOMA terminal, return to the stand-by display, or press CLR in the stand-by display. The playback stops after a certain period of time. A frame displayed at the time of the playback being stopped is used as the stand-by display image. To restart the playback, press CLR (however, while displaying the i-Channel Telop text, the playback does not start even if you press CLR). The sound effect of the Flash movie set for the stand-by display is not heard.
- The displayed contents of Stand-by books are employed using part of examples/explanations.

Setting Images for Placing a Call/Sending Mail <Animation>

You can set an image that appears when you place a voice or videophone call, send mail, and perform other events.

Example: Setting an image to be used when you place a call

1 From the Menu, select [Settings] → [Display] → [Animation] and press ▭.

```
Animation setting
Calling
       Colorful White
V.phone calling img
       Colorful White
Mail sending img
       Colorful White
Check new message
       Colorful White
```

[Calling] : Set an image that appears when you place a voice call.

[V.phone calling img] : Set an image that appears when you place a videophone call.

[Mail sending img] : Set an image that appears when you send i-mode mail or SMS.

[Check new message] : Set an image that appears when you check new messages or SMS.

2 Select an image from My picture of the Data Box at [Calling].

● You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stand-by(480×864)], Max. W480×H288 for GIF animation
	SWF	Max. 100K bytes	—

To check the image

Move the cursor to the image and press 🄬 (Play).

● If you set the Phonebook image of the Set call display to [ON], the Des call display set in the Phonebook is displayed when you place a voice or videophone call regardless of the above setting.

Setting the Display for Incoming and Outgoing Calls <Call display>

You can set whether the Des call display or the name saved in the Phonebook is displayed.

1 From the Menu, select [Settings] → [Call] → [Call display] and press ▭.

```
Set call display
Phonebook image
              ON ▼
Name          ON ▼
Disp. call/rcv. No.
     None specified
```

[Phonebook image] : Set whether to display the Des call display set for a specific individual/group saved in the Phonebook.

[Name] : Set whether to display the name of a caller/recipient saved in the Phonebook.

[Disp. call/rcv. No.] : Set the display or call record display when placing/receiving a call or the color of the font for the received/sent mail lists.

2 Select [ON]/[OFF] at [Phonebook image].

[ON] : Display the image set for the Des call display in the Phonebook when placing/receiving a voice or videophone call.

[OFF] : Display the image set in the Animation or Incoming set when placing/receiving a voice or videophone call.

3 Select [ON]/[OFF] at [Name].

[ON] : Display the name saved in the Phonebook when placing/receiving a voice or videophone call, or originating/receiving a PushTalk call, or right after receiving mail or SMS.

[OFF] : Do not display the name saved in the Phonebook when placing/receiving a voice or videophone call, or originating/receiving a PushTalk call, or right after receiving mail or SMS.

Sound/Display/Light Settings

4 Select a color of the font to be displayed at [Disp. call/rcv. No.].

[dark] : Set the darker color for the display or call record display when placing/receiving a call, or the font for the received/sent mail lists.

[light] : Set the lighter color for the display or call record display when placing/receiving a call, or the font for the received/sent mail lists.

[None specified] : Do not specify the color of the font.

● When 2in1 is set to ON, the information of Number A/Address A is displayed in the font color which is set at the Disp. call/rcv. No. To display the information of Number B/Address B in the different color, you can set at the Set call/receive No. of the 2in1 setting (P.353).

Setting the Display for the Sub-display <Sub display>

You can set the clock type or format, or display when receiving mail to display in the sub-display and the time before starting the Power saver for the sub-display.

1 From the Menu, select [Settings] → [Display] → [Sub display] and press ▤.

```
Sub display setting
Mail receive display
     From/Subject ▼
Clock
     Digital clock1 ▼
Clock style    12h ▼
Power saver   15sec ▼
```

[Mail receive display] : Set whether to display the sender or subject in the sub-display when receiving mail.

[Clock] : Set the clock type to be displayed in the sub-display.

[Clock style] : Set the format to display the clock in the sub-display.

[Power saver] : Automatically turn off the sub-display if no operation is performed for a specific period.

2 Select a display of receiving mail at [Mail receive display].

[From/Subject] : Display the sender and subject.
[Only notice] : Display the message "Completed".

3 Select a clock type at [Clock].

Select from [Digital clock1 to 5].

4 Select the format to display the clock in the sub-display at [Clock style].

[12h] : Display in 12-hour format.
[24h] : Display in 24-hour format.

5 Set a time before starting the Power saver mode at [Power saver].

Select from [15sec], [30sec], [1min], and [2min].

Setting the Display and Keypad Illumination <Backlight>

You can set the main display light brightness, ON/OFF of the keypad light, and whether to turn on the light of the main display and sub-display.

1 From the Menu, select [Settings] → [Display] → [Backlight] and press ▤.

```
Backlight
Auto setting    ON ▼
Adjust light      3
Keypad light    ON ▼
Backlight always on
LED set when folded
                ON ▼
```

[Auto setting] : Set whether to adjust the main display light brightness and set ON/OFF of the keypad light automatically by the Brightness Sensor to adapt for the surrounding brightness.

[Adjust light] : Set the main display light brightness.

[Keypad light] : Set whether to turn on the keypad light.

[Backlight always on] : Set whether to keep the main display light on all the time including at the time of charging or recording.

[LED set when folded] : Set whether to turn on the indicator when the FOMA terminal is folded. The indicator color follows that set in the Incoming set of the Incoming call.

2 Select [ON]/[OFF] of adjusting automatically at [Auto setting].

3 Set the main display light brightness at [Adjust light].

Select from [1 to 5].

To reset to the default brightness

Press 🔳 (Reset).

4 Select [ON]/[OFF] of the Keypad light at [Keypad light].

5 Select [Backlight always on] and press ▤.

Backlight always on	
Charging	OFF ▾
Videophone	ON ▾
Internet	OFF ▾
Pict. shoot	ON ▾
Movie shoot	ON ▾
Movie play	ON ▾

[Charging] : Set whether to keep the light on during charging.

[Videophone] : Set whether to keep the light on during a videophone call.

[Internet] : Set whether to keep the light on while displaying sites or Internet home pages.

[Pict. shoot] : Set whether to keep the light on while recording a still image.

[Movie shoot] : Set whether to keep the light on while recording a movie.

[Movie play] : Set whether to keep the light on while playing back a movie.

6 Select [ON]/[OFF] of the Backlight always on for each item and press ◀.

7 Select [ON]/[OFF] of whether to turn on the indicator when the FOMA terminal is folded at [LED set when folded].

● It may take time to complete charging when [Charging] of the Backlight always on is [ON].
● The brightness of the main display while watching One Seg is set at the Display light (P.246).
● When the Auto setting is set to [ON], the brightness is automatically adjusted based on the value set at the Adjust light.

Saving Power for the Display <Power saver>

The display is automatically turned off to save battery power when no operations are made for a specific period. You can set the time before turning off the display.

1 From the Menu, select [Settings] → [Display] → [Power saver] and press ▤.

2 Select a time before starting the Power saver mode and press ▤.

Select from [1min], [3min], [5min], [10min], [15min], and [30min].

● While a function for which the Backlight always on is set to [ON] is in use, a slideshow is running, the software update (rewrite) is in progress, the Camera mode is active, and One Seg is activated, the Power saver mode does not work.
● The Power saver mode may be canceled if there is an incoming call, an activation of the Alarm or Schedule alarm, etc.

Changing the Appearance of the Menu <Menu setting>

You can switch the menu to be displayed when you press ▨ (MENU) in the stand-by display, and also set images to customize 12 icons displayed in the Standard menu.

Example: Setting an image as the icon for i-mode

1 From the Menu, select [Settings] → [Display] → [Menu setting] and press ▤.

```
Menu setting
Start menu setting
         Kisekae menu ▾
Icon setting
```

[Start menu setting] : Set the menu to be displayed when you press ▨ (MENU) in the stand-by display.

[Icon setting] : Set the icons to be displayed in the Standard menu display (P.34).

2 Select a display menu at [Start menu setting].

[Standard menu] : Display the Standard menu.
[Kisekae menu] : Display the Kisekae menu.
[My Selection] : Display the menu of My Selection.

3 Select [Icon setting] and press ▤.

The Icon setting display appears.

● You can only set it when [Standard menu] is set at the Start menu setting.

4 Select an image from My picture of the Data Box at [i-mode].

● You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stand-by(480×864)], Max. W480×H288 for GIF animation

● An image exceeding 60×80 dots in image size is displayed in reduced size.

To check the image

Move the cursor to the image and press ▣ (Play).

● If you set a GIF animation as an icon, the image in the first frame is displayed.

Using the Kisekae Tool <Kisekae setting>

Using the Kisekae Tool allows you to change settings such as the Kisekae menu, ring tone, stand-by display, icon, and coloration pattern at once. You can also use the Kisekae tools downloaded from i-mode sites, "SO@Planet", etc. (P.276).

● The following items can be set by the Kisekae Tool.

Display

- Stand-by display
- Mail Sending image
- V.phone Incoming image
- MessageR Receiving image
- MessageF Complete image
- Menu icon

- Voice call Calling image
- Check new message
- Mail Receiving image
- MessageR Complete image
- Battery level icon
- Color theme

- V.phone Calling image
- Voice call Incoming image
- Mail Complete image
- MessageF Receiving image
- Radio wave level icon
- Kisekae menu

Sound

- Voice call Ring tone
- Mail Ring tone
- Alarm tone

- V.phone Ring tone
- MessageR Ring tone
- Schedule alarm tone

- PushTalk Ring tone
- MessageF Ring tone
- Booking alarm tone

● Some displays or sounds of Kisekae Tool may not be set.

Example: Setting a Kisekae tool

1 From the Menu, select [Settings] → [Display] → [Kisekae setting] and press ▤.

[Kisekae Tool] : Set the Kisekae tool.

[Color theme setting] : Set the colors such as background color or coloration pattern at once.

2 Select data from Kisekae Tool of the Data Box at [Kisekae Tool].

To check an image

Move the cursor to the image and press 🄰 (Play).

To set the Color theme setting

Select a color theme at [Color theme setting].

● When 2in1 is used, the following items are not changed even if the Kisekae Tool is set.
 - Stand-by display of the Dual and B modes
 - Voice call Ring tone, Voice call Calling image, Voice call Incoming image, V.phone Ring tone, V.phone Incoming image, and V.phone Calling image for Number B
 - Mail Ring tone, Mail Receiving image, Mail Complete image, and Mail Sending image for Address B
● If you have deleted the preinstalled Kisekae tool, you can download it from "SO@Planet".
 [i Menu] → [メニュー/検索] (Menu/Search) → [ケータイ電話メーカー] (Mobile Phone Manufacturers) → [SO@Planet] (Japanese only)
● When you use the Kisekae tool to change the design of the menu display, some menu types may change the menu structure depending on the frequency in use. The digits assigned to menu items may not be applied.
 In this case, you cannot operate the FOMA terminal as explained in this manual, so please change the menu to the Standard menu or reset the menu settings (P.35, 116).
● When the Kisekae Tool is set to [ドコモダケ], if you select [基本メニュー呼び出し] (loading the basic menu), the menu structure can be changed to normal temporarily.
● Some Kisekae menus are displayed in Japanese even if the Select language is set to [English] depending on the Kisekae Tool.

Resetting the Menu Display

You can reset the display of the Kisekae menu to the default setting.

1 From the Menu, select [Settings] → [Management] → [Reset] → [Reset menu screen] and press ▤.

The Security code screen appears.

● The Reset display also appears by pressing ⑤ for over a second in the stand-by display. Select [Reset menu screen] and press ▤.

2 Enter the Security code and press ▤ (OK).

The screen for confirming whether to perform the Reset menu screen appears.

3 Select [Yes] and press ▤.

The default setting is restored.

Resetting the Settings of the Display and Sound

You can reset the settings of the display and sound set by the Kisekae Tool to the default settings.

1 From the Menu, select [Settings] → [Management] → [Reset] → [Reset display/sound] and press ▭.

The Security code screen appears.

- The Reset display also appears by pressing [5] for over a second in the stand-by display. Select [Reset display/sound] and press ▭.

2 Enter the Security code and press ▭ (OK).

The screen for confirming whether to perform the Reset display/sound appears.

3 Select [Yes] and press ▭.

The default settings are restored.

Customizing the Kisekae Menu <Kisekae menu>

Changing the Menu Items

You can change the items of the saved Kisekae menu with other menu items.

- You may not able to change menu items depending on the Kisekae menus.
- Menu items which can be changed vary depending on a Kisekae menu you use. You may not be able to change some menu items.
- Some Kisekae menus change the menu items automatically based on the operation history.
- You need to set the Start menu setting to [Kisekae menu] in advance (P.115).

1 Select a menu item in the Kisekae menu display and press ⓘ (Exchange).

```
Replacement
My Selection
i-mode
Mail
ⓘαppli
Phone
Data Box
MUSIC
Osaifu-Keitai
LifeKit
Own number
Settings
1Seg
```

※ The display shown is when the Kisekae Tool is set to [Manual Custom].

2 Select a menu item to be saved newly and press ⓘ (Save).

The screen for confirming whether to change a menu item with the selected item appears.

3 Select [Yes] and press ▭.

The selected menu item is saved.

Resetting the Operation History of the Kisekae Menu

Some Kisekae menus save the frequencies in use of menu items as an operation history and change the menu items automatically. The Operation history can be deleted.

1 From the Menu, select [Settings] → [Management] → [Reset] → [Reset menu log] and press ▭.

The Security code screen appears.

- The Reset display also appears by pressing ⑤ for over a second in the stand-by display. Select [Reset menu log] and press ▭.

2 Enter the Security code and press ▭ (OK).

The screen for confirming whether to reset the operation history appears.

3 Select [Yes] and press ▭.

The operation history of the menu is reset.

● To restore the default settings for the Kisekae menu display, see P.116.

Informing Missed Call/New Mail with Indicator   <Missed call>

The incoming indicator can be set to flash about every five seconds to notify you that there is a missed call or unread mail/SMS/message. The indicator is turned off by checking the missed call or displaying mail/SMS/message.

1 From the Menu, select [Settings] → [Call] → [Missed call] and press ▭.

2 Select [ON]/[OFF] and press ▭.

The Missed call is set.

● The indicator color for a missed call follows that set in the Incoming set.
● The indicator flashes in the following order of priority when there are mix of missed calls and unread mail/messages.
   1. Voice call indicator color
   2. Videophone call indicator color
   3. PushTalk call indicator color
   4. Mail indicator color
   5. Message R indicator color
   6. Message F indicator color
   7. Location provision indicator color
   If there are several calls, mails, messages, etc. of the same priority, the indicator color of the latest one has priority.

Setting the Font Size

<Font size>

Setting the Font Size At Once

You can set the size of fonts to be used for displaying the Kisekae menu, Phonebook, Call record, mail/SMS, and sites or for entering a word at once.

1 From the Menu, select [Settings] → [Display] → [Font size] → [All font size setting] and press ▤.

[Standard disp.] : Set the standard font size (40 dots) at once.

[Large disp.(XL)] : Set the extra large font size (60 dots) at once.

[Large disp.(XXL)] : Set the extra-extra large font size (80 dots) at once.

- When the font size of the Kisekae menu is changed between [Standard disp.] and [Large disp.(XL)]/[Large disp.(XXL)], the menu display is changed from the one which is used before the setting is changed.

2 Select a font size to be set at once and press ▤.

The All font size setting is set.

● Even if the Select language is set to [English], when you set the All font size setting to [Large disp.(XL)]/ [Large disp.(XXL)], the Japanese menu display appears.

Setting the Font Size Individually

You can set the size of fonts to be used individually for displaying the Phonebook, Own number Call record, mail/SMS, and sites or for entering a word.

Example: Setting the font size of the Phonebook

1 From the Menu, select [Settings] → [Display] → [Font size] → [Individual font size] and press ▤.

Individual font size	
Phonebook	M
Call record	M
Mail	M
Internet	M
Input text	M

[Phonebook] : Select a font size for the Phonebook and Own number from [Extra extra large], [Extra large], [Large], and [Medium].

[Call record] : Select a font size for the Call record from [Extra extra large], [Extra large], [Large], and [Medium].

[Mail] : Select a font size for the contents display of an i-mode mail, SMS, or Message R/F from [Extra extra large], [Extra large], [Large], [Medium], and [Small].

[Internet] : Select a font size for the contents display of a site, Full Browser, or screen memo from [Extra extra large], [Extra large], [Large], [Medium], and [Small].

[Input text] : Select a font size when entering a word from [Extra extra large], [Extra large], [Large], [Medium], and [Small].

2 Select a font size at [Phonebook].

The Phonebook font size is set.

● Even if you change the mail font size, the size of Deco mail pict. does not change.

● The font size of the Mail list is displayed in [Extra large] when [Extra extra large] or [Extra large] is selected at [Mail] of the Individual font size, or in [Medium] when [Large], [Medium], or [Small] is selected.

● The font size in the Input text display (address, subject, and main body) of mail/SMS is displayed in [Extra large] when [Extra extra large] or [Extra large] is selected at [Input text] of the Individual font size, in [Large] when [Large] is selected, or in [Medium] when [Medium] or [Small] is selected. When the [Small] is selected, only the font size in the matching word list is displayed in [Small].

Changing the Screen Display to English <Select language>

Menus, messages, and other displays can be displayed in either Japanese or English.

1 From the Menu, select [設定] → [管理] → [バイリンガル] and press ▤.

バイリンガル

　Japanese
　English

[Japanese] : Set the display language to Japanese.
[English] : Set the display language to English.
When the display language is set to English
　　Select [Settings] → [Management] → [Select language].

2 Select [English] and press ▤.

The display language is set to English.

● When you set the display language with the UIM inserted, the setting is recorded to the UIM.

Reducing Noise in the Display <BN reduction>

The noise in the display can be reduced while playing back a movie.

1 From the Menu, select [Settings] → [Management] → [BN reduction] and press ▤.

[ON] : The noise reduction is set.
[OFF] : Do not set the noise reduction.

2 Select [ON] and press ▤.

The BN reduction is set.

Security Settings

Security Codes Used on the FOMA Terminal

Some functions provided for convenient use of the FOMA terminal require the security code to use them. Besides the Security code for operating the mobile phone, the network security code necessary for the network services, i-mode password, etc. are available. Make use of the FOMA terminal using an appropriate security code according to the purpose.

Security Code

The Security code is set to "0000" at the time of purchase. It can be changed by yourself (P.124).

```
Input
security code
[■        ]
```

When the Security code screen appears, enter the 4- to 8-digit Security code and press ▤ (OK).
● The entered Security code is displayed as asterisks (✱).

When you enter the wrong Security code
The message "Invalid security code" appears. Enter the correct Security code.

Network Security Code

The network security code, a 4-digit number necessary for performing procedures on ド コモeサイト (DoCoMo e-site) and using the DoCoMo Network Services, can be set to any number at the time of subscription. It can be also changed later by yourself.
You can change your network security code to the new one using the PC if you have the "DoCoMo ID"/"Password" for the "My DoCoMo" General support site for PC. You can also change it by yourself using i-mode, from "各種手続き" (Applications and Procedures) available on ドコモeサイト (DoCoMo e-site).
※ For information on "My DoCoMo" or "DoCoMo e-site", see the backcover of this manual.

i-mode Password

The 4-digit "i-mode password" is required when saving/deleting My Menu or subscribing/canceling message service or i-mode charged service, etc.
(There may be other passwords for the i-mode used by IP (information service providers)).)
The i-mode password is set to "0000" at the time of subscription. It can be changed by yourself.
You can change the i-mode password using i-mode, by selecting [i Menu] → [English iMenu] → [Options] → [Change i-mode Password].

PIN1 Code and PIN2 Code

You can set two Security codes, namely PIN1 and PIN2, for the UIM (FOMA card). These codes are set to "0000" at the time of subscription. They can be changed by yourself (P.125).
PIN1 is a 4- to 8-digit number (code) that must be entered for user confirmation to prevent unauthorized use by a third party every time you insert the UIM into the FOMA terminal or when the FOMA terminal is powered on. Only after you enter the PIN1 code, you can use the FOMA terminal for placing/receiving a call and other operation.
PIN2 is a 4- to 8-digit number (code) that must be entered in order to reset the total call cost, use a user certificate, or request the issue of a user certificate.

- If you continue to use the current UIM with a newly purchased FOMA terminal, use the previous PIN1 and PIN2 codes you set for the UIM.

```
Input PIN1 code.
3 times left
```
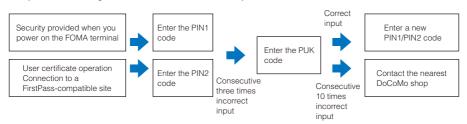

When the PIN1 or PIN2 code input screen appears, enter the 4- to 8-digit PIN1/PIN2 code and press ▤ (OK).

- The entered PIN1/PIN2 code is displayed as asterisks (✱).
- If you enter a wrong PIN1/PIN2 code three times consecutively, the PIN1/PIN2 code is locked and cannot be used anymore. ("X times left" appears on the screen, indicating the remaining number of times for retry operation.)
When you enter the correct PIN1/PIN2 code, the number of times left is reset to 3.

PUK Code

The PUK code is a 8-digit number for canceling the locked PIN1/PIN2 code. The PUK code cannot be changed by yourself.

- If you enter a wrong PUK code 10 times consecutively, the UIM is locked.

123

Changing the Security Code

<Change code>

1 From the Menu, select [Settings] → [Management] → [Change code] and press ▤.

```
Input
security code
[▮      ]
```

2 Enter the current Security code and press ▤ (OK).

The entered Security code is displayed as asterisks (✳).

3 Enter the new Security code and press ▤ (OK).

Enter a 4- to 8-digit code.

4 Select [Yes] and press ▤.

The Security code is changed.

Setting the PIN Code

<UIM setting>

You can set the FOMA terminal to require the PIN1 code input when powered on. You can change the PIN1 and PIN2 codes.

1 From the Menu, select [Settings] → [Management] → [UIM setting] and press ▤.

The Security code screen appears.

2 Enter the Security code and press ▤ (OK).

```
UIM setting
PIN1 code setting
                OFF ▾
Change PIN1 code
Change PIN2 code
```

3 Select [ON]/[OFF] at [PIN1 code setting].

[ON] : You need to enter the PIN1 code when the FOMA terminal is powered on.
[OFF] : Do not need to enter the PIN1 code when the FOMA terminal is powered on.

4 Enter a PIN1 code and press ▤ (OK).

The entered PIN1 code is displayed as asterisks (✳).

● The PIN1 code is set to "0000" at the time of subscription.

The PIN1 code setting is set.

Security Settings

Changing the PIN1 Code/PIN2 Code

- To change the PIN1 code, set the PIN1 code setting to [ON].

Example: Changing the PIN1 code

1 From the Menu, select [Settings] → [Management] → [UIM setting] and press ▦.

The Security code screen appears.

2 Enter the Security code and press ▦ (OK).

The UIM setting display appears.

3 Select [Change PIN1 code] and press ▦.

```
Input PIN1 code.
3times left
▯▭
```

To change the PIN2 code
    Select [Change PIN2 code].

4 Enter the current PIN1 code and press ▦ (OK).

The entered PIN1/PIN2 code is displayed as asterisks (✱).

5 Enter a new PIN1 code and press ▦ (OK).

Enter a 4- to 8-digit code.

6 Enter the new PIN1 code again and press ▦ (OK).

The new PIN1 code is set.

Canceling the PIN Lock

Example: Canceling the PIN1 code lock

1 Enter the 8-digit PUK code and press ▦ (OK).

```
Input PUK code.
10times left
▯▭
```

The entered PUK code is displayed as asterisks (✱).

2 Enter a new PIN1 code and press ▦ (OK).

Enter a 4- to 8-digit code.
The entered PIN1 code is displayed as asterisks (✱).

3 Enter the new PIN1 code again and press ▦ (OK).

The PIN lock is canceled and the PIN1 code is changed to the new one.

Various Locking Functions

The FOMA terminal offers many lock functions to assure safety operation, such as preventing unauthorized use of the FOMA terminal, protecting the Phonebook from being seen by others. You can use any mix of these functions depending on the purpose.

Functions	Description
Lock all	Prevent others from using the FOMA terminal (P.126).
Omakase Lock	Lock the FOMA terminal to prevent others from using it. For example, this service is useful when you lose or misplace the FOMA terminal (P.127).
Self mode	Disable all functions that involve calls and communication, such as placing/receiving a voice or videophone call, originating/receiving a PushTalk call, sending/receiving mail, infrared communication, or the infrared remote control (P.128).
Personal data lock	Disable some functions to prevent others from viewing/editing your personal information such as the Phonebook and Schedule data (P.129).
Key dial lock	Disable the dial keys to prevent placing a voice/videophone call or originating a PushTalk call (P.130).
Auto lock SubKey	Prevent the Music Touch Key on the back from being accidentally patted while carrying around the folded FOMA terminal with the power on (P.130).
Record display	Set the Redial, Dial frequency, and Received records not to be displayed (P.131).
Secret display	Display/not display phonebook entries (PushTalk phonebook)/Own number/schedules saved as Secret (P.131).
Mail security	Set the FOMA terminal not to display the saved mail, Receive ranking, etc. (P.132).
Data security	Set the FOMA terminal not to display data in My picture or i-motion of the Data Box (P.132).
Accept/Reject call	Accept/reject a voice, videophone, or PushTalk call from a specific phone number/group when it is received (P.133).
Denied no ID	Set not to accept a voice, videophone, or PushTalk call without the caller's phone number (P.134).
Set ring start time	Set a time interval before performing the receiving operation for a voice, videophone, or PushTalk call from a caller who is not saved in the Phonebook (P.134).
Reject unknown	Reject a voice, videophone, or PushTalk call from a caller who is not saved in the Phonebook (P.135).
IC card lock	Lock the IC card to prevent others from using the IC card function (P.226).

Locking the Keypad to Prevent Unauthorized Use <Lock all>

You can set the Lock all to prevent others from using the FOMA terminal. When the Lock all is set, you cannot perform any operation other than powering on/off the FOMA terminal and answering a voice or videophone call.

1 From the Menu, select [Settings] → [Lock/Security] → [Lock all] and press ▤.

The Security code screen appears.

2 Enter the Security code and press ▤ (OK).

The screen for confirming whether to set the Lock all appears.

3 Select [Yes] and press ▤.

The Lock all is set and the message "Lock all" appears in the stand-by display.

To cancel the Lock all

Enter the Security code and press ▤ (OK).

● To call emergency numbers (110, 119, and 118) when the Lock all is set, enter the emergency number and press ☎. The emergency number is displayed as asterisks (＊) in the security code input field of the Security code screen.

● The FOMA terminal is powered off after five unsuccessful attempts to cancel the Lock all.

● When the Lock all is set, the default ring tone is used for an incoming voice or videophone call. One of the images from the [Preinstall] folder in My picture of the Data box is used for the incoming image. In this case, not the caller's name but the caller's phone number is displayed. Chaku-moji, if received, is not displayed, but when you cancel the Lock all, Chaku-moji can be checked in the Received record (P.54).

● When the Lock all is set, you cannot send a substitute image to answer a videophone call. You can only adjust the volume of the caller's voice or switch the camera during a call.

● If there is an incoming PushTalk call when the Lock all is set, the FOMA terminal does not receive the call and the caller hears a busy tone. The call is saved in the Received record. When you cancel the Lock all, the notification icon " 𝄌 " (Missed call) appears.

● If you receive a request for your location information while the Lock all is set, the FOMA terminal answers the request. In this case, not the caller's name but the caller's phone number is displayed.

● When the Lock all is set, i-mode mail, Message R/F, and SMS are still received automatically, however, the receiving operations, such as displaying the incoming mail display or the received mail display or the sounding of the ring tone, are not performed and you are not notified of the reception.

● When you set the Lock all, the Alarm, Schedule alarm, and Booking alarm do not operate.

● If you set the Lock all, the settings of the stand-by display and Kisekae Tool are changed to those of [Manual Custom]. The i-Channel Telop text is not displayed.

● When you set the Lock all, the notification icons are not displayed. When you cancel the Lock all, the icons are displayed again.

Using the Omakase Lock

Omakase Lock is a service that allows you to lock the FOMA terminal remotely if you lose the FOMA terminal by requesting DoCoMo or using a procedure available on the My DoCoMo website. Use this service to protect your important private information and Osaifu-Keitai.
You can also request DoCoMo by a call, etc. to unlock the FOMA terminal.

※ Omakase Lock is a paid service. However, when you subscribe to this service together with your request to suspend the FOMA terminal or while the FOMA terminal is suspended, the service charge is not required.

※ If the Location request is set to ON while the Omakase Lock is set, the FOMA terminal answers a request of location information of the GPS function.

Setting/Canceling the Omakase Lock
☎ 0120-524-360   Service hours: 24 hours
※ You can also use your PC to set/cancel the lock from the My DoCoMo website.

• For details on how to use/charges, etc. of the Omakase Lock, see the "Mobile Phone User's Guide 【Procedures and After-Sales Services】".

```
Omakase Lock
activated
```

The message "Omakase Lock activated" appears and the Omakase Lock is set.

• The Omakase Lock service locks a FOMA terminal if it has an installed UIM card you are currently subscribing to.

• When the Omakase Lock is set, the user can answer a voice or videophone call and power on/off the FOMA terminal, but all keypad operation is locked and all functions (including the IC card function) are disabled.

• When the Omakase Lock is set, the received mail is stored at the Mail Center.

• Although the user can power on/off the FOMA terminal, powering off does not cancel the lock.

• Note, however, that the UIM and microSD memory card are not locked.

● Any other active function is terminated when the Omakase Lock is set.

● The Omakase Lock can be used even when another lock function is set. If you set the Omakase Lock while the Public mode (Drive mode) is set, you cannot receive a voice or videophone call.

● The Omakase Lock cannot be set if the FOMA terminal is outside of the service area, in the Self mode, or powered off.

● The Omakase Lock cannot be set if you subscribe to the Dual Network Service and use the Mova service.

● The Omakase Lock service locks the FOMA terminal upon request from a subscriber of the UIM inserted in the FOMA terminal. Even if this UIM subscriber and user of the FOMA terminal are different, the FOMA terminal is locked if requested by the subscriber.

● You can cancel the Omakase Lock only when the UIM the phone number of which is the same as of the one inserted when you set the lock is inserted in the FOMA terminal. If the lock cannot be canceled, call the "General Inquiries" on the backcover of this manual.

● When the Omakase Lock is set, the default ring tone is used for an incoming voice or videophone call. One of the images from the [Preinstall] folder in My picture of the Data box is used for the incoming image. In this case, not the caller's name but the caller's phone number is displayed. Chaku-moji, if received, is not displayed, but when you cancel the Omakase Lock, Chaku-moji can be checked in the Received record (P.54).

● When the Omakase Lock is set, you cannot send a substitute image to answer a videophone call. You can only adjust the volume of the caller's voice and switch the camera during a call.

● If you set the Omakase Lock, the settings of the stand-by display and Kisekae Tool are changed to those of [Manual Custom]. The i-Channel Telop text is not displayed.

Restricting Placing/Receiving Calls

<Self mode>

You can disable all functions that involve calls or communication, such as placing/receiving a voice or videophone call, originating/receiving a PushTalk call, and sending/receiving mail. You cannot use infrared communication, infrared remote control, and iC communication, either.

1 From the Menu, select [Settings] → [Call] → [Self mode] and press ▤.

The screen for confirming whether to set the Self mode appears.

To cancel the Self mode

Select [Yes] on the screen for confirming whether to cancel the Self mode.

2 Select [Yes] and press ▤.

The Self mode is set and "self" appears.

● Even if the Self mode is set, you can call emergency numbers (110, 119, and 118). The Self mode is canceled after you call an emergency number.

● If there is an incoming voice call when the Self mode is set, the caller hears a guidance informing that the FOMA terminal is outside of the service area or the FOMA terminal is powered off. When using the DoCoMo Voice Mail Service or Call Forwarding Service, these services can be used in the same manner as when the FOMA terminal is powered off.

● If you receive a PushTalk call when the Self mode is set, the call is disconnected. If the received call is for the PushTalk communication among several persons, the message "✕Disconnect" appears in the On PushTalk display of the members.

Protecting Your Personal Data in the Phonebook, Schedule, etc. <Personal data lock>

You can disable the following functions to prevent others from viewing/editing your personal information such as the Phonebook and Schedule data.

- 1Seg
- Camera
- i-mode
- Own number
- Record message
- ToruCa
- Schedule
- Kisekae tool
- Ring tone
- Chaku-moji

- MUSIC Player
- Full Browser
- i-Channel
- Phonebook
- Voice memo
- IC card content
- Text memo
- Sub display
- Incoming image
- Melody Call

- Music&Video Channel
- microSD
- i-αppli
- PushTalk phonebook
- Bar code reader
- GPS
- Data Box
- Icon settings
- Substitute image

- Lifetime Calendar
- Mail
- DCMX
- Data Security Service
- Infrared communication
- Alarm
- Stand-by display
- Animation
- Reset

● When the Reject unknown is set, you cannot set the Personal data lock.

1 From the Menu, select [Settings] → [Lock/Security] → [Pers. data lock] and press ▤.

The Security code screen appears.

2 Enter the Security code and press ▤ (OK).

3 Select [ON] and press ▤.

The Personal data lock is set and "▤" appears.

To cancel the Personal data lock

Select [OFF]. The Personal data lock is canceled and "▤" disappears.

● When the Personal data lock and Key dial lock are set simultaneously, "▨" is displayed instead of "▤".
● If you set the Personal data lock when data other than that of the Kisekae menu or that preinstalled in the [Preinstall] folder of the Data Box is set for the image, substitute image, or ring tone in the stand-by or other display, the setting is reset to the default setting. If you cancel the Personal data lock, the image or ring tone you set is restored.
● When the Personal data lock is set, the regular ring tone, incoming image (excluding PushTalk), and indicator color are used for an incoming voice, videophone, or PushTalk call. In this case, not the caller's name but the caller's phone number is displayed. Chaku-moji, if received, is not displayed, but when you cancel the Personal data lock, Chaku-moji can be checked in the Received record (P.54).
● If you receive a request for your location information while the Personal data lock is set, the FOMA terminal answers the request. In this case, not the caller's name but the caller's phone number is displayed.
● When the Personal data lock is set, i-mode mail, Message R/F, and SMS are still received automatically, however, the receiving operations, such as displaying the incoming mail display or the received mail display or the sounding of the ring tone, are not performed and you are not notified of the reception.
● When you set the Personal data lock, the name, phone type icon, and Chaku-moji are not displayed in the Redial/Received record.
● When you set the Personal data lock, the Alarm, Schedule alarm, and Booking alarm do not operate.
● When you set the Personal data lock, all incoming call is accepted regardless of the Accept/Reject call setting.
● When you set the Personal data lock, the i-Channel Telop text is not displayed.
● When you set the Personal data lock, the FOMA terminal does not display the following icons. If you cancel the lock, they appear.
  - "▤" (New mail)
  - "▤" (New MessageF)
  - "▤" (New V.phone msg)
  - "▤" (Download completed)
  - "▤" (Stand-by SW error)
  - "▤" (Mail at center)
  - "▤" (New ToruCa)
  - "▤" (Voice Mail)
  - "▤" (Download failed)
  - "▤" (Update completed)
  - "▤" (New MessageR)
  - "▤" (New Record msg)
  - "▤" (Timer Rec result)
  - "▤" (PB update failed)
  - "▤" (Update definitions)

Restricting Dialing from the Keypad <Key dial lock>

The keypad is locked to restrict placing a voice or videophone call or originating a PushTalk call. To cancel the Key dial lock temporarily, enter the Security code.

● When you set the Key dial lock, you cannot perform the following functions.
- Place a call using the keys on the keypad (excluding calls made by the 2-touch dial or using the Flat-plug Earphone/Microphone with Switch), place a call to a recipient who is not saved in the Phonebook using the Received record, or [Call back] from i-mode mail
- Add a member during PushTalk communication using the keys on the keypad
- Place a call to a recipient who is not saved in the Phonebook using the Redial/Dial frequency record
- Send i-mode mail or SMS to a recipient who is not saved in the Phonebook
- Phone To (AV Phone To) or Mail To
- Save new data or edit/delete data in the Phonebook
- Operate the Phonebook stored in the microSD memory card
- Select the Phonebook attached to i-mode mail
- Save/edit/delete the Location notice or information of a party
- Send the Phonebook data using the infrared communication

1 From the Menu, select [Settings] → [Lock/Security] → [Key dial lock] and press ▭.

The Security code screen appears.

2 Enter the Security code and press ▭ (OK).

3 Select [ON] and press ▭.

The Key dial lock is set and " 🖾 " appears.

To cancel the Key dial lock
Select [OFF]. The Key dial lock is canceled and " 🖾 " disappears.

● When the Key dial lock and Personal data lock are set simultaneously, " 🖾 " is displayed instead of " 🖾 ".
● Even if the Key dial lock is set, you can call emergency numbers (110, 119, and 118).

Locking the Music Touch Key to Prevent an Accidental Use <Auto lock SubKey>

You can set whether to lock the Music Touch Key when the Power saver mode is started while the FOMA terminal is folded.

1 From the Menu, select [Settings] → [Lock/Security] → [Auto lock SubKey] and press ▭.

2 Select [ON]/[OFF] and press ▭.

The Auto lock SubKey is set.

Locking the Music Touch Key Manually

You can lock the Music Touch Key manually while the FOMA terminal is folded only when the MUSIC Player or Music&Video Channel is activated.

1 Press (MUSIC/⚬).

The Music Touch Key is locked.

To cancel the lock

Press (MUSIC/⚬) while the sub-display lights. While the sub-display is turned off, the sub-display lights when pressing (MUSIC/⚬). Press (MUSIC/⚬) again to cancel the lock.

Setting the Display of the Redial/Received Record <Record display>

The Redial, Dial frequency, and Received record can be set not to be displayed. Playback of the Record message is also disabled. To cancel the Record display temporarily, enter the Security code.

1 Press ▶ (▢) in the stand-by display and press ✉ (Func).

The Function menu appears.

2 Select [Set call record] → [Record display] and press ▱.

The Security code screen appears.

3 Enter the Security code and press ▱ (OK).

The Record display appears.

4 Select [ON]/[OFF] and press ▱.

The Record display is set.

● The call is saved in the Redial/Received record even if the Record display is [OFF].

Displaying the Data Saved as Secret <Secret display>

The Phonebook (PushTalk phonebook), Own number, and Schedule saved as Secret are not displayed unless the Secret display is set to [ON]. Make sure to save the Phonebook, Own number, and Schedule as Secret if you do not want others to see them.

• Even if the Secret display is set to [ON], it is changed to [OFF] when you power off the FOMA terminal.

1 From the Menu, select [Settings] → [Lock/Security] → [Secret display] and press ▱.

The Security code screen appears.

2 Enter the Security code and press ▱ (OK).

3 Select [ON]/[OFF] and press ▱.

The Secret display is set.
When set to [ON], " 🔒 " appears.

● When a caller or recipient is saved as Secret in the Phonebook, the name and phone type are not displayed in the Redial/Received record. Once you cancel the Secret, they are displayed.

Protecting Mail from Unauthorized Access

<Mail security>

You can set the FOMA terminal not to display the received/sent/saved mail by folder. You can also use this function not to display the Receive/Send ranking and Sort inbox/outbox. To cancel this function temporarily, enter the Security code.

1 From the Mail menu, select [Inbox]/[Outbox]/[Draft] and press ▤.

2 Press ✉ (Func).

The Function menu appears.

3 Select [Mail security] and press ▤.

The Security code screen appears.

4 Enter the Security code and press ▤ (OK).

The Mail security set display appears.

5 Select a folder to be locked and press ▤.

"✓" appears.

To lock all folders

Press ⟨ch⟩ (Sel. all).

To unlock the selected folder

Press ▤ (Rel.).

6 Press ⓘ (Complete).

The Mail security is set and "📁" (yellow)/"📁" (blue)/"📁" appears (P.189).

Protecting Data from Unauthorized Access

<Data security>

You can set the FOMA terminal not to display data in My picture or i-motion of the Data Box. You can select data not to display by folder. To cancel this function temporarily, enter the Security code.
The Data security can be set for the following folders.

Category	Folder
My picture	i-mode, Camera, Data exchange, and User-created folder
i-motion	i-mode, Camera, Data exchange, and User-created folder

1 From the Data Box, select a category and press ▤.

The folder list appears.

2 Press ✉ (Func).

The Function menu appears.

3 Select [Data security] and press ▤.

The Security code screen appears.

4 Enter the Security code and press ▤ (OK).

The screen for selecting a security folder appears.

5 Select a folder to be locked and press ▤.

To lock all folders

Press ⟨ch⟩ (Sel. all).

To unlock the selected folder

Press ▤ (Rel.).

6 Press [≣] (Complete).

The screen for confirming the change of the security setting appears.

7 Select [Yes] and press ▭.

The Data security is set.

Specifying Phone Numbers to Accept/Reject Calls <Accept/Reject call>

You can set to accept/reject voice, videophone, or PushTalk calls only from specific phone numbers. For the Accept/Reject calls, up to 20 phone numbers can be saved (Phone No.). You can also set to accept/reject calls only from specific groups in the FOMA terminal phonebook. For the Accept/Reject calls, up to three groups can be saved (Group list).

This function is valid only when a caller sends the phone number. It is recommended to set the Caller ID Display Request Service and the Denied no ID together with this function.

- SMS and i-mode mail can be received regardless of this function.
- For an incoming PushTalk call, it is only to the caller's phone number that the Accept/Reject call setting is valid. The Accept/Reject setting does not work even if you set it to a member other than the caller. When you make the Accept/Reject setting through the Group list, a call is accepted/rejected if the caller of it belongs to the specified group in the FOMA terminal phonebook.
- When the Personal data lock is set, you cannot set the Accept/Reject calls.

Example: Setting [Accept]/[Reject] for calls from specified phone numbers

1 From the Menu, select [Settings] → [Lock/Security] → [Acpt/Rjct call] and press ▭.

The Security code screen appears.

2 Enter the Security code and press ▭ (OK).

```
Accept/Reject call
Set            OFF ▾
Phone No.      0/20
Group list     0/3
```
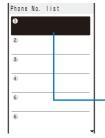

3 Select [Accept]/[Reject] at [Set].

[Accept] : Set to accept a call. When you receive a call from a phone number/group other than specified, the call is not connected. The missed call notification icon appears and the call is saved in the Received record.

[Reject] : Set to reject a call. When you receive a call from a specified phone number/group, the call is not connected. The missed call notification icon appears and the call is saved in the Received record.

[OFF] : Cancel the Accept/Reject call setting.

4 Select [Phone No.] and press ▭.

```
Phone No. list
❶
②
③
④
⑤
⑥
```
— Number field

To specify a group
Select [Group list] and select a group at the group field.

To delete a phone number or group
Move the cursor to the number or group field and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete all numbers or groups, from the Function menu, select [Delete] → [Delete all] → [Yes].

5 Enter a phone number at the number field.

6 Press ◀.

The list is saved and the Accept/Reject call display is restored.

7 Press 📧 (Complete).

The Accept/Reject call from specified phone numbers is set.

Rejecting Calls with No Caller ID <Denied no ID>

When receiving a voice, videophone, or PushTalk call without the caller's phone number displayed, the reason for not displaying it is shown. You can decide whether to accept a call based on the reason.

● SMS and i-mode mail can be received regardless of this function.
● If you receive a call with no caller ID when the Denied no ID is [ON], the call is not connected. The missed call notification icon appears and the call is saved in the Received record.

1 From the Menu, select [Settings] → [Lock/Security] → [Denied no ID] and press ▤.

The Security code screen appears.

2 Enter the Security code and press ▤ (OK).

```
Denied no ID
User Unset      OFF▼
PublicPhone     OFF▼
Not supported   OFF▼
```

3 Select [ON]/[OFF] of the Denied no ID for each non-display reason.

The Denied no ID is set.

Muting the Ring Tone for Calls with No Phonebook Entry <Set ring start time>

You can set a time interval before starting operation of the ring tone, incoming indicator, and vibrator when you receive a voice, videophone, or PushTalk call from a person/group who is not saved in the Phonebook. This function is also useful for blocking a nuisance call such as from a malicious caller.

● When the Reject unknown is set, you cannot set the Set ring start time.

1 From the Menu, select [Settings] → [Call] → [Call assist] → [Set ring start time] and press ▤.

```
Set ring start time
Set             OFF▼
Start time      04 sec
                (01-99)
Missed call display
                OFF▼
```

2 Select [ON]/[OFF] for the Set ring start time at [Set].

3 Enter the time before starting the ring tone for an incoming call at [Start time].

Enter from 01 to 99 seconds.

4 Select [ON]/[OFF] at [Missed call display].

[ON] : Display all calls in the Received record.

[OFF] : For a call the start time of which is shorter than the set time, neither the missed call notification icon nor the received record is displayed. The call is saved in the Received record. When the operation of the record message or videophone message is started, the notification icon of missed call appears and the received record is displayed.

5 Press 📱 (Complete).

The Set ring start time is set.

● In the following cases, the Set ring start time setting works to a call even if you receive it from a person saved in the Phonebook.
  - A call from a person saved as Secret in the Phonebook (when the Secret display is set to [OFF])
  - A call with no caller ID
  - When the Personal data lock is set
● To display all received records when the Missed call display is [OFF], from the Function menu in the Received record display, select [Display all].
● If the time set for the Start time is same as that for the answer or ring times for the Record message, Auto answer setting, Voice Mail Service, and Call Forwarding Service, the ring tone may sound.

Rejecting Calls from Callers with No Phonebook Entry <Reject unknown>

You can set to reject voice, videophone, or PushTalk calls from callers not saved in the Phonebook. It is recommended that you set the Caller ID Display Request Service together with this function.

● SMS and i-mode mail can be received regardless of this function.
● If you receive a call from a caller who is not saved in the Phonebook when the Reject unknown is [ON], the call is not connected. The missed call notification icon appears and the call is saved in the Received record.
● When the Set ring start time or Personal data lock is set, you cannot set the Reject unknown.

1 From the Menu, select [Settings] → [Lock/Security] → [Reject unknown] and press ▤.

The Security code screen appears.

2 Enter the Security code and press ▤ (OK).

3 Select [ON]/[OFF] and press ▤.

The Reject unknown is set.

● In the following cases, the Reject unknown setting works to a call even if you receive it from a person saved in the Phonebook.
  - A call from a person saved as Secret in the Phonebook (when the Secret display is set to [OFF])
  - A call with no caller ID

Using the Data Security Service <Data Security Service>

The Data Security Service is a service that allows you to store the Phonebook, images, and mail (hereinafter referred to as "stored data") saved in your FOMA terminal at the Data Security Service Center.

Even if you lose the stored data, for example, if you accidentally lost the FOMA terminal or it had a water-related trouble, you can restore the stored data at the Center into a new FOMA terminal. Also, the phonebook data saved in both the FOMA terminal and Data Security Service Center can be kept it latest automatically on a regular basis. Furthermore, you can easily edit the stored data at the Data Security Service Center by accessing the My DoCoMo website on your PC, and save the edited stored data in the FOMA terminal.

※ For details on the Data Security Service, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

| FOMA terminal | Data Security Service Center | PC, etc. |

Store the Phonebook, images, and mail.

Easily restore data when the FOMA terminal is lost or has a water-related trouble.

Internet

Update the FOMA terminal after editing the data on a PC.

View and edit the stored data.

※ Data Security Service is a paid service that requires a subscription. (To apply for this service, you need an i-mode subscription.)

● Saving the Phonebook (P.100)   ● Saving the mail (P.191)   ● Saving the images (P.269)

Other Measures "For Safety Operation"

The following functions and services are also available for safety operation besides those described in this chapter.

Purpose	Function name/Service name	Page
Prevent others from using the IC card function without consent.	IC card lock	P.226
Do not receive a "nuisance call" such as a prank call and malicious sales call.	Nuisance Call Blocking Service	P.348
Do not receive a call without a caller ID.	Caller ID Display Request Service	P.348
Use the electronic authentication service to perform secure and reliable data communication (available only when accessing FirstPass-compatible sites).	FirstPass	P.171
Update of the FOMA terminal software when it is necessary.	SW Update	P.402
Protect the FOMA terminal from data that could cause trouble.	Scan function	P.407
Choose to receive only necessary mail when receiving i-mode mail.	Recv option setting	P.186, 196
Register or check information about your or someone's condition using i-mode in the event of a disaster.	i-mode Disaster Message Board Service	See the "Mobile Phone User's Guide 【i-mode】 FOMA version".
Change or confirm the mail address.	Change/Confirm Mail Address	
Reject mail that contains URLs.	Spam Mail Prevention (Reject Mail with URL)	
Receive/reject mail from specific domains.	Spam Mail Prevention (Receive/ Reject Mail Settings)	
Receive/reject mail only from i-mode users.		
Receive/reject mail from specific addresses.		
Do not receive SMS messages.	Spam Mail Prevention (SMS Rejection Settings)	
Do not receive mail from an i-mode compatible mobile phone if the number of mail sent from it reaches 200 a day.	Reject Mass i-mode Mail Senders	
Do not receive advertising mail sent without prior agreement.	Reject Unsolicited Ad Mail	
Limit the size of received mail.	Limiting mail size	
Confirm the current settings of the mail function.	Confirm Settings	
Disable the mail function temporarily.	Suspend Mail	
Check the rough present location of the lost FOMA terminal.	Keitai-Osagashi Service	

Camera

Before Using the Camera

You can record images by the FOMA terminal's built-in camera, which you can send by attaching to i-mode mail and set for the stand-by display, etc.

To use the microSD memory card, you need to obtain a microSD memory card separately. If you do not have a microSD memory card, you can purchase one at a home electric appliance store or other similar store (P.278).

- The image recorded by the camera may differ from actual color or brightness of object.

About Using the Camera

Notes Before Using the Camera

- Clear images cannot be obtained if the camera lens is stained with fingerprints or grease. Wipe the camera with a soft clean cloth before recording an image.
- Leaving the FOMA terminal in a place exposed to direct sunlight or high temperature for a long period of time may deteriorate the image quality.
- You cannot start the Camera mode when the battery level is very low. To use the camera, charge the battery sufficiently.
- The Camera mode may not be activated when the FOMA terminal is charged electrostatically.

Notes on Using the Camera

- To prevent shaking, hold the FOMA terminal firmly or place it on a stable place and use the Auto timer when recording.
- When you try to record a strong light source directly, such as the sun or a lamp, the screen may black out or the image on the screen may be distorted.
- The camera is manufactured based on the leading edge technologies, and black and bright points or lines may appear constantly in the display. Additionally, increased noise may appear as white lines when recording in a low-light environment. These are not malfunctions.
- When the battery level becomes very low in the Camera mode, the Camera mode is terminated.

About the Camera Mode

To use the camera, press the shutter 📷 for over a second in the stand-by display. The Camera mode is activated, an image through the camera lens appears in the display, and the photo light is turned on (low light).

To terminate the Camera mode, press ☎ .

- The camera mode is also activated by pressing 🄲🄷 for over a second.

● The Camera mode is terminated automatically if the keypad is not pressed for about two minutes.

Camera

About Still Image/Movie

Item	Still image	Movie
File format	JPEG (Exif format)	MP4 (MobileMP4)
File name	When saved to [Data Box] 　YYYYMMDDhhmmss ● The recorded year, month, date, hour, minute, second is displayed. For example, when a still image is recorded at November 1, 2007, 18:02:10, it appears as "20071101180210". ● When using the Continuous mode, 00 to 03 is added after the year, month, date, hour, minute, second, resulting in a format like "20071101180210_00". When saved to [microSD] 　DSC0nnnn	When saved to [Data Box] 　YYYYMMDDhhmmss ● The recorded year, month, date, hour, minute, second is displayed. For example, when a movie is recorded at November 1, 2007, 18:02:10, it appears as "20071101180210". When saved to [microSD] 　MOLnnn
File number	NNN-nnnn ● The file number is displayed when saved to [microSD]. You can reset the file number (P.156).	—

● A number "100 to 999" is assigned to "NNN", "001 to FFF" is assigned to "nnn", and "0001 to 9999" is assigned to "nnnn" in the order of recorded time.

● If you have not set the date/time, the file name is displayed as "--------------".

Number of Still Images You Can Save

The number of still images that can be saved in the Data Box or microSD memory card varies depending on the image quality and size, recording conditions, and object of shooting.

Recording Still Images

<Shoot by photo>

When recording with the Out-camera, you can use the Auto focus function to focus on an object at the center of the display and record still images.
You can also record a still image in the TV style (P.27).

- The minimum allowable distance for the Auto focus between the camera and an object is 20 cm using [Normal mode] and 10 cm using [Closeup mode].
- You cannot use the Auto focus when you set the Select scene to [Night scene]/[Low Light] for recording still images.

1 Press [📷] for over a second in the stand-by display.

The Camera mode display appears.

2 Point the camera at the object and press ▤ (Shoot).

The white-framed focusing window is used to adjust the focus. When the image comes into focus, the confirmation sound is heard, and the focusing window turns green. A still image is recorded with the shutter sound and the screen for confirming whether to save the image appears.

- While you record a still image, the photo light (low light) flashes.
- When failed to adjust the focus, the white-framed focusing window turns red.

To focus on an area other than the center of the display

Press ▼ (▸AF◂) first to activate the Auto focus, point the camera at the object, and press ▤ (Shoot).

To switch to the In-camera

From the Function menu, select [Shoot] → [Switch camera] → [In camera]. When using the In-camera, the white-framed focusing window does not appear, indicating that the Auto focus function is disabled.

To record images using [📷]

Press [📷]. When you press [📷] halfway down, the Auto focus is activated. When the image comes into focus, press [📷] all the way down.

To record in the TV style

You can use the Viewing Touch Key to operate the zoom or Auto focus, or turn on/off the photo light.

3 Press ▤ (Save).

The still image is saved.

To attach to mail

Press ✉ (Func) for over a second. The still image is saved and the Edit mail display appears.

To cancel a recorded image

Press [CLR] and select [Yes].

To add location information

From the Function menu, select [Rcv loc. info] (P.237).

To save as a mirror image during In-camera recording

From the Function menu, select [Save mirror img]. To switch between Normal-img and Mirror-img, from the Function menu, select [Mirror image]/[Normal image].

Camera

⬤ When there is not enough memory or the number of saved images exceeds the maximum number, the message appears. Change the place to save the image or delete unnecessary images.

⬤ When you switch to the Shoot by photo mode from the Movie shoot mode, the following items are reset.

Item	Default setting	Item	Default setting
Switch camera	Out camera	Auto timer	OFF
Photo light	OFF	Change screen	to vertical
Zoom magnification	×1	Select scene	AUTO
White balance	AUTO	Photometry	Center
EV	±0.0EV	Picture effect	OFF

⬤ The image may not be saved when you receive a call before the shutter sound ends.

⬤ Depending on the object of shooting and the recording conditions, you may not be able to adjust focus or an unexpected portion may be brought into focus.

⬤ When you record an object under the following conditions, the Auto focus may not be able to adjust the focus of the object.
- The object does not have color contrast.
- You are recording while moving the FOMA terminal.
- The object is moving.
- There is a light within range of the camera view.
- You are recording in a dark place.

Recording Still Images in the Continuous Mode

You can record four still images continuously at an interval of about 0.2 seconds with a single press of ▤ (Shoot) or 🔲 .

● The size of the images in the Continuous mode is [VGA(640×480)]. You cannot change the size of images.

● If you set the Shoot mode to [Continuous mode] while the Select scene is set to [Night scene] or [Low Light], the Select scene is changed to [AUTO].

● When the Shoot mode is set to [Continuous mode], the Image stabilize function is temporarily set to [OFF].

1 Press ▣ (Func) in the Camera mode display, select [Shoot] → [Shoot mode] → [Continuous mode], and press ▤.

2 Press ▣ (Close).

The Shoot mode is set to [Continuous mode] and " 🔲 " appears.

3 Point the camera at the object and press ▤ (Shoot).

The white-framed focusing window is used to adjust the focus. When the image comes into focus, the confirmation sound is heard, and the focusing window turns green. Images are recorded continuously with the burst sound, and the screen for confirming whether to save the images appears.

4 Press ▤ (Save).

Four continuous images are saved.

Recording Images with Frames

You can record an image with a frame, which can be selected from the preinstalled frames or downloaded frames.

- For Out-camera recording, you can select a frame size of [sQCIF(128×96)], [QCIF(176×144)], [QVGA(240×320)], [CIF(352×288)], and [Stand-by(480×864)]. For In-camera recording, you can select the frame size of [sQCIF(128×96)], [QCIF(176×144)], and [CIF(352×288)].
- The size of images recorded with a frame is determined according to the frame you selected and cannot be changed.

1 Press ✉ (Func) in the Camera mode display, select [Shoot] → [Shoot mode] → [Shoot with frame], and press ▤.

```
Select frame size

sQCIF(128×96)
QCIF(176×144)
QVGA(240×320)
CIF(352×288)
Stand-by(480×864)
```

2 Select a frame size and press ▤.

The Stamp&Frame display appears.

3 Select a frame and press ▤.

To check a frame

Move the cursor to a frame and press ⟦ch⟧ (Play).

4 Press ✉ (Close).

The Shoot mode is set to [Shoot with frame] and "▢" and the selected frame appear.

5 Point the camera at the object and press ▤ (Shoot).

The white-framed focusing window is used to adjust the focus. When the image comes into focus, the confirmation sound is heard, and the focusing window turns green. A still image is recorded with the shutter sound and the screen for confirming whether to save the image appears.

6 Press ▤ (Save).

The image is saved.

Recording a Still Image Using the BestPic™ Mode

Just by bringing an object into focus using the Auto focus function and pressing the shutter, you can record a total of nine continuous still images in a moment before and after you press the shutter, from which you can select the best shot.

- The image size of BestPic™ is [3M(2048×1536)], the zoom magnification is [×1], and the image quality is [Standard]. The image size, zoom magnification, and image quality cannot be changed.
- When you set the Shoot mode to [BestPic™] while the Auto focus setting is [OFF], the Auto focus setting is changed to [Normal mode].
- When the Shoot mode is set to [BestPic™], the Image stabilize and Auto save are temporarily set to [OFF].

1 Press ⊠ (Func) in the Camera mode display, select [Shoot] → [Shoot mode] → [BestPic™] and press ▤.

2 Press ⊠ (Close).

 The Shoot mode is set to [BestPic™] and "〔□〕" appears.

3 Point the camera at the object and press ▼ (▸AF◂).

The white-framed focusing window is used to adjust the focus. When the image comes into focus, the confirmation sound is heard, and the focusing window turns green.

4 Press ▤ (Shoot).

Images are recorded continuously with the shutter sound, and the screen for confirming whether to save the images appears.

5 Use ◀ ▶ to select an image and press ▤ (Save).

The selected image is saved and the screen for confirming whether to save another image appears.

To save another image
Select [Yes], select an image, and press ▤ (Save).

To return to the Camera mode display
Select [No].

Recording Movies

<Movie shoot>

You can make movie recordings with the built-in camera.
You can also record a movie in the TV style (P.27).

● The movie recording time varies depending on where to save a movie (P.140).

1 Press ⊠ (Func) in the Camera mode display, select [Shoot] → [Switch mode] → [Movie shoot], and press ▭.

The display switches to the Movie shoot display and "▦" appears.

2 Point the camera at the object and press ▭ (Shoot).

The recording start tone is heard and the movie is recorded. "▢ STOP" changes to "● REC".

● While you record a movie, the photo light (low light) is turned on and the estimated recordable time is displayed by both a bar and numbers under the image.

To pause recording

Press ｃｈ (Pause). The recording pause tone sounds and "▮▮ PAUSE" appears. To restart the recording, press ｃｈ (Record).

To record movies using 📷

Press 📷 . To end the recording, press 📷 .

To record in the TV style

You can use the Viewing Touch Key to operate the zoom or turn on/off the photo light.

3 Press ▭ (Stop) to end recording.

The recording end tone is heard, the recording is stopped, and the screen for confirming whether to save the movie appears.

4 Press ▭ (Save).

The movie is saved.

To cancel movie recording

Press ｃｌｒ and select [Yes].

To check before saving

Press ｃｈ (Play).

To attach to mail

Press ⊠ (Mail). The movie is saved and the Edit mail display appears.

Camera

146

● When there is not enough memory or the number of recorded time of saved movies exceeds the maximum number, the message appears. Change the place to save the movie or delete unnecessary movies. Even if recording is possible, the maximum recording time may not be achieved.

● When you switch to movie recording from still image recording, the following items are reset.

Item	Default setting	Item	Default setting
Shoot	Regular	Switch camera	Out camera
Auto timer	OFF	Photo light	OFF
Zoom magnification	×1	Select scene	AUTO
White balance	AUTO	Photometry	Center
EV	±0.0EV	Picture effect	OFF

● If you fold the FOMA terminal while you are recording a movie, the recording is stopped and the screen for confirming whether to save the movie appears. When the Auto save is set to [ON], the movie is saved automatically.

● Noise in the form of a mosaic may appear in an image or the image or sound may be interrupted while you are recording a movie. Note that this is not malfunction.

● The movie sound is recorded via the microphone of the FOMA terminal. If you operate the keys or block the microphone during recording, the recording may be affected by the sound of the keys and other noise.

● The motion of the recorded movie may be rough depending on the object you are shooting and the recording conditions.

Changing the Camera Settings

● In the TV style, the Function menu in the Camera mode display cannot be displayed.

Selecting an Image Size

You can select the size of a still image and movie to be recorded from nine and four types, respectively.

● When the Shoot mode of the still image is set to [Continuous mode], [Shoot with frame], or [BestPic™], you cannot select the image size.

● The sizes of images that can be recorded by the In-camera are [sQCIF(128×96)], [QCIF(176×144)], and [CIF(352×288)] (Still image only).

● When the size of a movie is set to [QVGA(320×240)] or [VGA(640×480)], the image quality of the movie is changed to [Super fine]. When the size of a movie whose image quality is [Super fine] is set to [sQCIF(128×96)], the image quality of the movie is changed to [Standard].

● When the size of a movie is set to [sQCIF(128×96)] or [QCIF(176×144)], the Change screen is changed to [to vertical]. Also, when the size of a movie is set to [VGA(640×480)], the Change screen is changed to [to horizontal].

1 Press ✉ (Func) in the Camera mode display, select [Shoot] → [Select size], and press ▤.

The menu for selecting an image size appears.

● You can also display the menu for selecting an image size by pressing ⃞1 in the Camera mode display.

2 Select an image size and press ▤.

The image size is set and the icon for the current image size appears.

● When the image size for recording still images is set to [VGA(640×480)], [1M(1280×960)], [2M(1632×1224)], or [3M(2048×1536)], the recording direction indication "🖤" appears. It is recorded as the screen points upward.

Still image

🖵128	sQCIF(128×96)	🖵352	CIF(352×288)	🖵1M	1M(1280×960)

🖵320	QVGA(240×320)	🖵864	Stby(480×864)	🖵3M	3M(2048×1536)※

※ When the Image stabilize is set to [AUTO], the image size is set to [3M(2000×1500)].

Movie

🎬128	sQCIF(128×96)	🎬320	QVGA(320×240)
🎬176	QCIF(176×144)	🎬640	VGA(640×480)

Switching the Camera Used for Recording

You can switch between the Out- and In-cameras for recording.

- When the Shoot mode is set to [Continuous mode] or [Best Pic™], you cannot switch the camera.
- When the Shoot mode is set to [Shoot with frame] and the image size is set to [QVGA(240×320)] or [Stby(480× 864)], you cannot switch the camera from the Out-camera to In-camera.
- When you switch the camera from the Out-camera to In-camera, the image size is changed to [QCIF(176× 144)] if it is not supported by the In-camera.

1 Press ⊠ (Func) in the Camera mode display, select [Shoot] → [Switch camera], and press ▤.

The menu for switching the camera appears.

- You can also display the menu for switching the camera by pressing ⌷2⌷ in the Camera mode display.

2 Select [Out camera]/[In camera] and press ▤.

The camera is switched.

Using the Auto Timer

The Auto timer allows you to record yourself or others without holding the FOMA terminal. You can also set the interval until recording is started after you press the shutter.

1 Press ⊠ (Func) in the Camera mode display, select [Shoot] → [Auto timer], and press ▤.

The menu for selecting a time for the Auto timer appears.

2 Select a time until recording is started after you press the shutter and press ▤.

Select from [OFF], [10sec], [5sec], and [2sec].
The Auto timer is set and "🕙" appears.

- ● If there is an incoming call or you fold the FOMA terminal when you are recording with the Auto timer, the recording stops.
- ● After recording, the Auto timer is automatically reset to [OFF].

Turning on the Photo Light

The FOMA terminal's built-in photo light can be used when recording by the Out-camera in a dark place, etc.

1 Press ▲ (꛷) in the Camera mode display.

Every time you press ▲ (꛷), the photo light is switched to [ON]/[OFF].
When switched to [ON], the photo light is turned on and "꛷" appears.

For the TV style

Pat ᶜᴴ in the Camera mode display.

- ● The photo light is for helping you record in a dark place. You cannot expect as much amount of light from the photo light as from the electric flash of a normal camera.
- ● Even if the photo light is set to [OFF], the photo light is not turned off completely but lights (low light) always.

Camera

Switching the Direction for Recording Movies

You can switch the direction for recording movies of [QVGA(320×240)] size.

● When the image size is set to [sQCIF(128×96)], [QCIF(176×144)], or [VGA(640×480)], you cannot select the Change screen.

1 Press ✉ (Func) in the Camera mode display, select [Shoot] → [Switch mode] → [Movie shoot], and press ▭.

The display switches to the Movie shoot display.

2 Press ✉ (Func), select [Shoot] → [Change screen], and press ▭.

The menu for switching the screen appears.

[to vertical] : Record a movie while holding the FOMA terminal in the landscape orientation.

[to horizontal] : Record a movie while holding the FOMA terminal in the portrait orientation. It is recorded as the screen points upward shown "▲".

3 Select the recording direction and press ▭.

The direction for recording a movie is set.

Setting Movies to Play Back on Another FOMA Terminal

You can set recorded movies to play back on another FOMA terminal.

● When the Com. replay mode is set to either [High quality] or [Long play], the settings of the camera are changed, as follows.

Item	High quality	Long play
Image size	[QCIF(176×144)]	[sQCIF(128×96)]
Image quality	Super fine	Fine
File size	Attach(S)	Attach(S)
Shoot mode	Image+Sound	Image+Sound

1 Press ✉ (Func) in the Camera mode display, select [Shoot] → [Switch mode] → [Movie shoot], and press ▭.

The display switches to the Movie shoot display.

2 Press ✉ (Func), select [Shoot] → [Com. replay mode], and press ▭.

The screen for selecting the Com. replay mode appears.

[OFF] : Record a movie regularly.

[High quality] : Record a movie focused on the image quality to be clearer.

[Long play] : Record a movie focused on the recording time to be longer.

3 Select a common replay mode and press ▭.

The Com. replay mode is set and the icon for the current common replay mode appears.

● No icon appears for [OFF].

▶SP	High quality	▶LP	Long play

Adjusting the Camera during Recording

● In the TV style, the Function menu in the Camera mode display cannot be displayed.

Adjusting Zoom

You can adjust the zoom of an image when you record using the Out-camera. The zoom magnifications that can be adjusted for each image size are as follows.

When recording a still image

Image size	Maximum magnification display
[sQCIF(128×96)]	About ×16 (33 levels)
[QCIF(176×144)]	About ×10.6 (31 levels)
[QVGA(240×320)]	About ×6.4 (27 levels)
[CIF(352×288)]	About ×6.4 (27 levels)
[VGA(640×480)]	About ×6.4 (27 levels)
[Stby(480×864)]	About ×6.4 (27 levels)
[1M(1280×960)]	About ×6.4 (27 levels)
[2M(1632×1224)]	About ×6.4 (27 levels)
[3M(2048×1536)]	About ×6.4 (27 levels)

When recording a movie

Image size	Maximum magnification display
[sQCIF(128×96)]	About ×16 (33 levels)
[QCIF(176×144)]	About ×10.6 (31 levels)
[QVGA(320×240)]	About ×6.4 (27 levels)
[VGA(640×480)]	About ×6.4 (27 levels)

1 Use ◀ ▶ in the Camera mode display.

● Use ▶ to increase the zoom and ◀ to decrease it. When you press these keys for over a second, an image is zoomed in/out continuously.
● You can also adjust the zoom by the JOG. Scroll it upward to zoom in and scroll it downward to zoom out.

The zoom is adjusted and the current magnification is indicated on the zoom bar.

For the TV style

Use ⁺VOL / ⁻VOL in the Camera mode display.

Switching the Recording Scene

When you record a movie by the Out-camera, you can automatically adjust the camera settings in accordance with a scene. When you change a scene, the White balance, Photometry, EV, and Picture effect settings are reset.

● When the Shoot mode is set to [Continuous mode] or [Best Pic™] or while recording a movie, you cannot select [Night scene] and [Low Light].
● When the Shoot mode of movie is set to [Sound only], you cannot use the Select scene.

1 Press ⊠ (Func) in the Camera mode display, select [Adjust] → [Select scene], and press ▤.

● The Select scene display can be also displayed by pressing ③ in the Camera mode display.

[AUTO] : Record an image by automatically adjusting the color and brightness.
[Beach/snow] : Record the bright colors of the ocean, lake, and snow scene even more vividly.
[People] : Make a clear recording of a person's skin in bright and warm tones of color.
[Party] : Make a clear recording of a party scene by enhancing the mood of the illumination in a room.
[Night scene] : Record night scenes without compromising the atmosphere of darkness.
[Landscape] : Make a clear recording of an outdoor scene with a vivid expression of the color of ocean, sky, and trees.
[Sports] : Record an object that is moving in a brightly lit place such as the outdoors.
[Low Light] : Increase the film speed in a dark place to record the scene as brightly as possible.

2 Select a scene and press ▤.

The Select scene is set and the icon for the current scene type appears.

- No icon appears for [AUTO].

🏖️	Beach/snow	👥	People	🎉	Party	🌙	Night scene
⛰️	Landscape	🏃	Sports	🔅	Low Light		

Adjusting White Balance

The color balance of the image can be adjusted depending on the lighting condition. If a recording image appears in unnatural colors, set the white balance in accordance with the recording environment.

1 Press ✉ (Func) in the Camera mode display, select [Adjust] → [White balance], and press ▤.

The menu for selecting a white balance appears.

- You can also display the menu for selecting a white balance by pressing [4] in the Camera mode display.

[AUTO]   : Adjust the color balance automatically.

[Bulb]   : Set when recording under bulbs or incandescent lamps.

[Fluorescent] : Set when recording under fluorescent lamps.

[Fine]   : Set when recording outdoors on a clear day.

[Cloudy]   : Set when recording outdoors on a cloudy day or in the shade.

2 Select a white balance type and press ▤.

The White balance is set and the icon for the current white balance type appears.

- No icon appears for [AUTO].

💡	Bulb	💡	Fluorescent	☀️	Fine	☁️	Cloudy

Setting a Position for Automatic Adjustment of the Exposure

You can set what position on the screen to use as a reference for the image brightness (EV) adjustment.

1 Press ✉ (Func) in the Camera mode display, select [Adjust] → [Photometry], and press ▤.

The menu for selecting a photometry mode appears.

- You can also display the menu for selecting a photometry mode by pressing [5] in the Camera mode display.

[Center] : Photometry mode for centerweighted metering of the display, including the periphery.

[Average] : Photometry mode for average metering of the whole display.

[Spot]   : Photometry mode for metering only a part in the center of the display. Aim the object at the Spot photometry point "✛" in the center of the display. You can use this mode effectively when recording an object against light or an object with the strong contrast to the background.

2 Select a photometry mode and press ▤.

The Photometry mode is set and the icon for the current photometry mode appears.

◙	Center	▣	Average	▫	Spot

Adjusting Brightness

The image brightness (EV: Exposure Value) can be adjusted according to the ambient condition. The exposure can be adjusted in 13 levels from –2.0EV to +2.0EV for recording with the Out-camera and in seven levels from –1.0EV to +1.0EV for recording with the In-camera.

1 Press ✉ (Func) in the Camera mode display, select [Adjust] → [EV], and press ▤.

The menu for selecting the EV value appears.

- You can also display the menu for selecting the EV value by pressing ⑦ in the Camera mode display.

2 Select the EV value and press ▤.

The brightness is adjusted and the icon "-2.0EV" to "+2.0EV" for the current EV value appears.

⬤ When the place is extremely bright or dark, the brightness may not be changed even after being adjusted.

Adding a Picture Effect

The images can be recorded with a special effect.

- When you record an image using the In-camera, you cannot select the [Negative art] and [Solarization].

1 Press ✉ (Func) in the Camera mode display, select [Adjust] → [Picture effect], and press ▤.

The menu for selecting a picture effect appears.

- You can also display the menu for selecting a picture effect by pressing ⑧ in the Camera mode display.

[OFF]   : Cancel the picture effect.
[Negative art] : Set the color and brightness of the image as in a negative.
[Solarization] : Set the image as an illustration with sharp tones.
[Sepia]   : Set the image sepia-toned like an old photograph.
[Black&White]   : Set the image monochrome (black and white).

2 Select a special effect and press ▤.

The Picture effect is set.

Restoring the Default Camera Settings

You can reset the camera settings to the default settings. The camera settings listed below can be reset.

Item	Default setting	Item	Default setting
Zoom magnification	×1	Select scene	AUTO
White balance	AUTO	Photometry	Center
EV	±0.0EV	Picture effect	OFF

1 Press ✉ (Func) in the Camera mode display, select [Adjust] → [Reset all], and press ▤.

The screen for confirming whether to perform the Reset all appears.

- You can also display the screen for confirming whether to perform the Reset all by pressing ⓪ in the Camera mode display.

2 Select [Yes] and press ▤.

The default settings are restored.

Setting the Camera Operation

● In the TV style, the Function menu in the Camera mode display cannot be displayed.

Selecting Where to Save Images

You can set the place to save recorded images.

Example: Selecting the microSD memory card to save the recorded still images

1 Press ▣ (Func) in the Camera mode display, select [Set] → [Select save to], and press ▭.

The menu for selecting a place to save to appears.

[Data Box] : Save images in the Data Box. Select a folder for saving still images and movies from My picture and i-motion, respectively.

[microSD] : Save images in the microSD memory card. Still images are saved in the [Camera] folder in My picture, movies with video and sound tracks and with video track only in the [Distribute contents] folder in i-motion, and movies with sound track only in MM file, respectively.

2 Select [microSD] and press ▭.

The place to save images is set and the icon for the selected place appears.

🗂	Data Box	🗂※	microSD memory card

※ Does not appear when no microSD memory card is inserted.

Setting Whether Recorded Images Are Automatically Saved

You can set the save method of an image recorded.

1 Press ▣ (Func) in the Camera mode display, select [Set] → [Auto save], and press ▭.

The menu for selecting whether to automatically save the recorded images appears.

[ON] : After recording, the image is automatically saved.

[OFF] : After recording, press ▭ (Save) on the screen for confirming whether to save the image if you want to save it.

2 Select [ON]/[OFF] and press ▭.

The image save method is set.

● When the Shoot mode is set to [Regular], [Continuous mode], or [Shoot with frame] or when a movie is recorded in the TV style, the recorded still image or movie is saved automatically regardless of the Auto save setting.

Selecting the Image Quality

You can select the image quality for recording images.

- When the size of a movie is set to [QVGA(320×240)] or [VGA(640×480)], you can only select [Super fine] for the image quality. When the size of a movie is set to [sQCIF(128×96)], you cannot select [Super fine] for the image quality.

1 Press ⊠ (Func) in the Camera mode display, select [Set] → [Image quality], and press ▤.

The menu for selecting an image quality appears.

Still image

[Fine] : Higher image quality mode. The file size is larger.

[Standard] : Standard image quality mode.

[Economy] : Lowest image quality mode. The file size is smaller.

Movie

[Super fine] : Higher image quality mode. The file size is larger and the recording time is shortest.

[Fine] : Image quality mode for smoother movement in movies.

[Standard] : Standard image quality mode.

[Economy] : Lowest image quality mode. The file size is smaller and the recording time is longest.

2 Select the image quality and press ▤.

The image quality is set and the icon for the current image quality appears.

SFINE	Super fine (Movie only)	STD	Standard
FINE	Fine	ECO	Economy

Changing the Shutter Sound

The shutter sound can be selected from three types when the Shoot mode for still images is [Regular], [Shoot with frame], or [Best Pic™].

- The shutter sound volume is fixed and cannot be adjusted or muted. The shutter sound is heard even if the Manner mode is set.

1 Press ⊠ (Func) in the Camera mode display, select [Set] → [Shutter sound], and press ▤.

The menu for selecting a shutter sound appears.

2 Select a shutter sound and press ▤.

The Shutter sound is set.

To check the shutter sound

Move the cursor to the shutter sound and press ⓘ (Play).

Setting the Effective Distance of the Auto Focus

You can set the effective distance of the Auto focus function when you record still images with the Out-camera.

1 Press ✉ (Func) in the Camera mode display, select [Set] → [Auto focus], and press ▤.

The menu for selecting the Auto focus type appears.

[Normal mode] : Record an image by focusing the object. The minimum focusing distance is about 20 cm.

[Closeup mode] : Record an image by focusing a close object. The minimum focusing distance is about 10 cm.

[OFF] : Record an image without using the Auto focus.

For the TV style

Pat ⁺ᶜᴴ in the Camera mode display. Every time you pat ⁺ᶜᴴ, the mode changes [Normal mode]/[Closeup mode]/[OFF].

2 Select the Auto focus type and press ▤.

The Auto focus is set and the icon for the current Auto focus type appears.

• No icon appears for [Normal mode].

📷	OFF	📷	Closeup mode

Correcting Camera Shake
You can set whether to use the Image stabilize when you record still images with the Out-camera.

• When you set the Image stabilize, the shoot range (angle of view) is changed.

1 Press ✉ (Func) in the Camera mode display, select [Set] → [Image stabilize], and press ▤.

The menu for selecting whether to correct camera shake appears.

2 Select [AUTO]/[OFF] and press ▤.

The Image stabilize is set and the icon for the current Image stabilize setting appears.

🖐	AUTO	🖐	OFF

● While recording movies, the Image stabilize is set to [AUTO] if you use the Out-camera and [OFF] if you use the In-camera.
● The Image stabilize function is to reduce camera shake. Its effect may differ depending on the object of shooting and recording conditions.
● In the following cases, the effect of the Image stabilize may be small.
 - When camera shake is too strong
 - When using the zoom function
 - When [Night scene] or [Low Light] is set for the Select scene
● When recording a moving object, an afterimage may remain in the image. In this case, set the Image stabilize to [OFF].

Camera

Resetting File Numbers

When a still image with the file number (P.139) "999-9999" is saved in the microSD memory card, no more still images can be saved even if there is a vacant space in these memories. The Reset file No. allows you to reset the file numbers up to the largest file number saved in the microSD memory card. To reset the file numbers, delete still images that have file numbers larger than that you want to reset beforehand.

- The images cannot be saved even if the file numbers are reset when the microSD memory card has no free space. In this case, change the microSD memory card or delete data saved in the microSD memory card.

1 Press ✉ (Func) in the Camera mode display, select [Set] → [Reset file No.], and press ▤.

The screen for confirming whether to perform the Reset file No. appears.

2 Select [Yes] and press ▤.

The file numbers are reset.

Restricting the Size of a File Used for Movie Recording

You can restrict the size of a movie file to a file size that can be attached to i-mode mail.

1 Press ✉ (Func) in the Camera mode display, select [Shoot] → [Switch mode] → [Movie shoot], and press ▤.

The display switches to the Movie shoot display.

2 Press ✉ (Func), select [Set] → [File size], and press ▤.

The menu for selecting a file size restriction appears.

[Attach(S)] : You can record up to about 500K bytes.

[Attach(L)] : You can record up to about 2M bytes.

[No limit] : No file size restriction. You can record up to about one hour. Selectable when [microSD] is set as the place to save to.

3 Select a file size restriction type and press ▤.

The file size restriction for movie is set and the icon for the current file size restriction type appears.

📷	Attach(S)	📷	Attach(L)	📷	No limit

● Depending on the recording conditions and object of shooting, the recording may be stopped before the maximum file size set in the file size restriction is reached.

Selecting the Shoot Mode of Movie

You can select the shoot mode of movie from three types.

1 Press ✉ (Func) in the Camera mode display, select [Shoot] → [Switch mode] → [Movie shoot], and press ▤.

The display switches to the Movie shoot display.

2 Press ✉ (Func), select [Set] → [Shoot mode], and press ▤.

The menu for selecting a shoot mode appears.

[Image+Sound] : Record a movie with video and sound tracks.
[Image only] : Record a movie with video track only. No sound is recorded.
[Sound only] : Record a movie with sound track only. No movie is recorded.

3 Select a shoot mode and press ▤.

The Shoot mode is set and the icon for the current shoot mode appears.

🎞	Image+Sound	🎞	Image only	🎤	Sound only

Using the Bar Code Reader

<Bar code reader>

You can use the Out-camera to scan JAN or QR code. The scanned text data can be used for Phone To (AV Phone To), Mail To, Web To and i-αppli To functions, Bookmark and Phonebook entries, and also for displaying and copying/pasting text. You can also obtain a ToruCa card, and play and save the scanned images and melodies.

- To scan the JAN/QR code, hold the Out-camera more than about 20 cm in [Normal mode] and 10 cm in [Closeup mode] away from the code to be scanned. When the code cannot be scanned, change the distance between the code and the Out-camera, angle, or direction.
- The FOMA terminal may not be able to scan JAN or QR code if it is scratched, smudged, damaged, of poor print quality, too small in size, or in certain light reflection conditions. It also may not be able to scan some QR code versions.
- The FOMA terminal cannot scan a bar code/2-dimensional code other than JAN and QR codes.

■What is JAN code?

A bar code that represents numbers using vertical lines (bars) of different widths.
The FOMA terminal can scan 13-digit and 8-digit JAN codes.

"Example: 4942857131932"

■What is QR code?

One of the 2-dimensional codes that represent data in the vertical and horizontal directions. This data includes alphanumeric characters, character strings (kanji, kana, pictographs), melodies, still images, and ToruCa cards.

- Up to 16 QR codes can be scanned serially so that they connect to each other and saved as a single data set. When scanning multiple segmented QR codes, the message prompting you to scan the next QR code appears after you scan the first one. Scan the QR code in response to the message.

"Example: FOMA SO905i"

Scanning JAN/QR Code

You can scan JAN or QR code and save the maintained data for later use. Specifically, you can use text data from the scanned JAN or QR code to enter information in a textbox while entering text (P.341).

1 From the Menu, select [LifeKit] → [Bar code reader] → [Scan code] and press ▤.

The bar code reader is activated and " 📇 " appears.

To change the effective distance of the Auto focus

Press 🔲 (Normal/Closeup). Every time you press this key, the mode is switched between [Normal] and [Closeup].

2 Locate the JAN/QR code at the center of the display and press ▤ (Scan).

The scanning of the JAN/QR code starts.

When the scanning is completed, the end sound is heard and the data that has been scanned is displayed in the normal display.

To save scanned data such as a phone number

Move the cursor to data such as a phone number and from the Function menu, select [Add to phonebook] → [Yes] and save the scanned data in the Phonebook.

● Follow the same steps as in "Add to FOMA terminal phonebook" (P.91, step 3 to 6) or "Add to UIM phonebook" (P.93, step 3 to 4).

To save a scanned URL as a bookmark

Move the cursor to the URL and from the Function menu, select [Add bookmark] → [Yes] → a folder.

3 Press ▤ (Save).

The data from the scanned JAN/QR code is saved.

● Some QR codes allow you to save data such as a name, phone number, and mail address all at once in the Phonebook just by scanning them.
● When scanned characters cannot be entered in the text editing display, they are replaced with as many spaces (blanks).
● A scanned image may not be saved depending on its image or file size.

Displaying the Saved Data

You can save up to 10 data entries for JAN or QR codes that are scanned.

● When a total of 10 data entries is saved and a new JAN/QR code is scanned, unprotected data is overwritten from the oldest.

1 From the Menu, select [LifeKit] → [Bar code reader] → [Saved data] and press ▤.

To delete data

Move the cursor to the data and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete several data, from the Function menu, select [Delete] → [Select&delete], select data, press ▤ (Complete), and then select [Yes]. To delete all data, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To protect data

Move the cursor to the data and from the Function menu, select [Protect ON/OFF] → [Yes]. "▤" changes to "▤".

2 Select the data and press ▤.

i-mode/i-motion/i-Channel

※ i-mode is a paid service that requires a subscription.

What is i-mode?

i-mode allows you to use the i-mode compatible FOMA terminal (hereinafter referred to as i-mode terminal) to access various online services such as site (program) connection, Internet connection, and i-mode mail.

● i-mode is a paid service that requires a subscription.
● For details on i-mode, see the "Mobile Phone User's Guide 【i-mode】FOMA version".

Important information about using i-mode

● The data on sites (programs) or Internet sites is generally protected by the copyright laws. Part or all of the data such as documents and graphics obtained to the i-mode terminal from these sites (programs) or Internet sites cannot be sold or redistributed, whether they are changed or not, without consent of the copyright holders except for personal use.

● When the UIM is switched to another card, or the i-mode terminal is powered on without inserting the UIM, some of the terminal models may not be able to display/play back still images/movies/melodies downloaded from sites, attached files (still images/movies/melodies, etc.) sent/received by mail, screen memos, and Message R/F.

● If you set a file whose display/playback is restricted by the UIM for the stand-by display, ring tone, and/or other applications, those settings are reset to the initial settings if the UIM is switched to another card or the FOMA terminal is powered on without inserting a UIM.

Displaying the i-mode Menu

<i-mode menu>

1 Press [i] (i-mode) in the stand-by display.

Menu name	Function
i Menu	Connect the FOMA terminal to the i-mode center (P.161).
Bookmark	Display favorite sites and Internet sites (P.165).
Screen Memo	Display sites saved in the FOMA terminal (P.166).
Last accessed URL	Display sites and Internet sites displayed last (P.161).
Go to location	Connect the FOMA terminal to the Internet (P.164).
i-Channel	Display the channel menu (P.174).
MessageR/F	Display the list of Message R/Message F received (P.199).
Check new msg	Check if the i-mode center holds mail, Message R, and Message F (P.186, 199).
i-mode setting	Set the i-mode settings on the FOMA terminal (P.105, 119, 169, etc.).
Full Browser	Display the Full Browser menu (P.258).

To display i Menu while displaying a site

From the Function menu, select [i Menu].

Displaying Sites

Various sites offered by IP (information service providers) can be displayed (the subscription is necessary for some sites).

1 From the i-mode menu, select [i Menu] → [メニュー/検索] (Menu/Search) and press ⬚.

2 Select a site and press ⬚.

The FOMA terminal is connected to the site.

● Some of the connected sites may request you to send the "manufacturer's serial number of the mobile phone/UIM (FOMA card)" before you access the site.

The "manufacturer's serial number of the mobile phone/UIM (FOMA card)" that you send is used by IP (information service providers) to identify you in order to provide information customized for you and to determine whether the content provided by IP is compatible with your FOMA terminal.

Since the "manufacturer's serial number of the mobile phone/UIM (FOMA card)" is sent to IP via the Internet, it might be accessed by a third party. Note, however, that IP is not notified of your phone number, address, age, and sex by this operation.

● When you receive a request from a site about information of music you play back on your FOMA terminal, the screen for confirming whether to send the music information appears.

If you select [Yes], the music information (names of title and artist and date of playing back) played back on your FOMA terminal is sent.

The sent music information is used by IP (information service providers) to provide a customer with the customized information.

Reconnecting to the Web Page Displayed Last

The site displayed when you last connected to i-mode is recorded as the Last accessed URL. You can directly connect to this site from the Last accessed URL.

● Some web pages cannot be recorded as Last accessed URL.

1 From the i-mode menu, select [Last accessed URL] and press ⬚.

```
Last accessed URL
http://www.△△△△.□□.jp
```

To delete the Last accessed URL
Press ✉ (Delete) and select [Yes].

To copy the Last accessed URL
Press 🛈 (Copy).

2 Press ⬚ (Cnct).

The FOMA terminal is connected to the site displayed last.

Displaying SSL Site

You can display SSL-compatible sites (SSL page) using an operation similar to that for general sites.

● To display an SSL site, make sure to set the date and time with the Date/time setting beforehand.

```
Establishing
SSL session
(Authenti-
    cating)
```

The message on the left appears when connecting to an SSL site. "🔒" appears when displaying an SSL site.

To display the certificate
From the Function menu, select [Certificates].

```
SSL session
is released

    Yes
    No
```
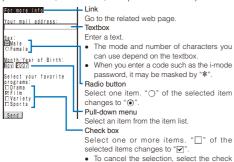

The message on the left appears when moving from an SSL site to a non-SSL site. "🔒" disappears when displaying a non-SSL site.

● The confirmation message may appear when the connected site may not be secure. Select [Yes] to connect to the SSL site, or select [No] to cancel connecting to the SSL site.

● If there are any problems such as an invalid certificate of the server, the SSL site may not be displayed.

Using Sites

Selecting Links or Other Items of Choice

When using a site, you may display a linked site, enter texts (textbox) or select an item from multiple options (radio button, check box, and pull-down menu).

```
For more info
Your mail address:

Sex:
◉Male
○Female

Month/Year of Birth:
Nov 2007

Select your favorite
programs:
□Drama
☑Film
□Variety
□Sports
 Send
```

Link
Go to the related web page.

Textbox
Enter a text.
● The mode and number of characters you can use depend on the textbox.
● When you enter a code such as the i-mode password, it may be masked by "＊".

Radio button
Select one item. "○" of the selected item changes to "◉".

Pull-down menu
Select an item from the item list.

Check box
Select one or more items. "□" of the selected items changes to "☑".
● To cancel the selection, select the check box again.

Displaying the Previous/Next Page

The FOMA terminal stores up to 20 most recently displayed site pages in its cache.
The stored site pages are deleted when i-mode is terminated.
When the left or right arrow is displayed in the guide display, the pages stored in the cache can be used for display using ◀ ▶ without accessing the site. Note, however, that if the recorded site pages exceed the cache size or when a site page is programmed always to download the latest information, network communication is performed.
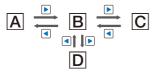

● The text or setting you entered in a site is not stored in the cache.
● The cache is a place in the terminal used for temporarily storing the displayed screen data.

```
Func
MENU   ⊙ s@s ⊙
```

◀ : Indicates that the previous page is recorded. Use ◀ to display the previous page.

▶ : Indicates that the next page is recorded. Use ▶ to display the next page.

Example: When viewing site pages in the order of A→B→C →B→D

A ⇄ B ⇄ C
         ⇅
         D

Assuming that you view site pages in the order of A→B→C and go to a new site page D after going back to B as shown in the above illustration, the history for B→C is cleared and starts afresh for B→D at the time you go to a new site page D.

Reloading a Page

The page, which is displayed incorrectly or updated frequently, can be reloaded so that the latest data is displayed.

1 While displaying a site, press ⊠ (Func).
The Function menu appears.

2 Select [Reload] and press �.
The display of the page is updated.

Displaying a Site URL

The URL of the currently displayed site can be displayed.

1 While displaying a site, press ⊠ (Func).
The Function menu appears.

2 Select [URL] and press �.
The URL of the site is displayed.

To copy the URL
Press ⓘ (Copy).

Sending a URL by Mail

The URL of the currently displayed site can be sent by mail.

1 While displaying a site, press ⊠ (Func).
The Function menu appears.

2 Select [Compose message] and press ▄▄▄▄.
The Edit mail display appears.
The site URL is already entered in the main body.

3 Compose mail and send it.
● Follow the same steps as in "Compose and send mail" (P.179, step 2 to 5).

Displaying a Site Correctly

If the display of the text is incorrect on a site, you can reload the page after changing the character code.

1 While displaying a site, press ✉ (Func).

The Function menu appears.

2 Select [Word translate] → [Convert]/[Auto select] and press ▤.

[Convert]:

Sequentially convert the character codes and display the page again. If the text is still incorrectly displayed, repeat this operation. The original display reappears when you repeat [Word translate] → [Convert] several times.

[Auto select]:

Automatically select and convert the character code and display the page.

The character code is converted and the page is displayed again.

● The page may not be displayed correctly even if the character code is changed. Note that changing the character code when the page is displayed correctly may cause the page to be displayed incorrectly.

Changing the Display to Full Browser

You can change the current site display to Full Browser.

1 While displaying a site, press ✉ (Func).

The Function menu appears.

2 Select [To Full Browser] → [OK] and press ▤.

The display is switched to Full Browser.

● For information on the operations of Full Browser, see P.258.

What is Flash?

Flash is an animation technology that uses animation and sound. Flash movies enhance site content for richer expression. You can set a Flash movie for the stand-by display and other applications.

● When a Flash movie is displayed, the action may differ from other sites.

● Even if ▤ (Select) is displayed, you may not be able to use the Select function.

● Some Flash movies may be accompanied by a sound effect. To mute the sound effect, set the Sound effect to [OFF].

● If you do not operate the FOMA terminal for more than about 30 seconds while the Flash movie is played back, the playback pauses. To operate a Flash movie again, from the Function menu, select [Retry]. If the playback is not started, either display the Flash movie entirely or adjust the display position until it can be played back.

● Even if a Flash movie is displayed, it may not operate properly in some cases.

● When you save a Flash movie using the Save image function or save it in Screen Memo, a portion of it may not be saved or it may appear differently from the one you viewed on the site.

● When you play back a Flash movie saved in the Data Box, Screen Memo, or microSD memory card, the image may be displayed differently depending on the saved places.

● If an error occurs during a Flash movie playback, this Flash movie cannot be saved.

● Some of the Flash movies vibrate the FOMA terminal during playback. Note that this could happen even if the vibrator is set to [OFF].

● Some Flash movies may have to use data saved in the i-mode terminal. To allow such a Flash movie to use saved data, set the Use phone info of the i-mode setting to [Yes] (P.170). This item is set to [Yes] at the time of purchase. Saved data that may be used by a Flash movie is as follows.
- Battery level   - Reception level   - Clock information
- Sound effect setting   - Language setting   - Terminal type
- Model information

Terminating i-mode

1 Press ☎ during i-mode, select [Yes], and press ▤.

i-mode is terminated and "📶" disappears.

Saving a Site in My Menu <My Menu>

If you save the frequently used sites in My Menu, you can access them easily from next time. Up to 45 sites can be saved in My Menu.

● Only i-mode sites can be saved in My Menu. To save Internet sites, use the Bookmark.

1 While displaying a site, select [マイメニュー登録] (Save My Menu) and press ▭.
● The location of [マイメニュー登録] (Save My Menu) and the menu structure may vary depending on each site.

2 Enter the i-mode password at [i モードパスワード] (i-mode Password).
The password is masked by "✶✶✶✶".

3 Select [決定] (OK) and press ▭.
The site is saved in My Menu.

● The site is saved automatically in My Menu when you subscribe to a paid site.

Changing the i-mode Password

<Change i-mode password>

The "i-mode password" is used for saving/deleting My Menu and changing i-mode mail settings, etc. The i-mode password is set to "0000" at the time of subscription. Change it to your own i-mode password. Make sure to keep the i-mode password confidential.

● If you forget the i-mode password, you must bring your official identification (such as driver's license), the FOMA terminal, and UIM with you to the nearest DoCoMo shop.

1 From the i-mode menu, select [i Menu] → [English iMenu] → [Options] → [Change i-mode Password] and press ▭.

```
        Change i-mode
           Password
Current Password
📶[    ]
New Password
📶[    ]
New Password
(Confirmation)
📶[    ]
Select
※You will use
your i-mode
password to
subscribe and
unsubscribe
sites and set
to your
options.
```

2 Enter the current i-mode password at [Current Password].
The password is masked by "✶✶✶✶".

3 Enter the new password at [New Password].

4 Enter the new password at [New Password (Confirmation)].

5 Select [Select] and press ▭.
The i-mode password is changed.

Displaying Internet Sites

<Internet connection>

i-mode compatible Internet site can be displayed from the i-mode terminal.

● Sites that are not compatible with i-mode may not be displayed correctly.

1 From the i-mode menu, select [Go to location] → [Enter URL] and press ▭.
The Enter URL display appears.
● When the URL has been entered before, the URL entered previously is displayed.
● The beginning of the URL "http://" is entered beforehand.

2 Press 🔘 (Edit) and enter the URL.
Enter the URL including "http://" within 256 half-width alphanumeric characters and symbols.

3 Press ▭ (Cnct).
The FOMA terminal is connected to the site.
● Operations while displaying Internet sites are the same as while displaying the i-mode sites.

Displaying Using the URL History

Up to 50 sites that have been displayed by entering their URLs are saved in the URL history. The sites can be directly accessed from the URL history.

● If a total of 50 URLs is saved in the URL history, the URL is overwritten from the oldest.

1 From the i-mode menu, select [Go to location] → [URL history] and press ▭.
The URL history display appears.
To delete a URL
Move the cursor to the URL and from the Function menu, select [Delete one] → [Yes]. To delete several URLs, from the Function menu, select [Select&delete], select URLs, press 🔘 (Complete), and select [Yes]. To delete all URLs, from the Function menu, select [Delete all], enter the Security code, and select [Yes].

2 Select a URL and press ▭.
The URL history display appears.
To copy a URL
Press 🔘 (Copy).

3 Press ▭ (Cnct).
The FOMA terminal is connected to the site of the selected URL.

Saving a Site to Display It Quickly
<Bookmark>

Up to 200 URLs of the sites you display frequently can be saved in the Bookmark. The sites can be directly accessed from the Bookmark.

● Both i-mode and Internet sites can be saved as bookmarks, but with some exceptions.

● The text or setting you entered on the site, etc. is not saved in the Bookmark.

Saving a Site in the Bookmark

A URL including "http://" of up to 256 half-width alphanumeric characters and symbols can be saved as a bookmark.

1 While displaying a site, press ⊠ (Func).

The Function menu appears.

2 Select [Add bookmark] → a folder and press ▤.

The bookmark is saved in the selected folder.

When the maximum number of bookmarks has been reached

The screen for confirming whether to overwrite a bookmark appears. To overwrite a bookmark, select [Yes] and select a bookmark to overwrite.

● A title of up to 12 full-width or 24 half-width characters can be saved in the Bookmark. If the length of the title exceeds the limit, extra characters are deleted. If there is no title on the bookmark, the URL appears instead.

Displaying a Site

A site can be displayed using a bookmark.

1 From the i-mode menu, select [Bookmark] and press ▤.

A list of bookmark folders appears.

● The following icons show the type of folder.

🗀 (Yellow)	Preset folder
🗀 (Blue)	User-created folder

2 Select a folder and press ▤.

A list of bookmarks appears.

3 Select a bookmark and press ▤ (Cnct).

The FOMA terminal is connected to the site of the selected bookmark.

To check the URL

Move the cursor to the bookmark and press 📱 (Check).

To copy a bookmark URL

Move the cursor to the bookmark and press 📱 (Check) and 📱 (Copy).

To change the title

Move the cursor to the bookmark and from the Function menu, select [Edit title]. Enter the title within 12 full-width or 24 half-width characters.

To display other site while displaying a site

From the Function menu, select [Bookmark] → a folder → a bookmark.

● "☺" for the i-mode bookmark and "FB" for the Full Browser bookmark appear on the list of bookmarks of the microSD memory card

Adding/Deleting Folders

Folders in which bookmarks are saved can be added or deleted. Up to 10 folders can be used to manage bookmarks and folder names can also be changed.

● You cannot delete the preset folders.

Example: Adding a folder

1 From the i-mode menu, select [Bookmark] and press ▤, then press ⊠ (Func).

The Function menu appears.

2 Select [Edit folder] → [Create folder] and press ▤, then enter a folder name.

Enter a name within 10 full-width or 20 half-width characters.
The folder is added.

To change a folder name

Move the cursor to a folder and from the Function menu, select [Edit folder] → [Edit folder name]. Enter a name within 10 full-width or 20 half-width characters.

To delete a folder

Move the cursor to a folder and from the Function menu, select [Edit folder] → [Delete folder]. Enter the Security code and select [Yes].

Moving a Bookmark to a Different Folder

Bookmarks can be moved to a different folder using three methods.

Example: Moving a bookmark

1 From the i-mode menu, select [Bookmark] → a folder and press ▭.

To move all bookmarks in the folder
From the Function menu, select [Move] → [Move all] → [Yes] → a folder.

To move several bookmarks
From the Function menu, select [Move] → [Select&move], select bookmarks, and press ▤ (Complete). Select [Yes] → a folder.

2 Select a bookmark and press ▢ (Func).

The Function menu appears.

3 Select [Move] → [Move one] → [Yes] and press ▭.

The Select move to display appears.

4 Select a folder and press ▭.

The selected bookmark is moved to the different folder.

Deleting a Bookmark

You can delete bookmarks using four methods.

Example: Deleting a bookmark

1 From the i-mode menu, select [Bookmark] and press ▭.

To delete all bookmarks
From the Function menu, select [Delete all], enter the Security code, and select [Yes].

2 Select a folder and press ▭.

To delete all bookmarks in the folder
From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To delete several bookmarks
From the Function menu, select [Delete] → [Select&delete], select bookmarks, press ▤ (Complete), and select [Yes].

3 Select a bookmark and press ▢ (Func).

The Function menu appears.

4 Select [Delete] → [Delete one] → [Yes] and press ▭.

The selected bookmark is deleted.

Saving a Site in the Screen Memo   <Screen Memo>

You can save sites as your favorite ones in the Screen Memo. You can also instantaneously call up a saved screen memo.

- You can save up to 100 screen memos, each up to 100K bytes. The number of screen memos that can be saved may decrease depending on the data to be saved.
- The text or setting you entered on the site, etc. is not saved in the Screen Memo.

Saving a Screen Memo

1 While displaying a site, press ▢ (Func).

The Function menu appears.

2 Select [Add screen memo] and press ▭.

The screen memo is saved.

When there is not enough memory
The screen for confirming whether to overwrite a screen memo appears. To overwrite, select [Yes], select unnecessary screen memos, press ▤ (Complete), and select [Yes].

When the maximum number of screen memos has been reached
The screen for confirming whether to overwrite a screen memo appears. To overwrite, select [Yes] and select a screen memo to overwrite.
Displaying a Screen Memo

Saved screen memos can be displayed. The following icons show the status of the screen memo.

📄	Normal screen memo
📄	Protected screen memo

1 From the i-mode menu, select [Screen Memo] and press ▭.

A list of screen memos appears.

2 Select a screen memo and press ▭.

The screen memo is displayed.

To check the URL
Move the cursor to the screen memo and from the Function menu, select [URL].

To change the title
Move the cursor to the screen memo and from the Function menu, select [Edit title]. Enter the title within 10 full-width or 20 half-width characters.

● To operate the Flash movie or GIF animation again, from the Function menu, select [Retry]. If the playback is not started, either display the Flash movie entirely or adjust the display position until it can be played back.

Protecting a Screen Memo

You can protect screen memos from being overwritten. You can protect up to 50 screen memos.

1 Select a screen memo from the screen memo list and press ⊠ (Func).

The Function menu appears.

To cancel the protection

Move the cursor to the protected screen memo and press ⊠ (Func).

2 Select [Protect ON/OFF] → [Yes] and press ▭.

The screen memo is protected and "📛" changes to "📛".

Deleting a Screen Memo

You can delete screen memos using three methods.

Example: Deleting a screen memo

1 From the i-mode menu, select [Screen Memo] and press ▭.

To delete all screen memos

From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To delete several screen memos

From the Function menu, select [Delete] → [Select&delete], select screen memos, press 🔳 (Complete), and select [Yes].

2 Select a screen memo and press ⊠ (Func).

The Function menu appears.

3 Select [Delete] → [Delete one] → [Yes] and press ▭.

The selected screen memo is deleted.

Obtaining Graphics from a Site/Message <Acquire image>

You can obtain images and frames from sites and screen memos, and save them in My picture.

● You can save up to 100K bytes for each image entry. The number of images that you can save varies depending on the free memory space on the place to save to and data size.

Example: Saving a graphic displayed in a site

1 While displaying a site, press ⊠ (Func).

The Function menu appears.

2 Select [Acquire image] and press ▭.

To save the background image

Select [Acquire BG image].

3 Select [Save] → a graphic and press ▭.

The selected image is displayed in a frame and the screen for selecting the place to save to appears.

[Data Box]:

Save an image in the Data Box. Select a folder to save to.

[microSD]:

Save an image in the microSD memory card.

To perform the Display setting after saving an image

Select [Save&setting] → an image → a place to save to → the Display setting.

To save the frame/stamp/Deco-mail pictograph

Select [Save] → an image. The image is saved in an appropriate folder in My picture of the Data Box.

4 Select a place to save to and press ▭.

The graphic is saved in the selected place to save to.

When there is not enough memory or the maximum number of graphics has been reached

The screen informing insufficient memory or that the maximum number has been reached appears. To save the new graphic, select [Sel. delete file] → a folder → a file, press 🔳 (Complete), and select [Yes].

● You cannot save a GIF image exceeding [UXGA(1600× 1200)] and a GIF animation exceeding [Stby(480×864)] in the Data Box. You may also not be able to save some JPEG images in the Data Box.

Downloading Data from Sites <Download>

You can download melodies, PDF data, Chara-den, ToruCa cards, Deco-mail templates, dictionaries, Kisekae Tool, and mail (vMessage format) from related sites.

■ Files that can be downloaded

Type	Maximum downloadable size
Melody (SMF/MFi)※	100K bytes
PDF data※	2M bytes
Chara-den	100K bytes
ToruCa※	1K bytes
ToruCa(detail)※	100K bytes
Deco-mail template	200K bytes
Dictionary data	100K bytes
Kisekae Tool	2M bytes
Mail (vMessage)※	200K bytes

※ The number of files that you can save varies depending on the free memory space on the place to save to and data size.

Example: Downloading a melody from a related site

1 While displaying a site, select a melody and press [□].

```
Download
completed

   Play
   Save
   Back
```

The melody is downloaded and the screen for confirming whether to save the melody appears.

To check the melody before saving
Select [Play].

To cancel the saving
Select [Back] → [Yes].

2 Select [Save] and press [□].

The screen for selecting where to save appears.

[Data Box]:
Save melodies in the Data Box of the FOMA terminal. Select a folder for saving melodies.

[microSD]:
Save melodies in the microSD memory card.

3 Select a place to save to and press [□].

The melody is saved.

To download a Chara-den/Deco-mail/template/dictionary data
While displaying the site, select data and select [Save].

To download a Kisekae tool
While displaying the site, select a Kisekae tool and select [Save]/[Save temporary]/[Save&setting].

To download PDF data
While displaying the site, select PDF data and select [Data Box]/[microSD].

To download a ToruCa card
While displaying the site, select a ToruCa card and select [Yes] → a folder.

To download mail
While displaying the site, select mail and select [Save]/[Save in mail box].
● When you select [Save in mail box], the mail is saved in the Mail box. If the data contains several mails, only the first mail is saved.

When there is not enough memory
The screen for confirming whether to overwrite the data appears. To overwrite, select unnecessary data (P.294).

● Downloaded melodies may not be played back properly.
● PDF data whose size is unknown is downloaded until the downloaded size of it reaches 2M bytes.
● You may be able to display the PDF data you failed to download by downloading it again. However, some PDF data may be disabled for display.
● If you have deleted preinstalled Chara-den files or PDF data, you can download them from "SO@Planet".
[i Menu] → [メニュー/検索] (Menu/Search) → [ケータイ電話メーカー] (Mobile Phone Manufacturers) → [SO@Planet] (Japanese only)

Using the Phone To/Mail To/ Web To/i-αppli To/Media To

You can use highlighted information in a site, message, mail main body, i-αppli, ToruCa card, PDF data, i-Channel channel list, and data broadcasting to place a call, compose mail, display an Internet website, start i-αppli, activate One Seg, and set a timer for watching/recording a One Seg program.

● Sometimes, you may not be able to select an item for establishing a link to the displayed phone number/mail address/URL/i-αppli/program information. Whether you can use the function depends on sites, mail, messages, software, ToruCa cards, i-Channel contents, and data broadcasting.

Placing a Call from the Current Display

You can place a voice or videophone call or originate a PushTalk call from a phone number currently displayed in the display (Phone To, AV Phone To).

● When 2in1 is set to the B mode, you cannot originate a PushTalk call.
● You cannot send SMS from i-αppli.

1 Select a phone number in the display and press [□].

The screen for confirming whether to place a call appears.

2 Select [Yes] → [Voice call]/[Videophone]/[PushTalk]/[SMS] and press [□].

● Follow the same steps as in "Placing a call by specifying a condition" (P.57, step 1 to 3).

Composing/Sending Mail from the Current Display

You can compose/send mail to a mail address currently displayed in the display (Mail To).

● When 2in1 is set to the B mode, you cannot use the Mail To function.

1 Select a mail address in the display and press ▭.

The Edit mail display appears.
The selected mail address is entered as the address.

2 Compose mail and send it.

● Follow the same steps as in "Compose and send mail" (P.179, step 3 to 5).

Accessing a Site from the Current Display

You can connect to a site by i-mode of Full Browser from a URL currently displayed in the display (Web To).

1 Select a link (URL) in the display and press ▭.

The FOMA terminal is connected to the linked site.

Running i-αppli from the Current Display

You can start i-αppli software from a link currently displayed in the display. The software can also be started using the infrared communication (i-αppli To).

● Download software that can be started by the i-αppli To beforehand.

● i-αppli cannot be started to run when the i-αppli To is set to [No] (P.209).

1 Select i-αppli link in the display and press ▭.

The screen for confirming whether to start i-αppli appears.

2 Select [Yes] and press ▭.

The software is started to run.

Activating One Seg from the Current Display

You can activate One Seg from a program information link currently displayed in the display or set a timer for watching/recording a One Seg program (Media To).

1 Select a program information link in the display and press ▭.

The display for One Seg watching or booking reservation appears.

● Follow the same steps as in "Watching One Seg" (P.243) or "Setting a Timer for Watching/Recording a One Seg Program" (P.247, step 4 to 5).

● Even if the link is highlighted, the Media To may not be used.

Setting i-mode   <i-mode setting>

Setting the Connection Timeout

The duration before disconnecting the FOMA terminal automatically can be set when you cannot send or receive data due to heavy traffic at the i-mode center.

1 From the i-mode menu, select [i-mode setting] → [Common setting] → [Connection timeout] and press ▭.

[60sec]:
Disconnect automatically when unable to send/receive data for 60 seconds.

[90sec]:
Disconnect automatically when unable to send/receive data for 90 seconds.

[Unlimited]:
Do not set the connection timeout (however, the connection can be disconnected due to the radio wave condition or other reasons).

2 Select the waiting duration and press ▭.

The Connection timeout is set.

Changing the i-mode Host (ISP Connection Communication)

※ You do not need to change the Host setting when using the i-mode service of DoCoMo.

You can set up to 10 hosts for receiving services other than the services provided by i-mode (DoCoMo). When you change a host to other than [i-mode(UIM)], you cannot use i-mode.

● You must always enter [Host name], [Host number], and [Host address].

1 From the i-mode menu, select [i-mode setting] → [Common setting] → [Host selection] and press [▬▬].

```
Host selection
i-mode(UIM)
```

To edit the settings of the set host

Move the cursor to the set host and from the Function menu, select [Edit], and enter the Security code. Edit each item.

To delete the set host

Move the cursor to the set host and from the Function menu, select [Delete one], enter the Security code, and select [Yes].

2 Press [ｉ] (Create).

The Security code screen appears.

3 Enter the Security code and press [▬▬] (OK).

```
Host setting
Host name

Host number

Host address

Host address2
```

[Host name]:

Enter a host name within eight full-width or 16 half-width characters.

[Host number]:

Enter a host number within 99 half-width alphanumeric characters and symbols.

[Host address]/[Host address2]:

Enter a host address within 30 half-width alphanumeric characters and symbols.

4 Enter each item.

5 Press [ｉ] (Complete).

The entered host is saved.

6 Select the host and press [▬▬].

The host is changed.

● Note that packet communication is not covered by the Pake-Houdai/Pake-Houdai Full service if a host of the packet communication is set to other than [i-mode(UIM)].

Setting Whether to Use the Saved Data for Flash Movies

You can set whether to use the saved data (P.163) when you play back a Flash movie displayed on a site or saved in the Screen Memo.

1 From the i-mode menu, select [i-mode setting] → [Use phone info] and press [▬▬].

2 Select [Yes]/[No] and press [▬▬].

The Use phone info is set.

Disabling the Display of Graphics

You can set whether to display graphics when displaying sites or screen memos.

1 From the i-mode menu, select [i-mode setting] → [Display img] and press [▬▬].

2 Select [ON]/[OFF] and press [▬▬].

The Display img is set.
When set to [OFF], "📷" is displayed instead of a graphic.

● Some graphics may not be displayed correctly even if the Display img is [ON].
● The setting of the Display img is synchronized with that of the Display img of One Seg (P.255).

Displaying a Site Automatically with the Correct Character Code

You can set to identify the character code of a site automatically.

1 From the i-mode menu, select [i-mode setting] → [Auto detect.] and press [▬▬].

2 Select [ON]/[OFF] and press [▬▬].
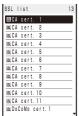

The Auto detect. is set.

● Even if the Auto detect. is [ON], some sites may not be displayed correctly.

Operating the SSL List <SSL certificate>

You can set to validate/invalidate the certificate that is required to connect to an SSL site.

1 From the i-mode menu, select [i-mode setting] → [SSL list] and press ▭.

```
SSL list          13
SSL CA cert. 1
SSL CA cert. 2
SSL CA cert. 3
SSL CA cert. 4
SSL CA cert. 5
SSL CA cert. 6
SSL CA cert. 7
SSL CA cert. 8
SSL CA cert. 9
SSL CA cert. 10
SSL CA cert. 11
SSL DoCoMo cert. 1
```

[CA cert.]:
　An authentication company issues these certificates. They are saved in the FOMA terminal at the time of purchase.

[DoCoMo cert.]:
　This certificate is required for connecting to the FirstPass Center and FirstPass-compatible sites and is saved on the UIM (green/white).

[User cert.]:
　This certificate is downloaded from the FirstPass Center by [User certificate] and is saved in the UIM (green/white).

To check the certificate
　Move the cursor to the certificate and press ▭.

2 Select an SSL certificate and press 📱 (Set).

The Security code screen appears.

3 Enter the Security code and press ▭ (OK).

The Valid/Invalid display appears.

4 Select [Valid]/[Invalid] and press ▭.

The SSL certificate is set.
When set to [Invalid], "SSL" changes to "SSL". The SSL communication is canceled when connecting to an SSL site that requires a certificate.

Setting the FirstPass <User certificate>

You can issue and download the user certificate from the FirstPass Center.
The user certificate certifies that you are a FOMA subscriber. The downloaded user certificate is saved on the green/white UIM (FOMA card) and enables you to use FirstPass-compatible sites.

● You cannot use the user certificate using the blue UIM.
● To connect to the FirstPass Center, set the date and time (P.43).
● The screens and operation methods displayed by the FirstPass Center may change.
● While the FOMA terminal is connected to the FirstPass Center, you cannot send/receive mail or receive Message R/F.
● The User certificate is not available overseas.

1 From the i-mode menu, select [i-mode setting] → [User certificate] and press ▭.

```
FirstPass
・FirstPassをご利用いた

```

2 Select [English] and press ▭.

```
FirstPass
①Request your certifica
te
②Download your certific
ate
③Other settings
④The usage regulation (
Japanese only)
```

3 Select [Request your certificate] → [Continue] and press ▭.

The PIN2 code input screen appears.

To void the issued certificate
　Select [Other settings] → [Revoke your certificate] → [Yes], enter the PIN2 code, and select [Continue] → [Continue] → [Continue].

4 Enter the PIN2 code and press ▭ (OK).

● If you do not enter the PIN2 code within 15 seconds, the request for issuing your certificate is canceled.

5 Select [Download] → [Continue] and press ▭.

```
FirstPass
Requesting a certificate
is completed.
Download the certificate
Download/Menu
```

The user certificate is downloaded and added to the list of SSL certificates (P.171).

Precautions on the use of FirstPass

● The packet communication charge is free when you connect to the FirstPass Center.

● The packet communication performed when connecting to a FirstPass-compatible site is covered by the Pake-Houdai/ Pake-Houdai Full service. However, data communication with a PC connected is not covered by the Pake-Houdai/ Pake-Houdai Full service.

● FirstPass is an electronic authentication service provided by DoCoMo. Using FirstPass enables client authentication, which is performed between the site and FOMA terminal user by exchanging certificates and verifying the received certificate of the other side for mutual authentication.

● FirstPass can be used for Internet communication from the FOMA terminal as well as for Internet communication by connecting the FOMA terminal to a PC. To use on a PC, you must install the FirstPass PC software on the supplied CD-ROM.

● When you request the user certificate to be issued, carefully read the displayed "FirstPass Agreement" and then make the request if you accept the terms.

● You need to enter the PIN2 code in order to use the user certificate (P.123).
You are liable for all operations performed after you enter the PIN2 code. Therefore, exercise care to prevent the use of your UIM or PIN2 code by others.

● If you have lost or stolen your UIM, you can invalidate your user certificate at the "General Inquiries" numbers provided on the backcover of this manual.

● DoCoMo shall have no liability for any content and information provided by FirstPass-compatible sites. Any problem must be resolved between you and the FirstPass-compatible site.

● DoCoMo and the authentication company do not guarantee the security for using FirstPass and SSL. Therefore, you must use them at your own discretion and responsibility.

Changing the Host for Certificate Issue <Select host>

※ Normally, you do not need to change the setting.

When you want a service other than FirstPass services, you can set one host. Note that if you change the setting, you cannot connect to the FirstPass Center.

● You cannot set this function during i-mode connection.

1 From the i-mode menu, select [i-mode setting] → [Select host] and press ⬛.

Select host
ドコモ

To edit the set host
Move the cursor to the set host and from the Function menu, select [Edit] and enter the Security code. Edit each item.

To restore the default host setting
From the Function menu, select [Reset], enter the Security code, and select [Yes].

2 Press 🔳 (Create).
The Security code screen appears.

3 Enter the Security code and press ⬛ (OK).

Host setting
Host name

Host address

[Host name]:
Enter a host name within 99 half-width alphanumeric characters and symbols.

[Host address]:
Enter a host address within 100 half-width alphanumeric characters and symbols.

4 Enter each item.

5 Press 🔳 (Complete).
The entered host is saved.

6 Select a host and press ⬛.
The host is changed.

What is i-motion?

i-motion is movie data that contains both video and sound tracks. You can play back an i-motion on the FOMA terminal and set a saved i-motion for the stand-by display.

The i-motion can be of the following types. The type of i-motion varies depending on a site and cannot be selected.

Category		Description
Type	**Playback method**	
Standard type (Allowed to be saved※)	Playback is performed while loading data (10M bytes maximum)	Playback starts after halfway downloading i-motion data and proceeds while downloading the rest of the data.
	Playback is performed after loading data (10M bytes maximum)	Playback starts after all i-motion data is downloaded.
Streaming type (Not allowed to be saved)	Playback is performed while loading data (10M bytes maximum)	Playback starts after halfway downloading i-motion data and proceeds while downloading the rest of the data. The i-motion data is deleted once it is played back.

※ Some i-motion cannot be saved.

Downloading an i-motion from Sites <Download i-motion>

You can download i-motion from a site and save it to the FOMA terminal.

- You can save up to 150 i-motion, each up to 10M bytes. The number of i-motion that can be saved may decrease depending on the data to be saved.

1 While displaying a site, select an i-motion and press ⬛.

```
i-motion
Play
Save
File property
Back
```

The i-motion is downloaded to the FOMA terminal.
When the i-motion auto replay is set to [ON], playback of the i-motion starts automatically after the downloading is completed. (For i-motion that can be played back while being downloaded, playback starts after halfway downloading data.)

- The operations during playback is the same as those described for i-motion in the Data Box (P.270).
- Even if you stop playback while the downloading is in progress, the downloading continues.

2 Select [Save]/[Save temporary] and press ⬛.

The screen for selecting where to save appears.

[Data Box]:
Save the i-motion in i-motion of the Data Box of the FOMA terminal. Select a folder for saving data.

[microSD]:
Save the i-motion in the microSD memory card.

To play back data
Select [Play].

To display detailed information
Select [File property].

3 Select a place to save to and press ⬛.

The i-motion is saved.

- Some i-motion may not be played back/saved properly even if its data is downloaded successfully.
- The playback may be stopped or the image may be distorted when you play back i-motion while downloading data depending on the radio wave condition, communication line conditions, or the communication speed. A standard type i-motion allows you to play back as many times as you want after downloading (using the saved data). However, a streaming type i-motion does not allow further playback once it is played back (unless you download it again).
- If you fold the FOMA terminal or execute another function while downloading/playing back an i-motion, the downloading/playing back may be stopped depending on some i-motion.
- You cannot download or play back an i-motion in the ASF format.

Setting Whether to Play Back i-motion Automatically <i-motion auto replay>

You can set whether to automatically play back standard type i-motion.

1 From the i-mode menu, select [i-mode setting] → [i-motion auto replay] and press ⬛.

2 Select [ON]/[OFF] and press ⬛.

[ON]:
Automatically play back the i-motion during or after downloading.

[OFF]:
Do not automatically play back the i-motion during or after downloading and display the download completion screen.

What is i-Channel?

The i-Channel service provided by DoCoMo or another IP (information service providers) distributes news, weather, etc. as graphics-based information to i-Channel-compatible terminals.

You can run the latest information updates in the stand-by display as Telop text by automatically getting this information on a regular basis. You can also display a list of channels and view the channel you want by pressing [ch] (P.174). The channel you select from the channel list gives you access to rich and detailed information.

i-Channel is a paid service that requires a subscription. (To apply for the i-Channel service, the subscription to i-mode is required.)

There are two types of channels: "Basic channel" and "Favorite channel". "Basic channel" is provided by DoCoMo and is pre-registered, and therefore you can use it from the moment you start using the i-Channel service. The packet communication charge required for automatic updates of information distributed for the "Basic channel" is free of charge. IP (information service providers) other than DoCoMo offers "Favorite channel" that you can register and use according to your needs. The packet communication charge required for automatic updates of information distributed for "Favorite channel" is not included in the i-Channel service charge.

However, the packet communication charge is required in addition to the i-Channel service charge when you view detailed information of "Basic channel" and "Favorite channel" from the channel list.

Also, note that the packet communication charge is required for automatic updates of information distributed for "Basic channel" during international roaming is not included in the i-Channel service charge.

- i-Channel is available only in Japanese.
- For details on i-Channel, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

● You can set the display speed of the Telop text and also turn off the Telop text (P.175).

Displaying the i-Channel

1 Press [ch] (i.ch) in the stand-by display.

The channel list appears.

2 Select a channel and press ▭.

● You may receive specific information when the channel list is displayed, depending on the terms of use.

When You Receive i-Channel

```
Nov  1 Thu    9:05 AM
```
∞→☀ 最高15℃ ♠10 —Telop

When you receive information, the information is automatically run as Telop text on the stand-by display.

To display the channel list
Press 🔲 (i.ch).

To display the Telop text on the sub-display
Fold the FOMA terminal and press 🔲 (P.33).

● When you receive i-Channel information, "🖋"→"🖂" flashes. Even if you receive information, the FOMA terminal does not sound the ring tone or vibrate, and the incoming indicator does not operate, either.
● If you change the host, the Telop text may be turned off and information may not be automatically updated. To receive latest information, press 🔲 (i.ch) and display the channel list. The Telop text starts running automatically.
● You can change the i-Channel host using the Host selection (P.169). Normally, you do not need to change the host.
● When the FOMA terminal is powered off, outside of the service area, or in poor radio wave condition, you may not be able to receive information. When you receive information by pressing 🔲 (i.ch), the Telop text is automatically displayed in the stand-by display.
● Telop text is not displayed in the following cases.
  - When the Lock all is set
  - When the Personal data lock is set
  - When the Omakase Lock is set
  - When the Public mode (Drive mode) is set
  - When the UIM is not inserted
  - When the i-Channel or i-mode service is canceled

Changing the i-Channel Settings

Setting the Telop Text

You can set the display speed of the Telop text and also turn off the Telop text.

1 From the i-mode menu, select [i-Channel] → [Ticker] and press ▭.

The Ticker display appears.

[Stand-by]:
Set the Telop text of the stand-by display used for the main display.

[Sub display]:
Set the Telop text used for the sub-display.

2 Set the speed for displaying the Telop text at [Stand-by]/[Sub display].

Select from [Fast], [Std], and [Slow].

To turn off the Telop text
Select [OFF].

● When 2in1 is used, you can set the Ticker for each 2in1 mode.

Restoring the Default Settings

You can delete saved i-Channel data and reset the Ticker settings to the default settings.

● If an i-motion or i-αppli is set for the stand-by display, the Ticker settings are not reset.

1 From the i-mode menu, select [i-Channel] → [Reset i-Channel] and press ▭.

The screen for confirming whether to reset the i-Channel data appears.

2 Select [Yes] and press ▭.

The i-Channel is reset.

Mail

What is i-mode Mail?

When subscribing to the i-mode service, mail can be exchanged with i-mode terminals as well as e-mail over the Internet.

In addition to the main body of text, you can attach up to 10 files (JPEG, ToruCa, PDF data, etc.) of up to 2M bytes in total. The i-mode mail function also provides Deco-mail support, and you can change the font color/size and background color of the mail main body text. Since there are many preinstalled Deco-mail pictographs that can be inserted in an i-mode mail message in the same manner as other pictographs, you can easily compose and send expressive mail.

● For details on the i-mode mail, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

About SMS

You can exchange messages between FOMA terminals without subscribing to i-mode.

● Sending SMS (P.202)
● Receiving SMS (P.203)
● Checking new SMS (P.203)
● See DoCoMo's website to send/receive SMS to/from an overseas telecommunication company other than DoCoMo.

If Unable to Receive SMS

The SMS received at the SMS center is immediately sent to your FOMA terminal. When your FOMA terminal is powered off or cannot receive radio waves because it is outside of the i-mode service area or due to other reasons, the SMS is held at the SMS center.

Displaying the Mail Menu

<Mail menu>

1 Press ✉ (Mail) in the stand-by display.

```
┌─────────────────────────┐

Menu name	Function
Inbox	Display, reply to or forward received mail (P.187, 189).
Outbox	Display or edit sent mail (P.189).
Draft	Display mail that was saved without being sent and sent unsuccessfully (P.189).
Compose message	Compose and send new i-mode mail (P.179).
WEB Mail	Connect to the WEB mail site to display mail addressed to Address B and compose/send mail from Address B at the site (P.352).
Compose SMS	Compose and send new SMS (P.202).
Templates	Display the list of Deco-mail templates (P.183).
Check new msg	Obtain mail, Message R, and Message F held at the i-mode center (P.186, 199).
Check new SMS	Obtain SMS held at the SMS center (P.203).
Receive option	Select and receive mail held at the i-mode center (P.186).
Mail setting	Set items relating to i-mode mail, SMS, and Area Mail on the FOMA terminal (P.119, 194, 203, etc.).

● For details on the WEB mail, see the "Mobile Phone User's Guide 【2in1】".

Composing and Sending i-mode Mail <Compose and send mail>

Sent mail is saved in [Outbox].

- Mail may not be displayed correctly on the recipient's phone depending on the radio wave condition.

1 From the Mail menu, select [Compose message] and press ▤.

- You can also display the mail compose display by pressing ▤ (Cmps msg) in the Mail menu.

```
Edit mail
To
Sub
```

Number of entered bytes

2 Enter an address at [Tₒ].

Enter an address within 50 half-width alphanumeric characters and symbols.

3 Enter a subject at [S̲ᵤᵦ].

Enter a subject within 100 full-width or 200 half-width characters.

4 Enter the main body at [▤].

Enter the main body within 5,000 full-width or 10,000 half-width characters.
You can enter a Deco mail pict. to compose Deco-mail (P.180).

To obtain the location information
From the Function menu, select [Rcv loc. info] (P.237).

To display the preview image
From the Function menu, select [Preview].

5 Press ▤ (Send).

The mail is sent.

To save the main body of text as signature
From the Function menu, select [Save signature].

- While editing mail, when you change the font size, from the Function menu, from [Input method] → [Font size], the setting is only applied for the font size in the matching word list. The setting for the font size of an address, subject, and main body text is changed from the next time when you activate mail (P.119).
- When the number of saved draft mail has reached 50 or there is not enough memory left for draft mail, you cannot compose new mail nor edit draft mail.
- If new mail is sent when the number of saved sent mail has reached 500 or there is not enough free space, the unprotected sent mail is overwritten from the oldest.
- If mail you send to several addresses is sent successfully to some and unsuccessfully to other addresses, the same mail is saved in [Outbox] as sent mail and in [Draft] as unsent mail/mail sent unsuccessfully.
- Even if the mail is sent successfully, you may receive the error message "Transmission failed" depending on the radio wave condition and the mail is saved in [Draft].
- When 2in1 is set to the B mode, you cannot compose any i-mode mail.
- You cannot send i-mode mail using Address B.
- When you obtain location information and attach the location information URL, " ┝ " appears in front of the location information URL in the main body. Attached location information URL is counted as the characters in the mail main body.
- All the part of a title may not be received depending on the recipient's terminal model.

Adding an Address

You can send i-mode mail containing the same information up to five addresses all at once by adding these addresses. You can select the type of address from To, Cc, and Bcc.

1 Press ▤ (Func) in the Edit mail display.

The Function menu appears.

2 Select [Add receiver] → address type (To/Cc/Bcc) and press ▤.

The address field of the selected address type ([Tₒ]/[Cc]/[Bcc]) is added.

3 Enter an address in the added address field [Tₒ]/[Cc]/[Bcc].

To delete an address
Move the cursor to an address and from the Function menu, select [Delete receiver] → [Yes].

To change the address type
Move the cursor to an address and from the Function menu, select [Change addr type] → an address type (To/Cc/Bcc).

4 Compose mail and send it.

- Follow the same steps as in "Compose and send mail" (P.179, step 3 to 5).

- The mail addresses entered in To and Cc are displayed in the recipient's terminal display. Note, however, that they may not be displayed depending on the terminal, device, or mail software of the recipient. The mail addresses entered in Bcc are not displayed in the recipient's terminal display.

Entering an Address from the Mail List

You can send mail to several recipients saved in the mail list.

1 Press ✉ (Func) in the Edit mail display.

The Function menu appears.

2 Select [Mail list] → a mail list and press ▭.

All the members in the list are entered in the address box.

To select a specific address from the mail list
Press ⓘ (Each) in the Mail list display and select a member.

3 Compose mail and send it.

● Follow the same steps as in "Compose and send mail" (P.179, step 3 to 5).

Composing and Sending Deco-mail   <Compose and send Deco-mail>

You can compose and send Deco-mail, i-mode mail that has a decorated main body.

● Deco-mail may not be received or displayed correctly depending on the recipient's terminal model.

Main body input display

→ Deco-mail

Icons for the specified decoration items

Blink/Move

Preview display

Color/Size/Align

Background color
Insert image
Insert line

1 From the Mail menu, select [Compose message] and press ▭.

The Edit mail display appears.

2 Enter an address and subject.

● Follow the same steps as in "Compose and send mail" (P.179, step 2 to 3).

3 Enter/decorate the main body at [▦].

Enter the main body within 5,000 full-width or 10,000 half-width characters.

● Number of characters permitted in the main body may be reduced depending on the type and volume of decoration you use.

Press 📞 in the Main body input display to display the decoration menu.

Set the decorations and press ✉ (Close) to end the decoration menu.
The following table indicates the decoration items, buttons displayed in the decoration menu, and icons which appear in the title field of the Main body input display after decoration.

Mail

Decoration menu	Icon	Description
[1]: Color/Size	A A A A	Use ▲ ▼ to select a font size from three types, large/medium/small and ◄ ► to select font and line colors from 20 colors. • When you select a font color, the color of a pictograph is also changed. To reset to the normal pictograph color, select [None]. • You cannot change the size of the Deco-mail pictograph.
[2]: Quick deco. Mail	—	You can specify the background and font colors of Deco-mail all at once and also insert a decoration line above and below the text by selecting a pattern image and its color scheme (P.182).
[3]: Blink/Move/Align	A A 三三三	Use ▲ ▼ to select whether or not to allow the text to blink (ON/OFF) and ◄ ► to select the alignment (left justified/centered/right justified) or move (none/Telop text/swing).
[4]: Insert image	—	You can insert up to 20 types of images (90K bytes) from My picture of the Data Box. You can also select a Deco-mail pictograph.
[5]: Deco. slcted txt	—	After specifying the range of the main body, you can decorate it. You can decorate the mail using [Color/Size] and [Blink/Move/Align], one after the other (P.181).
[6]:Insert line	—	The line in the color set in [Color/Size] is inserted.
[7]:Close	—	You can quit the decoration menu.
[8]: Background color	—	You can select the background color from 20 colors.
[9]:Reset all	—	You can cancel the all decorations.

• You can set a decoration by entering a digit in front of the name of the decoration menu.

To undo the last decoration setting
    Press 📱 (Undo).

To check the decoration settings
    Press ✉ (Close) and from the Function menu, select [Preview].

To enter Deco mail pict.
    Press 📷 (Pict/Sym) to select Deco mail pict.
    Deco mail pict. is a Deco-mail pictograph that can be entered only in the Edit mail, Edit template, and Edit signature displays.

4 Press ✉ (Close) and then press 📱 (Send).

To save the composed Deco-mail as a template
    From the Function menu, select [Save template] → [Yes]. The Deco-mail is saved in Templates.

● Even if you delete a decorated character, the data used for decoration may not be erased and the number of characters in the mail main body that you can enter could be reduced. After canceling the decoration, delete the character. When you press CLR for over a second, both the character and the decoration data are deleted.

● Blinking, motion, and animation stop automatically after a certain period of time.

● When Deco-mail exceeding 10,000 bytes is sent to a terminal of other than the following models※, it is received as ordinary mail in which a URL for viewing the Deco-mail is included. However, some terminals may receive mail only of the main body in which no URL for viewing the Deco-mail is included.
    ※ 903i series, 904i series, 905i series, 703i series (excluding P703iμ), and 704i series (excluding P704iμ)

Specifying Decoration After Entering the Main Body

1 Press 📞 in the main body input display.
    The decoration menu appears.

2 Select [A] and press ▭.

3 Select the decoration start point and press ▭.
    The first character to be decorated is set.

4 Select the decoration end point and press ▭.
    The range of the text to be decorated is set and the Cross Deco-palette appears.

5 Select the font size/color and press ▭.
    Use ▲ ▼ to select the font size (large/medium/small) and ◄ ► to select the font color.
    • If you do not set the font size/color, press ▭.

6 Select the text blink/move/alignment and press ▭.
    Use ▲ ▼ to select whether or not to allow the text to blink (ON/OFF) and ◄ ► to select the alignment (left justified/centered/right justified) or move (none/Telop text/swing).
    • If you do not set the text blink/move/alignment, press ▭.

Specifying Decoration All at Once

- If you select "☐☐" from the decoration menu, all the specified decorations are canceled.

1 Press ⌒ in the main body input display.

The decoration menu appears.

2 Select [☐☐] and press ▭.

The Cross Deco-palette appears.

```
Input
◁

Quick deco. Mail          Font color
▓▓▓▓ A ▓▓▓▓               Background color
            A
Sample
```

3 Select the font/background color and press ▭.

Use ▲ ▼ to select the font color and ◀ ▶ to select the background color.

- If you do not set the font/background color, press ▭.

```
Input
◁

Quick deco. Mail
▓▓▓▓▓ ◢ 🎨 ▓▓▓▓▓
```

4 Select a pattern image/color scheme and press ▭.

Use ◀ ▶ to select a pattern image to be inserted above and below the text and ▲ ▼ to select a pattern image/color scheme.

- If you do not set a pattern image/color scheme, press ▭.

5 Press ✉ (Close) and enter the main body.

Enter text within 5,000 full-width or 10,000 half-width characters.
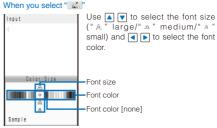

- Number of characters permitted in the main body may be reduced depending on the type and volume of decoration you use.

● You can also select the Quick deco. Mail after entering the main body.

Entering the Main Body After Specifying Decoration
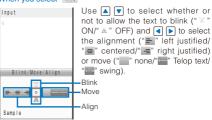

1 Press ⌒ in the main body input display.

The decoration menu appears.

2 Select the decoration and press ▭.

The Cross Deco-palette appears.

When you select "🖼":

```
Input
◁

Color/Size                Font size

Background color
▓▓▓▓▓ ▓▓▓▓▓               Background color
                          Background color [none]
Sample
```

Use ◀ ▶ to select the background color.

3 Press ✉ (Close) and enter the main body.

Enter text within 5,000 full-width or 10,000 half-width characters.

- Number of characters permitted in the main body may be reduced depending on the type and volume of decoration you use.

Mail

Using a Template to Send Mail

A template is a model used for Deco-mail, which is preset with decorations for the main body. You can use templates to easily compose/send Deco-mail.
You can download a template from a site and also save up to 50 composed/received/sent Deco-mails as templates (P.181).

- You cannot edit or delete a preinstalled template.

1 From the Mail menu, select [Templates] and press ⬛.

```
Templates
浜でお散歩
海でぷかぷか
らぶらぶ
SEE YOU
いってらっしゃーい
ガンバレ！
これってラッキー？
元気？
男の子
お化け
きのこ
きらり
```

To check a template
    Select a template.
To change the title
    Move the cursor to a template and from the Function menu, select [Edit title]. Enter the title within 10 full-width or 20 half-width characters.
To delete a template
    Move the cursor to a template and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete several templates, from the Function menu, select [Delete] → [Select&delete], select templates, press 🔘 (Complete), and select [Yes]. To delete all templates, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].
To edit a template
    Move the cursor to a template and press 📷 (Edit).

2 Select a template and press 🔘 (Mail).

The Edit mail display appears.

3 Compose mail and send it.
- Follow the same steps as in "Compose and send Deco-mail" (P.180, step 2 to 4).

● When you save Deco-mail containing an image that cannot be sent as a mail attachment or Deco-mail with a file attachment as a template, the image or file attachment is not saved.

File Attachment <File attachment>

You can send i-mode mail with up to 10 file attachments, 2M bytes in total, including still images, movies/i-motion, melodies, ToruCa cards, PDF data, Phonebook, Schedule, Bookmark, My data, and other files.

■ Files that can be attached

Type	Restrictions, etc.
🖼 Image (GIF/JPEG/SWF)	• A JPEG image exceeding 2M bytes is automatically converted to a file of 2M bytes or less. (It is only the first file attachment that can be selected for conversion.)
🎬 Movie/i-motion (MP4)	• A movie/i-motion file exceeding 2M bytes is automatically clipped from the beginning within 2M bytes. (It is only the first file attachment that can be selected for conversion.) • A movie/i-motion whose image size is set to [VGA(640×480)] or less can be attached. • An attached movie may appear grainy or may be displayed after being converted into several continuous still images depending on the recipient's terminal model. • Some i-motion files may not be attached.
🎵 (Green) Melody (SMF) 🎵 (Orange) Melody (MFi)	• A melody may not be sent properly to mobile phones other than SO905i.
🔖 ToruCa	• You may not be able to send some ToruCa cards.
📄 PDF data (PDF)	• PDF data that you obtained by page cannot be attached.
📑 Tool data	• The Phonebook, My data, Schedule, and Bookmark data can be attached.
📃 Other files	—

- Files that cannot be attached to mail and files prohibited from being retrieved out of the FOMA terminal cannot be attached.
- When you reply to mail saved in the microSD memory card, you cannot attach a file (P.282).

1 Press 📧 (Func) in the Edit mail display.

The Function menu appears.

2 Select [Add attach file] and press ▭.

The Select attach file display appears.

[Image]:
Select an image from My picture of the Main memory/microSD.

[i-motion]:
Select a movie/i-motion from i-motion of the Main memory/microSD.

[Melody]:
Select a melody from Melody of the Main memory/microSD.

[ToruCa]:
Select data from ToruCa of the Main memory/microSD.

[PDF]:
Select PDF data from My document of the Main memory/microSD.

[Phonebook]:
Select data from Phonebook of the Main memory/microSD. However, when the Save/attach image of the Phonebook is set to [Invalid], the image is not attached.

[My data]:
Attach My data.

[Schedule]:
Select data from Schedule of the Main memory/microSD.

[Bookmark]:
Select data from Bookmark of the Main memory/microSD.

[Others]:
Select data from Others of the microSD.

[Activate camera]:
Select [Camera]/[Movie] and record images/movies using the camera (P.142, 146).

3 Select a file type and press ▭.

To check the contents of a file
Move the cursor to a file and press ⊞ (Play).

4 Select a folder → a file and press ▭.

The file is attached and "📷", "🎬", "🎵"(Green), "🎵"(Orange), "📎", "📑", "📇", or "🗂" appears.

When you select the image that is added the location information
The screen for confirming whether to attach the location information URL to the main body appears. If you select [Yes], "📍 Location information URL" is entered at the end of the main body.

5 Compose mail and send it.

- Follow the same steps as in "Compose and send mail" (P.179, step 2 to 5).

● It may take time to send mail depending on the size of a file attachment.

● When you send mail to an i-mode terminal which does not support 2M-byte file transmission, you can only attach files of the supported types and size within the capacity of the recipient's terminal. If you attach files of unsupported types or size exceeding the capacity, the file attachments are deleted and only the mail main body is sent to the recipient.
When you send a movie as a file attachment to i-mode terminals of other than the following models※, a movie that is recorded with [High quality] or [Long play] set at the Com. replay mode is recommended.
※ 903i series, 904i series, 905i series, 703i series (excluding P703iμ), and 704i series (excluding P704iμ)

● When you send mail to an i-mode terminal for the Mova service, file attachment is restricted to one JPEG image, melody of the MFi format, or i-motion file. The recipient receives it as mail with a URL linked to the file. If you attach multiple files or an unsupported file, the attached files are deleted and only the mail main body is sent to the recipient.

Deleting a File Attachment

1 Select a file in the Edit mail display and press ▭ (Func).

The Function menu appears.

2 Select [Del attach file] → [Yes] and press ▭.

The file attachment is deleted.

Saving i-mode Mail to Send Later
<Save mail>

If you do not want to send composed mail immediately, you can save it in [Draft].

1 Press ▭ (Func) in the Edit mail display.

The Function menu appears.

2 Select [Save] and press ▭.

The composed mail is saved as unsent mail in [Draft].

To edit saved mail
From the Mail menu, select [Draft] → [Draft] → mail.

Receiving i-mode Mail <Auto receive>

When mail is sent to the i-mode center, the FOMA terminal automatically receives them.

While receiving mail, "✉" flashes.

To cancel receiving mail

Press ✉ (Cancel). "✖" appears in the next display informing the completion of reception. Receiving may be completed depending on the timing of cancellation.

When receiving is completed, "✉" is displayed, the indicator flashes, the ring tone sounds, and the number of received mail is displayed.
The display before receiving reappears after about 15 seconds.

● When returning to the stand-by display, the notification icon "✉" (New mail) appears. Press ▤ (Link) and select "✉" to display the Inbox display.

● You can automatically receive up to 100K bytes of data in each mail, including the file attachment. You have to manually obtain a file attachment exceeding 100K bytes from the i-mode center (P.189).

● If new mail is received when the number of saved received mail has reached 1,000 or there is not enough free space, the unprotected read mail is overwritten from the oldest.

● When you receive multiple mail at the same time, the ring tone, call picture, and indicator color of the last received mail have priority.

● Mail that has been sent to you in the following situations is held at the i-mode center.
  - During a videophone call
  - When the FOMA terminal is powered off
  - When the FOMA terminal is outside of the i-mode service area
  - During PushTalk communication
  - While receiving SMS
  - While the Self mode is set
  - While the Omakase Lock is set
  - During the infrared communication
  - During the iC communication
  - While updating the software
  - While connected to the FirstPass Center
  - While connected to the Data Security Service Center

● Some mail is held at the i-mode center when "▐" appears (sometimes "▐" does not appear even if mail is held at the i-mode center).
  If the maximum number of mail is held at the i-mode center, "▐" appears. In this case, check the contents of unread mail, delete unnecessary received mail, or cancel protection of received mail before performing the Check new message.

● When the size of received mail (number of characters and file attachment size) has exceeded the number of characters (data size) specified at Limit Mail Size accessible through [i Menu] → [English iMenu] → [Options] → [Mail Settings], the file attachment cannot be received automatically.

Selecting to Receive i-mode Mail

<Receive option>

You can check through mail held at the i-mode center, where you can select mail to receive and delete mail without receiving it based on the information such as mail subject. To use this function, set the Recv option setting to [ON]. When the Recv option setting is set to [ON], i-mode mail is not received automatically.

● When the Recv option setting is set to [ON], the Mail tone does not sound and when the Manner mode or Vibrator is set, the vibrator does not operate.

When receiving mail, the notification icon "📭" (Mail at center) appears.

To check mail

Press 📲 (Link) in the stand-by display and select "📭" → [Yes]. The FOMA terminal is connected to the i-mode center.

Receiving i-mode Mail after Selecting

Connect to the i-mode center and select mail to receive.

● When 2in1 is set to the B mode, the Receive option cannot be performed.

1 From the Mail menu, select [Receive option] and press 📲.

The call is connected to the i-mode center and the list of i-mode mail saved at the center appears.

● When the mail contains a file attachment, the following icons appear.

📷	Still image file attachment
🎞	i-motion attachment
♪	Melody attachment
■	ToruCa card attachment
📄	Other file attachment

2 Select [保留] (Holding) for the mail and press 📲.

[受信] (Receive):
    Receive a selected i-mode mail.

[削除] (Delete):
    Delete a selected i-mode mail.

[保留] (Holding):
    Hold a selected i-mode mail at the i-mode center.

3 Select [受信] (Receive) and press 📲.

4 Select [受信/削除] (Receive/Delete) and press 📲.

To delete all mail

Select [削除] (Delete) below [i モードセンターから全てのメールを] (All mail from the i-mode center).

5 Select [決定] (OK) and press 📲.

The selected mail is received.

Checking New i-mode Mail

<Check new message>

New mail held at the i-mode center while the FOMA terminal is powered off or outside of the i-mode service area can be checked.

● Depending on the radio wave condition, you may not be able to check new mail.

1 Press ✉ (Mail) for over a second in the stand-by display.

The FOMA terminal is connected to the i-mode center, and an inquiry result is displayed.

To check mail

Select [Mail].

Mail

Replying to i-mode Mail

<Reply to mail>

You can compose and send replies to the received mail.

- You may not be able to reply to some received mail.

1 From the received mail list, select mail and press ⬛ (Quote).

The Edit mail display appears.
The mail address as address, "Re: title of the received mail" as subject, and ">main body of the received mail" as main body are entered beforehand.

- When the subject including "Re:" exceeds 100 full-width or 200 half-width characters, the extra characters are automatically deleted.
- When the subject of the received mail includes more than one "Re:", some "Re:" are brought together in one automatically.

To reply to mail without the sender's message
Move the cursor to mail and press 🔲 (Reply).

To reply to broadcast mail
Select mail, press ⬛ (Quote) or 🔲 (Reply), and select [Reply to sender]/[Reply all].

2 Compose mail and send it.

- Follow the same steps as in "Compose and send mail" (P.179, step 3 to 5).

The reply mail is sent and "📧" appears.

● No quote is used for a file attachment, a melody or i-αppli To link that is inserted in the mail main body, and an image in Deco-mail that cannot be redistributed.
● You cannot reply to the i-mode mail sent to Address B of 2in1.

Forwarding i-mode Mail

<Forward mail>

You can forward received mail to another person. A file attachment is also forwarded.

1 From the received mail list, select mail and press ✉ (Func).

The Function menu appears.

2 Select [Forward] and press ▭.

The Edit mail display appears.
"Fw: title of the received mail" as subject and "main body of the received mail" as main body are entered beforehand.

- When the subject including "Fw:" exceeds 100 full-width or 200 half-width characters, the extra characters are automatically deleted.
- When the subject of the received mail includes more than one "Fw:", some "Fw:" are brought together in one automatically.

3 Compose mail and send it.

- Follow the same steps as in "Compose and send mail" (P.179, step 2 to 5).

The mail is forwarded and "📧" appears.

● A melody or i-αppli To link inserted in the mail main body, an image in Deco-mail that cannot be redistributed, and a file not yet downloaded are not forwarded.

Saving the Mail Address/Phone Number in the Phonebook

Saving the Sender's/Recipient's Mail Address in the Phonebook

You can save the mail address of a received mail sender and recipient or sent/saved mail recipient in the Phonebook.

Example: Saving the mail address of a received mail sender to the FOMA terminal phonebook as a new entry

1 From the received mail list, select mail, press ▭, and press ✉ (Func).

The Function menu appears.

2 Select [Save address] and press ▭.

The screen for selecting how to save to the Phonebook appears.

3 Select [New] and press ▭.

The screen for selecting where to save appears.

When you select [Add]
Select an entry to which you want to add the mail address from the Phonebook.

When there are multiple mail addresses
Select mail addresses → [New]/[Add].

4 Select [Main memory] and press ▭.

The Edit phonebook display appears.

To save to the UIM phonebook
Select [UIM].

5 Save other items.

- Follow the same steps as in "Add to FOMA terminal phonebook" (P.91, step 3 to 5) or in "Add to UIM phonebook" (P.93, step 3).

6 Press ⬛ (Complete).

The entry is saved in the FOMA terminal phonebook.

Saving the Phone Number/Mail Address in Display in the Phonebook

The mail addresses or phone numbers currently displayed in the site, received mail/sent mail, or ToruCa card can be saved in the Phonebook.

● Depending on the site, the displayed phone number or mail address may not be saved.

Example: Saving the phone number contained in the main body of the received mail to the FOMA terminal phonebook as a new entry

1 From the received mail list, select mail and press ▭, and then select the phone number and press ✉ (Func).

The Function menu appears.

2 Select [Add to phonebook] and press ▭.

The screen for selecting how to save to the Phonebook appears.

3 Select [New] and press ▭.

The screen for selecting where to save appears.

When you select [Add]

Select an entry to which you want to add the phone number from the Phonebook.

4 Select [Main memory] and press ▭.

The Edit phonebook display appears.

To save to the UIM phonebook

Select [UIM].

5 Save other items.

● Follow the same steps as in "Add to FOMA terminal phonebook" (P.91, step 3 to 5) or in "Add to UIM phonebook" (P.93, step 3).

6 Press ☒ (Complete).

The entry is saved in the FOMA terminal phonebook.

Playing Back/Saving a File Attachment Received in i-mode Mail

You can display/play back/save/delete a file that is attached or pasted in i-mode mail or a message including an image, movie/i-motion, melody, ToruCa card, PDF data, Phonebook, Schedule, Bookmark, and My data.

■ File attachments that can be played back and saved

Format	Restrictions
Image (JPEG/GIF/SWF)	● You can save a Deco-mail pictograph and stamp/frame in the Data Box only. ● You cannot play back a Flash movie of 100K bytes or more. You can save a Flash movie of 100K bytes or more in the microSD memory card only.
Movie/i-motion (MP4)	—
Melody (SMF/MFi)	● You cannot play back a melody of 100K bytes or more. You can save a melody of 100K bytes or more in the microSD memory card only. ● You may not be able to play back correctly a melody sent from a mobile phone other than SO905i.
ToruCa card	● You cannot play back a ToruCa card of 1K bytes or more and a ToruCa(detail) card of 100K bytes or more.
PDF data (PDF)	—
Tool data	● You can save the Phonebook, Schedule, and Bookmark data. ● When you save a file using [Save attached], you cannot select the Main memory.
Other files	● You can save other files in the microSD memory card only.

● The number of files that you can save varies depending on the free memory space on the place to save to and data size.

Example: Saving a file attachment received in mail

1 From the received mail list, select mail and press ▭.

2 Select a file attachment and press ✉ (Func).

The Function menu appears.

To display/play back a file attachment

Move the cursor to the file attachment and press ▭.

Mail

3 Select [Save attached] and press ⬛.

The Save to display appears.

[Data Box]:
Save a file attachment in the Data Box. Select a folder to save to.

[microSD]:
Save a file attachment in the microSD memory card.

To play back a melody pasted in a message
Select [Play melody].

To save a melody pasted in a message
Select [Save melody] → a place to save to.

To check a melody title
Select [Confirm title].

To display details about an inserted image
Select [Insert img info] → an image. The detailed information appears.

To save an inserted image
Select [Save insert img] → an image → a place to save to.

4 Select a place to save to and press ⬛.

The file is saved.

To display Tool data
Move the cursor to the file attachment, press ⬛, and select [Confirm].

To save Tool data in the FOMA terminal
Move the cursor to the file attachment, press ⬛, select [Register], enter the Security code, and select [Add]/[Overwrite].

When there is not enough memory
The screen for confirming whether to overwrite the data appears. To overwrite, select unnecessary data (P.294).

● Some of the received image and movie/i-motion may not be played back correctly.

Receiving a File Attachment Selectively

You can obtain a file attachment exceeding 100K bytes and one for which the Attached file pref. is set to [Invalid].

● You cannot obtain a file attachment whose retention period is expired.

1 From the received mail list, select mail and press ⬛.

2 Select "🗐" and press ⬛.

The obtaining operation starts and the file attachment is obtained.

● If you obtain a file attachment not yet existing when there exist already 1,000 received mails or there is no more free memory space in the FOMA terminal, the obtained data overwrites the unprotected read mail from the oldest one. Depending on the size of the file attachment to be obtained, multiple mails may be overwritten by it.

Deleting a File Attachment

You can delete a file that is attached to i-mode mail.

● You cannot delete an i-αppli To link that is displayed in the mail main body.

Example: Deleting a file attached to the received mail

1 From the received mail list, select mail and press ⬛.

2 Select a file attachment and press ✉ (Func).

The Function menu appears.

3 Select [Del attach file] → [Yes] and press ⬛.

The file attachment is deleted.

Displaying Received/Sent/Saved Mail

You can display received/sent/saved mail any time you want to. Received and sent mail can be saved in [Inbox] and [Outbox], respectively. Mail that was saved without being sent or sent unsuccessfully, is saved in [Draft].

● You can save up to 1,000 received mails, up to 500 sent mails, up to 50 saved mails, and up to 30 Area Mail. The number of files that can be saved may decrease depending on the data to be saved.

● For SMS saved in the UIM, some function menu items are not available.

1 From the Mail menu, select [Inbox]/[Outbox]/[Draft] and press ⬛.

Received mail

```
Inbox          25/66
📁 Inbox
  MessageR
  MessageF
```

● The number of saved mail in the folder at the cursor/the total number of mail is displayed at the right end of the title line.

● The following icons show the status of the folder. Next to the icon, the folder name is displayed.

📁/📁 (Yellow)	Preset folder/Mail security is set
📁/📁 (Blue)	User-created folder/Mail security is set
📁/📁	Folder created by i-αppli with mail/Mail security is set

● If there is unread mail, "✉" appears at the lower left of the icon.

● When 2in1 is set to Address B, sent and saved mail cannot be displayed.

To display the SMS list in the UIM
Press 📷 (UIM).

● When 2in1 is set to the B mode, the SMS list cannot be displayed.

2 Select a folder and press ⬛.

The received/sent/saved mail list appears.

You can change the display style of the mail list (P.195).

- The received/sent/saved date/time field indicates the time when the mail is received/sent/saved today, and otherwise the date. When the date/time is corrected to the local time during international roaming, "" appears (P.43).
- For SMS, the beginning of the mail main body is displayed instead of the subject.
- For Area Mail, "エリアメール" and the beginning of the mail main body are displayed instead of the sender and the subject, respectively.
- All the part of a title may not be displayed.
- When 2in1 is used, mails for each Address A and Address B are colored differently.
- The following icons show the status and type of the mail and the type of the file attachment.

Mail status

✉	Unread mail
📧(📨)	Read mail (Protect ON)
📧(📨)	Replied mail (Protect ON)
📧(📨)	Forwarded mail (Protect ON)

To display mail addresses or phone numbers

When saved in the Phonebook, the name is displayed instead of the mail address/phone number. Press 🔲 to switch the display temporarily between the names and mail addresses/phone numbers.

- While displaying the mail list, press 🔲 to change the display.

  For 2lines
  Name of sender ←→ Mail address/phone number

  For 1line
  Subject → Name of sender → Mail address/phone number

- When the Secret display is set to [ON], the name is displayed even if a caller or recipient is saved as Secret in the Phonebook.

To place a call

When a mail address and phone number is saved in the Phonebook, you can place a call to this number. Move the cursor to the mail and from the Function menu, select [Call back].

3 Select mail and press ▭.

Received mail   Sent mail

- The following icons show the details of mail. Other icons are the same as in step 2.

File attachment type

To change the font size

Press ⓪ for over a second. Every time you press ⓪ for over a second, the font size changes to one level bigger than it. When the font size is [Extra extra large], the font size changes to [Small].

To display the previous or next mail

Use ◀ to display the previous mail or ▶ to display the next mail.

● You can set the received/sent/saved mail not to be displayed by folder (Mail security) (P.132).

Storing the Mail at the Data Security Service Center

You can use the Data Security Service to store up to 10 i-mode mails, SMS messages, or Area Mail at one time at the Data Security Service Center.

- Data Security Service is a paid service that requires a subscription. For details on this service, see the "Mobile Phone User's Guide【i-mode】FOMA version".
- You can also store an image inserted in Deco-mail.
- You cannot store a file attachment and also a mail file exceeding 100K bytes.

Example: Storing received mail

1 Press ✉ (Func) in the received mail list.

The Function menu appears.

2 Select [Store in Center] and press ▭.

The Security code screen appears.

3 Enter the Security code and press ▭ (OK).

The Select mail display appears.

4 Select mail and press ▭.

- To store several mails, repeat step 4.

5 Press ▯ (Complete).

The screen for confirming whether to store the mail appears.

6 Select [Yes] and press ▭.

The call is connected to the Data Security Service Center and mail is stored. When the storing is completed, the storing result display appears.

● You cannot store SMS report.

Mail

Adding/Deleting Folders

In addition to [Inbox]/[Outbox], you can create up to 20 folders each to manage received and sent mail. Besides these folders, additional five folders are reserved for i-αppli with mail each in [Inbox]/[Outbox]/ [Draft]. You can also change a folder name or sort the folders.

- You cannot delete the preset folders, folders including protected mail, mail folders supported by i-αppli with mail software, and [MessageR]/[MessageF]. Folders of i-αppli with mail can be deleted if there is no supporting software for that i-αppli with mail. In this case, the other folders of that i-αppli with mail in the received, sent, or saved mail list are also deleted.
- You cannot change the names of the preset folders, folders of i-αppli with mail, and [MessageR]/[MessageF].

Example: Adding a folder for received mail

1 From the Mail menu, select [Inbox], press ▭, and press ▢ (Func).

 The Function menu appears.

2 Select [Edit folder] → [Create folder], press ▭, and enter a folder name.

 Enter a name within 10 full-width or 20 half-width characters.
 The folder is added.

To change a folder name

 Move the cursor to a folder and from the Function menu, select [Edit folder] → [Edit folder name]. Enter a name within 10 full-width or 20 half-width characters.

To reorder folders

 From the Function menu, select [Edit folder] → [Reorder folders] → a folder. Move the cursor to a position to move to, press ▭ (Move), and press ▢ (Complete).

To delete a folder

 Move the cursor to a folder and from the Function menu, select [Edit folder] → [Delete folder]. Enter the Security code and select [Yes].

- ● After downloading i-αppli with mail, the folders of i-αppli with mail are automatically created in [Inbox], [Outbox], and [Draft].
- ● When you delete a folder, all mail for both Address A and Address B and SMS for both Number A and Number B within the folder are deleted, regardless of the 2in1 mode.

Moving Mail to a Different Folder

You can move received/sent mail to another folder using three methods.

- You cannot move messages in the [MessageR]/[MessageF] folder to another folder or mail from another folder to the [MessageR]/[MessageF] folder.

Example: Moving received mail

1 From the Mail menu, select [Inbox] → a folder and press ▭.

To move all mail in a folder

 From the Function menu, select [Move] → [Move all] → [Yes] → a folder.

To move several mails

 From the Function menu, select [Move] → [Select&move], select mails, and press ▢ (Complete). Select [Yes] → a folder.

2 Select mail and press ▢ (Func).

 The Function menu appears.

3 Select [Move] → [Move one] → [Yes] and press ▭.

 The Select move to display appears.

4 Select a folder and press ▭.

 The selected mail is moved to the different folder.

- ● When you perform the Move all, only the displayed mail of each 2in1 mode are moved.

Protecting Mail

Received or sent mail can be protected from being overwritten. Up to 500 received mails and 250 sent mails can be protected.

● You cannot set protection for unread mail, unsent mail/mail, and Area Mail sent unsuccessfully.

Example: Protecting received mail

1 From the received mail list, select mail and press ✉ (Func).

The Function menu appears.

To cancel the protection
Move the cursor to the protected mail and press ✉ (Func).

2 Select [Protect ON/OFF] → [Yes] and press ▤.

The mail is protected and "📧/📧/📧" appears.

To cancel the protection of all mail
From the Function menu, select [Unprotect all] → [Yes].

Deleting Mail

You can delete the received or sent mail using the following six methods.

Delete one※1	Delete a mail in the folder.
Select&delete※1	Delete several mails in a folder. Up to 30 mails can be selected at a time.
Delete read msg (for received mail only)※1	Delete all read mail.
Delete all※1	Delete all mail in the folder.
Delete read msg (for received mail only)※1	Delete all read mail in the folder.
Delete all※2	Delete all received or sent mail.

※1 Deleting only displayed mail at each 2in1 mode.
※2 Deleting all mail for both Address A and Address B and SMS for both Number A and Number B within the folder, regardless of the 2in1 mode.

Example: Deleting received mail

1 From the Mail menu, select [Inbox] and press ▤.

To delete all received mail
From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To delete all read mail
From the Function menu, select [Delete] → [Delete read msg], enter the Security code, and select [Yes].

2 Select a folder and press ▤.

The received mail list appears.

To delete all read mail in the folder
From the Function menu, select [Delete] → [Delete read msg], enter the Security code, and select [Yes].

To delete all mail in the folder
From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To delete several mails
From the Function menu, select [Delete] → [Select&delete], select mails, press 📷 (Complete), and select [Yes].

3 Select mail and press ✉ (Func).

The Function menu appears.

4 Select [Delete] → [Delete one] → [Yes] and press ▤.

The selected mail is deleted.

Mail

Displaying i-αppli Mail as Regular Mail

i-αppli mail can be displayed as regular mail. If after the i-αppli with mail software is deleted, mail saved in the folder of the i-αppli with mail can be displayed in the same way as regular mail.

Example: Displaying received i-αppli mail

1 From the Mail menu, select [Inbox] and press ▤.

2 Select the folder of i-αppli with mail and press ✉ (Func).

The Function menu appears.

3 Select [i-mode mail form] and press ▤.

The i-αppli mail can be displayed as regular mail.

Checking the Number of Mail Saved

The number of mail saved can be checked for each folder.

Example: Checking the number of received mail saved

1 From the Mail menu, select [Inbox] and press ▤.

2 Select a folder and press ✉ (Func).

The Function menu appears.

3 Select [Memory status] and press ▤.

```
Memory status
        Folder      All
 ✉         1         1
 📬        22        55
 ✉🔒       2        10
Ttl       25        66
```

The number of received mail saved in the selected folder and the total number of received mail saved are displayed.

Received mail

✉	Number of unread mail
📬	Number of read mail
📬🔒	Number of protected read mail

Sent mail

✉	Number of sent mail
✉🔒	Number of protected sent mail

Saved mail

The number of saved mail in the selected folders and the total number of saved mail are displayed.

Sorting Mail

Received or sent mail in a folder can be sorted for display temporarily.

Example: Sorting received mail

1 Press ✉ (Func) in the received mail list.

The Function menu appears.

2 Select [Sort] → a sorting order and press ▤.

Received mail

[Date]:
Sort mail from newest to oldest received date.

[From address]:
Sort mail by the sender's mail address in alphabetical order.

[Subject]:
Sort mail by the subject in Japanese alphabetical order.

[Size]:
Sort mail by the mail file size from the largest (including an obtained file attachment).

Sent mail

[Date]:
Sort mail from newest to oldest sent date.

[To address]:
Sort mail by the recipient's mail address in alphabetical order.

[Subject]:
Sort mail by the subject in Japanese alphabetical order.

[Size]:
Sort mail by the mail file size from the largest (including a converted file attachment).

The mail is listed in the selected order.

● When you select [Subject], sorting may not be performed exactly in Japanese alphabetical order if, for example, some subjects contain a mixture of full-width and half-width characters. For SMS, sorting may not be performed exactly in Japanese alphabetical order because it is treated as mail without the subject.

Setting the Mail Function of the FOMA Terminal <Mail setting>

● When 2in1 is set to the B mode, the following functions are not available.

- Sort outbox
- Signature
- Mail list
- Clear Send/Recv ranking
- Edit signature
- Recv option setting
- Attached file pref.

Setting How to Display a List of Mails

You can select the display style of Inbox, Outbox, and Draft lists using the following four methods. The set display style is applies to all folders.

```

1 From the Mail menu, select [Mail setting] → [Mail list setting] and press ▭.

2 Select the display style and press ▭.

The display style of a mail list is set.

- ● When [2lines+body] or [1line+body] is set, the beginning of the mail at the cursor is displayed.
  Even if the mail is previewed, the status is still to be read.
- ● For the Draft list, the preview display does not appear.
- ● The preview display may not appear depending on the character string (URL, etc.) in mail.
- ● When you press # in the Mail list display, the display can be changed (P.190).

Assigning Separate Folders for Mail

You can save requirements to sort received or sent mail so that they can be automatically assigned to folders. Up to 30 sorting requirements can be saved.

Example: Setting a sorting requirement for received mail

1 From the Mail menu, select [Mail setting] → [Sort inbox] and press ▭.

```
Sort inbox
❶
②
③
④
⑤
⑥
```
— Sorting requirement field

To delete a sorting requirement
Move the cursor to the sorting requirement field and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete several sorting requirements, from the Function menu, select [Delete] → [Select&delete], select sorting requirements, press ⓘ (Complete), and select [Yes]. To delete all sorting requirements, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To reorder the sorting requirements
From the Function menu, select [Reorder] → a sorting requirement, move the cursor to a folder to move to, press ▭ (Move), and press ⓘ (Complete).

To cancel editing
From the Function menu, select [Cancel].

2 Select the sorting requirement field and press ▭.

```
Sort rule1
Sorting criteria

Folder to sort into
```

3 Select the sorting method at [Sorting criteria].

[Address]:
Specify a mail address. The mail address portion after the @ mark is required. However, when you set the mail address to "phone number@docomo.ne.jp", enter the phone number only.

[Group]:
Specify a group.

[Subject]:
Enter a subject or a part of it within 100 full-width or 200 half-width characters.

[None]:
Sort mail that does not meet any specified sorting requirement.

4 Select a folder to be used for sorted mail at [Folder to sort into].

When no folder is specified
Mail is sorted to [Inbox]/[Outbox].

5 Press 🔲 (Complete).

The sorting requirement is saved.

● If mail satisfies several sorting requirements, the sorting requirement with a lower number in the list has higher priority. If you set [None] for sorting requirement, the sorting requirements lower than the number you set become invalid, and mail is sorted to the folder for which [None] is set.

● If you delete a folder for which the sorting requirement was set, [Inbox]/[Outbox] is used as a sort destination folder.

● If data saved as Secret is contained in a group that has been set as a sorting requirement, and if you receive mail from a sender or send mail to a recipient who is relevant to the data, it is saved in [Inbox]/[Outbox]. To enable the sorting requirement, set the Secret display to [ON].

● An i-αppli with mail is automatically sorted to the corresponding i-αppli with mail folder regardless of the sorting requirement.

● Mail received before the sorting requirement is set is not sorted automatically.

● When 2in1 is set to ON, the sorting requirement of the Group may become invalid.
You need to set the sorting requirement from the Address, Subject, or None.

Adding a Signature to Mail

When saved beforehand, your signature can be attached at the end of the main body of mail.

Saving a Signature

The signature attached to mail can be created and saved.

1 From the Mail menu, select [Mail setting] → [Edit signature] and press 🔲.

The Edit signature display appears.
● If you have saved a signature before, it is displayed.

2 Press 🔲 (Edit) and enter a signature.

Enter a signature within 5,000 full-width or 10,000 half-width characters.
You can enter a Deco mail pict. to compose Deco-mail.

3 Press 🔲 (Complete).

The signature is saved.

● You can also decorate a signature (P.180).

Adding a Signature Automatically

The saved signature can be automatically attached to the main body when you compose mail.

1 From the Mail menu, select [Mail setting] → [Signature] and press 🔲.

2 Select [Auto]/[No] and press 🔲.

The Signature is set.

● Even if the Signature is set to [No], you can attach the signature manually. From the Function menu in the Input text display, select [Add signature].

● Even if the Signature is set to [Auto], you cannot attach a signature to a reply mail using the Quote function or a forwarded mail.

Setting the Type of Mail/Message to be Checked

You can set whether to receive mail, Message R, and Message F when making inquiries to the i-mode center.

Example: Setting the i-mode inquiry set for mail

1 From the Mail menu, select [Mail setting] → [Common setting] → [i-mode inquiry set] and press 🔲.

```
i-mode inquiry set
Mail       Valid  ▼
MessageR   Valid  ▼
MessageF   Valid  ▼
```

2 Select [Mail] → [Valid]/[Invalid] of the i-mode inquiry set.

The i-mode inquiry set is set.

Setting to Select and Receive Mail

You can set whether to selectively receive i-mode mail.

● Even if the Recv option setting is [ON], all mail is received if you use the Check new message. If you do not want to receive mail, set [Mail] to [Invalid] in the i-mode inquiry set (P.196).

1 From the Mail menu, select [Mail setting] → [Recv option setting] and press 🔲.

The Recv option setting display appears.
[ON]:
Sent mail is held at the i-mode center and not received by the FOMA terminal. To receive, use the Receive option (P.186).
[OFF]:
Sent mail is received automatically by the FOMA terminal.

2 Select [ON]/[OFF] and press 🔲.

The Recv option setting is set.

Setting a Mail List

By saving mail addresses in a mail list, you can send mail to all members in the list at the same time.
Up to 10 mail lists can be saved. Up to five mail addresses can be saved in each mail list.

1 From the Mail menu, select [Mail setting] → [Mail list] → a mail list and press ▤.

```
List setting
List
    リスト5
Member list      0/5
```

2 Enter a list name at [List].

Enter a list name within eight full-width or 16 half-width characters.

3 Select [Member list] and press ▤.

```
Friend
❶
2)
3)
4)
5)
```
←──Member field

To delete a member

Move the cursor to the member field and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete all members, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

4 Enter the mail address or the phone number in the member field.

Enter a mail address or phone number within 50 half-width alphanumeric characters and symbols.

5 Press ⊡ (Complete).

The member list is set.

6 Press ⊡ (Complete).

The mail list is set.

To delete a mail list

Move the cursor to a mail list in the Mail list display and from the Function menu, select [Delete one] → [Yes]. To delete several mail lists, from the Function menu, select [Select&delete], select mail lists, press ⊡ (Complete), and select [Yes]. To delete all mail lists, from the Function menu, select [Delete all], enter the Security code, and select [Yes].

● Even if you change the contents of the Phonebook after saving a member to the mail list, the saved contents on the mail list do not change.

Playing a Melody Automatically from Mail

The melody can be set to be played back automatically when displaying mail or message.

1 From the Mail menu, select [Mail setting] → [Common setting] → [Melody auto play] and press ▤.

2 Select [ON]/[OFF] and press ▤.

The Melody auto play is set.

● When mail has several melody attachments, the melodies are played back in the order they were attached to the mail. Melodies in the MFi format has lower priority than those in the SMF format.
● When the Manner mode is set or when the message is displayed automatically, the Melody auto play is disabled.

Setting the Receiving Operation during Multitasking

You can set whether the incoming mail or received mail display should appear when you receive mail, SMS, or Message R/F while you are using the FOMA terminal for other tasks.

1 From the Mail menu, select [Mail setting] → [Common setting] → [Dur multi task disp] and press ▤.

[Prefer alarm]:
Display the incoming mail or received mail display.

[Prefer operat.]:
Do not display the incoming mail or received mail display. "✉", "ℝ", or "𝔽" flashes while you are receiving mail/message and "✉", "Ⓢ", "ℝ", or "𝔽" appears after reception.

2 Select [Prefer alarm]/[Prefer operat.] and press ▤.

The receiving operation during multitasking is set.

● Regardless of the setting, SMS is received with [Prefer operat.] while placing (originating)/receiving a voice, videophone, or PushTalk call, during a voice call, videophone call, or PushTalk communication, while recording a still image/movie, running i-αppli, or receiving mail.

Enabling the Receiving of a File Attachment

You can set whether to automatically receive the file attached to i-mode mail.

1 From the Mail menu, select [Mail setting] → [Attached file pref.] and press ▤.

```
Attached file pref.
Image      Valid  ▼
Melody     Valid  ▼
i-motion   Valid  ▼
ToruCa     Valid  ▼
PDF        Valid  ▼
Tool data  Valid  ▼
Others     Valid  ▼
```

2 Select [Valid]/[Invalid] for each item.

[Valid]:
Automatically receive a file attachment.

[Invalid]:
Do not automatically receive a file attachment. To obtain a file attachment, from the Inbox display, select "📎" (P.189).

The Attached file pref. is set.

● Even if you set the Attached file pref. to [Valid], a file attachment exceeding 100K bytes is not received automatically.

Deleting the Send/Receive Ranking List

Up to 20 each of most frequent senders and recipients are automatically saved in the Send and Receive ranking lists. You can select a recipient from this list when you compose mail. The Send and Receive ranking lists can be cleared at once.

Example: Deleting the Receive ranking list

1 From the Mail menu, select [Mail setting] → [Clear Recv ranking] and press ▤.

To delete the Send ranking list
From the Mail menu, select [Mail setting] → [Clear Send ranking].

2 Select [Clear all] and press ▤.

All Receive ranking list data is deleted.

Receiving a Message <Receive message>

When a message is received while in the stand-by display, the contents of the message are automatically displayed. Up to 20 Message R and Message F each can be saved in the FOMA terminal.

When receiving a message, "R"/"F" /"R" flashes.

Receiving
MessageR

Received

When receiving is completed, "R"/"F"/"R" is displayed, the indicator flashes, the ring tone sounds, and the number of received messages is displayed.
The contents of the message appear automatically after about 15 seconds. The display before receiving reappears after about 15 seconds when no operations are made.

● Messages that are automatically displayed are saved as unread.

● When the number of saved received messages has reached 20 and a new message is received, the unprotected message is overwritten from the oldest.

● You can also disable Auto-display of messages (P.199).

● Messages are held at the i-mode center when "R", "F", "R", "F", "R", "F", "R", or "R" appears (sometimes "R", "F", "R", "R", "R", "R", "R", or "R" do not appear even if messages are held at the i-mode center).
If the maximum number of messages is held at the i-mode center, "R", "F", "R", "F", "R", "R", "R", "R", "R" appears. In this case, perform the Check new message after checking contents of the unread messages, delete unnecessary messages, and cancel protection of the messages.

● Message R/F that has been sent to you in the following situations is held at the i-mode center.
- During a videophone call
- When the FOMA terminal is powered off
- When the FOMA terminal is outside of the i-mode service area
- During PushTalk communication
- While receiving SMS
- While the Self mode is set
- While the Omakase Lock is set
- During the infrared communication
- During the iC communication
- While updating the software
- While connected to the FirstPass Center
- While connected to the Data Security Service Center

Setting Auto-display

You can set to display the contents of the message automatically when it is received while in the stand-by display. You can also select which message should be displayed first when receiving both Message R and Message F at the same time.

1 From the Mail menu, select [Mail setting] → [Common setting] → [Auto-display] and press ▤.

[Prefer msgR]:
  Display automatically Message R first when receiving Message R and Message F at the same time.

[MessageR only]:
  Display automatically Message R only.

[Prefer msgF]:
  Display automatically Message F first when receiving Message R and Message F at the same time.

[MessageF only]:
  Display automatically Message F only.

[Display off]:
  Do not display automatically.

To set from the i-mode menu
  From the i-mode menu, select [i-mode setting] → [Common setting] → [Auto-display].

2 Select a display method and press ▤.

The Auto-display is set.

Checking a New Message

<Check new message>

New messages held at the i-mode center while the FOMA terminal is powered off or outside of the i-mode service area can be checked.

● Depending on the radio wave condition, you may not be able to check new messages.

1 Press ✉ (Mail) for over a second in the stand-by display.

The FOMA terminal is connected to the i-mode center, and an inquiry result is displayed.

To check messages
  Select [MessageR] or [MessageF].

● You can select an inquiry item (P.196).

Displaying a Message <Message R/Message F>

The list of received messages can be displayed.

1 From the Mail menu, select [Inbox] → the [MessageR]/[MessageF] folder and press ▤.

```

  To display the previous or next message

  Use ◀ to display the previous message or ▶ to display the next message.

Protecting a Message

Message R or Message F can be protected from being overwritten.

- An unread message cannot be protected.

Example: Protecting Message R

1 From the Mail menu, select [Inbox] → the [MessageR] folder and press ▤.

  To protect Message F

  From the Mail menu, select [Inbox] → the [MessageF] folder.

  To set from the i-mode menu

  From the i-mode menu, select [MessageR/F] → the [MessageR]/[MessageF] folder.

2 Select a message and press ✉ (Func).

  The Function menu appears.

  To cancel the protection

  Move the cursor to the protected message and press ✉ (Func).

3 Select [Protect ON/OFF] → [Yes] and press ▤.

  The message is protected and "✉" changes to "🔒".

Deleting a Message

You can delete messages using four methods.

Example: Deleting Message R

1 From the Mail menu, select [Inbox] → the [MessageR] folder and press ▤.

  To delete Message F

  From the Mail menu, select [Inbox] → the [MessageF] folder.

  To delete from the i-mode menu

  From the i-mode menu, select [MessageR/F] → the [MessageR]/[MessageF] folder.

  To delete all messages

  From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

  - In the received mail list, from the Function menu, select [Delete] to delete a message.

  To delete all read messages

  From the Function menu, select [Delete] → [Delete read msg], enter the Security code, and select [Yes].

  - In the received mail list, from the Function menu, select [Delete] to delete a message.

  To delete several messages

  From the Function menu, select [Delete] → [Select&delete], select messages, press 🔳 (Complete), and select [Yes].

2 Select a message and press ✉ (Func).

  The Function menu appears.

3 Select [Delete] → [Delete one] → [Yes] and press ▤.

  The selected message is deleted.

⬤ You can delete all messages or read messages by selecting [Delete] from the Function menu at the folder list display of received mail.

What is Early Warning "AreaMail"? (to be offered)

Area Mail is a service that allows you to receive mail such as the urgent earthquake news flash delivered by the Japan Meteorological Agency.

- You can receive Area Mail without subscribing to the i-mode service.

<Usage precautions>
- To receive Area Mail, you need to set the Receive setting.
  ※ To set the Receive setting of Area Mail, see P.201.
- You may not be able to receive Area Mail in the following cases.
  - During a call (voice/videophone call)
  - During the packet communication (i-mode, data, or PushTalk communication)
  - While updating the software
  In the following cases, you cannot receive Area Mail at all.
  - While the Omakase Lock is set
  - While the international roaming service is used
  - While the Self mode is set
  ※ The message which cannot be received because of the reasons such as above ones, you cannot receive it again.

Receiving Early Warning "AreaMail" <Receive Area Mail>

The FOMA terminal automatically receives Area Mail when it is sent. You can save up to 30 received Area Mails in [Inbox] separated from up to 1,000 mails of the normal received mail. When there are already 30 received Area Mails, the unprotected read mail from the oldest one is deleted.

```
Received
Area Mail
```

When Area Mail is received, "📧" appears, the incoming indicator flashes, the beep or ring tone of Area Mail sounds, and then the screen informing the Area Mail reception appears.
After about 15 seconds, the display prior to the Area Mail reception reappears.
- Some Area Mail may activate the vibrator after the reception is completed.
- Some Area Mail may show the Area Mail main body after the reception is completed. Confirm the contents and press ▤ (OK), CLR, or ☎.

● You cannot adjust the volume of the beep of Area Mail of the urgent earthquake news flash. [Pattern1] is used for the vibrator (P.103). The vibration pattern cannot be changed. But the Beep and Beep time can be set (P.202). While the Manner mode is set, the setting follows that set in the Manner mode (P.108).
● When you receive Area Mail except Area Mail of the urgent earthquake news flash, the ring tone volume of the incoming Area Mail follows the setting of the Mail volume.

Setting Early Warning "AreaMail" <Area Mail setting>

Setting Whether to Receive Area Mail

The default setting of the Receive setting is [OFF].

1 From the Mail menu, select [Mail setting] → [Area Mail setting] → [Receive setting] and press ▤.

```
Receive setting
Notice
(Read these
Directions)

DoCoMo will provide
Area Mail in
accordance with
contract stipulations
of telecommunication
services. Area Mail
enables you to receive
area information based
```

2 Confirm the contents, select [Yes]/[No], and press ▤.

The Receive setting is set.
- You may receive messages from different areas other than your current area.

Setting to Save Receiving Entry of Area Mail

You need to save a name and Message ID of Area Mail including information you want to receive rather than Area Mail of the emergency information. To receive emergency information, you do not need to save receiving entry.

1 From the Mail menu, select [Mail setting] → [Area Mail setting] → [Receive entry] and press ▤.

```
Receive entry
Emergency information
```

To edit the settings of the set entry
Move the cursor to the set entry, press ▤ (Edit), and enter the Security code. Edit each item.

To delete the set entry
Move the cursor to the set entry, press ✉ (Delete), enter the Security code, and select [Yes].

2 Press 📱 (Create).

The Security code screen appears.

Mail

3 Enter the Security code and press 🔲 (OK).

```
Edit Area Mail name
Area Mail name
━━━━━━━━━━━━━━━━
Message ID
  ┌──────────┐
  └──────────┘
        (A400-A7FF)
```

[Area Mail name]:
　　Enter the Area Mail name within 15 full-width or 30 half-width characters.
[Message ID]:
　　Enter the Message ID from A400 to A7FF (in hexadecimal).

4 Enter each item.

5 Press 🔳 (Complete).

　The entered entry is saved.

● You cannot edit/delete the pre-saved [Emergency information].

Setting the Operation While Receiving Area Mail

You can set whether to sound the beep and activate the vibrator when you receive Area Mail of the urgent earthquake news flash, and the ring time of the beep. The Beep setting is set to [Permission] and the Beep time is set to [10sec] at the time of purchase.

1 From the Mail menu, select [Mail setting] → [Area Mail setting] and press 🔲.

```
Area Mail setting
━━━━━━━━━━━━━━━
Receive setting   ON
Receive entry
Beep setting
    Permission  ▼
Beep time   10 sec
            (01-30)
```

2 Select [Permission]/[Non-permission] at [Beep setting].

[Permission]:
　　The beep sounds and the vibrator is active.
[Non-permission]:
　　Neither the beep nor the vibrator activates.

3 Enter the ring time of the beep at [Beep time].

　Enter the ring time within 01 to 30 seconds.

Composing and Sending SMS

<Compose and send SMS>

Regardless of whether you subscribe to i-mode, you can send/receive text messages between FOMA terminals.

● You can exchange SMS with recipients/senders who subscribe to an overseas telecommunication company other than DoCoMo. See the NTT DoCoMo website for information about countries and overseas telecommunication companies you can use for sending/receiving SMS.
● Even if the Notify caller ID is set to [Not notify], an SMS recipient is notified of the sender's phone number.
● The text of sent message may not be displayed correctly on the recipient's terminal depending on the radio wave condition or the type of characters to be sent.

1 From the Mail menu, select [Compose SMS] and press 🔲.

```
Edit SMS
To
━━━━━━━━━━━━━━━

R.70char
```

2 Enter a phone number at [To].

　Enter a phone number within 21 digits.

When a recipient subscribes to an overseas telecommunication company other than DoCoMo
　　Enter "+" (press ⓪ for over a second), "Country code", and "recipient's mobile phone number", in this order. When the mobile phone number starts with "0", enter the number without "0". You can also send SMS by entering "010", "Country code", and "recipient's mobile phone number", in this order. (To reply to SMS received from overseas, use the latter method using "010".)

3 Enter a main body at [🔲].

　When you set [Language] to [JPN] for the SMS setting, enter the SMS main body within 70 characters regardless of full-width or half-width.
　When you set it to [ENG], enter the main body within 160 half-width characters (excluding `, ￮, 「, 」, ､, ･, ", and ゜). Use of the symbols (|^{}[]~¥) reduces the number of characters that can be sent.

4 Press 🔳 (Send).

　The SMS is sent.

To save SMS without sending it
　　From the Function menu, select [Save]. The SMS is saved in [Draft].

● While editing SMS, when you change the font size, from the Function menu, from [Input method] → [Font size], the setting is only applied for the font size in the matching word list. The setting for the font size of an address and main body text is changed from the next time when you activate mail (P.119).
● When you subscribe to the Multi Number Service, set [Basic Number] for the Set Multi Number.
● When 2in1 is set to the B mode, you cannot compose SMS.
● You cannot send SMS from Number B.

Receiving SMS <Receive SMS>

The FOMA terminal automatically receives SMS. You can save up to 1,000 received SMS including i-mode mail in [Inbox].

While receiving SMS, "✉" flashes.

Receiving SMS

↓ Received

When SMS reception is completed, "✉" is displayed, the incoming indicator flashes, the ring tone sounds, and the number of received SMS appears.
After about 15 seconds, the display prior to the SMS reception reappears.

Unread mail/message

↓ Received

- When returning to the stand-by display, the notification icon "✉" (New mail) appears. Press (Link) and select "✉" to display the Inbox display.

Mail	✉	1
MessageR		0
MessageF		0

- You can compose and send a reply to the received SMS and forward it (P.187).
- Some characters in a received SMS message are replaced with as many spaces (blanks).
- You cannot reply to SMS sent to Number B of 2in1.

Checking New SMS <Check new SMS>

New SMS held at the SMS center while the FOMA terminal is powered off or outside of the service area can be checked.

- Depending on the radio wave condition, you may not be able to check new SMS.

1 From the Mail menu, select [Check new SMS] and press ▤.

The FOMA terminal is connected to the SMS center and receives SMS if some are held at the center.

- Even if you check new SMS, it may take time to receive SMS.

Setting SMS <SMS setting>

※ Normally, you do not need to change the SMSC, Type of Number, and address settings.

1 From the Mail menu, select [Mail setting] → [SMS setting] and press ▤.

SMS setting

Language	
	JPN ▼
SMS report	
	Invalid ▼
Validity	3days ▼
SMSC	DoCoMo ▼
Type of Number	
	International ▼
Address	
	81903101652

[Language]:
Select whether a message to be sent is going to be displayed in Japanese or English. The number of characters that can be sent varies depending on the type of characters.

[SMS report]:
Set whether you require a delivery report when SMS is sent.

[Validity]:
Select the period for holding your SMS at the SMS center when a recipient is unable to receive the SMS you sent.

[SMSC]:
Set when you receive SMS services provided by companies other than DoCoMo.

[Type of Number]:
When you select [Others] at [SMSC], select [International]/[Unknown].
- When "✱" or "#" is included in the address entered at [Address], select [Unknown].

[Address]:
When you select [Others] at [SMSC], enter an address. You can enter up to 20 half-width digits.

2 Set each item.

3 Press ▤ (Complete).

The SMS setting is set.

i-*α*ppli

What is i-αppli?

By downloading i-αppli from its site, the i-mode terminal can be made much more useful in many ways. For example, you can enjoy many kinds of games by downloading them to it. There are also i-αppli from which you can directly save data to the Phonebook and Schedule, as well as i-αppli that can be linked with Data Box for saving/loading images.

- For details on i-αppli, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".
- Some i-αppli cannot be used when 2in1 is set to either the B or Dual mode.

Downloading i-αppli from a Site

You can download i-αppli software from sites and save it.

- You can save up to 100 i-αppli software, each software maximum 1M bytes. The number of i-αppli software that can be saved may decrease depending on the data to be saved.
- When downloading ends in failure due to the radio wave condition, the software is not saved.
- When downloading i-αppli with mail, software cannot be downloaded if there are already five mail folders for i-αppli with mail or if software using the same mail folder already exists.

1 While displaying the site, select the software and press ▭.

The software is downloaded.

When the screen for confirming whether to download the software appears

Select [Yes] or [Download].

2 Select a folder and press ▭.

The downloaded software is saved in the selected folder.

3 Perform the Software setting.

```
SW init. Setting
NW setting
            Yes ▾
ǒ αppli stand-by
            No ▾
Use location info
            Yes ▾
Program guide key
            No ▾
```

- There are items that cannot be changed depending on the software.

To connect to the network automatically when the software is started

Select [NW setting] → [Yes].

- Settings you made are applied to the NW setting and Stand-by NW setting of the Individual set (P.209).

To set the software for the i-αppli stand-by display

Select [i αppli stand-by] → [Yes].

To use the location information

Select [Use location info] → [Yes].

To set the software to start using the Program guide key when you watch One Seg

Select [Program guide key] → [Yes]. The software already set to the Program guide key is canceled.

- The software that can be set to the Program guide key is only one of the software that is able to work with One Seg.

4 Press [i] (Complete).

The screen for confirming whether to run the software appears.

5 Select [Yes] and press ▭.

The downloaded software is started.

i-αppli

206

- If you have deleted preinstalled software, you can download it from "SO@Planet".
  [i Menu] → [メニュー/検索] (Menu/Search) → [ケータイ電話メーカー] (Mobile Phone Manufacturers) → [SO@Planet] (Japanese only)
- The message "Terminal and UIM ID will be sent" may appear when downloading. Select [Download] to download. Since the "serial number of your mobile phone/UIM (FOMA card)" is sent to IP (information service providers) via the Internet, it might be accessed by a third party.
- The message "This software uses saved data" may appear when downloading. Information on the saved data to be used can be confirmed by pressing [Description]. Select [Download] to download the software. The i-αppli uses the saved data in this case.
- If you lock the IC card function while downloading an Osaifu-Keitai-compatible i-αppli, the downloading is stopped.
- After downloading i-αppli with mail, i-αppli with mail folder is automatically created in Inbox, Outbox, and Draft. The folder is named based on the downloaded i-αppli with mail and cannot be changed.
- If only the mail folder to be used remains when downloading i-αppli with mail, that folder can be used. If a folder name is different from the name of a downloaded i-αppli, this folder name is changed to the downloaded i-αppli name. If the i-αppli with mail does not use that folder, it can be deleted and a new folder can be created. Note that the i-αppli with mail cannot be downloaded without creating a new folder.
- Even if there is enough memory, you may not be able to download an Osaifu-Keitai-compatible i-αppli depending on the volume of data saved on your IC card. If you cannot perform a download, delete unnecessary software data in accordance with the confirmation screen and download the i-αppli again. (You may not be able to delete some software data.) In some cases, you may need to start up the software before deleting related data on the IC card.

Checking i-αppli Information When Downloading

The software information can be displayed when i-αppli software is downloaded from a site.

1 From the Menu, select [i-appli] → [i αppli setting] → [SW description] and press ▤.

2 Select [Yes]/[No] and press ▤.

The SW description is set.

i-αppli

Running i-αppli

<Run i-αppli>
i-αppli software can be set to run manually.

1 Press ![i] (i-mode) for over a second in the stand-by display.
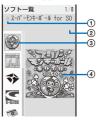

The i-αppli folder list appears.

● The following icons show the type of folder.

📁 (Yellow)	Preset folder
📁 (Blue)	User-created folder
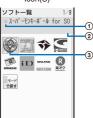

2 Select a folder and press ▤.

Icon(L)

Icon(S)

List

① 🖈(🗒)※ : Software supporting i-αppli stand-by display (While setting)

🖈(🗒)※ : Software supporting i-αppli DX stand-by display (While setting)

🖈(🗒)※ : Software supporting i-αppli with mail stand-by display (While setting)

🖈※ : Software not supporting i-αppli stand-by display

🖈※ : Software not supporting i-αppli DX stand-by display

🖈※ : Software not supporting i-αppli with mail stand-by display

▤ : Search by i-mode

※ "⊐" appears to the lower right of the icon for the software while downloading in progress.

② : Osaifu-Keitai-compatible i-αppli software (While the service is unavailable)

![SSL] : Software downloaded from an SSL site

![GPS] : GPS-compatible i-αppli software

![clock] : Software set for automatic startup

③ Software icon

● An icon assigned to each software appears. If there is no icon assigned to software, the following icons appear.

🖈 : i-αppli software

🖈 : i-αppli DX software

![ic] : Osaifu-Keitai-compatible i-αppli software

④ Title image of selected software

● A title image assigned to each software appears. If there is no title image assigned to software, the following icons appear.

🖈 : i-αppli software

🖈 : i-αppli DX software

![ic] : Osaifu-Keitai-compatible i-αppli software

3 Select the software and press ▤.

The software is started up and "🖈" or "🖈" appears.

To quit i-αppli software

Press ![phone] and select [Yes].

To check the detailed information

Move the cursor to the software and from the Function menu, select [Soft description].

● Displayed items may vary depending on the software.

● The name of the software listed in the Soft description display cannot be changed.

To display the certificate

Move the cursor to the software and from the Function menu, select [Certificates].

● Some software applications start up immediately from the site. This means that the software has been downloaded, but not saved. Also note that you cannot save some downloaded software.

● Some software applications that start up immediately from the site may require NW setting while it is running.

● The software is interrupted when the Alarm, Schedule alarm, or Booking alarm time comes while running the software. Press ☎ or ᴄʟʀ to return to the previous display.

● The software can be interrupted and the phone can be answered when you receive a voice, videophone, or PushTalk call while running the software. The previous display returns when a call is finished. When receiving a videophone or PushTalk call while i-αppli communication is in progress, the setting for the V.ph while packet or the i-mode arrival act is applied, respectively.

● When you receive mail/message/Area Mail while running the software, "☐", "ʀ", "ꜰ", or "☐☐" appears.
 When the Receive option setting is [ON], "▐" appears if you receive mail while running the software. "▐" (Mail at center) appears when you display the stand-by display. To check mail, use the Receive option (P.186).

● Images used by i-αppli software※ and some of the data you entered may be automatically sent to a server via the Internet.
 ※ Images used by i-αppli software include those recorded by the camera activated from within i-αppli software with camera interface, obtained using the infrared communication function of i-αppli software, obtained from sites or Internet home pages using i-αppli software, and obtained from the Data Box by i-αppli software.

● You can save data of some software applications in a microSD memory card. The data saved in a microSD memory card may not be used by other terminal models.
 Also, when you set [Output of Rec] to [microSD], some software may end or may not operate properly at the time the recording starts. You can check the software which can be used a microSD memory card at "Displaying i-αppli data in microSD memory card" (P.217).

● There is i-αppli software that starts the specified software so that you can enjoy the software without returning to the software list. If software to start is not specified, you need to select it. Even if software to start is specified, however, you need to download it if it is not included in the software list.

● Some software cannot start with One Seg, MUSIC Player, or Music&Video Channel simultaneously.

● Some software may be displayed in the full-screen display. While displaying in the full-screen, the icons other than the communication icon are not displayed.

Setting i-αppli Operating Conditions

● It may not be possible to change some items of the saved software.

1 From the list of i-αppli software, select the software and press ☒ (Func).

The Function menu appears.

2 Select [Individual set] and press ▤.

```
Individual setting
NW setting
        Yes ▾
Stand-by NW setting
            Yes ▾
𝟠αppli To

```

[NW setting]:
 Set whether to permit the software that uses network communication to connect to the network or alternatively set it to ask confirmation every time you start it.

[Stand-by NW setting]:
 Set whether the FOMA terminal should connect to the network when you set an i-αppli software that uses network communication as the stand-by display.

[i αppli To]:
 Set whether to start the software from the currently displayed i-αppli link.

[Use icons]:
 Set whether to use icon information (mail, message, radio wave condition, battery level, and Manner mode).

[Cng. ring tone/img.]:
 Set whether to permit the software to change the ring tone or image. Otherwise, set the software to ask for your permission every time before changing it.

[Phonebook/Records]:
 Set whether to permit the software to look up the Phonebook, Redial/Received record, unread mail, or ToruCa cards.

[Use location info]:
 Set whether to use location information.

[Program guide key]:
 Set whether to start the software using the Program guide key when you watch One Seg.

3 Set each item.

i-αppli

- If you set the NW setting or Stand-by NW setting to [No], the software may not be started and information may not be provided in a timely manner.
- If you set the NW setting or Stand-by NW setting to [Yes], i-αppli automatically connects to the network. When the FOMA terminal is connected to the network, the packet communication charge is required.
- When you set [Yes] for the Use icons, icon information might be accessed by a third party since it is sent to IP (information service providers) via the Internet just as it is the case with the "serial number of your mobile phone/UIM (FOMA card)".
- The software that can be set to the Program guide key is only one of the software that are able to work with One Seg. When you set [Yes] for the software that is not set to the Program guide key currently, the software already set to the Program guide key is canceled. The software which is activated from [Program guide] in the 1Seg menu is also changed accordingly.
- When you set [No] for the software that is set to the Program guide key currently, "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control) is set to the Program guide key.
- "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control) cannot change the Program guide key of the Individual set from [Yes] to [No].
- Depending on the settings of the Individual set, the network connection and use of icon information (such as unread mail and battery level) from i-αppli software may not be available.

Preinstalled Software

● スーパーモンキーボールモバイル for SO (SUPER MONKEY BALL Mobile for SO)

©SEGA

This is the mobile phone appli that is the very famous home action game called "スーパーモンキーボール" (SUPER MONKEY BALL).
This is the action game to roll a ball where a monkey character stays for the goal.
Clear various worlds (scenes) and daedal stages for the goal.

To operate by moving the FOMA terminal
   Moving the FOMA terminal up, down, and to the left and right allows you to operate it as using the 4-way keys of the FOMA terminal.
   The ball where the monkey stays is rolled to the direction where the FOMA terminal is moved.

To operate by a player's movement
   Check the player location by the In-camera and the ball is rolled to the direction where the player moves.

- For more details about operations, see the "スーパーモンキーボールの遊び方" (How to play SUPER MONKEY BALL).
   From the Menu, select [Data Box] → [My document] → [Preinstall] → [スーパーモンキーボールの遊び方] and press ⬛. The appli appears.

■ Warning

This appli is the game played by titling or shaking the FOMA terminal. It may injure or damage by hitting a person or object due to some reasons such as shaking too hard.
When you play it, hold the FOMA terminal tightly and do not shake or move the FOMA terminal too much or too hard.
Make sure to secure the surroundings to be safe as to play.

● 地図アプリ (Map appli)

You can check your current location, search a map by addresses or phone numbers, or use the FOMA terminal to navigate you to the destination. The i-αppli allows you to use GPS functions (P.228).

- When you use a GPS-compatible i-αppli, the location information is sent to IP (information service providers) of the i-αppli being used.
- When you use the GPS function with a GPS-compatible i-αppli, set the Use location info of the i-αppli being used to [Yes].

● FOMA通信環境確認アプリ (FOMA communication environment check i-appli)

※ The display shown is an image for explanatory purpose and may be different from the actual display.

FOMA通信環境確認アプリ (FOMA communication environment check i-appli) is an appli to check whether the FOMA terminal can be used the FOMA HIGH-SPEED Area.

- To use FOMA通信環境確認アプリ (FOMA communication environment check i-appli), you need to accept "ご利用上の注意" (Usage Precautions).
- When the communication environment is checked, different confirmation results or the result informing that it is outside of the service area may appear depending on the communication environment (such as weather, radio wave condition, or network congested) even if you use it in the same place and same time.
- When you use another function while using this appli, it may not be checked correctly.

● Gガイド番組表リモコン (G-GUIDE TV Program List Remote Control)

※ The display shown is an image for explanatory purpose and may be different from the actual display. The TV program list is displayed according to your location.

This convenient i-αppli is a TV program list integrated with an audiovisual remote control function and it is free.

It enables you to get terrestrial digital/analog or BS digital TV program information for your preferred hour from anywhere, any time. The information includes a TV program title, details of the program, start/end time, etc. You can also activate One Seg from a program list or vice versa.

If you find any program interesting, you can let the DVD hard disk recorder to schedule recording of it remotely via the Internet. (A DVD hard disk recorder that features a remote scheduling function is required. Before using this function, the initial setting for this appli is also required.)

You can also search for program information by entering a keyword such as a TV program category or your favorite TV personality. Furthermore, you can also perform remote control operation of a TV/video player/DVD player (P.247). (Some models are not compatible with this function.)

- When you use the "G-GUIDE TV Program List Remote Control" for the first time, you need to perform initial registration and accept the Terms of Use.
- An additional packet communication charge is required for using this function.
- When you use this appli overseas, you need to set the time of the FOMA terminal to Japan time.
- For details on Gガイド番組表リモコン (G-GUIDE TV Program List Remote Control), see the "Mobile Phone User's Guide 【i-mode】 FOMA version".
- You cannot use this appli when 2in1 is set to the B mode because it uses mail.

About timer recording function

You can set a timer for recording a One Seg program by selecting a program you want to record from the program list provided by this appli.

- Booking timer recordings

  Start this appli, select a program you want to record, select "＃ワンセグ録画予約" (One Seg timer recording) → "予約実行" (Execute booking) from the menu to run the reservation scheduler, and continue the operations as instructed by the displayed guidance. (You can also set a timer for recording by selecting a program and pressing ＃ after starting this appli.)

About program booking function

You can set a timer for watching One Seg by selecting a program you want to watch from the program list provided by this appli.

- Booking programs

  Start this appli, select a program you want to watch, select "視聴予約" (Book program) → "予約実行" (Execute booking) from the menu to run the reservation scheduler, and continue the operations as instructed by the displayed guidance.

About the remote timer recording function

If you have a DVD hard disk recorder that supports a remote timer recording function, you can book recording of a program from the program list provided by this appli.

To use this function, the initial setting for this appli is required.

- Making initial setting

  1. Set the DVD hard disk recorder to connect to the Internet. (For more information, see the user's manual supplied with your DVD hard disk recorder.)
  2. Start this appli, select "リモート録画予約" (Remote timer recording) from the menu, and continue the initial setting as instructed by the displayed guidance.

- Booking recording of a program

  Once you complete the initial setting, by selecting a desired program and selecting "リモート録画予約" from the menu, you can connect to the DVD hard disk recorder that has an entry in this appli via the Internet and let it to schedule recording of the program.

- An additional packet communication charge is required for using this function.
i-αppli

● ｉアプリバンキング (i-αppli Banking)

※ The display shown is an image for explanatory purpose and may be different from the actual display.

This i-αppli is for using the mobile banking service conveniently. Mobile banking is a service that allows you to check the balance and usage details of deposit or withdrawal, transfer between accounts, and make a transfer, from anywhere and at anytime. By entering the password which you set when you start this i-αppli, you can use up to two mobile banking services provided by financial institutions.

- To use a mobile banking service by ｉアプリバンキング (i-αppli Banking), you need to open an account at a financial institution which provides the mobile banking service and subscribe to a mobile banking service of each financial institution.
- An additional packet communication charge is required for using this function.
- For details, see the "Mobile Phone User's Guide【i-mode】FOMA version".
- For information on ｉアプリバンキング (i-αppli Banking), see the i-mode site.
  i-mode site ： [ｉMenu] → [メニュー/検索] (Menu/Search)→[モバイルバンキング] (Mobile banking) → [ｉアプリバンキング](i-αppli Banking)

● iD 設定アプリ (iD Setting appli)

※ The display shown is an image for explanatory purpose and may be different from the actual display.

The chargeless e-cash iD is a service that enables you to make payments for shopping by simply holding up the Osaifu-Keitai or a credit card that is employed iD to a reader. It provides you with a convenient way of shopping because you do not need to give your signature as you did before. Some credit card issuing companies support cash withdrawals as well.

- To use iD, a subscription to each credit card issuing company that adopts the iD brand and the Osaifu-Keitai whose settings are completed by the iD appli and Card appli of a credit card issuing company or a credit card that is employed iD are needed.
- For using iD by the Osaifu-Keitai, you start the iD appli, agree with "ご利用上の注意" (Usage precautions), complete the settings for the iD appli, download or start a Card appli, and then perform the settings for the Card appli.
- A fee for using a service that adopts the iD brand (annual membership fee, etc.) varies depending on each credit card issuing company.
- The packet communication charge is required for downloading the iD appli and a Card appli.
- For information on iD, see the i-mode site for iD.
  i-mode site ： [ｉMenu] → [メニュー/検索] (Menu/Search) → [iD]

● DCMXクレジットアプリ(DCMX credit appli)
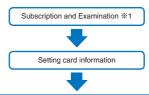

※ The display shown is an image for explanatory purpose and may be different from the actual display.

"DCMX" is an "iD" compatible credit service provided by NTT DoCoMo group. Two types of services are available in DCMX: DCMX mini in which the total amount of credit is limited to ¥10,000 per month and DCMX which allows you to use more amount than DCMX mini as well as get DoCoMo points.
DCMX mini provides immediate use of a mobile credit service with an easy subscription that can be made from within this software.

What you can do on this software

Subscription and Examination ※1

Setting card information

Using
No need for troublesome charging!
You can enjoy shopping simply by holding the mobile phone that has been configured for the service close to a reading device without signature ※3.

Checking ※2
You can check the available balance of the credit and the usage details for this month from within the software!

Changing
You can also make necessary settings from within the software when you get the card updated or the FOMA terminal changed!

※1 We make an online examination for your qualification when we receive your subscription to DCMX mini. If your subscription is to other than DCMX mini, the connection is redirected to the i-mode site for subscription information.

※2 A function, such as for checking the usage status is available only when you are a member of DCMX mini.

※3 You may be asked to enter a security code at a given condition.

- For information on the contents of the service and on how to subscribe to the service, see the i-mode site for DCMX.
  i-mode site ： [i Menu] → [DCMX iD]

● When you start this software for the first time, you are asked to agree with "ご利用上の注意" (Note on using the program). Agree with it to continue.
● Packet communication charge is required for settings and operations on this software.

Precaution on the Osaifu-Keitai-compatible i-αppli software

● Under no condition will DoCoMo be held liable for any information set in the IC card.

● 楽オク出品アプリ2 (Appli for selling items at Rakuten)
※ The display shown is an image for explanatory purpose and may be different from the actual display.

"楽オク出品アプリ2" (Appli for selling items at Rakuten) is a convenient appli for selling items at 楽オク (Rakuten Auction) from anywhere and at anytime easily.

The appli helps you sell an item with the guide display, making it easy even for first-time users. Also, there are functions such as shooting a photo, editing a photo, and saving a history to sell an item faster than doing it from the site.

● When you use the "Appli for selling items at Rakuten" for the first time, you need to accept "利用規約" (Terms of use).

● An additional packet communication charge is required for using this function.

● For details on 楽オク (Rakuten Auction), see the "Mobile Phone User's Guide【i-mode】FOMA version".

● To sell items at 楽オク (Rakuten Auction), you need to sign up for the Rakuten Membership and register as an auctioneer.

● For information on 楽オク (Rakuten Auction), see the i-mode site.

   i-mode site : [i Menu] → [楽オク♣-オークション-]

Running i-αppli Automatically

<Auto-start>

Enabling/Disabling Auto-Start

You can set whether to start i-αppli software automatically on the FOMA terminal.

1 From the Menu, select [i-appli] → [i αppli setting] → [Auto-start] and press [___].

2 Select [Yes]/[No] and press [___].

Whether to enable the Auto-start is set.

Setting the Start Date and Time

The i-αppli software can be started automatically. You can set the starting date/time and day of the week and whether to use the software's automatic start for each i-αppli software.

1 From the list of i-αppli software, select the software and press [✉] (Func).

The Function menu appears.

2 Select [Auto-start] and press [___].

[User set]:
   Set the staring date/time and day of the week for each software.

[SW set]:
   Set whether to start the software using the software's auto-start function.

3 Select [User set] and press [___].

4 Select a style of the Auto-start time at [Style].

[OFF]:
   Do not set the start time.

[D/T]:
   Start the software automatically at the specified date and time.

[Eyd]:
   Start the software automatically at the specified time everyday.

[Week]:
   Start the software automatically at the specified time on every specified day of the week.

5 Enter the date/time/day of the week.

● Enter the date/time/day of the week according to the style of the auto-start time selected in step 4.

6 Press [ⓘ] (Complete).

7 Select [SW set] and press [___].

The SW set display appears.

8 Select [Valid]/[Invalid] of the Auto-start function of the software at [Set].

The Auto-start is set.

●The Auto-start does not operate in the following cases.
   - When the FOMA terminal is powered off
   - During a call/communication
   - When the date/time is not set
   - When another function is executed
   - When the Alarm/Schedule alarm/Booking alarm is set to start at the same time as the Auto-start
   - When the Lock all/Personal data lock is set
   - When the Omakase Lock is set
   - When 2in1 is set to the B mode (when i-αppli with mail software is used or i-αppli uses mail)

Setting i-αppli for the Stand-by Display <i-αppli stand-by>

Only one supporting software can be set for the i-αppli stand-by display. The software that supports the i-αppli stand-by display is identified by "⧆/⧆/⧆".

● When the software using network transmission is set for the i-αppli stand-by display, it may not operate properly depending on the radio wave condition.

● When you set the i-αppli stand-by display from the i-αppli software list display, the image set for the stand-by display in the Stand-by display is also changed.

1 From the list of i-αppli software, select the software and press 🖂 (Func).

The Function menu appears.

2 Select [Stand-by display] → [Yes] and press ▤.

The i-αppli stand-by display is set and the icon (P.208) changes to indicate that the software is set for the stand-by display.

To operate the software set for the i-αppli stand-by display
Press CLR (⚙) in the i-αppli stand-by display.

● The message confirming whether to start the i-αppli stand-by display appears when the FOMA terminal is powered on if the i-αppli stand-by display is set. Select [No] not to start it. Select [Yes] or leave it for a while to start the i-αppli stand-by display.

● If the Lock all or Personal data lock is set or 2in1 is set to the Dual or B mode while you set the i-αppli stand-by display, the i-αppli stand-by display is temporarily terminated. When you cancel the Lock all or Personal data lock, the i-αppli stand-by display reappears.

● The Web To cannot be used from the i-αppli stand-by display.

● If an error which could terminate the i-αppli stand-by display occurs, the time of error occurrence can be checked in the stand-by error history.

● If a security error occurs in the i-αppli stand-by display, "⧆" (Stand-by SW error) appears in the stand-by display.
Terminating the i-αppli Stand-by Display

The i-αppli stand-by display is terminated and the normal stand-by display is set.

1 From the list of i-αppli software, select the software and press 🖂 (Func).

The Function menu appears.

2 Select [Stand-by display] → [Cancel] and press ▤.

[End]:
End the i-αppli stand-by display once and redisplay without terminating it.

[Cancel]:
Terminate the i-αppli stand-by display.

The i-αppli stand-by display is terminated.

Managing i-αppli

● For some software, IP (information service providers) may access the software saved in the mobile phone and directly stop the use of it. In this case, most operations including starting the software, setting the software for the stand-by display, and upgrading the software are disabled and only deleting the software and displaying the software information are available. To use the software again, you need to request IP to resume the use of the software. For more details, contact IP.

● For some software, IP (information service providers) may send data to the software saved in the mobile phone.

● When IP (information service providers) sends a stop/resume request or data to the software, the mobile phone starts to communicate with IP and "⧆" flashes. No packet communication charge is required.

Upgrading i-αppli

The software saved in the FOMA terminal can be upgraded if a newer version of the downloaded software is available on a site.

1 From the list of i-αppli software, select the software and press 🖂 (Func).

The Function menu appears.

2 Select [Upgrade] → [Yes] and press ▤.

Download of the new version of the software starts.

● Some software can be upgraded automatically when it is started.

● When the FOMA terminal is connected to the network for software upgrade, the packet communication charge is required.

Adding/Deleting Folders

Folders in which software are saved can be added or deleted. Up to 10 folders can be used to manage software and folder names can also be changed.

- You cannot delete the preset folders.

Example: Adding a folder

1 Press 🔘 (i-mode) for over a second in the stand-by display and press ✉ (Func).

The Function menu appears.

2 Select [Edit folder] → [Create folder], press ▤, and enter a folder name.

Enter a name within 10 full-width or 20 half-width characters. The folder is added.

To change a folder name
Move the cursor to a folder and from the Function menu, select [Edit folder] → [Edit folder name]. Enter a name within 10 full-width or 20 half-width characters.

To delete a folder
Move the cursor to a folder and from the Function menu, select [Edit folder] → [Delete folder]. Enter the Security code and select [Yes].

Moving i-αppli to a Different Folder

You can move software to a different folder using three methods.

Example: Moving a software

1 Press 🔘 (i-mode) for over a second in the stand-by display, select a folder, and press ▤.

To move all software in the folder
From the Function menu, select [Move] → [Move all] → [Yes] → a folder.

To move several software
From the Function menu, select [Move] → [Select&move]. Select software and press 🔘 (Complete). Select [Yes] → a folder.

2 Select the software and press ✉ (Func).

The Function menu appears.

3 Select [Move] → [Move one] → [Yes] and press ▤.

The Select move to display appears.

4 Select a folder and press ▤.

The selected software is moved to the different folder.

- "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control) cannot be moved.

Deleting i-αppli

You can delete software using four methods.

Example: Deleting a software

1 Press 🔘 (i-mode) for over a second in the stand-by display.

To delete all software
From the Function menu, select [Delete all], enter the Security code, and select [Yes].

2 Select a folder and press ▤.

To delete all software in the folder
From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To delete several software
From the Function menu, select [Delete] → [Select&delete] and select software. Press 🔘 (Complete) and select [Yes].

3 Select the software and press ✉ (Func).

The Function menu appears.

4 Select [Delete] → [Delete one] → [Yes] and press ▤.

The selected software is deleted.

- When deleting i-αppli with mail or deleting all software including i-αppli with mail, you can select whether to delete the automatically created mail folder at the same time. However, if the i-αppli with mail folder contains protected mail at the time you select to delete both of them, neither the software nor the folder can be deleted. When you select to delete only the software and keep the folder intact, you can display only the mail main body from the Function menu (P.194).
- Some Osaifu-Keitai-compatible i-αppli software may not be deleted. Some software requires to run i-αppli software and delete data stored in the IC card before you can delete the software.
- When the IC card lock is set, you cannot delete an Osaifu-Keitai-compatible i-αppli.
- "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control) cannot be deleted.
- If you delete the software that is set to the Program guide key, "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control) is set to the Program guide key.

i-αppli

Setting How to Display a List of Software

You can select the display style of a software list using the following three methods. The set display style is applied to all folders.

Icon(L)

Icon(S)

List

1 Press ✉ (Func) in the i-αppli software list display.

The Function menu appears.

2 Select [Change display] → the display style and press ▭.

The display style of an i-αppli software list is set.

Checking Error History and Trace Result

The error histories for the i-αppli stand-by display and the results output by the i-αppli trace feature can be displayed.

Stand-by err hist	When an i-αppli stand-by display is terminated by an error, such as being unable to continue operation, up to 10 records including the time of error occurrence, etc. are displayed.
Security err. hist.	When i-αppli software is terminated by an error, such as being unable to use the saved data, up to 10 records including the time of error occurrence, etc. are displayed.
Trace result	When i-αppli software supporting the trace feature is terminated, up to 16 trace results are displayed.
Auto-start err hist	When i-αppli software fails to operate the Auto-start, up to 10 records including the time of error occurrence, etc. are displayed.

Example: Displaying the stand-by error history

1 From the Menu, select [i-appli] → [i αppli history] and press ▭.

2 Select [Stand-by err hist] and press ▭.

To display the security error history
   Select [Security err. hist.].
To display the trace result
   Select [Trace result].
To display the auto-start error history
   Select [Auto-start err hist].
To delete the error history or trace result
   Press 🗑 (Delete) and select [Yes].

● To i-αppli authors
If the software does not operate properly during its programming, the trace result may be useful as a reference.

Displaying i-αppli Data in microSD memory card <i-αppli(microSD)>

You can display i-αppli data saved in the microSD memory card, using a folder name.

1 From the Menu, select [i-appli] → [i αppli(microSD)] and press ▭.

```
δαppli data
■Folder1
▨Folder2
▨Folder3
▨Folder4
```

The i-αppli(microSD) folder list display appears.

To delete a folder

Move the cursor to a folder and from the Function menu, select [Delete folder]. Enter the Security code and select [Yes].

2 Select a folder and press ▭.

The SW description display appears.

Using Various i-αppli Functions

Using the Camera Function from i-αppli

You can use the camera function (P.142) from the software running on the FOMA terminal.

- Images are used and saved in the software.
- Items that can be set and the startup procedure of the camera vary depending on the software.

1 While running the software, start the camera function.

The Camera mode display appears.

2 Point the camera at the object and press ▭.

The image is recorded.

Using the Bar Code Reader from i-αppli

You can use the bar code reader (P.157) from the software running on the FOMA terminal.

- The startup procedure of the bar code reader varies depending on the software.
- The scanned data may be used in the software.

1 While running the software, start the bar code reader.

The Bar code reader display appears.

2 Locate at the JAN/QR code at the center of the display and press ▭.

The JAN/QR code is scanned.

Using Infrared Communication from i-αppli

You can use the infrared communication (P.295) from the software running on the FOMA terminal.

- There are some data that cannot be exchanged even if the other device is equipped with the infrared communication function.
- The startup procedure of the infrared communication varies depending on the software.

1 While running the software, start the infrared communication.

2 Select [Yes] and press ▭.

The infrared communication is started.

Obtaining a ToruCa Card from i-αppli

You can obtain ToruCa cards from the software running on the FOMA terminal and save them.

- You can obtain up to 100 ToruCa or ToruCa(detail) cards each up to 1K bytes for a ToruCa card or 100K bytes for a ToruCa(detail) card. The number of cards that can be obtained may decrease depending on the data to be obtained.
- The obtaining method of ToruCa cards varies depending on the software.

1 While running the software, select a ToruCa card and press ▭.

The screen for confirming whether to save data appears.

2 Select [Yes] and press ▭.

The ToruCa card is obtained.

Saving the Alarm from i-αppli

You can save the Alarm from the software running on the FOMA terminal.

1 While running the software, perform the settings of the Alarm.

2 Select [OK] and press ▭.

The Alarm is saved.

Osaifu-Keitai/ToruCa

What is Osaifu-Keitai?

"Osaifu-Keitai" provides convenient i-mode functions (i-mode FeliCa) that can be performed using the IC card inserted in an i-mode terminal.

FeliCa adopts a contactless IC card technology that enables data to be read/written just by scanning.

You can simply hold up your Osaifu-Keitai to a reading device in stores that provide the FeliCa service to pay using e-money, or use it as an airplane ticket or point card. With features like Osaifu-Keitai, your mobile phone becomes an increasingly handy tool.

This latest FeliCa is even more convenient to use compared with previous versions of the FeliCa-compatible contactless IC card. For example, you can deposit e-money in Osaifu-Keitai on the IC card, and check the balance and purchase history using communications.

※ To use Osaifu-Keitai-compatible services, you need to make the necessary settings using i-αppli software (IC appli) supporting IC card function (check with IP (information service providers) for more details).

※ For precautions on the use of each Osaifu-Keitai-compatible service, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

● The data on the IC card could be lost/changed due to an Osaifu-Keitai trouble (Note that, as a rule, when your Osaifu-Keitai is left with us such as for repairs, we can take it only when all data is deleted. Therefore, you are requested to delete the data yourself). You are requested to use the backup services provided by IP (information service providers) to support for reissuing, restoring, holding temporarily, or transferring data except transferring data by the iC transfer service. Check with IP (information service providers) whether the backup service is provided, for the usage conditions (such as necessary prior procedures or fees), or whether the iC transfer service is supported beforehand because those vary from one service to another. Please make sure to use the services supporting the backup services for important data.

● DoCoMo shall not be liable for any data loss/change of the information saved on the IC card or any damage occurred relating to using Osaifu-Keitai-compatible services regardless of any reasons such as trouble or changing to another FOMA terminal.

● If you should lose the Osaifu-Keitai or have it stolen, immediately contact the Osaifu-Keitai-compatible service provider you use for operations which have to be done in this situation. For this FOMA terminal, both the Omakase Lock (P.127) and IC card lock (P.226) can be used.

What is the iC transfer service?

The iC transfer service※1 is a service provided for transferring all data stored on the IC card at once※2 to a new Osaifu-Keitai※3 when the Osaifu-Keitai is replaced such as for changing to another FOMA terminal or trouble repair. Once the data stored in the IC card is transferred to the new Osaifu-Keitai, you can use Osaifu-Keitai-compatible services by simply downloading the Osaifu-Keitai-compatible i-αppli.

You can use the iC transfer service at our service counter of your local DoCoMo shop, etc.

For details, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

※1 There is a processing charge for the use of the iC transfer service. (There are some cases where no charges apply.) Packet communication charges apply for IC appli downloads and various settings.

※2 There are some Osaifu-Keitai-compatible services that do not support the all data transfer function. Unsupported services are deleted when you use the iC transfer service. Therefore, utilize the backup service of each Osaifu-Keitai-compatible service or delete them before you use the iC transfer service.

※3 The iC transfer service can be used only the Osaifu-Keitai where the data is transferred to has to be the compatible model with the iC transfer service.

Starting an Osaifu-Keitai-compatible i-αppli

You have access to useful functions, for example, reading/writing data on the IC card using an Osaifu-Keitai-compatible i-αppli in order to deposit e-money (such as train ticket deposit) or look up the balance or purchase history from the mobile phone.

● When you start an Osaifu-Keitai-compatible i-αppli software for the first time or download one, the message "Current UIM necessary to use IC card?" appears. If you select [Yes], you cannot use the IC card function without inserting the associated UIM.
When you use the FOMA terminal with another UIM, you once need to delete all Osaifu-Keitai-compatible i-αppli software with the associated UIM inserted in the FOMA terminal to use the IC card function.

1 From the Menu, select [Osaifu-Keitai] → [IC card content] and press ▤.

2 Select the software and press ▤.
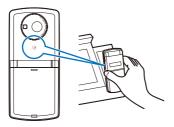

The software is started up and "📶" or "📵" appears.

● Reading/writing of data on the IC card from the software is interrupted in the following cases. Partially read/written data may be discarded.
- When the time preset for the Schedule alarm, Booking alarm, or Alarm occurs
- When receiving a voice, videophone, or PushTalk call (The operation that takes place after you hang up the call may be different depending on the service you use.)
- When the battery runs out

Using the Osaifu-Keitai

When you hold up and show the FeliCa mark "⌒" side of the FOMA terminal to a reading device, you can use the FOMA terminal for payment as e-money or use it in place of a train ticket. You can use this function without starting up the associated software.

● You can use Osaifu-Keitai by holding up and showing the FeliCa mark to a reading device during a call or i-mode connection. You cannot start the software.
● Holding up and showing the FeliCa mark to a reading device may cause the associated software to be executed.

When the FOMA terminal comes within the communication range with the reading device, the FeliCa Sign lights in green. The vibrator vibrates when the communication starts.

● If the FeliCa mark on the FOMA terminal is not recognized by a reading device, move the terminal back and forth and side to side as you hold it up to the device.
● Even if the FOMA terminal is powered off, you can use the Osaifu-Keitai by holding up and showing the FeliCa mark to a reading device. You cannot use it if the battery pack is not attached. You may not be able to use Osaifu-Keitai if the attached battery pack has not been used for a long period of time or has not been charged after the battery alarm was sounded. In this case, charge the battery pack and power on the FOMA terminal. When the FOMA terminal is powered off, you cannot start an Osaifu-Keitai-compatible i-αppli to read/write data on the IC card.
● Note that if you leave the FeliCa Sign lighting, the battery drains faster.
● When the FOMA terminal comes within the communication range with the reading device while charging the battery, the Charge indicator and FeliCa Sign light at the same time.

What is ToruCa?

ToruCa is an e-card that can be obtained using Osaifu-Keitai. This convenient e-card can be used for applications such as flier, restaurant card, or coupon.
You can obtain ToruCa cards from a reading device or site. These e-cards can be easily exchanged by way of e-mail, infrared communication, or the microSD memory card.
The ToruCa card you obtained is saved in [ToruCa] of the [Osaifu-Keitai] menu.
You need a ToruCa-compatible terminal to use ToruCa. For details, see the "Mobile Phone User's Guide 【i-mode】FOMA version".

Flow of ToruCa Operation
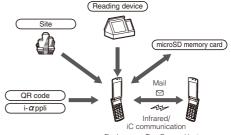

Hold up and show the Osaifu-Keitai to a reading device in order to obtain a ToruCa card.
When the FOMA terminal comes within the communication range with the reading device, the FeliCa Sign lights in green. The vibrator vibrates and the FeliCa Sign flashes when the communication starts.

Select an obtained ToruCa card from the ToruCa list.

Methods for Obtaining a ToruCa Card

Exchange a ToruCa card between i-mode terminals

● When you exchange a ToruCa card using i-mode communication, the regular packet communication charge is required.
● Some ToruCa cards may not allow you to update or redistribute using mail or infrared communication, etc. depending on the settings by IP (information service providers).

Obtaining a ToruCa Card

<Obtain a ToruCa card>

You can hold up and show the FOMA terminal to a reading device to obtain a ToruCa or ToruCa(detail) card.

- You can obtain up to 100 ToruCa cards, each up to 1K bytes for a ToruCa card and up to 100K bytes for a ToruCa(detail) card. The number of ToruCa cards that can be obtained may decrease depending on the data to be obtained.
- While the IC card lock is set, you cannot obtain a ToruCa card from a reading device.

When you obtain a ToruCa card from a reading device, the FeliCa Sign flashes in green, a beep sounds to notify you that the card has been obtained, the ToruCa card is displayed, and the previous display reappears after about 15 seconds. The notification icon "🔔" (New ToruCa) appears in the stand-by display.

To display the ToruCa card
Press ▤ (Link) in the stand-by display and select "🔔".

● Some ToruCa cards may not allow you to send mail with ToruCa cards attached, send data using iC or infrared communication, or copy them to the microSD memory card.

Displaying a ToruCa Card

<Display ToruCa>

You can display a saved ToruCa or ToruCa(detail) card any time. You can also obtain a ToruCa(detail) card from the ToruCa card.

1 From the Menu, select [Osaifu-Keitai] → [ToruCa] and press ▤.

The ToruCa folder list appears.
- The following icons show the status of the folder.

📁 (Yellow)	Preset folder
📁 (Blue)	User-created folder

- If there is an unread ToruCa card, "🔔" appears at the lower right of the icon.

2 Select a folder and press ▤.

Obtained date/time
Index
Category icon

The ToruCa list appears.
- The following icons show the status of the ToruCa card.

🔔/🔕	Unread ToruCa card/Expired unread ToruCa card
📖/📕	Read ToruCa card/Expired read ToruCa card

3 Select a ToruCa card and press ▤.

Index
Category icon

4 Select [詳細] (Detail) → [Yes] and press ▤.

You obtain a ToruCa(detail) card.

To update a ToruCa(detail) card to the latest status
From the Function menu, select [Updated ToruCa] → [Yes].

To save data such as a phone number in the Phonebook
Move the cursor to the phone number, etc. and from the Function menu, select [Add to phonebook].
- Follow the same steps as in "Saving the Redial/Received Record in the Phonebook" (P.94, step 4 to 7).

● When you obtain a ToruCa card from a reading device while displaying a list such as the ToruCa list, the ToruCa folder list appears. Select [ToruCa] once again to display the obtained ToruCa card.

Managing ToruCa Cards

● You cannot move, sort, or search a ToruCa card in the [Used] folder.

Adding/Deleting Folders

You can create and delete a folder for saving a ToruCa card. You can manage up to 22 folders. You can also change the name of a folder or sort folders in the list.

● You cannot delete or change the names of the preset folders.

Example: Adding a folder

1 Press 🖂 (Func) in the ToruCa folder list.

The Function menu appears.

2 Select [Edit folder] → [Create folder], press ▭, and enter a folder name.

Enter a folder name within 10 full-width or 20 half-width characters.
The folder is added.

To change a folder name
Move the cursor to the folder and from the Function menu, select [Edit folder] → [Edit folder name]. Enter a folder name within 10 full-width or 20 half-width characters.

To reorder the folders
From the Function menu, select [Edit folder] → [Reorder folders] → a folder. Move the cursor to a position to move to, press ▭ (Move), and press 🔒 (Complete).

To delete a folder
Move the cursor to the folder and from the Function menu, select [Edit folder] → [Delete folder], enter the Security code, and select [Yes].

Moving a ToruCa Card to Another Folder

You can move ToruCa cards to another folder using three methods.

● You cannot move a ToruCa card to [Used].

Example: Moving a ToruCa card

1 From the ToruCa folder list, select a folder and press ▭.

To move all ToruCa cards in the folder
From the Function menu, select [Move] → [Move all] → [Yes] → a folder.

To move several ToruCa cards
From the Function menu, select [Move] → [Select&move], select ToruCa cards, and press 🔒 (Complete). Select [Yes] → a folder.

2 Select a ToruCa card and press 🖂 (Func).

The Function menu appears.

3 Select [Move] → [Move one] → [Yes] and press ▭.

The Select move to display appears.

4 Select a folder and press ▭.

The selected ToruCa card is moved to another folder.

Deleting a ToruCa Card

You can delete ToruCa cards using four methods.

Example: Deleting a ToruCa card

1 From the Menu, select [Osaifu-Keitai] → [ToruCa] and press ▭.

To delete all ToruCa cards
From the Function menu, select [Delete all], enter the Security code, and select [Yes].

2 Select a folder and press ▭.

To delete all ToruCa cards in the folder
From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To delete several ToruCa cards
From the Function menu, select [Delete] → [Select&delete], select ToruCa cards, press 🔒 (Complete), and select [Yes].

3 Select a ToruCa card and press 🖂 (Func).

The Function menu appears.

4 Select [Delete] → [Delete one] → [Yes] and press ▭.

The selected ToruCa card is deleted.

Sorting the List

You can temporarily sort the ToruCa cards in a folder and display them.

1 Press 🖂 (Func) in the ToruCa list.

The Function menu appears.

2 Select [Sort] → a sorting order and press ▭.

[Date]:
Sort by obtained date/time from newest to oldest.
[Genre]:
Sort by genre that identifies the type of ToruCa.
[Index]:
Sort by index in Japanese alphabetical order.
[By kana]:
Sort by "kana" in the data saved on a ToruCa card.
The ToruCa cards are displayed in accordance with the selected sort method.

● When you sort ToruCa cards using [Index], the order of sorting may not follow the Japanese alphabetical order if both full-width and half-width characters are used.

Searching a ToruCa Card

You can search for ToruCa cards by genre.

1 Press ☑ (Func) in the ToruCa folder list.

The Function menu appears.

To search for ToruCa cards in the folder
    Press ☑ (Func) in the ToruCa list.

2 Select [Search] and press ▭.

```
Select category
Restaurant
Town info
Supermarket
travel/recreation
fashion/accessory
beauty/relaxation
game/horoscope
hobby/entertainment
Education
Others
```
←—Category icons

3 Select a genre and press ▭.

The search result appears.

To delete all searched ToruCa cards
    From the Function menu, select [Delete] → [Delete all item], enter the Security code, and select [Yes].

To move all searched ToruCa cards
    From the Function menu, select [Move] → [Move all item] → [Yes] → a folder.

Setting the ToruCa Details

<ToruCa setting>

Setting Whether to Obtain a ToruCa Card

You can set whether to obtain ToruCa cards from a reading device or using the iC communication.

1 From the Menu, select [Osaifu-Keitai] → [Settings] → [ToruCa setting] → [ToruCa receive] and press ▭.

[Yes]:
    Obtain a ToruCa card from a reading device or using the iC communication.

[No]:
    Do not obtain a ToruCa card from a reading device or using the iC communication.

2 Select [Yes]/[No] and press ▭.

The ToruCa receive is set.

Assigning Separate Folders for ToruCa Cards

You can save requirements to sort ToruCa cards obtained from a reading device so that they can be automatically assigned to folders. Up to 20 sorting requirements can be saved.

1 From the Menu, select [Osaifu-Keitai] → [Settings] → [ToruCa setting] → [Sort folder] and press ▭.

```
Sort folder
❶
②
③
④
⑤
⑥
```

To delete a sorting requirement
    Move the cursor to the sorting requirement and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete several sorting requirements, from the Function menu, select [Delete] → [Select&delete], select sorting requirements, press ⓘ (Complete), and select [Yes]. To delete all sorting requirements, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To reorder the sorting requirements
    From the Function menu, select [Reorder] → a sorting requirement, move the cursor to a folder to move to, press ▭ (Move), and press ⓘ (Complete).

2 Select a place to save the sorting requirement to and press ▭.

```
Sorting requirement1
Sorting criteria

Folder to sort into
```

3 Select the sorting method at [Sorting criteria].

[Genre]:
    Specify a genre of ToruCa cards.

[Title]:
    Specify a part of a title within 10 full-width or 20 half-width characters.

[Index]:
    Specify a part of an index within 10 full-width or 20 half-width characters.

[None]:
    Do not specify any sorting method.

4 Select a folder to be used for sorted ToruCa cards at [Folder to sort into] and press ▭.

When no folder is specified
    ToruCa cards are sorted to [ToruCa].

5 Press ⓘ (Complete).

The sorting requirement is saved.

- If a ToruCa card satisfies several sorting requirements, the sorting requirement with a lower number in the list has higher priority.
- If you delete a folder for which the sorting requirement is set, [ToruCa] is used as a sort destination folder.
- ToruCa cards received before the sorting requirement is set are not sorted automatically.
- You cannot set [Used] as a sort destination folder.
- Only ToruCa cards obtained from the reading device are sorted automatically.

Setting Whether to Automatically Recognize a ToruCa(Detail) Card

You can set whether to let a reading device recognize available ToruCa cards automatically when you hold up and show the FOMA terminal to it in order to use ToruCa.

- Up to 20 ToruCa cards are saved in [Used]. When the number of saved cards exceeds 20, the cards with the oldest date/time are deleted, in that order.

1 From the Menu, select [Osaifu-Keitai] → [Settings] → [ToruCa] → [Auto recognition] and press ▱.

[ON]:
　Available ToruCa cards are automatically recognized by the reading device and saved in [Used].
[OFF]:
　Available ToruCa cards are not recognized by the reading device.
To display the explanation about the Auto recognition
　Move the cursor to [Auto recognition] and press [ℹ] (Help).

2 Select [ON]/[OFF] and press ▱.

The Auto recognition is set.
When you select [ON]
　Select [Yes].

- When the Lock all or Personal data lock is set, a ToruCa card does not move to [Used] even if it is to be deleted regardless of the Auto recognition being set to [ON].
- If you hold up and show the FOMA terminal to a reading device with the Auto recognition set to [OFF], a message confirming whether to use the Automatic reading function or stating that the Automatic reading function is OFF may appear. To use the Automatic reading function, select [Yes] to set the Auto recognition to [ON].

Setting Whether to Check the Duplication of a ToruCa(Detail) Card

You can set the FOMA terminal to check if the ToruCa(detail) card you are trying to obtain has been obtained already when you obtain the card from a reading device.

1 From the Menu, select [Osaifu-Keitai] → [Settings] → [ToruCa] → [Duplication check] and press ▱.

[ON]:
　Check if a target ToruCa(detail) card is already obtained. Do not obtain a ToruCa card that you have obtained already. Obtain a ToruCa card only when you have not obtained it yet.
[OFF]:
　Do not check if a target ToruCa(detail) card is already obtained.

2 Select [ON]/[OFF] and press ▱.

The Duplication check is set.

Setting Whether to Notify That within the Communication Range　　　　<IC act. notice>

You can set the FOMA terminal whether to notify you of being within the FeliCa communication range or the FeliCa communication being started by vibration or the FeliCa Sign when you are close to a reading device with the FOMA terminal powered on.

1 From the Menu, select [Osaifu-Keitai] → [Settings] → [IC act. notice] and press ▱.

```
IC act. Notice
By vibrator
                    ON ▼
By LED
                    ON ▼
```

[By vibrator]:
　Set whether to activate the vibrator when the communication starts.
[By LED]:
　Set whether to turn on the FeliCa Sign when you enter the range in which communication is enabled or when the communication starts.

2 Select [ON]/[OFF] of the vibrator at [By vibrator].

3 Select [ON]/[OFF] of the FeliCa Sign at [By LED].

- When the Public mode (Drive mode) is set, the FeliCa Sign does not light and the vibrator does not operate even if the By vibrator and By LED are set to [ON].

Locking the IC Card Function

<IC card lock>

You can lock the IC card function to prevent others from using it.

1 Press ✱ (🔲) for over a second in the stand-by display.

The IC card function is locked and "🔲" appears.

To cancel the IC card lock
Press ✱ (🔲) for over a second in the stand-by display, enter the Security code, and press ▤ (OK).

Locking the IC Card Function When the FOMA Terminal Is Powered Off

You can set to automatically lock the IC card function when the FOMA terminal is powered off.

1 From the Menu, select [Osaifu-Keitai] → [Settings] → [IC card lock] and press ▤.

The Security code screen appears.

2 Enter the Security code and press ▤ (OK).

[IC card lock]:
Set whether to lock the IC card function.

[IC lock(power-off)]:
Set whether to automatically lock the IC card function when the FOMA terminal is powered off.

3 Select [Last status]/[Locked] at [IC lock(power-off)].

[Last status]:
Keep the current status even after the FOMA terminal is powered off.

[Locked]:
Lock the IC card function when the FOMA terminal is powered off.

GPS Function

Precautions on the Use of GPS Functions

- You may need i-mode subscription for the use of the GPS function.
- GPS is operated by the U.S. Department of Defense. Therefore, GPS radio wave condition may be controlled (degradation of accuracy, suspension of radio wave transmission, etc.) at the discretion of the U.S. Department of Defense.
- Note that radio waves may not be received or it may be difficult to receive radio waves in the following conditions, since GPS uses radio waves from a satellite.
  - Inside or immediately under a building
  - Inside a basement or tunnel, and below the ground or water
  - Inside a bag or box
  - High-rise building district or densely populated residential area
  - Inside or under a thick covering of trees
  - Near a high-voltage cable
  - In a car, inside a train compartment
  - Bad weather such as heavy rain or snow
  - When there are obstructions (people or objects) near a mobile phone
  - When you are covering the main display or earpiece of your mobile phone with your hand.

  The obtained location information may deviate by 300 m or more under the above conditions.
- When the FOMA terminal is outside of the service area (or it is overseas), the GPS function is not available.
- There are about 24 GPS satellites in orbit at an altitude of about 20,000 km, and each satellite takes about 12 hours to travel around the earth. Therefore, radio wave reception condition may vary depending on the date/time even if the operating environment is the same. For example, a significant deviation could occur to the location information or it may not be possible to identify a location.
- Please note that DoCoMo shall have no liabilities for any purely economic loss including those due to missing a chance to check the measurement (communication) results because of external factors (including the running out of the battery), such as a failure, malfunction, or any other problems of the FOMA terminal or the power failure.
- You cannot use the FOMA terminal as a navigation device for an aircraft, vehicle, and person. Please note that DoCoMo shall have no liabilities whatsoever even if you suffer damage or loss while performing a navigation using the location information.
- You cannot use the FOMA terminal as a high-accuracy measurement GPS. Please note that DoCoMo shall have no liabilities whatsoever even if you suffer damage or loss due to a deviation of the location information.
- The Position location, Location notice, and Location provision cannot be used in the following cases.
  - While the Lock all is set※1
  - While the Omakase Lock is set※1
  - While the Personal data lock is set※1
  - While the Self mode is set
  - When the UIM is not inserted
  - While updating the software
  - While the Key dial lock is set※2
  ※1 The Location provision is available.
  ※2 The Position location, Location provision, and Location notice from the Loc. service client list are available.

Checking Your Location

<Position location>
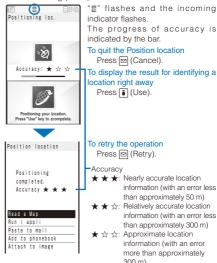

You can measure your current location to determine where you are. You can display a map based on the location information you obtain, mail the location information, or save the location information in the Phonebook.
- No communication charge is required for confirming your current location. Note, however, that there is an extra packet communication charge for displaying a map based on your current location information.

Example: Displaying a map of your current location

1 From the Menu, select [LifeKit] → [GPS] → [Position location] and press ⬛.

- You can also check your current location by pressing ⑨ for over a second in the stand-by display. After positioning, the operations follow the settings of the GPS button setting (P.238).

"⬛" flashes and the incoming indicator flashes.
The progress of accuracy is indicated by the bar.

To quit the Position location
Press ✉ (Cancel).

To display the result for identifying a location right away
Press ⓘ (Use).

To retry the operation
Press ✉ (Retry).

Accuracy
★ ★ ★: Nearly accurate location information (with an error less than approximately 50 m)
★ ★ ☆: Relatively accurate location information (with an error less than approximately 300 m)
★ ☆ ☆: Approximate location information (with an error more than approximately 300 m)

- Use the positioning accuracy as a guide. The accuracy may vary depending on the radio wave condition of the vicinity.

2 Select [Read a Map] and press ⬛.

The map of determined current location is displayed.
- After displaying the map, you can search for the neighborhood information using "ｉエリアー周辺情報－" (i-mode area –Neighbor info–). For details about "ｉエリアー周辺情報－", see the DoCoMo's website.

To use the location information with GPS-compatible i-αppli software
Select [Run i appli] → software to be used.

To paste the location information to mail
Select [Paste to mail] → [Yes].
- "⚑ location URL" that has a link to the location information is entered in the mail main body.
- The location information URL being sent is only displayed on the i-mode compatible terminals.

To save the location information in the Phonebook
Select [Add to phonebook] → [New]/[Add].
- Follow the same steps as in the Add to FOMA terminal phonebook (P.91, step 3 to 6).

To add location information on an image
Select [Attach to image] → an image from My picture of the Data Box.

Using the GPS-compatible i-αppli

<i appli>

You can use the location information with GPS-compatible i-αppli software.
- When you use a GPS-compatible i-αppli, the location information is sent to the information provider of the software being used.
- When you use the GPS function with a GPS-compatible i-αppli, set the Use location info of the software being used to [Yes].
- The method of using the location information varies depending on the software.

1 From the Menu, select [LifeKit] → [GPS] → [i appli] and press ▤.

The GPS software list display appears.

2 Select a software and press ▤.

The software is started up and "▨" or "▨" appears.

Using 地図アプリ(Map appli)

The preinstalled "地図アプリ(Map appli)" uses the GPS function and a map to display your current location or specified location, to search the information on neighborhood, and to navigate you to the destination by public transportation, walk, or car.
- An additional packet communication charge is required for using this function. It is recommended to use the Pake-Houdai/Pake-Houdai Full for this software.
- When you have deleted the software but you want to restore it, download it from "ｉエリアー周辺情報ー" (i-mode area-Neighbor info-).
- You cannot use this software when 2in1 is set to the B mode because it uses mail.
- Please note that DoCoMo will not guarantee any result such as of the accuracy and immediacy of information such as map or route.
- While driving a car, please let a person other than the driver operate it .

Basic Service and Additional Service

There are the basic services and additional services for this software.

Basic service : Services provided by DoCoMo for free of charge.

Additional service : Services provided by ZENRIN DataCom that require an additional charge.

You can use the additional services except the traffic information up to 90 days after you activate the software for the first time.

After 90 days, if you wish to keep using the additional services, you need to apply for a membership (paid) to "ゼンリン⛰地図＋ナビ" (ZENRIN Maps+Navi) provided by ZENRIN DataCom.

If you apply for a membership while still using it, you do not need to download the software again. You can keep using the software.

Menu	Contents	Up to 90 days	After 90 days
今いる場所 (Current location)	• Use the GPS function to show the map of your current location or send a map attached to mail. • Leave your footmark of your current location, follow the track, and check others' footmarks.	Free	Free
周辺を調べる (Search neighborhood)	• Search information such as shops, facilities, iD-available stores around your current location or specified location and obtain a coupon from gourmet information. • Check weather or availabilities of parking lot near the location.	Free	Free
地図を見る (View a map)	• Search a map by entering information such as keywords, a genre, address, and phone number.	Free	Free
	• Check a map of the location saved in the software, server, or Phonebook or searched before. • Save a map of a location in a server to use the information on a PC as well.	Free	Paid
ナビをする (Navigation)	• Navigate the route to the destination by public transportation, walk, or car. • Navigate the route to your house whose information is saved before.	Free	Paid
乗換案内 (Transfer information)	• Check transfer information and time table of trains. • Check the train route on a map and set an alarm before departure.	Free	Paid
設定/直感★ (Settings/ Aperch)	• Move the FOMA terminal to move a 3D map or map.	Free	Free
	• Set the items such as map and navigation displays and check how to use it.	Free	Free

Menus and Operations of the Top Display of "地図アプリ" (Map appli)

- When you use "地図アプリ" (Map appli) for the first time, the Terms of Use and precautions are displayed.
- The display shown is an image for explanatory purpose and may be different from the actual display.

Top display

Each menu is displayed in the Top display. When you close the menu, the last searched map appears.

■ After 90 days without a subscription for a membership

When you use the software for the first time after 90 days, the message informing that available functions are limited and the message inquiring for a subscription for a membership appear. When you select an additional service, those messages appear as well.

You can subscribe for a membership from the software accessed to the "ゼンリン⚑地図＋ナビ" (ZENRIN Maps+Navi) site.

Navigating the Searched Route with Sound and Display to the Destination

You can set the departure point and the destination to search the route. The route is displayed traveling by walk, public transportation, or car. After the route is searched, you can be navigated to the destination with sound and display.

1 While activating the software, press ✉ (メニュー) (Menu), select [ナビをする] (Navigation) → [ナビをする] (Navigation), and press ▤.

2 Select [出発地] (Departure point), press ▤, and set the departure point by the items below.

現在地(GPS) (Current location (GPS))	Position the current location and set it.
フリーワード検索 (By keyword)	Search by keyword.
地図上で指定 (Specify on map)	Set the departure point on the map.
TEL/〒検索 (By phone number/code)	Search by phone number/postal code.
住所一覧から (From address list)	Select an address to set.
ジャンルから (From genre)	Select a genre to set.
履歴から (From history)	Set from the previously displayed map.
登録地点から (From saved location)	Set from the location information saved in the software, server, or Phonebook.
自宅 (Home)	Set the location information on your home.
出発地の確認 (Check departure point)	Check information on the departure point.

3 Select [目的地] (Destination), press ▤, and set the destination following the similar steps at Step 2.

4 Select [時間指定] (Specify time), press ▤, and select an item below.

現時刻で指定 (Current time)	Check the route using the current time.
出発時刻指定 (Start time)	Set the start time and check the route.
到着時刻指定 (Arrival time)	Set the arrival time and check the route.
終電を利用 (Last train)	Check the route with the last train of the day.

5 Select [条件設定] (Condition), press ▤, select an item below, select [上記で設定] (Set as above), and press ▤.

乗換条件 (Transfer)	Select from [早い] (Fast), [安い] (Budget), or [楽々] (Easy) for transfer selection criteria.
徒歩ルート (Walking route)	Select from [おまかせ] (Recommended), [屋根多い] (Many roofs), or [階段少ない] (Less up-and-down) for route selection criteria.
特急利用 (Express)	Select whether to use express even if the total route distance is within 100 km.
通常利用車種 (Type of car in regular use)	Select a type of car in regular use.

6 Select [🚗🚕🚶で検索]/[🚶のみで検索] and press ▤.

You can search a route by using the total navigation: [🚗🚕🚶で検索] and the car navigation: [🚶のみで検索]. Routes (up to six routes) are displayed as a search result. If there is another transfer route, an icon shows the characteristics of the route.

Icon	Meaning
早 (Fast)	Fastest route to reach the destination.
安 (Budget)	Most budget route to reach the destination.
楽 (Easy)	Route with less numbers of transfers to reach the destination.
オススメ (Recommended)	Meet the above three conditions.
有料 (Toll)	Car route taking toll roads.
一般 (Local)	Car route taking local roads.

To save the route

Select [ルートを登録] (Save route).

7 Select a route, select [ナビ・ルート確認] (Check Navi/route) → [ナビ]/[ナビ(省電力)] (Navi/Navi(power saver)), and press ▤.

The "ご利用上の注意" (Usage precautions) appears.

To check a route

Select a route and select [ルート確認] (Check route).

To check the time table

Select a route and select [時刻表] (Time table).

8 Select [はい] and press ▤.

The navigation to the destination starts.

Display and operations of route (car)/navigation (car)

Key operation	Action
▼ 結果&設定 (Result&Settings)	Display the search result of a route (time, fee, etc.) and perform settings for the navigation.
◀ 経由地の決定 (Decide the passing point)	Search the route adding up to three passing points toward the destination.
▶ リルート (Search the route again)	Search the route from the departure to the destination again.
1 ルート消去 (Delete route)	Delete the displayed route.
2 モード切替 (Switch mode)	Switch to the intersection mode.
3 渋滞情報 (Traffic information) ※ Only for the car route	Display the traffic information linked to the displayed map.

Using the Setting/Help

1 From the menu of the Top display, select [設定/直感★] → [設定・ヘルプ], press ▤, and select items from the followings.

会員情報確認 (Check membership)	Check whether you sign up for [ゼンリン🏠 地図＋ナビ] (ZENRIN Maps+Navi).
α基本設定 (Basic settings of appli)	Set the settings related to the software itself such as the display color of the map and font size.
ナビ設定 (Navi setting)	Set the setting related to the navigation function such as リルート (Re-route) and volume of audio guidance.
自宅設定 (Set your home)	Save your home location.
履歴系クリア (Delete history)	Delete the usage history of maps and navigations.
使い方の説明/よくある質問/利用規約 (Explanation of usage/FAQ/Agreement for use)	Check the explanation of usage, FAQ, and agreement for use.

GPS Function

Providing Your Current Location Information upon Request
<Location provision>

You can provide your current location information when there is a request from another party.

- Before using the Location provision, set the Location request to [ON] or [Permission sched]. The default setting is set to [OFF]. You may also need to perform the usage settings for each service (P.234). (When you use "imadoco-search", you need to set "位置情報利用設定" (Settings to use location information) (settings for imadoco-search) in i Menu ("オプション設定" (Options) of "料金＆お申込･設定" (Charge & Subscription/Settings)).)
- To use the Location provision, you may need to subscribe to a service provider that supports this function. There may be a charge for the use of the service.
- To use the Location provision, follow the information provided by the service provider and DoCoMo's website.
- When the Location request is set to [ON] or [Permission sched], the location information may be sent to a searcher without operating the FOMA terminal.

When Your Location Information Is Requested

When the provision of the location information is requested by the preset GPS host, the Location provision is started.

- During a voice call or PushTalk communication, the vibrator does not operate.

When the settings for using each service is set to "許可" (accept)

"🏢" flashes, the Loc. provide/accept tone sounds, and the incoming indicator flashes.

To quit the Location provision
Press ✉ (Cancel).

When the settings for using each service is set to "毎回確認" (Check every time)

Select [Send Loc.].

"🏢" flashes, the Loc. provide/check tone sounds, and the incoming indicator flashes.

To quit the Location provision
Press ✉ (Cancel).

- If there is a request for your location information when the Public mode (Drive mode) is set, the FOMA terminal operates as follows.
  - When the settings for using each service is set to "許可" (accept), it is indicated only in the display and the location information is provided. The Loc. provide/accept tone, vibrator, and incoming indicator do not operate.
  - When the settings for using each service is set to "毎回確認" (Check every time), the location information is not provided.
- When the location information is requested from a person who uses "imadocokantan search", the FOMA terminal operates as follows.
  - The confirmation screen appears every time you are requested. If you select [Send Loc.], the rough positioning result is immediately notified to the person who requests it. After you select [Send Loc.], the GPS positioning display appears. The high-detailed positioning result is notified after the GPS positioning.
  - After you select [Send Loc.] and you cancel providing the location, the rough positioning result is notified to the person who requests it. In this case, the Location history is saved but location information is not displayed.
- The location information may be sent depending on the timing of cancellation.
- Even if the location information may have been sent, the service provider that supports the Location provision function may not have received it depending on the radio wave condition.
- When 2in1 is used, the location information is provided, regardless of the 2in1 mode.
- Some Service client IDs may not be displayed.

Setting Whether to Provide Your Location Information

You can set whether to accept or reject the request to provide your current location information.

1 From the Menu, select [LifeKit] → [GPS] → [GPS settings] → [Loc. request menu] → [Location request] and press ▤.

The Security code screen appears.

2 Enter the Security code and press ▤.

The Location request display appears.

[ON]:
Provide the location information to requesting party. The location information may be sent to a searcher without operating the FOMA terminal.

[OFF]:
Do not provide location information to requesting party.

[Permission schedule]:
Provide the location information to requesting party during the permitted period.

3 Select a way to provide the location information and press ▤.

The Location request is set. If you set [ON] or [Permission sche], "▨" appears.

When you select [Permission schedule]
Set a period to permit for providing location information. Enter the time both at [Start time] and [End time] in 24-hour format and select the repeat type at [Repeat]. If you set [Eyd] or [Day], enter dates both at [Start day] and [End day].

To perform the setting via the Initial setting
From the Menu, select [Settings] → [Management] → [Initial setting] → [Location request], enter the Security code, and select [Yes]/[No].

Operations When the Period to Permit for Providing Location Information is Set

Example: When the current date and time is "2007/11/23 14:00"
Starting time: 15:00   Ending time: 22:00

Settings		Period for providing location information
Repeat type	Valid period	
None specified	—	From 2007/11/23 15:00 to 2007/11/23 22:00
Everyday	Start date 2007/11/28 End date 2007/12/28	From 2007/11/28 15:00 to 2007/12/28 22:00 Everyday (from 15:00 to 22:00)
	Start date 2007/11/23 End date 2007/12/28	From 2007/11/23 15:00 to 2007/12/28 22:00 Everyday (from 15:00 to 22:00)

Setting the User-defined Host

※ Normally, you do not need to change this setting.

You can set one host for using the GPS service besides the Initial host set at the time of subscription.

1 From the Menu, select [LifeKit] → [GPS] → [GPS settings] → [Loc. request menu] → [Host setting] and press ▤.

```
Host setting
Initial host
Unregistered
```

To edit the set host
Move the cursor to the set host, press ▣ (Edit), and enter the Security code. Edit each item.

To delete the set host
Move the cursor to the set host, press ✉ (Delete), enter the Security code, and select [Yes].

To reset the host to the default setting
Select [Initial host].

2 Select [Unregistered] and press ▣ (Edit).

The Security code screen appears.

3 Enter the Security code and press ▤ (OK).

```
Register host
Host name

Host address
```

[Host name]:
Enter a host name within 99 half-width alphanumeric characters and symbols.

[Host address]:
Enter a host address within 100 half-width alphanumeric characters and symbols.

4 Enter each item.

5 Press ▣ (Complete).

The entered host is saved.

6 Select a host and press ▤.

The user-defined host is changed.

Performing Settings for Using the GPS Service

You can connect to the GPS service settings site and perform setting necessary for providing the location information.

1 From the Menu, select [LifeKit] → [GPS] → [GPS settings] → [Loc. request menu] → [Service settings] and press ▭.

The FOMA terminal is connected to the GPS service settings site.

2 Set each item.
- For details about how to set the services, contact your service provider.

● While you are connecting to the GPS service settings site, available Function menus are different from the ones displayed during i-mode. The URL history is also not recorded.

● If you connect to the GPS service settings site during international roaming, an error message appears on the display and a communication charge is required.

Notifying Your Current Location Information <Location notice>

You can notify a specific party (a service provider that supports the Location notice function) of the location information of your current location.

- To use the Location notice, you may need to subscribe to a service provider that supports this function. There may be a charge for the use of the service.
- To use the Location notice, follow the instructions provided by the service provider or on the DoCoMo's website. There is a charge for the use of the Location notice function.

1 From the Menu, select [LifeKit] → [GPS] → [Location notice] and press ▭.

The screen for selecting the method for activating the Location notice appears.

2 Select [Loc. service client] → a party to be notified and press ▭.

"▩" flashes and the incoming indicator flashes.
When the current location is notified, the location notice tone sounds and the location information is notified to a recipient.

To enter a party to be notified and notify location information
Select [Direct input], enter the service client ID, and press ▭ (OK).

To quit the Location notice
Press ✉ (Cancel).

● When 2in1 is used, the location information is notified by Number A, regardless of the 2in1 mode.

● The location information may be sent depending on the timing of cancellation.

● Even if the location information may have been sent, the service provider that supports the Location notice function may not have received it depending on the radio wave condition.

Saving a Party to Be Notified

You can save a party to be notified of your current location information as a location service client. Up to five parties can be saved.

- Make sure to enter [Loc. serv. client] and [Service client ID].

1 From the Menu, select [LifeKit] → [GPS] → [GPS settings] → [Reg. service client] and press ▭.

To display the details of a party
Move the cursor to the party and press ▭ (Detail).

To edit the information of a party
Move the cursor to the party and from the Function menu, select [Edit]. Edit each item.

To delete a party
Move the cursor to the party and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete all parties, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To save a party in the Phonebook
Move the cursor to the party and from the Function menu, select [Add to phonebook] → [Main memory]/ [UIM].
- Follow the same steps as in the Add to FOMA terminal phonebook (P.91, step 3 to 6) or in the Add to UIM phonebook (P.93, step 3 to 4).

2 Press ⓘ (Create).

[Loc. serv. client]:
Enter a name of the party to be notified.

[Service client ID]:
Enter a notified party ID specified by the service provider.

[Phone number]:
Enter a phone number.

[Auto Notice setting]:
Set whether to notify your current location automatically when you place a voice/videophone call to the number set at [Phone number].

3 Enter a name of a party to be notified at [Loc. serv. client].

Enter the name within 16 full-width or 32 half-width characters.

4 Enter a notified party ID specified by the service provider at [Service client ID].

Enter the ID within 12 half-width numeric characters including "✳" or "#".

GPS Function

5 Select [Phone number] → [Direct input], press 📠, and enter a phone number.

Enter the phone number within 26 half-width numeric characters including "＊", "#", "+", or "P".

● The phone number which is already saved as a location service client cannot be saved again.

To quote from the Phonebook
Select [Phonebook].

6 Select the notification method at [Auto Notice setting].

[Yes]:
Notify your current location automatically.

[No]:
Do not notify your current location automatically.

[Confirm]:
When you place a voice/videophone call, confirm whether to notify your current location.
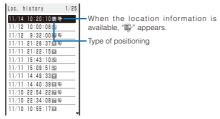

7 Press 📷 (Complete).

The party is set as a location service client.

Displaying the History of Location Positioning <Location history>

Up to 50 results of location information positioned by the Position location, Location provision, and Location notice are recorded as history. You can perform various operations from the location information recorded in the history.

● When the number of location information records exceeds 50, the records are deleted starting from the location information with the oldest date/time.

1 From the Menu, select [LifeKit] → [GPS] → [Location history] and press 📠.

```
Loc. history     1/25
11/14 10:20:10
11/12 10:00:08
11/12  9:32:00
11/11 21:28:37
11/11 21:22:15
11/11 15:43:10
11/11 15:09:51
11/11 14:49:33
11/11 14:40:39
11/10 22:54:22
11/10 22:34:08
11/10 10:55:17
```

When the location information is available, "📍" appears.

Type of positioning

● The following icons show the type of positioning used.

📍	Position location
🔼	Location notice
🔀	Location provision

To use the location information
Press ✉ (Use).
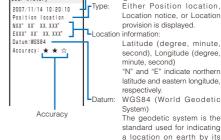

● For details about how to use the location information, see P.237.

To delete a location history record
Move the cursor to the location history record and press ✉ (Use), select [Delete] → [Delete one] → [Yes]. To delete several location history records, from the Function menu, select [Delete] → [Select&delete], select records, press 📷 (Complete), and select [Yes]. To delete all location history records, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

2 Select a location history and press 📠 (Detail).

```
Loc. history
2007/11/14 10:20:10
Position location
NXX° XX' XX.XXX"
EXXX° XX' XX.XXX"
Datum:WGS84
Accuracy: ★ ★ ☆
```

Positioning date/time

Type: Either Position location, Location notice, or Location provision is displayed.

Location information:
Latitude (degree, minute, second), Longitude (degree, minute, second)
"N" and "E" indicate northern latitude and eastern longitude, respectively.

Datum: WGS84 (World Geodetic System)
The geodetic system is the standard used for indicating a location on earth by its longitude/latitude.

Accuracy

● When the Location notice or Location provision is performed, it is recorded in the Location history even if the Position location fails or is canceled. However, note that some items are not displayed.

● A location history record for which location information is not obtained cannot be used by any function.

● Even if the result of the Location provision or Location notice is left in the history, the service provider may not have received the location information.

● When you provide your location information while 2in1 is used, the name of the party who requests the location information is displayed by each 2in1 mode following the Phonebook 2in1 setting.

● The location information and accuracy saved in the Location history may differ from those sent to the Location provision destination/Location service client depending on some reasons such as radio wave condition.

Using the Location Information from Each Function

You can display a map based on the location information added to the Phonebook, sites, screen memos, ToruCa cards, Message R/F, or images. You can also paste the location information URL to mail.

Adding the Location Information

You can add the location information to an image or the FOMA terminal phonebook or paste the location information URL in the main body of mail.

Example: Adding the location information to the mail main body by obtaining it by the Position location

1 Press ✉ (Func) in the mail main body input display, select [Rcv loc. info], and press 📠.

```
Rcv location info
From position loc.
From loc. history
From phonebook
Attach from image
```

To add the location information to the FOMA terminal phonebook
Select "📍" in the Edit FOMA terminal phonebook display.

2 Select [From position loc.], press ![key], and press ![key] (OK).

The screen for confirming whether to paste the location URL appears.

Select [From loc. history] → a location history and press ![key] (OK).

Select [From phonebook] → a phonebook.
● You cannot select it when you save the location information in the Phonebook.

Select [Attach from image] → an image from My picture of the Data Box.
● You cannot select it when you add the location information on an image.

3 Select [Yes] and press ![key].

"♪ location URL" that has a link to the location information is entered in the mail main body.

Using the Added Location Information

You can use the location information added to the image, FOMA terminal phonebook, sites, screen memos, ToruCa cards, or Message R/F.
● Items you can use vary depending on the type of data which is attached location information. The available items depending on the type of data are followings.

Type of data	Available item
Image	Read a Map, Paste to mail, Run i appli, and Add to phonebook
Phonebook	Read a Map, Paste to mail, Run i appli, and Attach to image
Site, Screen memo, ToruCa, or MessageR/F	Read a Map, Paste to mail, and Run i appli

Example: Displaying a map of the location information added to the Phonebook

1 From the Phonebook, select data → [📷Has loc. info] and press ![key].

```
Use location info
Read a Map
Run i appli
Paste to mail
Attach to image
```

2 Select [Read a Map] and press ![key].

The map of the location information appears.
● After displaying the map, you can search for the neighborhood information using "ｉエリアー周辺情報ー" (i-mode area –Neighbor info–). For details about "ｉエリアー周辺情報ー", see the DoCoMo's website.

Select [Run i appli] → software to be used.

Select [Paste to mail] → [Yes].
● "♪ location URL" that has a link to the location information is entered in the mail main body.

Select [Attach to image] → an image from My picture of the Data Box.

Select [Add to phonebook] → [New]/[Add].
● Follow the same steps as in the Add to FOMA terminal phonebook (P.91, step 3 to 6).

Setting the GPS Functions

<GPS settings>

Setting the GPS Keys

You can set the actions when performing the Position location by pressing **9** for over a second in the stand-by display.

1 From the Menu, select [LifeKit] → [GPS] → [GPS settings] → [GPS button setting] and press ![key].

```
GPS button setting

Read a Map
Run i appli
Paste to mail
Add to phonebook
Attach to image
Confirm
```

[Read a Map]:
Display the map showing your current location that is positioned.
[Run i appli]:
Use the GPS-compatible i-αppli.
[Paste to mail]:
Attach the location information into mail.
[Add to phonebook]:
Save the location information in the Phonebook.
[Attach to image]:
Attach the location information to an image.
[Confirm]:
Select a function every time you use.

2 Select a function to be performed automatically and press ![key].

The GPS button setting is set.

Setting the Positioning Accuracy

You can set to prioritize either the speed or accuracy of positioning.

1 From the Menu, select [LifeKit] → [GPS] → [GPS settings] → [Positioning mode] and press ![key].

```
Positioning mode
Position location
      Standard mode ▾
Location notice
      Standard mode ▾
Location provision
      Standard mode ▾
```

2 Select a positioning mode at each item.

[Standard mode]:
Perform positioning in preference to the speed.
[Quality mode]:
Perform positioning in preference to the accuracy. It may take time longer than [Standard mode] to perform positioning.

3 Press ![key] (Complete).

The Positioning mode is set.

One Seg

About One Seg

What is One Seg?

One Seg is a digital terrestrial broadcasting for mobile devices and provides data broadcasting as well as video and sound broadcasting. You can also receive more detailed program information, join panel shows, enjoy TV shopping, and more using i-mode.

- For details on the "One Seg" service, see the website below.
  The Association for Promotion of Digital Broadcasting
  PC　　 : http://www.dpa.or.jp/
  i-mode : http://www.dpa.or.jp/1seg/k/

About Using One Seg

- One Seg is a service provided by TV broadcasters (broadcast stations).
- You can receive video, sound, and data broadcasting of One Seg that is broadcasted without any subscription and free of charge.
- The two types of information are available in the area of the data broadcasting: "data broadcasting" and "data broadcasting site". "Data broadcasting" is carried in airwave with video and sound, and "data broadcasting site" is available by accessing sites provided by TV broadcasters (broadcast stations). Also, "i-mode site" can be accessed with this service. To access sites, you need to subscribe to services such as i-mode.
- The packet communication charge is required to access a site such as "data broadcasting site" or "i-mode site".
  Depending on a site, an additional information charge may be required for using sites (i-mode paid sites).

About Radio Wave

One Seg is one of the broadcasting services and uses the different radio wave (airwave) from the FOMA service. Therefore, regardless of whether you are outside/inside of the FOMA service area, you cannot receive One Seg broadcasting in a place where the airwave does not reach or in a time zone when it is out of service.

Even if you are in the digital terrestrial broadcasting service area, the receiving condition may become worse or you cannot receive anything in the following places.

- Places where are far away from the radio wave tower which send airwaves
- Places such as interfered by mountains, covered with a building where the radio wave is interrupted by features or buildings
- Places such as in the tunnel, basement, or building where the radio wave is weak or does not reach at all

To make the radio wave condition better, extend the One Seg Antenna fully. Changing the orientation of the antenna, placing the FOMA terminal closer or further to the body, or moving to another location may make the radio wave condition better.

Display When Using One Seg for the First Time

After the purchase, when you use One Seg for the first time, the display for confirming the notabilia of the service appears. Check the contents and press ▤ (OK).

- When you insert another UIM or perform the Reset all data&set, the display for confirming the notabilia of the service appears again.

What is Broadcast Storage Area?

The broadcast storage area is a storage area inside the terminal that is exclusive for One Seg. The information you input according to the instructions provided by the data broadcast program you are watching is saved in the broadcast storage area as specified by the settings of TV broadcasters (broadcast stations). The information to be saved may contain answers for quiz, as well as personal information such as membership number, gender, age, or occupation.

The saved information may be displayed, or be sent to TV broadcasters (broadcast stations) without another input of information when you browse to the data broadcasting site.

To delete information in the broadcast storage area, see P.255.

When you replace the UIM with another one, the screen for confirming whether to reset the broadcast storage area appears. Select [Yes] to reset it.

■ Using information in the broadcast storage area

When information in the broadcast storage area is used while you are watching a program, the message "Use saved info? It may include info used by the same broadcasting gr." appears. When you select [Yes], the confirmation screen does not appear as long as you watch the same program. If you select [Yes,from then on], the confirmation screen no longer appears even if the program is changed.

Other Features
- One-touch channel selection by the remote-control numbers (P.244)
- Switching between the main sound and sub sound (P.246)
- Using the program guide i-αppli (P.247)
- Setting a timer for watching (P.247)
- Setting a timer for recording (P.247)
- Displaying and using the data broadcasting (P.251)
- Using TVlink (P.252)
- Recording a video and still image (P.252)
- Time shift play while watching (P.253)
- Rapid play with sound at about 1.3x speed (P.277)

Before Using One Seg

Step to Watch One Seg

Example: When you watch One Seg for the first time

Step 1 Set channel list (P.242)

Save a channel list suitable for the area you use.

Step 2 Activate One Seg (P.243)

Extend the One Seg Antenna and activate One Seg.
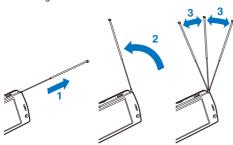

■ One Seg Antenna

When you use the One Seg function, extend the One Seg Antenna as illustrated below. When the One Seg reception is poor, change the direction of the One Seg Antenna or the location of the FOMA terminal.

● Do not use force to change the direction of the One Seg Antenna.
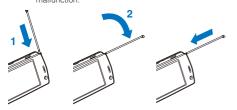

Using the One Seg Antenna

1 Pull out the One Seg Antenna.

2 Raise the One Seg Antenna.

3 Change the direction.

Putting the One Seg Antenna back

1 Change the direction back.

2 Push the One Seg Antenna back while aligning the top of the One Seg Antenna with the counter part until it stops.

● If you use force to put the antenna back without confirming the correct orientation, it may cause malfunction.

■ The display that appears when One Seg is used for the first time

When One Seg is activated for the first time, the display for confirming the notabilia of the service appears. When the FOMA terminal is in the TV style, switch to the Normal style, and then check the contents and press ▤ (OK) (P.240).

■ Battery level

● If you try to activate One Seg with the battery level low, the screen for confirming whether to activate One Seg appears. If you select [Yes], One Seg is activated. When the battery level becomes low while watching One Seg, the screen for confirming whether to quit One Seg appears. When you select [Yes], One Seg is terminated.

● When the battery level becomes low, the screen informing that the battery level becomes low appears, "🔋"/"🔋"/"🔋" flashes while watching One Seg, and "🔋"/"🔋"/"🔋" flashes while recording a One Seg program.

● When the battery level becomes extremely low while watching or recording a One Seg program, One Seg is terminated. When you are recording a One Seg program, the video recorded up to this point is saved automatically.

■ When there is an incoming call, etc. while watching One Seg

● When receiving a voice, videophone, or PushTalk call while watching One Seg, you can answer the call by pausing video and sound. After the call is terminated, the screen for confirming whether to use Time shift play appears. When you select [Yes], Time shift play is started.

● When receiving i-mode mail, SMS, Message R/F while watching One Seg, the incoming mail display appears. The display restores when mail reception is completed. (When the Mail telop disp set is set to [OFF] and Dur multi task disp is set to [Prefer operat.])

● When the Alarm, Schedule alarm, or Booking alarm time comes while watching One Seg, the alarm is displayed. The display restores when you stop the Alarm or Schedule alarm and press ⌷CLR⌷ or ⬛ in the display informing the release of the alarm. When you stop the Booking alarm, the screen for confirming whether to activate One Seg appears depending on the setting of the Cfm. activation (P.248) and you can activate it.

● When the UIM is not inserted, you cancel the subscription to DoCoMo, or you temporarily suspend using the FOMA service, you cannot watch One Seg.

● Even when you insert the UIM for which you subscribe to DoCoMo, you may not be able to activate One Seg if you repeatedly watch One Seg in the condition the FOMA terminal cannot communicate such as when the FOMA terminal is outside of the service area or in the Self mode. In that case, try to activate One Seg in the condition the FOMA terminal can communicate by moving into the FOMA service area.

● When you activate One Seg for the first time, activate it within the FOMA service area.

● Even if the data may be lost or changed as a result of malfunction, repair, or other handling of the FOMA terminal, under no condition will DoCoMo be held liable for any damaged or lost data saved in the FOMA terminal. Furthermore, note that the saved information (such as One Seg recorded videos or still images, TV links, or information saved in the broadcast storage area) cannot be moved when you change your FOMA terminal or have it repaired.

● If you continue watching One Seg for a long period of time with the battery being charged, the life of the battery pack may become shorter.

One Seg

Setting Channels <Set channel list>

To use One Seg, you need to perform the channel setting and save the channel list beforehand. When you watch One Seg, select a channel list suitable for the current location.
You can save up to 10 channel lists, 62 broadcast stations for each list.

Saving a Broadcast Station to the Channel List Automatically <Auto channel set>

Broadcast stations that can be received are automatically searched and saved to a channel list.

- You need to set it within the Terrestrial digital TV broadcasting service area.
- When you perform the Auto channel set, extend the One Seg Antenna fully.

1 From the Menu, select [1 Seg] → [Set channel list] and press ▭.

```
Set channel list
■チャンネルリスト1
1 東京
2 大阪
3 神奈川
4
5
6
7
8
9
```

When no channel list is saved
Follow step 3 to 4.

2 Select a place to save to and press ⬛ (Create).

The screen for creating a channel list appears.

3 Select [Auto channel set] → [Yes] and press ▭.

```
Channel scanning

Receive ch.  ①
Physical ch. 27ch
○○テレビ

⌛
```

Searching broadcast stations starts. The Channel scan result display appears when the search is completed.

To cancel searching broadcast stations
Press 🖂 (Cancel) and select [Yes].

4 Press ▭ (OK), select [Yes], press ▭, and enter a name of a channel list.

Enter a name within 10 full-width or 20 half-width characters.
The channel list is saved.

● When the multiple broadcast stations which have the same remote-control number are retrieved, the message to the effect that the remote-control number is doubled appears. Press ▭ and select the current location you are in from the Select service area display. The channels in the area you select are preferentially assigned to remote-control numbers 1 to 12, and channels in the area you do not select are assigned to remote-control numbers 13 to 62 onward.

● It takes about 40 to 60 seconds to complete searching broadcast stations. However, the searching time varies and it may exceed 60 seconds depending on the number of broadcast stations or the condition of airwave.

Saving a Broadcast Station into the Channel List Manually

You can save broadcast stations to a channel list by selecting a service area, prefecture, and area.

1 From the Menu, select [1 Seg] → [Set channel list] and press ▭.

The Set channel list display appears.

When no channel list is saved
Follow step 3 to 5.

2 Select a place to save to and press ⬛ (Create).

The screen for creating a channel list appears.

3 Select [Select Serv Area] and press ▭.

```
Select service area
Hokkaido
Tohoku
Kanto
Koshinetsu/Hokuriku
Tokai
Kinki
Chugoku
Shikoku
Kyusyu/Okinawa
```

4 Select a service area → a prefecture → an area and press ▭.

The screen for confirming the channel information of the selected service area appears.

5 Press ▭ (OK), select [Yes], and press ▭.

The channel list is saved.

● Depending on the area you use, you may not be able to save a broadcast station correctly even if you set the Select Serv Area. In this case, use the Auto channel set.

Selecting a Channel List to be Used

You can select a channel list suitable for your current location. Also, you can edit the saved channel lists.

1 From the Menu, select [1 Seg] → [Set channel list] and press 🔲.

The Set channel list display appears.

To activate One Seg from the channel list
Move the cursor to a channel list, press [ch] (Ch. list), move the cursor to a broadcast station in the channel list, and press 🔲 (Watch).

To change the name of a channel list
Move the cursor to a channel list and from the Function menu, select [Edit title]. Enter a name within 10 full-width or 20 half-width characters.

To delete a channel list
Move the cursor to a channel list and from the Function menu, select [Delete one] → [Yes].
● The currently used channel list cannot be deleted.

To reset the channel list
From the Function menu, select [Reset], enter the Security code, and select [Yes].

To display detailed information of a broadcast station
Move the cursor to a channel list, press [ch] (Ch. list), move to the cursor to a broadcast station in the channel list, and press [i] (Detail).

2 Select a channel list and press 🔲.

The channel list to be used is set.

Editing Remote-control Numbers

A remote-control number which can be used for selecting a station is already assigned to each broadcast station. Remote-control numbers can be changed.

1 Select a channel list in the Set channel list display and press ✉ (Func).

The Function menu appears.

2 Select [Edit RC number] and press 🔲.

```
Edit RC number
❶ ○○テレビ
② △△テレビ
③ ○△テレビ
④ □□テレビ
```

To delete a broadcast station
Move the cursor to a broadcast station and from the Function menu, select [Delete one] → [Yes].

3 Select a broadcast station and press 🔲.

The remote-control number input screen appears.

4 Enter a remote-control number.

Enter a number within 01 to 62.
The remote-control number is changed.
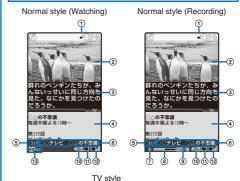

When the remote-control number is already assigned to another broadcast station
Select [Yes]. The saved broadcast station is replaced with the new one.

One Seg

Watching One Seg in the Normal Style

You can watch One Seg in the Normal style.

1 From the Menu, select [1 Seg] → [Activate 1Seg] and press ▤.

The channel which you watched previously is displayed.

● You can also activate One Seg by pressing [TV] for over a second in the stand-by display.

Operating method

Video mode

Operation	Key operation
UP/DOWN channel select	Use ▶ (CH+) / ◀ (CH–). Select a station in order/reverse order of the remote-control numbers.
One-touch channel select	Remote-control number 1 to 9 : [1] to [9] 10 : [＊] 11 : [0] 12 : [#]
Channel search	Use ▶ (CH+) / ◀ (CH–) for over a second. Search broadcast stations which can be received.
Volume adjustment	Use ▲ (VOL+) / ▼ (VOL–). The volume can be adjusted in 32 levels: 0 to 31.
Switch between video and data broadcasting modes	Press ▤ (TV/DATA) (P.251).
Start the program guide i-αppli	Press [ch] (EPG).
Time shift	Press ▤ (T.shft). Pause watching a program and play it back in time-shift mode (P.253).
Record a still image	Press [📷].
Record a video	Press [📷] for over a second.
Quit 1Seg	Press ⌁ and select [Yes].

Data broadcasting mode

Operation	Key operation
Display the previous/next page	Use ◀ / ▶ while using the data broadcasting site.
Switch the data broadcasting screen between half and full screens	Press ▤ (TV/DATA) for over a second.

When no channel list is saved
The screen informing that no channel list is saved appears. Select how to save a channel and save one (P.242).

To display the program information
From the Function menu, select [Program info.]. When you press ▶, the details of the program is displayed. To display the information of the previous/next program, press ▤ (Previous) / ▤ (Next).

To set the 1Seg setting
From the Function menu, select [1Seg setting].

To compose mail containing program information
From the Function menu, select [Prog info mail].

● When you send the program information to the FOMA terminal which is compatible with the Media To function, the recipient can select it to activate One Seg.

To select a program when multiple services (programs) are broadcasted on the same channel
From the Function menu, select [Select service] → a program.

To save the broadcast station into a channel list while watching it
From the Function menu, select [Add channel].

Watching One Seg in the TV Style

When you switch the FOMA terminal to the TV style, you can watch One Seg in the horizontal orientation.

- See "About the Style" (P.27) to switch the FOMA terminal to the TV style.
- The data broadcasting cannot be displayed in the TV style.

1 Switch to the TV style in stand-by status.

The Viewing Touch Key lights and it can be operated.

- You can set functions to be activated when switching to the TV style (P.328).
When you set other functions to be activated, activate One Seg in the stand-by status and then switch to the TV style.

The channel which you watched previously is displayed.

Operating method

Operation	Key operation
UP/DOWN channel select	Use ᴄᴴ+ / ᴄᴴ−. Select a station in order/reverse order of the remote-control numbers.
Channel search	Use ᴄᴴ+ / ᴄᴴ− for over a second. Search broadcast stations which can be received.
Volume adjustment	Use ⱽᴼᴸ+ / ⱽᴼᴸ−. The volume can be adjusted in 32 levels: 0 to 31.
Record a still image	Press 📷.
Record a video	Press 📷 for over a second.
Display the Function menu	Press T V.
Quit 1Seg	Press T V for over a second and select [Yes].

To display the program information

From the Function menu, select [Program info.]. When you pat ᴄᴴ+ / ᴄᴴ− (Chg.Info), the details of the program is displayed. To display the information of the previous/next program, pat ⱽᴼᴸ+ / ⱽᴼᴸ− (Back/Next).

- ● Depending on the receiving condition of airwave, sound interruption or video pause may occur, black-shaped noise may appear on the picture, or a dark display without video or data broadcasting may appear.
- ● Depending on the radio wave condition, videos and data broadcasting may not be displayed even if the status of the airwave reception level is other than the outside of the broadcast service area.
- ● When you activate One Seg while the Manner mode is set, the screen for confirming whether to output sound appears. When you select [Yes], you hear the sound.
- ● Colors of the guide display, etc. may change slightly while watching One Seg.
- ● The Viewing Touch Key is turned off about 15 seconds after it lights. Pat the Viewing Touch Key or press T V, 📷, or 📱 to light it again.

Setting While Watching One Seg

Watching One Seg with Subtitles

You can display subtitles while watching a program.

- You can set it either in the Normal style or in the TV style.

Example: For the TV style

1 Press T V (Func) while watching One Seg.

The Function menu appears.

For the Normal style

From the Function menu, select [Caption disp set] → a type of subtitles.

2 Use ᴄᴴ+ / ᴄᴴ− to select [Caption disp set] and press T V.

The Caption disp set menu appears.

[Language1]:
The subtitle of Language 1 is displayed.

[Language2]:
The subtitle of Language 2 is displayed.

[OFF]:
The subtitle is not displayed.

3 Use ᴄᴴ+ / ᴄᴴ− to select a type of subtitles and press T V.

The subtitle is set.

- ● Whether subtitles are provided or not depends on the program.
- ● When no subtitle is provided on a program, the subtitle is not displayed regardless of the Caption disp set.

Displaying the Guide Display All the Time

You can set whether to display the guide display, icon, etc. all the time in the TV style.

- You can set it only in the TV style.

1 Press T V (Func) while watching One Seg.

The Function menu appears.

2 Use ᴄᴴ+ / ᴄᴴ− to select [Guide always on] and press T V.

The Guide always on setting menu appears.

3 Use ᴄᴴ+ / ᴄᴴ− to select [ON]/[OFF] and press T V.

The Guide always on is set.

- ● When the guide display, icon, etc. are displayed, part of video may not be seen.

Adjusting the Image Quality

You can set the image quality of the video portion.

● You can set it either in the Normal style or in the TV style.

Example: For the TV style

1 Press ⬜ TV ⬜ (Func) while watching One Seg.

The Function menu appears.

For the Normal style
From the Function menu, select [Image quality] → an image quality.

2 Use ꜛCH / ꜜCH to select [Image quality] and press ⬜ TV ⬜.

The Image quality menu appears.

[Normal]:
The standard image quality emphasized naturalness.

[Sharp]:
Sharply edged image quality.

[Dynam.]:
The clear image quality in which an edge and contrast of an image is emphasized.

3 Use ꜛCH / ꜜCH to select an image quality and press ⬜ TV ⬜.

The image quality is set.

Setting to Adjust the Light Automatically

You can set whether to adjust automatically the main display light brightness by the Brightness Sensor to adapt for the surrounding brightness while watching One Seg.

● You can set it either in the Normal style or in the TV style.

Example: For the TV style

1 Press ⬜ TV ⬜ (Func) while watching One Seg.

The Function menu appears.

For the Normal style
From the Function menu, select [Auto Disp light] → [ON]/[OFF].

2 Use ꜛCH / ꜜCH to select [Auto Disp light] and press ⬜ TV ⬜.

The Auto Disp light display appears.

[ON]:
Adjust the light automatically.

[OFF]:
Do not adjust the light automatically.

3 Use ꜛCH / ꜜCH to select [ON]/[OFF] and press ⬜ TV ⬜.

The Auto Disp light is set.

Adjusting the Brightness of the Display

You can set the main display light brightness when you watch One Seg.

● You can set it either in the Normal style or in the TV style.

Example: For the TV style

1 Press ⬜ TV ⬜ (Func) while watching One Seg.

The Function menu appears.

For the Normal style
From the Function menu, select [Display light] → brightness.

2 Use ꜛCH / ꜜCH to select [Display light] and press ⬜ TV ⬜.

The Display light menu appears.

3 Use ꜛCH / ꜜCH to select brightness and press ⬜ TV ⬜.

Select brightness from [1 to 5].

Switching between the Primary/Secondary Sounds

You can switch the sound between the primary and secondary sounds.

● You can switch the sound only in the Normal style.

1 Press ▤ (Func) while watching One Seg.

The Function menu appears.

2 Select [Switch sound] and press ▤.

The screen for selecting the Switch sound appears.

[Primary sound]:
The primary sound is played back.

[Secondary sound]:
The secondary sound is played back.

3 Select a sound and press ▤.

The Switch sound is set.

● Even if the Switch sound is set to [Secondary sound], the primary sound is played back when there is no secondary sound for the program which you are watching.

Switching between the Main/Sub Sounds

You can switch the sound between the main and sub sounds.

● You can switch the sound only in the Normal style.

1 Press ▤ (Func) while watching One Seg.

The Function menu appears.

2 Select [Main/Sub] and press ▤.

The screen for selecting the Main/Sub appears.

[Main sound]:
The main sound is played back.

[Sub sound]:
The sub sound is played back.

[Main+Sub sound]:
The main sound is played back from the left speaker and the sub sound is played back from the right speaker.

3 Select a sound and press ▤.

The Main/Sub is set.

● Even if the Main/Sub is set to [Sub sound]/[Main+Sub sound], the main sound is played back when there is no sub sound for the program which you are watching.

You can set to terminate One Seg automatically after the certain period of time.

● You can set it either in the Normal style or in the TV style.

Example: For the TV style

1 Press [TV] (Func) while watching One Seg.

The Function menu appears.

For the Normal style

From the Function menu, select [Sleep] → a time before terminating One Seg automatically.

2 Use $\overset{CH}{+}$ / $\overset{CH}{-}$ to select [Sleep] and press [TV].

The Sleep setting menu appears.

3 Use $\overset{CH}{+}$ / $\overset{CH}{-}$ to select a time before terminating One Seg automatically and press [TV].

Select from [OFF], [30min], [60min], [90min], and [120min].

Using the Program Guide i-αppli
<Program guide>

Using the program guide i-αppli, you can activate One Seg by selecting a program from within the program guide and set a timer for watching or recording a program.

● "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control) is preinstalled as the program guide i-αppli (P.211). For details, see the "Mobile Phone User's Guide【i-mode】FOMA version".

1 From the Menu, select [1 Seg] → [Program guide] and press ▭.

※ The display shown is an image for explanatory purpose and may be different from the actual display. The TV program list is displayed according to your location.

The program guide i-αppli is started and "📺" or "📺" appears.

To start the program guide i-αppli while watching in the Normal style

Press 🔲 (EPG). You can also start the program guide i-αppli when, from the Function menu, select [Program guide].

To change the software to be activated by the Program guide key

Move the cursor to the software in the list of i-αppli software and from the Function menu, select [Individual set] → [Program guide key] → [Yes]/[No] (P.209).

● When you select a program in the "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control) display, you can watch the selected program by pressing 📧 (TV起動).

Setting a Timer for Watching/Recording a One Seg Program
<Booking list>

You can set a timer for watching or recording a One Seg program. When you set a timer for watching a program, the alarm sounds to notify you of the start of the program at the specified date/time. You can save up to 50 timer settings for watching and recording programs.

● When the channel list is not set, you cannot set a timer for watching or recording a program.

● The copy control signal (indicating that "the program cannot be recorded (Copy Never)", "the program can be recorded only once (Copy Once)", or "the program can be recorded without restrictions (Copy Free)") is placed in One Seg. They are set by each broadcast station.

● If the copy control signal of a program is one of "the program can be recorded only once (Copy Once)" and "the program can be recorded without restrictions (Copy Free)", the program can be recorded.

● When the copy control signal changes to "the program cannot be recorded (Copy Never)" while recording a program, the recording stops. Video data recorded up to that point is saved.

● When you set a microSD memory card as a place to save a recorded video, insert a microSD memory card beforehand.

1 From the Menu, select [1 Seg] → [Booking list] and press ▭.

The Res. data list display appears.

To delete a timer for watching/recording a program

Move the cursor to a timer and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete all timers, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To edit a timer for watching/recording a program

Move the cursor to a timer and press 🔲 (Edit).

To display the detailed information of a timer for watching/recording a program

Move the cursor to a timer and press ▭.

2 Press 📧 (Func).

The Function menu appears.

3 Select [Create] and press ▭.

4 Save each item.

○: Allowed to be saved 　—: Not allowed to be saved

When you select [Yes], terminate the executed function and start recording. When you select [No], a timer for recording a program is canceled.	—	○
💾	Output of Rec Select [Data Box]/[microSD] as a place to save a recorded video.	—	○

5 Press 🔅 (Complete).

A timer for watching/recording a program is saved.

● To play back a recorded video, see "Displaying/Playing Back One Seg" (P.277).

To set a timer for recording a program

The display for confirming the notabilia of the service appears. To save a timer for recording a program, confirm the contents and select [Yes]. If you do not want to display the confirmation display next time, select [Yes,from then on]. The confirmation display no longer appears.

● To restore the display for confirming the notabilia of the service, perform the Rset permission set (P.256).

● You can also set a timer for watching/recording a program using a program information provided by the program guide i-αppli, site, mail, etc.
● If the Alarm, Schedule alarm, and Booking alarm are set to start at the same time, the following priority is applied.
  1. Schedule alarm
  2. Booking alarm
  3. Alarm
● If there is a timer that is set to start at the same time as the new timer for recording a program, the confirmation screen appears. If you select [Yes], the previously saved timer for recording a program is overwritten by the new one.
● When the ending or starting date and time set for the previously saved timer for recording a program is the same as the starting or ending date and time set for the newly saved one respectively, the confirmation screen appears. If you select [Yes], the preceding timer terminates slightly earlier than the specified time.
● If the Booking list is updated because of the saved reservation being started while editing a reservation or other reason, the reservation may not be saved successfully.
● If the repeat type of the schedule set for the 31st is set to [Month], the schedule is set for the last day of the month for months with less than 31 days.

At the Booking Alarm Time

The alarm tone sounds for about 30 seconds with the indicator flashing.

To stop the alarm tone
Press any key. When you stop the alarm tone, the display informing the release of the alarm appears. To turn off the display, press ▤ (OK) or [CLR].

When you do not stop the alarm tone
The display informing the release of the alarm appears. To turn off the display, press ▤ (OK) or [CLR].

When the Cfm. activation is set to [ON]
After you turn off the display informing the release of the alarm, the Cfm. activation display appears. Select [Yes] to activate One Seg.

When the Cfm. activation is set to [OFF]
Press [TV] for over a second to activate One Seg.

● If you set an i-motion with video and sound tracks to the alarm tone, a movie in the i-motion is displayed.
● If the alarm time comes during a voice/videophone call or PushTalk communication, the default alarm tone sounds and default alarm image is displayed. The vibrator does not operate.
● The Booking alarm does not operate in the following cases.
  - When the FOMA terminal is powered off
  - While the Lock all is set
  - While the Personal data lock is set
  - While the Omakase Lock is set
  - While updating the software
● If the alarm time comes in the following cases, the alarm may operate when the status changes to during a call or stand-by.
  - While placing/receiving a voice/videophone call or originating/receiving a PushTalk call
  - During packet communication
  - During the infrared communication/while the infrared remote control is being used
  - During the iC communication
  - During data communication or while reading/writing data from/into a microSD memory card on a PC with the FOMA terminal connected using the USB cable
  - While recording a still image/movie
  - While the Schedule alarm is sounding
  - Beep while receiving Area Mail, while sounding Area Mail ring tone, or displaying Area Mail
● If you leave the FOMA terminal with the battery pack removed or fully expended for a long period of time, the date and time is reset, and the Booking alarm may not operate correctly.

At the Timer Recording Starting Time

A recording is automatically started. When the timer for recording a program starts while One Seg is not activated, "▤" appears. After the recording is completed, the notification icon "▤" (Timer Rec result) appears in the stand-by display.
● Extend the One Seg Antenna fully while recording a program.

To check the reservation result
Press ▤ (Link) in the stand-by display and select "▤".

One Seg

249

When the timer recording starting time comes while watching One Seg

The Preparing to Rec display appears. To cancel recording, press 📷 and select [Yes].

To cancel the recording during timer recording

Press 📷 while recording and select [Yes].

● Even if the Dur multitask Rec is set to [Prefer recording], the timer for recording a program may be canceled in a case such as when there are too many active functions or there is not enough memory. Also, while transferring data to the microSD memory card, the recording does not start.

● If the Dur multitask Rec is set to [Prefer operat.] and when functions that cannot be run simultaneously are active, the screen for confirming whether to start the timer recording appears. When you select [Yes], the timer recording starts. However, regardless of selecting [Yes] on the confirmation screen, the timer for recording a program may not start in a case such as when there are too many active functions or there is not enough memory.

● Even if the FOMA terminal is outside of the broadcast service area when the timer recording starting time comes, the timer recording works effectively.
However, the timer recording fails if the FOMA terminal is outside of the broadcast service area all the time from the beginning to the end of the scheduled recording time. The message "Could not receive broadcast wave" appears in the Result detail display (P.251).

● Timer recording does not start in the following cases.
- When the FOMA terminal is powered off
- When the UIM is not inserted

Setting the Operation for the Booking Alarm

You can set the detailed operation for the Booking alarm.

1 Press ✉ (Func) in the Res. data list display.

The Function menu appears.

2 Select [Booking ALM set] and press ▤.

3 Select an alarm tone from MUSIC/i-motion/Melody of the Data Box at [Alarm tone].

● You can set the following files. You can select a Chaku-Uta® from [i-motion].

Category	File format	File size	Image size
MUSIC※	AAC-LC/ HE-AAC	Max. 5M bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640× 480)]
Melody	SMF/ MFi	Max. 350K bytes	—

※ Some files may not be set.

When you select a Chaku-Uta Full® that has a choice of specified playback ranges from [MUSIC]

The screen for selecting a type of setting appears. If you select [Full song], the whole track of Chaku-Uta Full® is set for the alarm tone. If you select [Point], the specified playback range of Chaku-Uta Full® is set for the alarm tone.

To mute the alarm tone

Select [Silent].

To check the alarm tone

Move the cursor to the alarm tone and press 🎵 (Play).

4 Select an image from My picture/i-motion of the Data Box at [Alarm image].

● You can set the following files.

Category	File format	File size	Image size
My picture	GIF/ JPEG	Max. 250K bytes	Max. [Stand-by(480 ×864)], Max. W480 ×H288 for GIF animation
	SWF	Max. 100K bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640× 480)]

※ Some i-motion may not be set.

To check the alarm image

Move the cursor to the alarm image and press 🎵 (Play).

5 Set the volume at [Alarm volume].

Select from [OFF] and [1 to 6].

To set the volume to [OFF]

Press ▼ at level 1.

6 Select a vibration type at [Vibrator].

[Pattern1]:
Set short intermittent vibration.

[Pattern2]:
Set long intermittent vibration.

[Link melody]:
Vibrates in accordance with the alarm tone. If you have set the alarm tone to [Silent] or to a melody that cannot be synchronized with the vibrator operation, the vibrator vibrates using [Pattern1].

[OFF]:
Do not set the vibrator.

To check the vibration
Move the cursor to the pattern and press ▤ (Confirm).

7 Select an indicator color at [Color].

Select from 12 indicator colors or [C13:ALL] (indicator flashes in 12 colors in sequence).
When you move the cursor, the indicator flashes accordingly.

8 Press ▤ (Complete).

The operation for the Booking alarm is set.

● When you set an i-motion or Chaku-Uta Full® for the alarm tone or set an i-motion for the alarm image, the settings may be changed in some cases.

Checking the Reservation Result

Up to 30 results of Timer recording can be saved.

1 Press 🔂 (Res.Rslt) in the Res. data list display.

```

Using Data Broadcasting

One Seg allows you to use the data broadcasting in addition to the video and sound broadcasting. Various kinds of information including still images and movies, such as sites linked with programs are available.

● You cannot display the data broadcasting in the TV style.
● During the data broadcasting mode, you cannot select a broadcast station.

1 Press ▤ (TV/DATA) while watching One Seg.

"▣" appears and the mode is switched to the data broadcasting mode.

Half-screen display   Full-screen display

To go back to the video mode
Press ▤ (TV/DATA). Every time you press ▤, the mode is switched between the video and data broadcasting modes.

To switch the data broadcasting screen between half and full screens
Press ▤ (TV/DATA) for over a second during the data broadcasting mode. Every time you press ▤ for over a second, the screen is switched between half and full screens.

To display the certificate
From the Function menu, select [Certificates].

To reload the data broadcasting site
From the Function menu, select [Reload].

To go back to the data broadcasting from the data broadcasting site
From the Function menu, select [Back to data BC.].

2 Select an item and press ▤.

● When you access an i-mode site from the data broadcasting, the site is displayed in full-screen and the video and sound of One Seg are not output.
● If you select [Yes] on the screen for confirming whether to connect to i-mode that appears while using data broadcasting or data broadcasting site, the FOMA terminal connects to i-mode. If you select [Yes,from then on], the confirmation screen no longer appears. The packet communication charge may be required because of contents of data broadcasting or data broadcasting site being updated automatically. To display the confirmation screen again, perform the Rset permission set (P.256).
● The packet communication performed when connecting to a data broadcasting site is covered by the Pake-Houdai/ Pake-Houdai Full service.
● For the operation while the site is displayed, follow the same steps as in "Using Sites" (P.162). You cannot enter pictographs in the text box while in a data broadcasting or data broadcasting site.

One Seg

Using Displayed Information

Some data broadcasting or data broadcasting sites allow you to use displayed information to activate Phone To, Mail To, or i-αppli To function, download ToruCa cards, and save entries in the Phonebook or Schedule.

Using TVlink   <TVlink>

Depending on the data broadcasting or data broadcasting sites, you can save a URL or memo information as a TV link. Once the frequently used site or memo information is saved as a TV link, you can display a desired site or memo information directly.

Saving as a TV link

- You can save up to 50 TV links.

1 Select an item that can be saved as a TV link and press ⬛.

2 Select [Yes] and press ⬛.

The TV link is saved.

Displaying the Saved TV link

1 From the Menu, select [1 Seg] → [TVlink] and press ⬛.

```
TVlink list        1/4
🄳 ○○番組          📺
🄳 □△ズーム
🄲 ○△入門          ⬛
🄲 △△発見          ⬛
```

- The following icons show the type of TV link

🄳	Data broadcasting site
⬛	i-mode site
📄	Memo information
👉📄	TV link with expiration date set

To display the detailed information of a TV link
Move the cursor to a TV link and press 🛈 (Detail).

To delete a TV link
Move the cursor to a TV link and from the Function menu, select [Delete one] → [Yes]. To delete all TV links, from the Function menu, select [Delete all], enter the Security code, and select [Yes].

2 Select a TV link and press ⬛.

The selected TV link is displayed.

When the screen for confirming whether to connect to the i-mode appears
Select [Yes].

Recording One Seg While Watching   <Record One Seg>

You can save a program as a video and a scene of a program as a still image while watching One Seg.

- The copy control signal (indicating that "the program cannot be recorded (Copy Never)", "the program can be recorded only once (Copy Once)", or "the program can be recorded without restrictions (Copy Free)") is placed in One Seg. They are set by each broadcast station.

- If the copy control signal of a program is one of "the program can be recorded only once (Copy Once)" and "the program can be recorded without restrictions (Copy Free)", the program can be recorded.

- When the copy control signal changes to "the program cannot be recorded (Copy Never)" while recording a program, the recording stops. Video data recorded up to that point is saved.

Recording a Video

A recorded video is saved in either the [Video] folder in 1Seg of the Data Box or in 1Seg of a microSD memory card.

■ Estimated number and recording time of videos you can record

Place to save to	Estimated max. number[1]	Estimated max. recording time[2]
Data Box	99 items	About 30 minutes
microSD memory card (2GB)	99 items	About 10 hours 43 minutes

[1] Depending on the data size, the number of videos you can save may decrease.

[2] The recording times are estimated values. They vary depending on the contents of a program to be recorded.

- To set a place to save a recording video, see "Setting a Place to Save a Recorded Video to" (P.255).

1 Press 📷 for over a second while watching One Seg.

The display is switched to the Preparing to Rec display. After time for preparation, recording starts and "●" appears.

2 To stop recording, press 📷, select [Yes], and press ⬛.

The recording is stopped and a video is saved.

- To play back a saved video, see "Displaying/Playing Back One Seg" (P.277).

For the TV style
Press 📷, select [Yes], and press [TV].

- A file name of a recorded video appears in the format of the recorded year, month, date, hour, and minute. For example, when a video is recorded at November 1, 2007, 9:05, it appears as "200711010905NNN". A number "000 to 999" is assigned to "NNN".
- You cannot set a recorded video for the stand-by display, ring tone, incoming image, etc.
- When the Rec T.shift now/Play T.shift now is activated, you cannot start recording a program.
- You cannot start recording a video while the FOMA terminal is outside of the broadcast service area.
- Recorded video can only be moved from the Data Box to the microSD memory card. A video cannot be moved/copied from the microSD memory card to the Data Box.
- If the free space of the storage area is being decreased during recording, the message informing that there is not enough space appears and the recording ends. The video recorded up to this point is saved.

Recording a Still Image

You can save up to 50 recorded still images.

1 Press 📷 while watching One Seg.

A still image is recorded and saved automatically.

- A One Seg recorded still image cannot be saved in the microSD memory card.
- To play back a saved still image, see "Displaying/Playing Back One Seg" (P.277).

- Subtitles and data broadcasting cannot be recorded as a still image.
- A file name of a recorded still image appears in the format of the recorded year, month, date, hour, and minute. For example, when a still image is recorded at November 1, 2007, 9:05, it appears as "200711010905NNN". A number "000 to 999" is assigned to "NNN".
- You cannot set a recorded still image for the stand-by display, incoming image, etc.
- You cannot record a still image while the Rec T.shift is in progress, the FOMA terminal is outside of the broadcast service area, or video playback is in progress.
- The number of images that can be saved may decrease depending on the size of still images.

Starting Time Shift Play While Watching
<Time shift>

You can play back a time-delayed copy of a program after pausing watching One Seg.

- While playing back, a video and sound are played back at about 1.3× speed.
- When you start the Time shift recording while you are talking on the phone, extend the One Seg Antenna fully.
- You can set it either in the Normal style or in the TV style.

Example: For the TV style

1 Press TV (Func) while watching One Seg.

The Function menu appears.

For the Normal style
Press ▤ (T.shft) and select [Yes]. To play back, press ▤ (Play).

2 Use CH+ / CH− to select [Time shift] and press TV.

3 Use CH+ / CH− to select [Start] and press TV.

4 Use CH+ / CH− to select [Yes] and press TV.

The Time shift recording is started and the Rec T.shift now display appears.

To cancel the Time shift recording
From the Function menu, select [Time shift] → [Quit] → [Yes].

To cancel the Time shift recording in the Normal style
Press CLR and select [Yes].

5 Press TV (Func) to play back.

The Function menu appears.

6 Use CH+ / CH− to select [Time shift] and press TV.

7 Use CH+ / CH− to select [Play] and press TV.

The Time shift play is started.

To quit the Time shift play
From the Function menu, select [Time shift] → [Quit] → [Yes].

To quit the Time shift play in the Normal style
Press ▤ (Quit) and select [Yes].

- When there is an incoming voice/videophone or PushTalk call while watching One Seg, the Time shift recording is automatically started. After the call is disconnected, the screen for confirming whether to play back a program appears. Select [Yes] to start the Time shift play.
- The recording time of video you can record using the Time shift recording is up to about 90 seconds. When 90 seconds are past, the older part of the video is overwritten by the newer one. Every latest 90 seconds of video is maintained.
- When the Time shift recording is too short, the Time shift play may not start, or it may stop immediately to return to the original broadcasting program.
- You cannot start the Time shift recording when the FOMA terminal is outside of the broadcast service area. However, if the FOMA terminal becomes outside of the broadcast service area while the Time shift recording is in progress, the recording continues.
- Regardless of whether the data broadcasting is displayed in half-/full-screen, you cannot start the Time shift recording during the data broadcasting mode.

One Seg

Receiving Mail While Watching One Seg

While watching One Seg, you can read received mail or reply to the mail. The display style of the received mail varies depending on the Mail disp set. The default setting is set to [OFF] (P.256).

■ When the Mail disp set is set to [Display mail]

Multi-window

" ▆ " appears in the Video mode and " ▆ " appears in the Mail mode.

When you receive mail in the Normal style, the screen for confirming whether to display received mail appears. Select [Yes] to display the contents of the mail and " ▆ " appears.

To reply mail/SMS using the Quote function

Press 🔲 (Quote). The Edit mail display or Edit SMS display appears.

● Follow the same steps as in "Compose and send mail" (P.179, step 3 to 5) or "Compose and send SMS" (P.202, step 3 to 4).

To switch to the Video mode

Press 🔲 (TV/Mail). Every time you press 🔲 (TV/Mail), the mode is changed between Video and Mail modes.

To end the mail display

Press 🔲 (QuitMail).

● Mail cannot be displayed in the TV style but the Telop text is displayed.

● Mail cannot be displayed when you receive it from the sender who is saved as Secret. To display mail, set the Secret display to [ON].

● Mail cannot be displayed when it is sent from a sender who is not saved in the Phonebook.

● If you receive several mails continuously, the last received mail is displayed.

● When a message appears in the Mail mode, the message is not displayed completely and you may not be able to perform an operation. Press 🔲 (TV/Mail) to switch to the Video mode, the message appears correctly, and then you can perform the operation.

■ When the Mail disp set is set to [Display telop]

When you receive mail, the Telop text is displayed. When you receive i-mode mail from the sender who is saved in the Phonebook, the name of the sender and subject are added to the Telop text. When SMS is sent from the sender who is saved in the Phonebook, the name of the sender and "SMS" are added.

For the Normal style

Telop

For the TV style

Telop

● When you receive mail from a sender who is saved as Secret, the name of the sender is not displayed. To display a name, set the Secret display to [ON].

● When the mail is being saved in the folder for which the Mail security is set, the name and subject are not displayed.

● When the Public mode (Drive mode) is set, the Telop text is not displayed.

● Mail ring tone, vibrator, and incoming indicator are not operated.

● If you receive several mails or messages continuously, the information of the last received mail or message is displayed in the Telop text.

One Seg

Various Settings for One Seg

<1Seg setting>

You can set functions regarding One Seg, reset the settings, etc.

Deleting the Broadcast Storage Area

<Delete storage area>

You can delete information stored in the broadcast storage area.

1 From the Menu, select [1 Seg] → [1Seg setting] → [Delete storage area] and press ▭.

The BC group list display appears.

To delete data by each affiliated channel group

Move the cursor to an affiliated channel group and from the Function menu, select [Delete aff. Data] → [Yes]. To delete data of all affiliated channel groups, from the Function menu, select [Del all aff.data], enter the Security code, and select [Yes].

2 Select an affiliated channel group and press ▭.

The list of the broadcast stations in the affiliated channel group is displayed.

3 Select a broadcast station and press ▤ (Delete).

4 Select [Yes] and press ▭.

Data of the selected broadcast station is deleted.

Setting Not to Display Images of Data Broadcasting Site

<Display img>

You can set whether to display images provided by data broadcasting sites.

● This setting is synchronized with that of the Display img of i-mode (P.170).

1 From the Menu, select [1 Seg] → [1Seg setting] → [Display img] and press ▭.

2 Select [ON]/[OFF].

The Display img is set.

When set to [OFF], "🖻" is displayed instead of images.

●Even if the Display img is set to [ON], some images may not be displayed correctly.

Setting Not to Hear Sound Effect of Data Broadcasting Site

<Sound effect>

You can set whether to hear sound effect provided by data broadcasting/data broadcasting sites.

1 From the Menu, select [1 Seg] → [1Seg setting] → [Sound effect] and press ▭.

2 Select [ON]/[OFF].

The Sound effect is set.

●The volume of the Sound effect follows that set for watching One Seg.

Setting a Place to Save a Recorded Video to

<Output of Rec>

You can set a place to save a recorded video.

1 From the Menu, select [1 Seg] → [1Seg setting] → [Output of Rec] and press ▭.

The Save to display appears.

[Data Box]:

A video is saved in the [Video] folder of 1Seg of the Data Box.

[microSD]:

A video is saved in 1Seg of the microSD memory card.

2 Select a place to save to and press ▭.

The Output of Rec is set.

●When you set the Output of Rec while recording a video, the setting is effective from the next recording.

One Seg

Setting the Operation for Incoming Mail While Watching One Seg   <Mail disp set>

You can set whether to display contents of the received mail or telop when you receive mail while watching One Seg.

1 From the Menu, select [1 Seg] → [1Seg setting] → [Mail disp set] and press ▭.

[Display mail]:
　Display the screen for confirming whether to display the contents of mail when you receive mail.

[Display telop]:
　Display the Telop text.

[OFF]:
　Do not display anything.

When you watch in the TV style
　In the watching display, from the Function menu, select [Mail disp set] → [Mail]/[Telop]/[OFF].

2 Select an operation which is performed when you receive mail while watching.

The Mail disp set is set.

●Even if the Mail disp set is set to [Display mail], while watching One Seg in the TV style or when receiving mail from the sender who is not saved in the Phonebook, the mail is not displayed but the Telop text is displayed.

Displaying a User's Confirmation Screen for Data Broadcasting Site   <Rset permission set>

If you select [Yes,from then on] on the screen for confirming whether to connect to i-mode, which appears when using data broadcasting or data broadcasting sites, the confirmation screen no longer appears. To display the confirmation screen again, perform the Rset permission set.

1 From the Menu, select [1 Seg] → [1Seg setting] → [Rset permission set] and press ▭.

The Security code screen appears.

2 Enter the Security code and press ▭ (OK).

The screen for confirming whether to perform the Rset permission set appears.

3 Select [Yes] and press ▭.

The Rset permission set is reset.

Resetting the One Seg Settings to the Default Settings   <Reset 1Seg set>

You can reset the settings of the functions regarding the One Seg video and sound to the default settings. The items that can be reset are as follows.

Item		Default setting
Items set from the Function menu while watching/ playing back a program	Caption disp set	OFF
	Guide always on	ON
	Image quality	Normal
	Display light	3
	Auto Disp light	ON
	Switch sound	Primary sound
	Main/Sub	Main sound
	Auto off setting	OFF
Items set from the 1Seg menu	Display img	ON
	Sound effect	ON
	Output of Rec	Data Box
	Mail disp set	OFF
	Booking ALM set	Alarm tone: Alarm(std), Alarm image:視聴予約アラーム鳴動中, Alarm volume: 4, Vibrator: OFF, Color: C5:Color5

● The broadcast storage area and channel list are not reset.
● By performing the Reset 1Seg set, the Rset permission set is also performed simultaneously.

1 From the Menu, select [1 Seg] → [1Seg setting] → [Reset 1Seg set] and press ▭.

The Security code screen appears.

2 Enter the Security code and press ▭ (OK).

The screen for confirming whether to reset the One Seg settings appears.

3 Select [Yes] and press ▭.

The One Seg settings are reset.

Full Browser

Displaying a Website Designed for PC

You can view websites designed for PC on the FOMA terminal using Full Browser.

- Some websites may not be displayed at all or displayed incorrectly.
- Note that the communication charge could be expensive if you exchange large volumes of data such as viewing websites that contain a lot of images or downloading files. For details on the packet communication charge, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

1 Press 🅸 (i-mode) in the stand-by display, select [Full Browser], and press ▭.

```
Full Browser menu
Home
Bookmark
Go to location
Last accessed URL
Full Browser setting
```

The Full Browser menu appears.

2 Select [Go to location] → [Enter URL] and press ▭.

The Enter URL display appears.

To view the website saved as the Home page
Select [Home].

To view a website from a bookmark
Select [Bookmark] → a folder → a bookmark.

To view the website accessed last
Select [Last accessed URL] and press ▭ (Cnct).

3 Press 🅸 (Edit) and enter the URL.

Enter the URL including "http://" within 512 half-width alphanumeric characters and symbols.

4 Press ▭ (Cnct).

The website is displayed.

- When the Access setting is set to [No], the screen for confirming whether to use Full Browser appears. If you select [Yes] and [OK], the Access setting is changed and the website is displayed (P.264).

- ● It may take time to display a website depending on a website.
- ● Full Browser does not support the following functions.
  - Displaying a Flash movie
  - Plug-in
  - Playing back a melody or music data
  - Phone To
  - Displaying PDF data
- ● Some websites may communicate automatically.
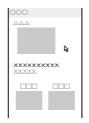

Key Operations While Viewing a Website

You can operate Full Browser both in the Normal and TV styles.
The following key operations can be performed while viewing a website.

Operating in the Normal Style

Operating method

Operation	Key operation
Move the pointer※	Press ▲ ▼ ◀ ▶.
Zoom out	Press 1.
Scroll to the upper page	Press 2.
Zoom in	Press 3.
Scroll to the left page	Press 4. It can be operated only in the PC mode.
Display the PagePilot display (Full page display)	Press 5.
Scroll to the right page	Press 6. It can be operated only in the PC mode.
Display the previous page	Press 7 or 🔤 (History).
Scroll to the lower page	Press 8.
Display the next page	Press 9.
Display the list of bookmarks	Press 0.
Switch to the left window	While displaying multiple windows, press ＊.
Switch to the right window	While displaying multiple windows, press ＃.

※ The movement speed of the pointer can be changed (P.264).

Full Browser

From the Function menu, select [Short cut], select a key, press ▤ (Edit), select a function to be assigned to the key, and press ⓘ (Complete).
To restore the default settings, press 🔳 (Reset) in the Short cut list display and select [Yes].

● You can scroll pages using the JOG but you cannot use the JOG to operate the pointer in a page such as selecting items. To operate the pointer, use the 4-way keys.

Operating in the TV Style

When you switch to the TV style while viewing a website in the Normal style, the website can be displayed in the horizontal orientation. The Viewing Touch Key can be used to operate in the TV style.

Operating method

Operation	Key operation
Scroll upward	VOL +
Scroll downward	VOL −
Scroll to the left	CH −
Scroll to the right	CH +
View the previous page	📷 (History)
OK	TV

● The Viewing Touch Key is turned off about 15 seconds after it lights. Pat the Viewing Touch Key or press TV , 📷 , or 📱 to light it again.
● When you switch to the Normal style while viewing a website in the TV style, the display changes to the vertical orientation. If a display such as the confirmation screen or Full Browser menu display appears, it is displayed in the horizontal orientation even if you switch to the Normal style. After you close the display in the TV style, switch to the Normal style.
Also, same things happen when switching from the Normal style to the TV style.
● Setting/canceling the full-screen display can be performed only in the Normal style (P.261).

Function Menus While Viewing a Website

While viewing a website, press ✉ (Func) to display the Function menu, and from the Function menu, the following operations can be performed.

● Some functions cannot be activated while loading a page.

Item	Operation
Display the previous page	Select [Previous page].
Display the next page	Select [Next page].
Reload a website	Select [Reload].
Save a website in the Bookmark	Select [Add bookmark] → [Complete] → a folder.
Connect to another site	Select [Bookmark] → a folder → a bookmark.
Use a history※	Select [History].
Display a website	Select [Go to location] (P.258, 260).
Save a website as the Home page	Select [Set as Home URL] → [Yes].
Display the website saved as Home	Select [Home].
Display in full-screen	Select [Full scrn/normal].
Save an image	Select [Acquire image] → [Save]/[Save&Setting] → an image.
Display multiple windows	Select [Window] (P.260).
Display the Flame selection display	Select [All frames] (P.261).
Search a character string in a page	Select [Search] (P.261).
Send a URL by mail	Select [Compose message].
Display a website correctly	Select [Word translate]. ● Sequentially convert the character codes and display the site again.
Retry to play back an animation	Select [Retry].
Display a title of a website	Select [Title].
Display a website URL	Select [URL]. ● To copy the URL, press ⓘ (Copy).
Display a certificate	Select [Certificates] (P.261).
Set Full Browser	Select [Full browser set].
Display a function assigned to a key	Select [Short cut] (P.259).

※ If there is not enough memory, the image which is different from the one displayed in the shrinking display may appear.

Action Menus While Viewing a Website

While viewing a website, press ⓘ (Action) to display the Action menu, and from the Action menu, the following operations can be performed.

The Action menu which can be actually performed varies depending on a displayed website or position of the pointer.

Item	Operating method
Display a link in a new window	Select [Open New Window] (P.260).
Display a linked URL	Select [Display Link URL] (P.260).
Download and save an image	Select [Save image] (P.262).
Save an image and set it as the stand-by display	Select [Save image&set].
Zoom in	Select [Zoom in].
Zoom out	Select [Zoom out].
Select a portion of an entire page to display	Select [PagePilot] (P.261).
Select an area or grab a display to move	Select [Drag] (P.261).
Copy a text	Select [Text copy] (P.261).
Paste a text	Select [Text paste] (P.261).

Displaying Using the URL History

Up to 50 websites that have been displayed by entering their URLs are saved in the URL history. The sites can be directly accessed from the URL history.

● If a total of 50 URLs is saved in the URL history, the URL is overwritten from the oldest.

1 From the Full Browser menu, select [Go to location] → [URL history] and press ▤.

The URL history display appears.

To display a URL

Move the cursor to a URL history and from the Function menu, select [URL]. When you press ▤ (Cnct), it is connected to its website.

To send a URL history by mail

Move the cursor to a URL history and from the Function menu, select [Compose message].

● Follow the same steps as in "Compose and send mail" (P.179, step 2 to 5).

To delete a URL history

Move the cursor to a URL history and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete several URLs, from the Function menu, select [Delete] → [Select&delete], select URLs, press ⓘ (Complete), and select [Yes]. To delete all URLs, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

2 Select a URL history and press ▤ (Cnct).

The website of the selected URL history is connected.

Displaying Websites in the Multiple Windows

You can view several websites by switching windows.

● Up to five windows can be displayed. However, you may not be able to display the maximum number of windows depending on displaying websites.

Example: Displaying the Home page in the new window

1 Press ✉ (Func) in the Full Browser display, select [Window], and press ▤.

To display a link in the new window

Move the cursor to a link in the Full Browser display, press ⓘ (Action), and select [Open New Window].

To display a URL of a link

Move the cursor to a link in the Full Browser display, press ⓘ (Action), and select [Display Link URL].

2 Select [Open New Window] and press ▤.

To display a website in the back window

Select [Open Back Window].

To close the window

Select [Close Window] → [OK].

To change the window

Select [Change Window] → a window being switched.

3 Select [Home].

The Home is displayed in the new window.

To display a website from a bookmark

Select [Bookmark] → a folder → a bookmark.

To display a website by entering a URL

Select [Go to location] → [Enter URL], press ⓘ (Edit), enter a URL, and press ▤ (Cnct).

To display a website from a URL history

Select [Go to location] → [URL history] → a URL.

Full Browser

Displaying a Frame Page

You can display a website consisted of multiple frames. Select a frame from the frame selection display to display a page.

1 Use ▲ ▼ to select a frame in the frame selection display and press ⬛.

The selected frame is displayed.

To go back to the frame selection display
From the Function menu, select [All frames].

Changing the Display

You can set whether to display the guide display in the display.

1 Press ✉ (Func) in the Full Browser display.

The Function menu appears.

2 Select [Full scrn/normal] and press ⬛.

The Full scrn/normal is set.

Displaying a SSL-/TLS-Compatible Page

You can display a SSL-/TLS-compatible page whose URL begins with "https://" using Full Browser.

● SSL/TLS is a method to perform data communication safely using the authentication/cryptograph technology.

```
Establishing
SSL/TLS session
(Authenti-
        cating)
```

When you display a SSL-/TLS-compatible page, the screen above appears. Once the SSL-/TLS-compatible page is displayed, "🔒" appears.

To display a certificate
From the Function menu, select [Certificates] → a certificate.

Selecting a Portion to be Displayed from the Entire Page

1 Press ⓘ (Action) in the Full Browser display, select [PagePilot], and press ⬛.

The entire page is displayed.

2 Use ▲ ▼ / ◀ ▶ to select a portion to be displayed and press ⬛.

The selected portion is displayed.

● If there is not enough memory, the image which is different from the one displayed in the shrinking display may appear.

Dragging

You can select an area or move a display using the dragging operation in the Full Browser display.

● Some sites may not allow you to drag.

Example: Selecting an area

1 Press ⓘ (Action) in the Full Browser display, select [Drag], and press ⬛.

The pointer changes from "🖕" to "🖐".

2 Select the Start point and press ⬛.

The pointer changes to "✊".

To move a display by dragging
Press ⬛ at the point to grab and use ▲ ▼ / ◀ ▶ to move the display.

3 Use ▲ ▼ / ◀ ▶ to select an area and press ⬛.

The area is selected and the pointer changes to "🖐".

To quit the Drag
Press CLR.

Copying Text

1 Press ⓘ (Action) in the Full Browser display, select [Text copy], and press ⬛.

The pointer changes from "🖕" to "I".

2 Select the Start point and press ⬛.

3 Use ▲ ▼ / ◀ ▶ to select the End point and press ⬛.

The text is copied.

To paste text
Press ⓘ (Action) in the textbox of the Full Browser display and select [Text paste].

Searching a Character String in a Page

1 Press ✉ (Func) in the Full Browser display, select [Search], and press ⬛.

2 Enter a keyword to be searched at [Search text].

Enter a keyword within 25 full-width or 50 half-width characters.

3 Select [ON]/[OFF] at [Match full].

4 Select [ON]/[OFF] at [Case sensitivity].

5 Press ⓘ (OK).

The searched word is displayed in reverse video.

To display the previous/next search result
Press ✉ (Back)/ ⓘ (Next).

Uploading an Image

You can upload an image saved in the Data Box or microSD memory card to a website which allows you to upload an image.

- The way of uploading an image varies depending on a website.

1 Select the "select" key in the Full Browser display and press [⬚].

2 Select an image in My picture of the Data Box or microSD memory card.

- The following image can be uploaded.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 80K bytes※	—

※ It is the size for one file. When containing several images or character strings, the maximum size of the total amount is 100K bytes.

Saving an Image

You can save images downloaded from a website in the Data Box or microSD memory card.

- A GIF image, JPEG image, PNG image, or BMP image can be saved and the image size must be less than 1M bytes. PNG and BMP images can be saved in the microSD memory card only.
- You cannot save a GIF image exceeding [UXGA(1600× 1200)] and a GIF animation exceeding [Stby(480×864)] in the Data Box. You may not be able to save some JPEG images in the Data Box as well.

1 In the Full Browser display, move the pointer to an image which you want to save.

2 Press [⬚] (Action), select [Save image], and press [⬚].

The screen for selecting where to save appears.

[Data Box]:
  Save an image in the Data Box. Select a folder to save to.
[microSD]:
  Save an image in the microSD memory card.

3 Select a place to save to and press [⬚].

The image is saved in the selected place to save to.

Managing a Bookmark

Up to 200 URLs can be saved as bookmarks of Full Browser.

- For information on functions operated at the folder list display or bookmark list display of Bookmark, see P.165 (a URL can be changed in Full Browser).
- A URL including "http://" of up to 512 half-width alphanumeric characters and symbols can be saved as a bookmark.
- Bookmarks can be managed by up to 16 folders.
- A folder neme of a bookmark can be entered within 16 full-width or 32 half-width characters.
- If there is not enough memory, the image which is different from the one displayed in the shrinking display may appear.

Editing a Bookmark

You can change the title of a bookmark or URL.

1 From the Full Browser menu, select [Bookmark] → a folder, press [⬚], select a bookmark, and press [✉] (Func).

The Function menu appears.

2 Select [Edit] and press [⬚].

The display for editing a bookmark appears.

3 Select [Title], press [⬚], and enter a title.

Enter a title within 12 full-width or 24 half-width characters.

4 Select [URL], press [⬚], and enter a URL.

Enter the URL including "http://" within 512 half-width alphanumeric characters and symbols.

5 Press [⬚] (Complete).

The edited contents are saved.

Setting the Full Browser Functions

You can set the functions used for Full Browser.

- You can operate Full Browser from the Function menu while viewing a website, but some functions cannot be performed.

Saving a Website as the Home Page

You can save a website as the Home page. "http://www.google.co.jp" is set as the Home URL at the time of purchase.

1 From the Full Browser menu, select [Full Browser setting] → [Home URL] and press [⬚].

2 Press [⬚] (Edit), enter a URL, and press [⬚] (OK).

Enter the URL including "http://" within 512 half-width alphanumeric characters and symbols.

Full Browser

Setting Cookie

Cookie is the mechanism for temporarily saving information such as the user name, date and time you accessed the website, and number of accesses in the FOMA terminal when you accessed a website. When you access the same website next time, the information is used.

You can set whether to send/receive Cookie when connecting to a website.

- Under no condition will DoCoMo be held liable for any reveal of your information to third parties because of sending Cookie.
- Some websites may not be displayed correctly or may be unable to use when Cookie is not set.

1 From the Full Browser menu, select [Full Browser setting] → [Cookie setting] and press ▭.

[Valid]:
    Cookie is always valid.

[Notify-sending]:
    Select whether to send Cookie.

[Notify-receiving]:
    Select whether to receive Cookie.

[Notify-send/recv]:
    Select whether to send/receive Cookie.

[Invalid]:
    Cookie is always invalid.

To delete all Cookie
    Select [Delete Cookie], enter the Security code, and select [Yes].

2 Select whether to set Cookie valid and press ▭.

The Cookie setting is set.

● When you insert another UIM, the Cookie setting becomes [Invalid].

Setting JavaScript to Be Valid/Invalid

JavaScript is a programming language used on a website to create a website with movement.

When JavaScript is used at the website, you can set whether to execute the program.

- Some websites may not be displayed correctly when you set JavaScript to be invalid.

1 From the Full Browser menu, select [Full Browser setting] → [Script setting] and press ▭.

[Valid(Auto)]:
    Activate a program automatically during communication.

[Valid(Confirm)]:
    Confirm whether to activate a program during communication. If you select [Yes,from then on] at the confirmation screen during communication, the setting is changed to [Valid(Auto)] automatically.

[Invalid]:
    Do not activate a program.

2 Select a method to activate a program and press ▭.

The Script setting is set.

When [Valid(Auto)] is selected
    Select [Yes].

Setting the Display Mode

You can set the display mode when activating Full Browser.

1 From the Full Browser menu, select [Full Browser setting] → [Display mode setting] and press ▭.

[PC mode]:
    Display the website with the screen size for PC.

[Mobile mode]:
    Reduce the display size of a website to fit in the width of the FOMA terminal.

2 Select a display mode and press ▭.

The Display mode setting is set.

Disabling the Display of Graphics

You can set whether to display graphics when displaying a website.

1 From the Full Browser menu, select [Full Browser setting] → [Display img] and press ▭.

2 Select [ON]/[OFF] and press ▭.

The Display img is set.

Setting the Display Magnification

You can set the display magnification for the Full Browser display.

1 From the Full Browser menu, select [Full Browser setting] → [Display magnification] and press ▭.

2 Select a display magnification and press ▭.

Select from [75%], [100%], [125%], [150%], [175%], and [200%].

Displaying the Entire Page While Scrolling

You can set whether to display the entire page automatically while scrolling.

1 From the Full Browser menu, select [Full Browser setting] → [PagePilot setting] and press ▱.

2 Select [Valid in scrl]/[Invalid] and press ▱.

The PagePilot setting is set.

Setting the Movement Speed of the Pointer

You can set a speed to move the pointer.

1 From the Full Browser menu, select [Full Browser setting] → [Pointer speed setting] and press ▱.

2 Select a movement speed of the pointer and press ▱.

Select from [1(Slow)], [2 to 4], or [5(Fast)].

Setting Whether to Open a New Window Automatically

You can set whether to open a website in a new window automatically when JavaScript of a website requests to open a new window.

1 From the Full Browser menu, select [Full Browser setting] → [Window Open Guard] and press ▱.

[Valid]:
  Do not open a website in a new window.
[Invalid]:
  Open a website in a new window.

2 Select [Valid]/[Invalid] and press ▱.

The Window Open Guard is set.

Setting Whether to Send Referer

Referer is the information of a link origin. If you send Referer, the access information of which page is used to connect is sent to a site.

You can set whether to send Referer when you select the link while viewing a website.

- Under no condition will DoCoMo be held liable for any reveal of your information to third parties because of using Referer.
- Some websites may not be displayed correctly when Referer is not sent.

1 From the Full Browser menu, select [Full Browser setting] → [Referer setting] and press ▱.

2 Select [Send]/[Unsend]/[Notify] and press ▱.

The Referer setting is set.

Setting Whether to Use the Full Browser Function

You can set whether to use the Full Browser function.

1 From the Full Browser menu, select [Full Browser setting] → [Access setting] and press ▱.

[Yes]:
  Full Browser can be used.
[No]:
  The Access setting display appears when you activate Full Browser.

2 Select whether to use the Full Browser function and press ▱.

3 Select [OK] and press ▱.

The Access setting is set.

● When you change the UIM to another UIM, the Access setting changes to [No].

Checking the Settings of Full Browser

1 From the Full Browser menu, select [Full Browser setting] → [Check settings] and press ▱.

The contents of the settings appear.

Restoring the Default Settings of Full Browser

You can restore the default settings of Full Browser.

1 From the Full Browser menu, select [Full Browser setting] → [Reset settings] and press ▱.

The Security code screen appears.

2 Enter the Security code and press ▱.

3 Select [Yes] and press ▱.

The default settings of Full Browser are restored.

Data Display/Edit/ Management

Displaying the Saved Image

<My picture>

You can display images saved in My picture of the Data Box or microSD memory card.

1 Press ▲ (□) in the stand-by display, select [My picture], and press ▤.

My picture folder list appears.

2 Select a folder and press ▤.

```
Camera              1/25
  My favorite
  Your cat
  Memorial shot
  Sasha of the nex
  A friend of Sash
  A stage face
```
— Management title

My picture file list appears.

● The following icons show the type/size of an image.

Icon	Type	Size
	JPEG image	sQCIF(128×96)
		QCIF(176×144)
		QVGA(240×320)
		WQVGA(240×432)
		CIF(352×288)
		VGA(640×480)
		Stby(480×864)
		1M(1280×960)
		2M(1632×1224)
		3M(2048×1536 or 2000×1500)※
		Others
	Frame image	—
	Stamp image	—
	Deco mail pict.	—
	GIF image	—
	Flash movie	—
	Has loc. info	—

※ The size of an image is [3M(2000×1500)] when the Image stabilize function is set to [AUTO].

● "⬚" appears on the upper right of the icon for images prohibited from being retrieved out of the FOMA terminal.

To display the saved date/time

Press # to switch the display temporarily between the management title and saved date/time.

3 Select an image and press ▤.

— Display quality

The selected image appears.

To change the display quality

Press 5 . By pressing 5 , you can switch the display quality between Normal/Sharp/Dynamic.

● The following icons show the display quality.

	Normal
	Sharp
	Dynamic

To hide the icons and guide display

Press ⓘ (Display). When you press ⓘ (Display), you can switch the display between standard and simple or turn off the display.

To display the previous/next image

Use ◀ to display the previous image and ▶ to display the next image.

To change the display size of a JPEG or GIF image

Press ⟐ (True img/Std./Enlarge/Shrink). Press ⟐ (True img) to display the image in the true size. However, when the image size is set to [sQCIF(128×96)], [QCIF(176×144)], or [QVGA(320×240)], press ⟐ (Std.) to display the image in the doubled size.

To display a Flash movie again

Press ⟐ (Retry).

To attach to i-mode mail

Press ✉ (Func) for over a second (P.183).

To set an image for stand-by or other displays

From the Function menu, select [Display setting] → a type of display.

To add the location information

From the Function menu, select [Location info] → [Rcv loc. info] → [Yes] (P.237).

To use the added location information

From the Function menu, select [Location info] → [Use loc. info] (P.238).

To display the attached detailed location information

From the Function menu, select [Location info] → [Location detail].

To delete the added location information

From the Function menu, select [Location info] → [Delete loc. info] → [Yes].

To display an image of VGA or higher in the horizontal orientation

Press ▤ (Horztl).

To activate the camera

From the Function menu, select [Pict. shoot mode].

- When the file list of images in the microSD memory card is displayed, you cannot perform the Rcv loc. info or Delete loc. info.
- It may take time to display a file list or images saved in the microSD memory card.
- If you edit a recorded image on a PC, etc., "🖼" may be displayed instead of the thumbnail.
- When the image cannot be displayed, "☑" appears.
- You can send a still image using the high-speed infrared communication (P.298).

Displaying Images as a Slideshow

You can automatically switch and display a JPEG image saved in My picture of the Data Box or microSD memory card.

1 Press ⊠ (Func) in My picture file list.

The Function menu appears.

2 Select [Slideshow] and press ▭.

```
Slideshow
Interval     3sec ▾
```

3 Select the time during which an image is displayed at [Interval].

- The interval may vary depending on the size of the displayed images.

4 Press ⓘ (Activate).

The slideshow starts.

To stop the slideshow
Press ⊠ (Stop).

Editing Still Images   <Edit photo>

You can edit a JPEG image saved in My picture by pasting a stamp, a frame, etc.

- You cannot edit preinstalled images or images prohibited from being retrieved out of the FOMA terminal.
- Some images may not be edited.
- Images may become inferior by editing repeatedly.

Pasting a Frame

A frame can be pasted to an image of [sQCIF(128× 96)], [QCIF(176×144)], [QVGA(240×320)], [CIF(352× 288)], and [Stby(480×864)].

Example: Pasting a frame and saving by overwriting

1 From My picture file list, select an image, press ▭, and press ⊠ (Func).

The Function menu appears.

2 Select [Edit photo] → [Frame] and press ▭.

3 Select a frame and press ▭.

To check a frame
Move the cursor to a frame and press 🔳 (Play).

4 Press ▭ (Save), select [Overwrite], and press ▭.

The image with the frame is saved by overwriting the original image.

To save as a new image
Select [Save new] → a place to save to.

Pasting a Stamp

A stamp can be pasted to an image of [sQCIF(128× 96)], [QCIF(176×144)], [QVGA(240×320)], [CIF(352× 288)], and [Stby(480×864)].

Example: Pasting a stamp and saving by overwriting

1 From My picture file list, select an image, press ▭, and press ⊠ (Func).

The Function menu appears.

2 Select [Edit photo] → [Image stamp] and press ▭.

3 Select a stamp and press ▭.

To check a stamp
Move the cursor to a stamp and press 🔳 (Play).

4 Use ▲ ▼ / ◀ ▶ to adjust the position and press ▭ (Paste).

To add the same stamp
Repeat step 4.

To paste another stamp
Press 🔳 (Retry) and perform step 3 to 4 again.

5 Press ⓘ (OK).

6 Press ▭ (Save), select [Overwrite], and press ▭.

The image with the stamp is saved by overwriting the original image.

To save as a new image
Select [Save new] → a place to save to.

Pasting Text

Text can be pasted to an image of [sQCIF(128×96)], [QCIF(176×144)], [QVGA(240×320)], [CIF(352× 288)], and [Stby(480×864)]. The style and color of the text can also be specified.

Example: Pasting text and saving by overwriting

1 From My picture file list, select an image, press ▤, and press ✉ (Func).

The Function menu appears.

2 Select [Edit photo] → [Text stamp] and press ▤.

```
Text stamp
Input text
[                ]
Font color      □
Font size    Std ▼
Font type    Std ▼
Thickness    Std ▼
Underline     No ▼
```

[Input text]:
Enter a text to be pasted within 10 full-width or 20 half-width characters.

[Font color]:
Select the color of a font to be pasted.

[Font size]:
Select the size of a font to be pasted.

[Font type]:
Select the type of a font to be pasted.

[Thickness]:
Select the thickness of a font to be pasted.

[Underline]:
Select whether to display a line under a font to be pasted.

3 Set each item.

4 Press ▤ (OK).

5 Use ▲ ▼ / ◀ ▶ to adjust the position and press ▤ (Paste).

To add the same text stamp
Repeat step 5.

To paste another text stamp
Press 🔄 (Retry) and perform step 2 to 5 again.

6 Press ▤ (OK).

7 Press ▤ (Save), select [Overwrite], and press ▤.

The image with the text is saved by overwriting the original image.

To save as a new image
Select [Save new] → a place to save to.

Trimming Part of an Image After Zoom In

You can specify a part of an image after zooming in on it and trim it into a size of [sQCIF(128×96)], [QCIF(176×144)], [QVGA(240×320)], [CIF(352× 288)], or [Stby(480×864)].

● When the image size is [sQCIF(128×96)], you cannot trim this image.

Example: Trimming an image and saving by overwriting

1 From My picture file list, select an image, press ▤, and press ✉ (Func).

The Function menu appears.

2 Select [Edit photo] → [Zoom&trim] → a size of an image to be trimmed and press ▤.

● The image size displayed in gray is not available for trimming.

3 Press 🔍 (Zoom(T))/ 🔍 (Zoom(W)).

```
sQCIF(128×96)
```

● Press 🔍 (Zoom(T)) to enlarge and 🔍 (Zoom(W)) to reduce an image.

The zoom is adjusted and the bar is displayed for the zoom magnification you have set.

4 Use ▲ ▼ / ◀ ▶ to select the area to be trimmed and press ▤ (OK).

The image is trimmed to the selected size.

5 Press ▤ (Save), select [Overwrite], and press ▤.

The trimmed image is saved by overwriting the original image.

To save as a new image
Select [Save new] → a place to save to.

Rotating an Image

An image of [sQCIF(128×96)], [QCIF(176×144)], [QVGA(240×320)], [CIF(352×288)], [VGA(640× 480)], and [Stby(480×864)] can be rotated.

Example: Rotating an image and saving by overwriting

1 From My picture file list, select an image, press ▭, and press ✉ (Func).

The Function menu appears.

2 Select [Edit photo] → [Rotate] and press ▭.

3 Press 🄸 (Rotate) and press ▭ (OK).

Every time you press 🄸 (Rotate), the image rotates clockwise by 90 degrees.

4 Press ▭ (Save), select [Overwrite], and press ▭.

The rotated image is saved by overwriting the original image.

To save as a new image
Select [Save new] → a place to save to.

Converting the Image Size

You can convert an image size into [sQCIF(128×96)], [QCIF(176×144)], [QVGA(240×320)], [CIF(352× 288)], or [Stby(480×864)].

Example: Converting an image size and saving

1 From My picture file list, select an image, press ▭, and press ✉ (Func).

The Function menu appears.

2 Select [Edit photo] → [Select size] → a size of an image to be converted and press ▭.

• The image size displayed in gray is not available for size conversion.

3 Press ▭ (Save), select [Yes] → a place to save to, and press ▭.

The size-converted image is saved.

● Some of the image size cannot be converted into the selected size.

Storing an Image at the Data Security Service Center

You can use the Data Security Service to store up to 10 GIF/JPEG images at one time at the Data Security Service Center.

• Data Security Service is a paid service that requires a subscription. For details on this service, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

• You cannot store a file that contains an image larger than 100K bytes and an image that is prohibited from being retrieved out of the FOMA terminal.

1 Press ✉ (Func) in the file list of My picture.

The Function menu appears.

2 Select [Store in Center] and press ▭.

The Security code screen appears.

3 Enter the Security code and press ▭.

The Select&save display appears.

4 Select an image and press ▭.

• To store several images, repeat step 4.

5 Press 🄸 (Complete).

The screen for confirming whether to store the image appears.

6 Select [Yes] and press ▭.

The call is connected to the Data Security Service Center and the image is stored. When the storing is completed, the storing result display appears.

Playing Back Movie/i-motion

<i-motion>

You can play back movie/i-motion that is saved in i-motion of the Data Box or microSD memory card.

1 Press ▲ (⌂) in the stand-by display, select [i-motion], and press ▤.

The i-motion folder list appears.

To play back data from the last stopped position
Select [Resume play].

To play back a playlist
Select the [Playlist] folder, move the cursor to a playlist, and press 🔲 (Play). When you play back a movie/i-motion in the playlist, select the [Playlist] folder → a playlist, move the cursor to a movie/i-motion, and press ▤ (Play).

2 Select a folder and press ▤.

```
Camera              1/8
   Flowers and cats      ← Management title
   One early aftern
   Chummy two
   It looks big
   Farewell, My fri
   Roaming at night
```

The i-motion file list appears.

● The following icons show the type/size of a movie/i-motion and playback restrictions.

Type and size

Icon	Type	Size
📺128	Movie/i-motion with video and sound tracks	sQCIF(128×96)
📺176		QCIF(176×144)
📺320		QVGA(320×240)
📺640		VGA(640×480)
📺		Others
📹128	Movie/i-motion with video track only	sQCIF(128×96)
📹176		QCIF(176×144)
📹320		QVGA(320×240)
📹640		VGA(640×480)
📹		Others
🎵	Movie/i-motion with sound track only (i-motion without video track, such as singer's voice)	—
📄	Movie/i-motion downloaded partway	—

● "📷" appears on the upper right of the icon for movie/i-motion prohibited from being retrieved out of the FOMA terminal.

Playback restrictions

Icon	Playback restrictions
📝	Movie/i-motion with playback restrictions
📝	Movie/i-motion whose time limit on playback has expired

To play back movie in a folder repeatedly
From the Function menu, select [Continuous play]. The files displayed in the list are played back sequentially. To stop the playback, press ✉ (Stop).

To display the saved date/time
Press # to switch the display temporarily between the management title and saved date/time.

3 Select a movie/i-motion and press ▤.

The selected movie/i-motion appears.

When the screen informing to make enough space appears
Select [Yes].

To change the display quality
Press 5 . By pressing 5 , you can switch the display quality between Normal/Sharp/Dynamic.

● The following icons show the display quality.

📺	Normal
📺s	Sharp
📺d	Dynamic

To hide the icons and guide display
Press 🔘 (Display). When you press 🔘 (Display), you can switch the display between standard/simple or turn it off.

To display the previous/next movie/i-motion
Use ◀ to display the previous movie/i-motion and ▶ to display the next movie/i-motion.

To change the display size
Press 🔲 (True img/Std./Enlarge). When the image size is set to [QVGA(320×240)], press 🔲 (True img) to display the image in the true size. When the image size is set to [sQCIF(128×96)] or [QCIF(176×144)], press 🔲 (Std.) to display the image in the doubled size.

● When the image size is set to [VGA(640×480)], the image is always displayed in the true size and cannot change the display size.

To attach to i-mode mail
Press ✉ (Func) for over a second (P.183).

To set a movie/i-motion for the stand-by display or other settings
From the Function menu, select [Display setting] → a type of a display.

To set a movie/i-motion for the ring tone or other tones
From the Function menu, select [Sound setting] → a type of a ring tone.

To change the display style of an image temporarily
From the Function menu, select [Change scr. set] → a display style of an image.

● When the image size is [QVGA(320×240)], you can select [Hor. wide(zoom)]/[Hor. wide(full)].

To set the display style of an image
From the Function menu, select [Screen setting] → a display style of an image.

To start the camera
From the Function menu, select [Movie shoot mode].

4 Press ▢ (Play).

Display quality

The selected movie/i-motion is played back.

Operating method

Operation	Key operation
Play	Press ▢ (Play).
Pause	Press ▢ (Pause).
Stop	Press ▢ (Stop).
Volume adjustment	Use ▲ ▼.
Fast-forward	Press ▶ during playback. Pressing and holding ▶ also provides Fast-forward.
Fast-reverse	Press ◀ during playback. Pressing and holding ◀ also provides Fast-reverse.
Frame advance	Press ▶ during pause.

● When you play back a movie/i-motion for the first time, the screen for confirming whether to play it back in the horizontal orientation appears. If you select [Yes], the movie/i-motion is played back in the horizontal orientation.
● It may take time to display a file list or movie/i-motion saved in the microSD memory card.
● If you edit a recorded movie on a PC, etc., " " may be displayed instead of the thumbnail.
● If you fold the FOMA terminal during playback of a movie/i-motion, the playback is stopped temporarily.
● If you leave the FOMA terminal without a battery pack or with a fully expended battery pack for a long period of time, the date and time is reset, and a movie/i-motion that has a time limit on playback may not be played back.
● A movie/i-motion can be set for the ring tone and/or incoming image when [Ring tone] and/or [Receive display] is set to "Not restricted" as can be checked in the Detail info display. However, the following are the exceptions.
  - A movie/i-motion restored from a PC or another FOMA terminal, which was once transferred to it using the infrared or iC communication or DoCoMo keitai datalink
  - A movie/i-motion saved from the microSD memory card to the FOMA terminal (including the one that is restored to the FOMA terminal after once copied/moved from there, except for the movable contents-compatible one)

Playing Back i-motion by Each Chapter

You can play back i-motion by each chapter.

1 From the i-motion file list, select a movie/i-motion, press ▢, and press ▢ (Func).

The Function menu appears.

2 Select [Chapter list] and press ▢.

3 Select a chapter and press ▢.

The movie/i-motion is played back from the selected position.

To play back from the previous/next chapter

Press 1 to play back from the previous chapter and press 3 to play back from the next chapter.

Creating a Playlist

You can save your favorite movies/i-motion in a playlist. Up to five playlists can be saved and up to 25 movies/i-motion can be saved in each playlist.

Example: Adding and saving one movie/i-motion

1 From the i-motion file list, select a movie/i-motion and press ▢ (Func).

The Function menu appears.

2 Select [Add to playlist] → [Save one] and press ▢.

To create a new playlist

From the i-motion folder list, select [Playlist] and from the Function menu, select [Create playlist]. Enter a playlist name within 10 full-width or 20 half-width characters.

To save several movies/i-motion

From the Function menu, select [Add to playlist] → [Select&save], select movies/i-motion, and press ▢ (Complete).

3 Select a playlist to be saved and press ▤.

The screen for selecting the saving method appears.

[Add]:

Newly add selected movie/i-motion to the movie/i-motion saved in a playlist.

[Overwrite]:

The screen for confirming whether to overwrite all movies/i-motion saved in a playlist with selected movies/i-motion appears. Note that all data existing in the playlist is deleted when you select [Yes].

4 Select [Add] and press ▤.

The selected movie/i-motion is saved in the playlist.

Deleting/Reordering Movies/i-motion of the Playlist

You can delete movies/i-motion from a playlist or reorder them within a playlist. Even if you delete movies/i-motion from a playlist, the files of the movies/i-motion are not deleted.

Example: Deleting one movie/i-motion

1 From the i-motion folder list, select [Playlist] → a playlist and press ▤.

The movie/i-motion list of the playlist appears.

To delete all movies/i-motion

From the Function menu, select [Delete from list] → [Delete all] → [Yes].

2 Select a movie/i-motion and press ▨ (Func).

The Function menu appears.

To reorder movies/i-motion

From the Function menu, select [Reorder] → a movie/i-motion. Move the cursor to the place to move to, press ▤ (Move), and press ▣ (Complete).

3 Select [Delete from list] → [Delete one] → [Yes] and press ▤.

The selected movie/i-motion is deleted from the playlist.

Deleting/Editing the Name of the Playlist

You can delete a playlist or edit its name.

Example: Deleting one playlist

1 From the i-motion folder list, select [Playlist] and press ▤.

A list of all playlists appears.

2 Select a playlist and press ▨ (Func).

The Function menu appears.

To edit the name of a playlist

Move the cursor to the playlist and from the Function menu, select [Edit name]. Enter a new name within 10 full-width or 20 half-width characters.

3 Select [Delete playlist] → [Yes] and press ▤.

The selected playlist is deleted.

Editing Movies   \<Edit movie>

You can edit a movie recorded with the FOMA terminal.

● Some movies may not be edited.

Clipping a Movie

You can clip a portion of a movie of [sQCIF(128×96)], [QCIF(176×144)], [QVGA(320×240)], and [VGA(640×480)] image size by specifying the range or size to be clipped.

Example: Trimming a movie image by specifying size and saving by overwriting

1 From the i-motion file list, select a movie, press ▤, and press ▨ (Func).

The Function menu appears.

2 Select [Edit movie] → [Clip movie] and press ▤.

```
Clip movie

  Any size
  Attach to mail(S)
  Attach to mail(L)
```

[Any size]:

Clip a movie by specifying the start and end positions.

[Attach to mail(S)]:

Automatically clip a movie to up to 500K-byte length from the specified start position.

[Attach to mail(L)]:

Automatically clip a movie to up to 2M-byte length from the specified start position.

Data Display/Edit/Management

3 Select [Attach to mail(S)]/[Attach to mail(L)] and press ☷.

4 Use ◀ ▶ to select the clipping start position and press 🛈 (Start).

When you select [Any size]
Use ◀ ▶ to select the clipping end position and press 🛈 (End).

5 Select [Yes] and press ☷.

6 Press ☷ (Save), select [Overwrite], and press ☷.

The movie clip is saved by overwriting the original movie.

To save as a new movie
Select [Save new] → a place to save to.

Clipping a Still Image from a Movie

You can specify any portion of a movie and clip it as a still image of [sQCIF(128×96)], [QCIF(176×144)], [QVGA(320×240)], and [VGA(640×480)] image size.

1 From the i-motion file list, select a movie, press ☷, and press ✉ (Func).

The Function menu appears.

2 Select [Edit movie] → [Clip picture] and press ☷.

To move forward frame-by-frame
Press ▶.
To move backward frame-by-frame
Press ◀.

3 Press ☷ (Play), press ☷ (Pause) at the clipping position, and press 🔳 (Clip).

4 Select [Yes] and press ☷.

5 Press ☷ (Save), select [Yes] → a place to save to, and press ☷.

The still image clip is saved in My picture.

Converting the Image Size

You can convert a [QVGA(320×240)] or [VGA(640×480)] image size movie into the [QCIF(176×144)] image size.

Example: Converting the image size and saving by overwriting

1 From the i-motion file list, select a movie, press ☷, and press ✉ (Func).

The Function menu appears.

2 Select [Edit movie] → [Select size] and press ☷.

3 Select [Yes] and press ☷.

4 Press ☷ (Save), select [Overwrite], and press ☷.

The converted movie is saved by overwriting the original movie.

To save as a new movie
Select [Save new] → a place to save to.

● It may take time to convert a large movie/i-motion file.
● When the size of a file after conversion is too large, movie images may be partially clipped into a file of 500K bytes or less.

What is Chara-den? <Chara-den>

You can send an avatar of your choice instead of your own image when you use the videophone function. You can make this avatar move by pressing the keys on the keypad. The mouth part of some avatars can be moved in response to the sound heard from the microphone.

■ Preinstalled Chara-den characters

● While pausing, fast-forwarding, or fast-reversing, or during the Rapid play, the data broadcasting is not displayed.
● If you perform the fast-forward, fast-reverse operation, or the Rapid play, the contents of the data broadcasting/data broadcasting site is refreshed to its top page when you return to normal playback.
● When the playback is completed, the display of the data broadcasting or data broadcasting site disappears.
● You may not hear sound clearly during the Rapid play.
● When a video is recorded/edited (divided) using the mobile phone that employs the editing function or PC, the video may not be played back correctly on the FOMA terminal.

microSD memory card

You can save Phonebook, mail, Bookmark, and other data in the FOMA terminal to the microSD memory card, as well as copy data in the microSD memory card to the FOMA terminal. In addition, you cannot only view data in the microSD memory card on the FOMA terminal, but also use the FOMA terminal as a reader/writer of a microSD memory card by connecting it to a PC (P.285).
To use the microSD memory card, you are required to obtain a microSD memory card separately. If you have no microSD memory card, you can purchase it at a home electric appliance store or other similar store.

● Data saved in the microSD memory card from other devices may not be displayed/played back on the FOMA terminal. Similarly, data saved in the microSD memory card from the FOMA terminal may not be displayed/played back on other devices.
● SO905i supports the commercially available microSD memory card of up to 2G bytes (as of October 2007).
For the latest information for which normal operation of the microSD memory card is confirmed, such as information about the manufactures and capacities of the microSD memory card, see the following websites. Note that a microSD memory card other than listed in the websites may not operate normally on SO905i.
i-mode site : [SO@Planet] (as of October 2007)
[i Menu] → [メニュー/検索] (Menu/Search) → [ケータイ電話メーカー] (Mobile Phone Manufacturers) → [SO@Planet] (Japanese only)
Website : Website of Sony Ericsson Mobile Communications Japan, Inc.
http://www.SonyEricsson.co.jp/memorycard/
Please note that the information listed represents only the result of the operation checks and by no means provides guarantee for all operations of the microSD memory card.
● Do not remove the microSD memory card during data access (reading of data, saving data, etc.). Doing so may cause malfunction, etc.
● During preparation for access after insertion of the microSD memory card (the time before the first reading/writing operation is ready), "🗄" flashes. If "🗄" keeps flashing, remove the microSD memory card and then insert it again. If the icon still keeps flashing, please check conditions of the microSD memory card.
● Do not stick a label, etc. on the microSD memory card. It may be removed when inserting/removing the microSD memory card, resulting in malfunction, etc. of the FOMA terminal.
● When you save data in a microSD memory card, it is recommended to make a backup copy of the saved data and keep it separately in a safe place. Under no condition will DoCoMo be held liable for any loss or modification of the data.
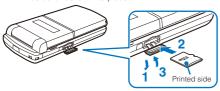

The microSD memory card formatted on a PC or other devices cannot be used on the FOMA terminal. Be sure to use the microSD memory card after formatting it using the FOMA terminal (P.284).
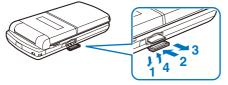

Inserting and Removing the microSD memory card

■ Inserting the microSD memory card

● When inserting the microSD memory card, make sure to insert it in the correct orientation with the printed side facing up as illustrated below. Any insertion in an orientation other than illustrated below may cause malfunction, etc.

1 Open the slot cover.

2 Insert the microSD memory card into the slot.

  ● Insert until it clicks into place.

Printed side

3 Close the slot cover.

■ Removing the microSD memory card

1 Open the slot cover.

2 Press the microSD memory card lightly.

It is ejected slightly.

3 Remove the microSD memory card.

4 Close the slot cover.

● "🗃" appears in the display while inserting the microSD memory card. When it does not appear, the following reasons about the microSD memory card may be considered. Please check them.
  - Dust or something gets on the metallic terminal portion
  - Insertion is not completed
  - Damaged
  - Using an external memory other than recommended ones (For information on recommended external memories, scan the QR code in P.278 and access to "SO@Planet".)

Displaying Data on the microSD memory card

Data saved in the microSD memory card can be displayed and checked.

1 From the Menu, select [LifeKit] → [microSD] and press ▭.

※1 When you save a Phonebook entry, text memo, schedule, mail, bookmark, and a ToruCa card from the microSD memory card to the FOMA terminal, they are saved as a file formatted for the microSD memory card. Multiple data records of above categories may be contained in a file of the microSD memory card.

※2 Including AAC-format music data

■ Data that cannot be moved/saved in the FOMA terminal

Phonebook	● You cannot save a movie/i-motion set for the Des call display and also a GIF/JPEG image set for the Des call display if it exceeds 100K bytes or [QVGA(240×320)].
ToruCa	● You cannot save a ToruCa and ToruCa(detail) card exceeding 1K bytes and 100K bytes respectively.
Melody	● You cannot save a melody exceeding 200K bytes.
My picture	● You cannot save a GIF image exceeding 2M bytes. ● You cannot save a GIF image and a GIF animation exceeding [UXGA(1600×1200)] and [Stby(480×864)] respectively, and some JPEG images. ● You cannot save a JPEG image exceeding 2M bytes or [3M(2048×1536)].
MUSIC	● You cannot save music data from the microSD memory card to the Data Box (except for the movable contents-compatible Chaku-Uta Full®).
i-motion	● You cannot save a movie/i-motion exceeding 10M bytes.
My document	● You cannot save PDF data exceeding 2M bytes.

When Displaying the Folders on a PC

When you save data of the FOMA terminal to the microSD memory card, a corresponding folder is created automatically.

● The maximum number of files that can be saved is an estimated number, assuming the blank memory is used.

Category			FOMA terminal folder	File format	FOMA terminal filename	Estimated max. number of files to be saved (64MB)

※1 The maximum number of files that can be saved in the microSD memory card is 99.
※2 A "＊.url" file received via data communication is also processed as a bookmark file.
※3 If there is a file with the same name, a serial number is added to the end of the file name.
● The numbers "001" to "999" and "0001" to "9999" are assigned to "nnn" and "nnnn" respectively from the smallest available number in the order of their creation.
● The hexadecimal digits "001" to "FFF" are assigned to "xxx" in the order of their creation.
● The numbers "00001" to "65535" and "00000001" to "00065535" are assigned to "*****" and "********" respectively from the smallest available number in the order of their creation.
● A file name that can be identified by the microSD memory card is up to 255 bytes including a drive name and path.

Data That Can Be Written/Read to and from the microSD memory card

- It may take time to save data depending on the data size.
- Data saved from the microSD memory card may not be displayed/played back properly.
- You cannot copy/move a file prohibited from being retrieved out of the FOMA terminal.

Category	Data you can/cannot save from the FOMA terminal			Data you cannot save from the FOMA terminal and other information
	One file	Selected files	All files	
My picture	○	○	○	• You cannot save a frame image and stamp image.
MUSIC	×	×	×	• You cannot save data from the Data Box to the microSD memory card (except for the movable contents-compatible Chaku-Uta Full®).
i-motion	○	○	○	• You can only move a movie/i-motion with playback restriction.
Melody	○	○	○	—
My document	○	○	○	• The document definition file is saved together with PDF data.
Kisekae Tool	×	×	×	• You cannot save data from the Data Box to the microSD memory card (except for the movable contents-compatible Kisekae tool).
1Seg	×	×	×	• You can only move videos from the Data Box to microSD memory card.
Phonebook	○	×	○	• You cannot save the Des substitute image, Des phone tone, Des mail tone, Select phone Illum., and Select mail Illum. • When you use Save one, you cannot save a Group number and Group name. To save data using Save one, set the Secret to [OFF]. • You cannot save a movie/i-motion set for the Des call display. • When you use Save all, the data of the PushTalk phonebook is also saved. • You cannot save the Des call display if the Save/attach image is set to [Invalid]. • You cannot copy the UIM phonebook.
Text Memo	○	×	○	—
Schedule	○	×	○	• You cannot save ON/OFF of the holiday setting for a repeated schedule. • To save data using Save one, set the Secret to [OFF].

Category	Data you can/cannot save from the FOMA terminal			Data you cannot save from the FOMA terminal and other information
	One file	Selected files	All files	
Inbox/Outbox/Draft	○	×	○	• You cannot save a folder name, i-αppli To link, and file attachment not yet obtained. • Mail exceeding 100K bytes is saved after being resized to 100K bytes by deleting a file attachment, etc. • Protected mail and i-αppli mail are saved as regular mail. • You cannot save the SMS report.
Bookmark	○	×	○	• You cannot save a folder name.
ToruCa	○	×	○	• You may not be able to save some ToruCa cards.

- ● If you edit, add, or delete data stored in the microSD memory card on a device such as a PC, it may not be displayed correctly on the FOMA terminal. If this happens, update the information of the management file in the microSD memory card (P.284).
- ● When you reply to mail saved in the microSD memory card, you cannot attach a file. If you want to reply to the mail with file attachment, you need to save the mail in the Main memory first, select the mail from the Draft, attach a file to the mail, and then you can send it with file attachment.

Data Display/Edit/Management

Saving Data from the FOMA Terminal to the microSD memory card

You can copy data from the FOMA terminal to the microSD memory card.

● While you save the Phonebook, Text memo, Schedule, mail, Bookmark, and ToruCa card data, the status of the FOMA terminal is the same as the outside of the service area status. Therefore, you cannot use call or communication functions, such as placing/receiving a call and using i-mode and data communication.

Example: Saving data

1 Select data and press ⌧ (Func).

The Function menu appears.

2 Select [Save to microSD] → [Save one] → [Yes] and press ▭.

The selected data is saved.

To save several data

Select [Save to microSD] → [Select&save] and select data. Press ▮ (Complete) and select [Yes].

To save all data in My picture/i-motion/Melody/My document

Select [Save to microSD] → [Save all], enter the Security code, and select [Yes].

To save all Phonebook entries

Select [Save to microSD] → [Save all] → [Yes]/[No] and enter the Security code.

To save all text memos

Select [Save to microSD] → [Save all] → [Yes]/[No] and enter the Security code.

To save mail/Schedule/Bookmark/ToruCa card

In the data list, from the Function menu, select [Save to microSD] → [Yes]. To save all data, in the folder list or the calendar, from the Function menu, select [Save to microSD] and enter the Security code.

Saving Data from the microSD memory card to the FOMA Terminal

You can copy data from the microSD memory card to the FOMA terminal.

Saving the Phonebook and Mail

You can save the Phonebook, Text memo, Schedule, mail, Bookmark, and ToruCa card data to the FOMA terminal.

● While you save the Phonebook, Text memo, Schedule, mail, Bookmark, and ToruCa card data, you cannot use call or communication functions, such as placing/receiving a call and using i-mode and data communication, because the FOMA terminal is placed in the same condition as outside of the service area.

● While another function is activated, you cannot save the Phonebook, Text memo, Schedule, mail, Bookmark, and ToruCa card data to the FOMA terminal.

Example: Saving the data by adding to the existing data

1 From the microSD category list, select a category and press ▭.

2 Select data and press ⌧ (Func).

The Function menu appears.

3 Select [Save to main] and press ▭.

The Security code screen appears.

4 Enter the Security code and press ▭ (OK).

The screen for confirming whether to save data appears.

[Add]:

Save the data by adding to the existing data.

[Overwrite]:

Save the data by overwriting the existing data. The screen for confirming whether to delete the existing data appears.

5 Select [Add] and press ▭.

The selected data is saved.

Saving a Melody and Image

You can save My picture, i-motion, Melody, My document, and MM File data to the FOMA terminal.

Example: Saving data

1 From the microSD category list, select a category and press ▭.

2 Select data and press ▣ (Func).

The Function menu appears.

3 Select [Save to main] → [Save one] → [Yes] and press ▭.

The selected data is saved in the [Data exchange] folder.

To save several data
Select [Save to main] → [Select&save] and select data. Press ▥ (Complete) and select [Yes].

To save all data
Select [Save to main] → [Save all], enter the Security code, and select [Yes].

● Data created on a microSD memory card compatible device other than SO905i may not be saved correctly.

Managing the microSD memory card

Formatting

You can format the microSD memory card to be used with the FOMA terminal.

● If you format the microSD memory card that contains data, the data is deleted. Be careful not to delete important data unintentionally when you start formatting.

1 Press ▣ (Func) in the microSD category list.

The Function menu appears.

2 Select [Format] and press ▭.

The Security code screen appears.

3 Enter the Security code and press ▭ (OK).

4 Select [Yes] and press ▭.

The microSD memory card is formatted.

● Do not format the microSD memory card using a PC, etc. Make sure to format it on the FOMA terminal.

Checking the Usage Information

You can check the usage information of the microSD memory card.

● The displayed data amount and total capacity of the microSD memory card are estimated values that may not be accurate.

1 Press ▣ (Func) in the microSD category list.

The Function menu appears.

2 Select [microSD info] and press ▭.

```
microSD info
Full cap.
                        60.5MB
Using
                        22.1MB
My picture
                         3.2MB
MUSIC
                        12.1MB
i-motion
                         5.6MB
Melody
                         0.5MB
```

To change the unit
Press ▥ (Unit chg) to switch temporarily between the MB and KB displays.

Updating the Management Information of the microSD memory card

If you edit, add, or delete data stored in the microSD memory card on a device other than the FOMA terminal, it may not be displayed correctly on the FOMA terminal. If this happens, update the information of the management file in the microSD memory card.

1 Press ▣ (Func) in the microSD category list.

The Function menu appears.

2 Select [Update mng. info] and press ▭.

The Update mng. info display appears.

3 Select a category to be updated, press ▭, and press ▥ (Complete).

The screen for confirming whether to update the management information appears.

4 Select [Yes] and press ▭.

The management information is updated. While the management information is updated, "⛟" appears.

● If any data in the microSD memory card has a file name that is not supported by the FOMA terminal, the file name is changed when you update the management information.
● If you update the management information while the screen for confirming whether to save the recorded images is displayed, the image that is being confirmed is discarded when the microSD memory card is set as the place to save to.

Data Display/Edit/Management

Using the FOMA Terminal with a PC

<USB mode setting>

When you connect the FOMA terminal to a PC using the FOMA USB Cable with Charge Function 01 (optional), you can use it as an external drive to read/write data on the microSD memory card.

- You can change the USB mode setting before connecting the FOMA terminal to a PC.
- If the FOMA terminal is not connected to a PC correctly or the battery level is very low or 0, not only data cannot be sent/received, but also it may be lost in some cases.
- Do not unplug the FOMA USB Cable with Charge Function 01 (optional) during reading/writing data. If you do so, not only data cannot be sent/received, but also it may be lost in some cases.
- The operating environment for using the FOMA terminal connected to a PC is as follows.

Item	Required environment
Connection cable	FOMA USB Cable with Charge Function 01 (optional)
PC main unit	PC with a USB port (Universal Serial Bus Specification 1.1 compliant) that can be used to connect the FOMA USB Cable with Charge Function 01 (optional)
OS	Windows 2000 Professional (SP3 or later), Windows XP, Windows Vista (Japanese version)

1 From the Menu, select [Settings] → [Management] → [USB mode setting] and press ▤.

```
USB mode setting

  Communication mode
  microSD mode
  MTP mode
  ATRAC mode

  Uses USB Hands-free/
  data transmission/
  data transfer
```

[Communication mode]:
　Perform packet and 64K data communication, and send/receive data.

[microSD mode]:
　Read and write data from/to the microSD memory card.

[MTP mode]:
　Transfer music data (WMA file) from a PC to the microSD memory card.

[ATRAC mode]:
　Transfer music data (ATRAC file) from a PC to the microSD memory card using the SonicStage.
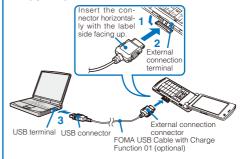

2 Select [microSD mode] and press ▤.

The microSD mode is set and "⬛" changes to "⬛".
On the PC, "リムーバブル ディスク" is displayed for the microSD memory card.

- You can check the current USB mode and connection status by the following icons.

Icon	Mode/Connection status
⬛	Communication mode
⬛	microSD mode
⬛	MTP mode (Connected)
⬛	MTP mode (Transferring)
⬛	MTP mode (Completed)
⬛	MTP mode (Error)※
⬛	ATRAC mode

※ It appears when the MTP connection cannot be started because there is not enough memory. End the unused applications, increase memory space, and then perform the PC connection again.

3 Connect the FOMA terminal and PC using the FOMA USB Cable with Charge Function 01 (optional).

Insert the connector horizontally with the label side facing up. 1

2 External connection terminal

3 USB terminal USB connector External connection connector

FOMA USB Cable with Charge Function 01 (optional)

Nov 01 Thu 09:05 AM

The icon "⬛" (USB cable cncted) appears in the stand-by display. When you press ▤ (Link) and then select "⬛", the USB mode setting display appears.

- ● Do not format the microSD memory card using a PC, etc. Make sure to format it on the FOMA terminal.
- ● Even if you set the USB mode setting to [MTP mode], [microSD mode], or [ATRAC mode] and connect the FOMA terminal to a PC, the PC may not recognize the FOMA terminal while the FOMA terminal is accessing to the microSD memory card (reading/saving data, etc.) or the microSD memory card is not inserted.
- ● While the USB mode setting is set to [ATRAC mode], when the FOMA terminal is connected to a PC, the message "SDカード枚数を超えたため認識できません 以前使用していたSDカードを使用してください" (The number of SD cards exceeds the limit and cannot be recognized. Use the SD card which has been used before.) appears. In this case, use the microSD memory card which has been inserted in the FOMA terminal before as no more microSD memory cards can be recognized.
- ● While the USB mode setting is set to [MTP mode] and the FOMA terminal is connected to a PC, when you press ▤, the Standard menu appears. The Kisekae menu is not displayed. Also, some functions may be limited.
- ● For more details about the USB mode setting, see the website below.
http://www.SonyEricsson.co.jp/so905i/faq.html

Terminating the microSD Mode

To remove the FOMA terminal from a PC, perform the procedure to safely remove the hardware on the PC in advance, which is slightly different for each OS.

Example: When using Windows XP
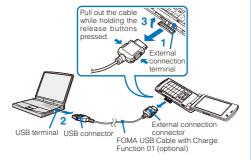

1 Double-click the task tray icon [<img>] (ハードウェアの安全な取り外し) on the Windows desktop.

2 Move the pointer to [USB**大容量記憶装置デバイス**] and click [**停止**].

3 Click [OK] and confirm that the hardware is unmounted successfully.

4 Remove the FOMA USB Cable with Charge Function 01 (optional) from the FOMA terminal and PC.

Pull out the cable while holding the release buttons pressed.

External connection terminal

USB terminal   USB connector

External connection connector

FOMA USB Cable with Charge Function 01 (optional)

Copying Data from the FOMA Terminal to the UIM

You can copy up to 50 FOMA terminal phonebook entries and up to 20 SMS from the FOMA terminal to the UIM (FOMA card).

- Only the "name", "reading", "first phone number", and "first mail address" can be copied from the FOMA terminal phonebook to the UIM phonebook. The reading is converted from half-width katakana characters to full-width katakana characters. If "+" is included in a phone number, it is deleted.
- If a group with the same name exists in the UIM phonebook, data is saved in it and if not, data is saved in **0**グループなし.
- You cannot copy the SMS report.

Example: Copying the FOMA terminal phonebook entries

1 From the FOMA terminal phonebook, select data and press 🖂 (Func).

The Function menu appears.

To copy all data

From the Function menu, select [Copy to UIM] → [Copy all] → [Yes] and enter the Security code.

To copy several data

From the Function menu, select [Copy to UIM] → [Select&copy] and select data. Press 🔳 (Complete) and select [Yes].

To copy SMS

Move the cursor to the mail in the mail list and from the Function menu, select [Copy to UIM] → [Yes].

2 Select [Copy to UIM] → [Copy one] → [Yes] and press ▭.

The selected data is copied.

Data Display/Edit/Management

Copying Data from the UIM to the FOMA Terminal

You can copy UIM (FOMA card) phonebook data and SMS from the UIM to the FOMA terminal.

● The reading of the UIM phonebook is converted from full-width katakana characters to half-width katakana characters.
● If a group with the same name exists in the FOMA terminal phonebook, data is saved in it and if not, data is saved in ⓪グループなし.

Example: Copying the UIM phonebook entries

1 From the UIM phonebook, select data and press ✉ (Func).

The Function menu appears.

To copy all data
From the Function menu, select [Copy to Main] → [Copy all] → [Yes] and enter the Security code.

To copy several data
From the Function menu, select [Copy to Main] → [Select&copy] and select data. Press 🖩 (Complete) and select [Yes].

To copy SMS
Move the cursor to the mail in the mail list and from the Function menu, select [Copy to Main] → [Yes] → a folder.

2 Select [Copy to Main] → [Copy one] → [Yes] and press ▦.

The selected data is copied.

Managing Data Box <Data Box>

Data handled by the FOMA terminal, such as downloaded data and data recorded using the camera, are saved in the categories of the Data Box: My picture, MUSIC, Music&Video Channel, i-motion, Melody, My document, Kisekae Tool, Chara-den, and 1Seg. You can display/play back saved data any time.

● You may not be able to operate some categories.

■ Data saved in the Data Box

Category	Folder name	Contents of data
My picture	i-mode	Images obtained from a site, i-mode mail, or i-αppli
	Camera	Images recorded using the camera of the FOMA terminal
	Deco mail image	Images that can be used when you compose Deco-mail
	Deco mail pict.※	Deco-mail pictograph
	Stamp&Frame	Images used for stamps/frames
	Preinstall	Preinstalled images
	Data exchange	Images scanned by the bar code reader, images moved/copied from the microSD memory card, images received using infrared/iC communication, images clipped from the PDF data, and images retrieved from a PC, etc.
MUSIC	—	User-created original playlist, preinstalled Chaku-Uta Full®, or Chaku-Uta Full® obtained from a site
Music&Video Channel	Distrib. program	Program obtained from a site
i-motion	i-mode	Movie obtained from a site, i-mode mail, or i-αppli
	Camera	Movie recorded using the camera of the FOMA terminal
	Preinstall	Preinstalled movie
	Playlist	User-created playlist
	Data exchange	Movie moved/copied from the microSD memory card, movie received using infrared/iC communication, and movie retrieved from a PC, etc.

※ Only Deco mail pict. can be saved.

Data Display/Edit/Management

Category	Folder name	Contents of data
Melody	i-mode	Melodies obtained from a site, i-mode mail, or i-αppli

📷	Deco mail pict.
📷	Stamp&Frame
📷	Preinstall
📷	Data exchange
📁 (Blue)	User-created folder ● At the time of purchase, the [スーパーモンキーボール] folder is created in My picture, in which images used by i-αppli are contained.

3 Select [Preinstall] and press ⬚.

Preinstall   1/20

Color Pencils ——— Management title
                  ——— Source
Modern Living

Aquarium

The Earth

世界遺産1（まちう

世界遺産2（まちう

The file list appears.

● The following icons show the source from where the file was obtained.

Icon	Source
	Preinstalled data
	Data obtained from sites, i-mode mail, or i-αppli
	Data recorded using the camera of the FOMA terminal
	Data scanned by a bar code reader, data moved/copied from the microSD memory card, data received using infrared/iC communication, and data retrieved from a PC, etc.
	One Seg recorded data

To display the saved date/time

Press ⎗ to switch the display temporarily between the management title and saved date/time.

● When you select [Search by i-mode] on the folder or file lists, the screen for confirming whether to connect to i-mode appears. If you select [Yes], the FOMA terminal connects to an i-mode site and you can search data.

Creating/Deleting Folders

You can create or delete a folder for saving data. Regarding the user-created folder, you can manage files by allocating them in 10 folders per category. You can also change the name of a folder.

● For MUSIC, 10 folders can be created under each folder in MUSIC.
● You can neither delete the preset folders nor change the name of them. However, the [スーパーモンキーボール] folder that is preset in My picture can be deleted and renamed.

1 Press ✉ (Func) in the category folder list.

The Function menu appears.

2 Select [Edit folder] → [Create folder], press ⬚, and enter a folder name.

Enter a name within 10 full-width or 20 half-width characters (seven full-width or 15 half-width characters in case of MUSIC).
The folder is added.

To change a folder name

Move the cursor to the folder and from the Function menu, select [Edit folder] → [Edit folder name]. Enter a name within 10 full-width or 20 half-width characters (seven full-width or 15 half-width characters in case of MUSIC).

To delete a folder

Move the cursor to the folder and from the Function menu, select [Edit folder] → [Delete folder], enter the Security code, and select [Yes]. To delete several folders, from the Function menu, select [Edit folder] → [Select&delete], enter the Security code, and select folders. Press ⎗ (Complete) and select [Yes]. To delete all folders, from the Function menu, select [Edit folder] → [Delete all], enter the Security code, and select [Yes].

To delete all data in the [WMA]/[ATRAC] folder in the microSD memory card

From the Function menu in the folder list, select [Delete all WMA]/[Delete all ATRAC], enter the Security code, and select [Yes].

● When you perform the Delete all WMA or Delete all ATRAC, the [WM] and [WM_SYSTEM] folders of the microSD memory card and all data in the folders may be deleted. Note that data which is not used for the MUSIC Player may be deleted as well.

Moving Data to a Different Folder

You can use three methods to move data to another folder or the microSD memory card.

● You cannot move the Chara-den and data saved in the [Image] folder in 1Seg or [Preinstall] folder.
● You cannot move copyrighted data if it is not permitted by the provider of this data.
● You cannot move data such as an i-motion or Kisekae tool downloaded partway.

Example: Moving data from the Data Box to the microSD memory card

1 From the Data Box, select a category → a folder and press ⬚.

To move all data in the folder

From the Function menu, select [Move] → [Move all] → a place to move to.

To move several data

From the Function menu, select [Move] → [Select&move] → a place to move to and select data. Press ⎗ (Complete) and select [Yes].

To move data from the microSD memory card to the FOMA terminal

Move the cursor to the data and from the Function menu, select [Move to main] → [Move one]. To move several data, select [Move to main] → [Select&move] and select data. Press ⎗ (Complete) and select [Yes]. To move all data, select [Move to main] → [Move all].

● You cannot perform the Select&move and Move all to move copyrighted data.

To move a Chaku-Uta Full® from the microSD memory card to the FOMA terminal

Move the cursor to a Chaku-Uta Full®, from the Function menu, select [Move to main] → a place to move to, and press ⎗ (Complete).

To move data in the [Video] folder of 1Seg to the microSD memory card

Move the cursor to data, from the Function menu, select [Move], press ⬚, and select [Yes].

2 Select data and press ✉ (Func).

The Function menu appears.

3 Select [Move] → [Move one] and press ▤.

The screen for selecting where to move appears.

[Data Box]:
Move data to a folder in the Data Box. To move a folder within the Data Box, select a place to save to → a folder.

[microSD]:
Move data to a folder in the microSD memory card. Copyrighted data is moved to [SO905i] of [Movable contents].

[Back to origin]:
Restore data to its original folder.

4 Select [microSD] and press ▤.

The selected data is moved to the microSD memory card.

Deleting Data

You can delete data using three methods.

● You cannot delete some preinstalled data.

Example: Deleting one data item

1 From the Data Box, select a category → a folder and press ▤.

To delete all data in the folder
From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To delete several data
From the Function menu, select [Delete] → [Select&delete] and select data. Press 🔘 (Complete) and select [Yes].

2 Select data and press ✉ (Func).

The Function menu appears.

3 Select [Delete] → [Delete one] → [Yes] and press ▤.

The selected data is deleted.

Sorting Data

Data in a folder can be sorted for display.

● You cannot sort data in MUSIC.

1 From the Data Box, select a category → a folder, press ▤, and press ✉ (Func).

The Function menu appears.

2 Select [Sort] → a sorting order and press ▤.

[Title(up)]:
Sort data by the management title in Japanese alphabetical ascending order.

[Title(down)]:
Sort data by the management title in Japanese alphabetical descending order.

[Date(new → old)]:
Sort data from newest to oldest saved date.

[Date(old → new)]:
Sort data from oldest to newest saved date.

[Size(big → small)]:
Sort data in decreasing order of file size, the largest file first.

[Size(small → big)]:
Sort data in increasing order of file size, the smallest file first.

[Originated(icon)]:
Sort data by the icon of the source in the order of "📱" (Preinstall) → "📲" (i-mode) → "📷" (Camera) → "🔄" (Data exchange).

The data is listed in the selected order.

● When you sort data by titles, sorting may not be performed exactly in Japanese alphabetical order for reasons such as because some titles contain a mixture of full-width and half-width characters.

Setting How to Display a List of Images

You can select the display style of My picture, i-motion, Music&Video Channel, Kisekae Tool, and [Image] folder in 1Seg file list using the following three methods. The set display style is applied to all folders.

6 images	20 images	List only

Display by 6 images   Display by 20 images   Display in the list form

1 From the Data Box, select a category → a folder, press ▤, and press ✉ (Func).

The Function menu appears.

2 Select [Change display] → the display style and press ▤.

The display style of a file list is set.

Displaying the Data Box/Data Information

Displaying the Data Box Information

1 Press ⊠ (Property) in the Data Box.

```
Data Box info
Full cap.
                316.6MB
Using
                  5.5MB
My picture
                  0.9MB
MUSIC
                  0.6MB
Music&Video channel
                  0.0MB
i-motion
                  0.0MB
```

To change the unit

Press 🔳 (Unit chg) to switch temporarily between the MB and KB displays.

Displaying Information of Folders in Data Box

1 From the Data Box, select a category, press ▤, and press ⊠ (Func).

The Function menu appears.

2 Select [Folder info] and press ▤.

```
My picture info
Remaining
                182.3MB
Using
                  0.9MB
0%       50%      100%

Max              1500
Registered        514
```

To change the unit

Press 🔳 (Unit chg) to switch temporarily between the MB and KB displays.

● Data in the [Distrib. program] folder of Music&Video Channel are not counted.

Displaying/Editing Data Information

You can change the data management title and file name, and set file restrictions. The management title is displayed in the file list.

● You may not be able to edit the detailed information of some preinstalled data.

1 From the Data Box, select a category → a folder and press ▤. Select a data item and press 🔳 (Detail) or 🔲 (Detail).

```
Detail info
[Management title]
Your cat
[File name]
20071112091836
[File format]
JPEG
[Restriction]
Not restricted
[Size]
W 352×H 288
[File size]
35KB
```

The detailed information of data appears.

2 Press 🔳 (Edit).

```
Edit file info
Management title
      Your cat
File name
      20071112091836
Restriction    No ▾
```

For Chaku-Uta Full®

Press 🔲 (Edit). Edit each item. To reset each item, move the cursor to an item, and press 🔲 (Reset).

● You can enter a management title at [Management title] within 25 full-width or 50 half-width characters.

3 Enter a title at [Management title].

Enter a title within 18 full-width or 36 half-width characters.

To reset the management title

Press 🔲 (Rset Ttl).

● You can reset the management title only of the data that has an original title to be displayed.

4 Enter a file name at [File name].

Enter a file name within 36 half-width alphanumeric characters and symbols.

● You cannot use half-width symbols " ⚹ / : < > ? ¥ | . You cannot enter "." at the beginning of a file name.

5 Select [Yes]/[No] at [Restriction].

[Yes]:
Set file restriction. Once you send the file as a mail attachment, it cannot be sent or forwarded from the recipient's FOMA terminal.

[No]:
Do not set file restriction.

6 Press 🔳 (Complete).

● Preinstalled i-αppli, [Deco mail pict.] and [スーパーモンキーボール] folders in My picture, and data of MUSIC and My document are included in the data amount.

In Case of Insufficient Memory

If there is not enough memory when you save or download data or software in My picture, MUSIC, i-motion, melody, My document, Chara-den, and Kisekae Tool of the Data Box, or i-αppli, select and delete data that is no longer required from the same category, allocate the save area, and then save the new data/software.

Example: When there is not enough memory while downloading software

1 Download the software.

The screen informing memory shortage appears.

[Sel. delete file]:
Delete unnecessary software and continue to download the software.

[Cancel]:
Cancel saving.

2 Select [Sel. delete file] and press ▤.

```
iαppli            12/24
ソフト一覧
Downloaded software

Used(Folder)     320KB
Shortage          64KB
```

3 Select a folder → software and press ▤.

```
ソフト一覧      1/12      ソフト一覧      1/12

Used(Data)     64KB      Used(Data)     64KB
Shortage       64KB      Saving available
```

To cancel the selection
Press ▤ (Rel.).

4 Press ▣ (Delete), select [Yes], and press ▤.

The selected software is deleted and then downloading starts.

● If you delete preinstalled Chara-den files, it does not help you increase the save area.

Data Display/Edit/Management

What is the Infrared Communication?

<Infrared communication>

You can send and receive the Phonebook, Schedule, Text memo, Bookmark, mail, image, movie, melody, PDF data, and ToruCa card to/from a mobile phone equipped with the infrared communication function. To send/receive all entries, you need a 4-digit authentication password preset with a communication target recipient/sender.

The FOMA terminal can also do much more in conjunction with other devices equipped with the infrared communication function by using the infrared communication feature of i-αppli.

- There are some data that cannot be exchanged even if the other device is equipped with the infrared communication function.
- The infrared communication of the FOMA terminal follows IrMC version 1.1. Even if the other device follows IrMC version 1.1, there may be data that cannot be exchanged properly depending on the software.
- You cannot perform infrared communication during a call or i-mode/packet/64K data communication, or when the Lock all, Omakase Lock, Personal data lock, or Self mode is set.
- During the infrared communication, the status of the FOMA terminal is the same as the outside of the service area status. Therefore, you cannot place a call or perform i-mode and data communication.
- When the other device does not support IrSimple1.0, the communication speed slows.
- The infrared receiving function of the FOMA terminal and infrared sending function of contents of the Data Box support IrSimple1.0.
- JPEG images saved in My picture of the Data Box can be sent by using the high-speed infrared communication (IrSS function※) (P.298).
  ※ IrSS is the one-way communication function (Home Appliance Profile) that is compliant with IrSimple1.0.

Using the Infrared Communication

- The FOMA terminal and the other device can be used within about 20 cm apart. The infrared data port must be kept pointed at the other device until the data exchange ends.
- If used under direct sunlight, fluorescent lamp or near other infrared devices, the infrared data exchange may not function properly.

Reception angle:
±15 degrees off axis

Infrared data port

Infrared data port

Within about 20 cm

Data That Can Be Sent/Received via Infrared Communication

You can send and receive your Own number, Phonebook, Schedule, Text memo, Bookmark, mail, image, movie, melody, PDF data, and ToruCa card between mobile phones and other devices equipped with the infrared communication function.

- It may take time to exchange or save data depending on the data size.
- Data received using the infrared communication may not be displayed/played back properly.

Type of data		Reception One item	Reception All items	Transmission One item	Transmission All items	Storage for received data	Items that cannot be sent/received, etc.
Own number		×	—	○	—	FOMA terminal phonebook※1	• You cannot send Additional No.1 and No.2 and images. • Data is sent by setting the Secret to [OFF].
FOMA terminal phonebook		○	○	○	○	FOMA terminal phonebook※1	• You cannot send Des call display, Des substitute image, Des phone tone, Des mail tone, Select phone Illum., and Select mail Illum. • When you send one data item, the group number, group name, memory number, and data of the PushTalk phonebook are not sent. Data is sent by setting the Secret to [OFF]. • When all data is sent/received, the data of the PushTalk phonebook is also sent/received. • When all data is sent/received, the first Phonebook entry is sent/received as the Own number.
UIM phonebook		○	○	×	×	FOMA terminal phonebook※1	• When you receive one data item, the group name is not transmitted.
Schedule		○	○	○	○	Schedule※2	• You cannot send ON/OFF of the holiday setting for a repeated schedule. • When you send one data item, the data is sent by setting the Secret to [OFF].
Text memo		○	○	○	○	Text Memo※3	—
Bookmark		○	○	○	○	Bookmark※4	• You cannot send/receive a folder name.
Mail	Received	○	○	○	○	[Inbox]※5	• You cannot send a folder name, i-αppli To link, and file attachment not yet obtained. • Mail exceeding 100K bytes is sent until the size being sent reaches 100K bytes after deleting a file attachment, etc. • Protected mail and i-αppli mail are sent as regular mail. • You cannot send the SMS report .
	Sent					[Outbox]※5	
	Saved					[Draft]※5	
JPEG/GIF image/Flash movie		○	×	○	×	[Data exchange] folder in My picture ※4	• You cannot receive an image exceeding 2M bytes. • You cannot receive a GIF image and a GIF animation exceeding [UXGA(1600×1200)] and [Stby(480×864)] respectively, and some JPEG images. • You cannot send a frame image, stamp image.
Movie/i-motion		○	×	○	×	[Data exchange] folder in i-motion※4	• You cannot receive a movie/i-motion exceeding 10M bytes and that with playback restriction.
Melody		○	×	○	×	[Data exchange] folder in Melody※4	• You cannot receive a melody exceeding 200K bytes.
PDF data		○	×	○	×	[Data exchange] folder in My document※4	• You cannot receive PDF data exceeding 2M bytes. • You cannot send PDF data that you downloaded by page or failed to download. • The document definition file is sent together with PDF data.
ToruCa		○	○	○	○	[ToruCa] folder in ToruCa※4	• You cannot receive a ToruCa and ToruCa(detail) card exceeding 1K bytes and 100K bytes respectively. • You may not be able to send some ToruCa cards.

- When you send/receive bookmark or mail data, the folder allocation setting may not be applied depending on the terminal model of a caller/recipient.
- When you send mail data, all of the title may not be displayed depending on the recipient's terminal.
- You cannot send data saved in the microSD memory card except JPEG images. To send JPEG images, you can use the infrared communication or high-speed infrared communication (IrSS function).
- You cannot send/receive a file prohibited from being retrieved out of the FOMA terminal.

※1 Saved in a memory space with the smallest vacant memory number.   ※2 Saved in the order of date and time when they start.
※3 Saved in the order of date and time when they were created.   ※4 Saved at the top of the list.
※5 Saved in the order of date and time when they were received/sent/saved.

Data Display/Edit/Management

Receiving Data Using the Infrared Communication <Receive Ir data>

Receiving Data

1 From the Menu, select [LifeKit] → [Receive Ir data] → [Receive] and press ☰.

" 📶 " changes to " ▓EXT " and the screen for confirming whether to begin the infrared communication appears.

2 Select [Yes] and press ☰.

The infrared communication is started and data exchange is started.
The screen for confirming whether to save data appears.

3 Select [Yes] and press ☰.

The received data is saved.

When you receive Phonebook data
The screen for confirming whether to save data in the PushTalk phonebook appears. If you select [Yes], the data is saved in both the PushTalk and FOMA terminal phonebooks. If you select [No], the data is saved in the FOMA terminal phonebook only. When there are several phone numbers, select the phone number to be saved in the PushTalk phonebook.

Receiving All Data

- It is necessary that you and the sender determine the 4-digit authentication password beforehand.

Example: Adding received data

1 From the Menu, select [LifeKit] → [Receive Ir data] → [Receive all] and press ☰.

" 📶 " changes to " ▓EXT ".

```
Select the way
to save

Add
Overwrite
```

[Add]:
Save received data by adding to the existing data.
[Overwrite]:
The screen for confirming whether to delete the existing data appears. Note that all existing data is deleted if you select [Yes].

2 Select [Add] and press ☰.

The Security code screen appears.

3 Enter the Security code and press ☰ (OK).

The Authentication password screen appears.

4 Enter the authentication password.

The screen for confirming whether to begin the infrared communication appears.

5 Select [Yes] and press ☰.

The infrared communication is started. Data exchange is started and the data is added to the existing data.

To cancel receiving
Press ✉ (Cancel).

Sending Data Using the Infrared Communication <Send Ir data>

Sending Data

1 Select data to be sent and press ✉ (Func).

The Function menu appears.

2 Select [Send Ir data] and press ☰.

" 📶 " changes to " ▓EXT " and the screen for confirming whether to begin the infrared communication appears.

To send data in My picture of the Data Box
Move the cursor to the data and from the Function menu, select [Send Ir data] → [Send Ir data].

To send one entry in the Phonebook/Text Memo
Move the cursor to the data and from the Function menu, select [Send Ir data] → [Send Ir data].

3 Select [Yes] and press ☰.

The infrared communication is started and data exchange is started.

Sending All Data

- It is necessary that you and the receiver determine the 4-digit authentication password beforehand.

1 Press ✉ (Func) in the folder list of data to be sent.

The Function menu appears.

2 Select [Send all Ir data] and press ☰.

" 📶 " changes to " ▓EXT " and the Security code screen appears.

To send all entries in the Phonebook/Text Memo
From the Function menu in the list of data, select [Send Ir data] → [Send all Ir data].

To send all entries in the Schedule
From the Function menu in the calendar display, select [Send all Ir data].

To send all ToruCa cards
From the Function menu in the folder list, select [Send all Ir data] → [Yes] → [Yes].

3 Enter the Security code and press ▤ (OK).

The Authentication password screen appears.

4 Enter the authentication password.

The screen for confirming whether to begin the infrared communication appears.

5 Select [Yes] and press ▤.

The infrared communication is started and data exchange is started.

To cancel sending
　Press ✉ (Cancel).

Sending a Still Image Using the High-Speed Infrared Communication

You can send a JPEG image saved in My picture of the Data Box or microSD memory card to the IrSS-compatible devices using the high-speed infrared communication.

● IrSS is the one-way communication, so send data without checking the answer from the receiver. Therefore, the sender side is completed normally even if the receiver cannot receive data.

Example: Sending an image in My picture of the Data Box

1 From My picture file list, select an image and press ✉ (Func).

The Function menu appears.

2 Select [Send Ir data] → [Send IrSS] and press ▤.

"📶" changes to "📶🔜" and the screen for confirming whether to begin the IrSS communication appears.

To send an image in the microSD memory card
　Select [Send IrSS].

3 Select [Yes] and press ▤.

The high-speed infrared communication is started and data transfer begins.

After completing to send data, the screen informing the completion appears.

4 Select [End] and press ▤.

The high-speed infrared communication ends.

To send the same data again
　Select [Retry].

Using the Infrared Remote Control

Once infrared remote control software is downloaded from a site and saved in the FOMA terminal, the FOMA terminal can be used as the TV or DVD player remote control.

● To use the infrared remote control, it is necessary to download the software corresponding to the target equipment. Even if the corresponding software is used, some equipment may not be operated.

● The infrared remote control key operations vary depending on the software.

■ Remote control operation
When using this function, point the FOMA terminal's infrared data port at the remote control receiver of the TV or DVD player and operate the FOMA terminal within about 4 m remote control range. Note that communication may be affected by the target equipment or ambient brightness.

Reception angle:
±15 degrees

Infrared data port
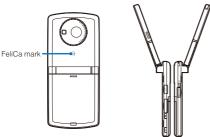

What is iC Communication Function?

You can send and receive data by placing the FOMA terminal provided with the iC communication function over the FeliCa mark of another FOMA terminal.

● Data that can be sent and received by iC communication is the same as the data exchanged using infrared communication (P.296).

● You cannot perform the iC communication during a call, i-mode/packet/64K data/infrared communication, or when the Lock all, Omakase Lock, Personal data lock, Self mode, or IC card lock is set.

● To receive data using iC communication, make sure that the FOMA terminal is in stand-by status. You cannot receive data when operation of another function is in progress.

● During the iC communication, the status of the FOMA terminal is the same as the outside of the service area status. Therefore, you cannot place a call or perform i-mode and data communication.

● Data may not be sent/received depending on the recipients' terminals. In this case, move the FOMA terminals so that both FeliCa marks "🔲" are closer or farther together, or move the FOMA terminals ups and downs or back and forth.

● When you send mail data, all of the title may not be received depending on the recipient's terminal.

Performing iC Communication

● Place the FeliCa mark "⌒" of the FOMA terminal over that of the other terminal. Do not move either of the FOMA terminals until the data exchange is completed.

FeliCa mark

Receiving Data Using iC Communication

Receiving Data

1 Place the FeliCa mark "⌒" of the FOMA terminal over that of the other terminal in the stand-by display on both terminals.

Set whether to distinguish uppercase and lowercase characters.

2 Enter a character string at [Search text].

Enter a character string within eight full-width or 16 half-width characters.

3 Select [ON]/[OFF] at [Match full].

4 Select [ON]/[OFF] at [Case sensitivity].

5 Press ▭ (OK).

The searched character string is displayed in reverse video.

To display the previous/next search result
Press ▭ (Back)/ ▭ (Next).

Using a Bookmark/Mark

Once you save a bookmark or mark in pages that you use frequently, you can display the linked page by simply selecting the bookmark or mark. You can save a mark for the number of the currently displayed page and location in the page. Some PDF data is preset with bookmarks or marks.

● The two types of bookmarks that you can use are as follows.
  - Bookmark: Saved in PDF data in advance. You cannot change it.
  - i bookmark: You can add/delete this bookmark.

Adding an i Bookmark/Mark

You can add up to 10 i bookmarks and marks each.

Example: Adding an i bookmark

1 In the PDF data display, display the page for which you want to add an i bookmark and press ⊠ (Func).

The Function menu appears.

To add a mark

From the Function menu, select [Mark] → [Add mark]. "▶" appears at the location where the mark is added.

2 Select [Bookmark] → [Add i bookmark] and press ▱.

The i bookmark is added.

●The i bookmarks/marks that you have added may be deleted if you attempt to copy them to a PC or other FOMA terminals using infrared/iC communication or the microSD memory card.

Displaying the i Bookmark/Mark List

Example: Displaying the i bookmark list

1 Press ⊠ (Func) in the PDF data display.

The Function menu appears.

2 Select [Bookmark] → [i bookmark list] and press ▱.

The list of i bookmarks is displayed.

To display the list of marks

Select [Mark] → [Mark list].

To check the details of a bookmark/i bookmark

Press 🅸 (Confirm).

To change the title of an i bookmark

Move the cursor to the i bookmark and from the Function menu, select [Edit title]. Enter a new title within 64 full-width or 128 half-width characters.

To delete an i bookmark/mark

Move the cursor to the i bookmark/mark and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete several i bookmarks/marks, from the Function menu, select [Delete] → [Select&delete] and select i bookmarks/marks. Press 🅸 (Complete) and select [Yes]. To delete all i bookmarks/marks, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

3 Select an i bookmark and press ▱ (Disp).

The page set with the i bookmark appears.

Clipping a Still Image

You can clip a part of the currently displayed PDF data and save it as a JPEG image.

● You may not be able to clip an image of some PDF data.

1 Press ⊠ (Func) in the PDF data display.

The Function menu appears.

2 Select [Capture screen] → [Yes] and press ▱.

3 Select a folder and press ▱.

The image clip is saved in My picture of the Data Box.

Music&Video Channel/
Music Playback

Handling the music data

- Chaku-Uta Full® and WMA (Windows Media Audio), ATRAC, and MP3 files which are played back on the MUSIC Player are stated as "music data" in this manual.
- The FOMA terminal can play back WMA, ATRAC, and MP3 files and Chaku-Uta Full® which are protected by the copyright protection technology.
- When you download music data from a website over the Internet, make sure to check the usage conditions (licensing, prohibited acts, etc.) before you use it.
- The WMA files protected by the copyright protection technology are played back by the FOMA terminal using its own information. When the FOMA terminal's own information is changed due to malfunction, repair, or change, the existing WMA files may not be played back again.
- Under no condition will DoCoMo be held liable for handling CCCD (copy controlled CD) or when music data cannot be converted to a WMA file or other file format.
- Music data saved in the FOMA terminal and microSD memory card is used only for your personal use. Please take care that you never violate other party's intellectual property right and other rights such as copyright when you use it. Also, do not copy or move music data saved in the FOMA terminal and microSD memory card to a PC or other devices.

What is Music&Video Channel?

Music&Video Channel is a service that a music program of up to one hour is automatically distributed during the night only by setting your favorite channel in advance. You can also enjoy high-quality movie programs up to 30 minutes. Programs are updated regularly and you can enjoy the distributed program anytime such as during commuting time to work or school.

■ Before using the Music&Video Channel service

● Music&Video Channel is a paid service that requires a subscription. (To apply for the Music&Video Channel service, the subscriptions to i-mode and Pake-Houdai/Pake-Houdai Full service are required.)
● The packet communication charge may be required depending on a program in addition to the Music&Video Channel service charge.
● For details on the Music&Video Channel service, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".
● After you subscribe to the Music&Video Channel service, inserting the UIM into the FOMA terminal which is incompatible with the Music&Video Channel service does not allow you to use the service. Even in this case, note that the service charge is required unless you unsubscribe from the service.
● You cannot set or download programs during international roaming.※ Stop the distribution service before you go abroad. Restart the distribution service after you come back.
  ※ Note that the packet communication charge for connecting to i-mode is required when you try to set or download programs during international roaming.

Setting a Program

When you set a desired program in advance, the program data is automatically distributed at night.

1 From the Menu, select [MUSIC] → [Music&Video Channel] and press ▭.

```
Music&Video Channel
    No program
    No program
    Set program
    Program list
    About
    this service
```

The Music&Video Channel menu appears.

[Set program]:
  Connect to a site to set/cancel a program.

[Program list]:
  Connect to a site that contains a program list.

[About this service]:
  Connect to a site that explains about Music&Video Channel.

2 Select [Set program] and press ▭.

3 Operate as instructed on the display to set a program.

For more details, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

● To set a program, you need to add a site which provides the Music&Video Channel service to My Menu (P.164).
● You can set two programs at a time.

Checking/Canceling a Set Program

1 From the Music&Video Channel menu, select [Set program] and press ▭.

2 Operate as instructed on the display.

You can check or cancel a set program. For more details, see the "Mobile Phone User's Guide 【i-mode】 FOMA version".

● Even if you cancel a set program, the site is not deleted from My Menu.

After Setting a Program

"▦" appears in the stand-by display 12 hours before the downloading starts.

A program is automatically downloaded at night and the notification icon "▦" (Download completed) appears in the stand-by display right after downloading successfully.

```
┌─────────────────────────────┐
│ Nov 1 Thu    9:05 AM        │
│                             │
│                             │
│                             │
│                             │
│ ┌─────────────────────────┐ │
│ │ Download completed      │ │
│ └─────────────────────────┘ │
│ ▦                           │
└─────────────────────────────┘
```

To play back a program immediately
In the stand-by display, press ▭ (Link) and select "▦". The Music&Video Channel menu appears.

When failed to download a program
The notification icon "✖" (Download failed) appears.

● If the communication is interrupted due to weak radio wave, etc. while downloading a program, the FOMA terminal attempts to resume the downloading up to five times at 3-minute intervals. If the program cannot be downloaded completely after the reacquisition, the FOMA terminal attempts to download the program at nighttime of the next day.

● If downloading fails because of the following reasons: outside of the service area, the terminal is powered off, the battery level is low, etc., the FOMA terminal will download the program at the next night.

● Downloading a program may take time so make sure that the FOMA terminal is fully charged and used in an area where the radio wave condition is good.

● The downloaded program cannot be copied.

● Programs cannot be downloaded automatically in the following cases. Set a program again from the Music&Video Channel menu.
  - When inserting the UIM which is not the one used for setting a program
  - When inserting the UIM into another Music&Video Channel compatible FOMA terminal after setting a program.
  - When performing the Rset all data&set.

● Only one program data can be saved in per channel. When new program data is downloaded, the previously downloaded program data is deleted and cannot be played back.

● When you unsubscribe from the Music&Video channel or i-mode service, the program data in the Distrib. program folder may be deleted.

Downloading a Program Manually

When failed to download a program automatically, you can download it manually.

1 From the Music&Video Channel menu, select a program → [Yes] and press ▭.

● During certain hours of a day, you may not be able to download a program manually.

● When downloading is interrupted, the partly downloaded program until the interruption can be saved. You can operate the FOMA terminal to resume the downloading for the remaining data except during certain hours.

● You cannot re-download a program whose playback restriction has expired. You cannot also update until the next distribution date.

Playing Back a Program

1 From the Menu, select [MUSIC] → [Music&Video Channel] and press ▭.

```

The Function menu appears.

2 Select [Delete] → [Yes] and press ▤.

● Even if you delete a program, the Set program is not canceled.

Moving a Program to a Different Folder

Downloaded programs are saved in the [Distrib. program] folder in Music&Video Channel of the Data Box. Every time the program is updated, the program saved in the folder is overwritten and you cannot play back the older one. You can move the program to a different folder before the update. You can save up to 10 programs.

1 From the Music&Video Channel menu, select a program and press ⊠ (Func).

The Function menu appears.

2 Select [Move program] → [Yes] and press ▤.

3 Select a folder and press 🔢 (Complete).

● You cannot move a downloaded program to the microSD memory card.
● The following programs cannot be moved.
 - Program which is partly downloaded
 - Program for which the playback starting time is set
 - Program whose time limit on playback has expired

Playing Back a Program from the Data Box

You can play back a program saved in Music&Video Channel of the Data Box.

1 Press ▲ (🗀) in the stand-by display, select [Music&Video Channel], and press ▤.

```
Music&Video Channel
  📁 Distrib. program
  📁 Folder1
  🎵 musicch1
```

The list of the Music&Video Channel folders and files appears.

● For information on operations while displaying the list of folders/files, see "Managing Data Box" (P.287).

To play back a program within a folder
Select a folder and press ▤.

2 Select a program and press ▤.

The selected program is played back.

What is MUSIC Player?

You can use the MUSIC Player to play back Chaku-Uta Full® downloaded from an i-mode site. You can also play back music data that was saved from a PC in the microSD memory card inserted in the FOMA terminal.

● You can play back music data in the background while operating other functions such as displaying a site or sending/receiving mail (Background playback).

■ **Music data that can be played back**

Data Box

Place to save to	Files that can be played back	Format	Extension
MUSIC	Chaku-Uta Full®	AAC-LC/ HE-AAC	.3gp

microSD memory card

Place to save to	Files that can be played back	Format	Extension
[Distrib. contents] folder of MUSIC	WMA/MP3/ 3GPP	WMA/MP3/ AAC-LC/HE-AAC	.wma/.mp3/ .3gp
[Movable contents] folder of MUSIC	Chaku-Uta Full®	AAC-LC/ HE-AAC	.SB2
[WMA] folder of MUSIC	WMA	WMA	.wma
[ATRAC] folder of MUSIC	ATRAC	"ATRAC3"/ "ATRAC3plus"	.oma

Format	Description
WMA	A sound compression technology developed by Microsoft Corporation, which is employed as the Windows standard sound compression technology.
AAC-LC	A sound compression technology used in MPEG2 and MPEG4, enabling a high compression rate while keeping the sound quality.
HE-AAC	A sound compression technology used in MPEG4, which is an extended version of AAC and also employed in the Chaku-Uta Full®.
MP3	MP3 is an abbreviation of "MPEG-1 AUDIO Layer-3" and a sound compression technology established by MPEG which is the working group of ISO (International Organization for Standardization). The music data can be compressed about 1/10 times than CD data.
"ATRAC3"	One of sound compression technologies of "ATRAC" developed by Sony Corporation, which is archived the high compression rate of about 1/10 times than CD data and the high sound quality.
"ATRAC3plus"	A sound compression advanced technology from "ATRAC3", which is archived the higher compression rate of about 1/20 times than CD data and the higher sound quality.

■ Bit rate supported for playback

File	Format	Bit rate (kbps)
Chaku-Uta Full®	AAC-LC	8－128
	HE-AAC(v1)	8－128
	HE-AAC(v2)	8－48
3GPP	AAC-LC	80, 96, 128, 160, 192, 256, 320
	HE-AAC(v1)	40, 48, 64, 80, 96
WMA	WMA	48, 64, 80, 96, 128, 160, 192
MP3	MPEG1 Layer3	96－320
ATRAC	"ATRAC3"	66, 105, 132
	"ATRAC3plus"	32, 48, 64, 96, 128, 160, 192, 256, 320, 352

● Typically, the higher the bit rate is, the better the sound quality, however, also the larger the data size is, resulting in the smaller number of tracks that can be saved.

■ Maximum number of tracks that can be stored for operation on the MUSIC Player

Place to save to	Maximum number of tracks
Data Box	200
microSD memory card: 2G bytes	1,500

● "ATRAC3", "ATRAC3plus", or "WMA" formatted music data which is copyrighted and saved in the microSD memory card can be played back only on your SO905i.
● Some music data saved in the microSD memory card may not be played back on other FOMA terminals.

Transferring Music Data

You can transfer music data from a PC to the microSD memory card inserted in the FOMA terminal using Windows Media Player, Napster® appli, or SonicStage.

Transferring a WMA File to a PC Using Windows Media Player

You can use Windows Media Player 10/11 to import music data from a music CD to a PC and save it in the microSD memory card inserted in the FOMA terminal.

1 Install Windows Media Player 10/11 on your PC.
- When installing Windows Media Player 10/11 on a PC running Windows XP, use Windows XP Service Pack 2 or later version.
- When installing Windows Media Player on a PC running Windows Vista, use Windows Media Player 11.

2 Save a WMA file in the PC.
For the operations on Windows Media Player 10/11, see the Help of Windows Media Player 10/11.

3 Change the USB mode setting of the FOMA terminal to [MTP mode].
- To change the USB mode setting, see "Using the FOMA Terminal with a PC" (P.285, step 1 to 3).
- Make sure to insert the microSD memory card before changing to the MTP mode.

4 Connect the FOMA terminal and PC using the FOMA USB Cable with Charge Function 01 (optional).

5 Transfer music data from Windows Media Player 10/11.
- When you transfer a playlist, the playlist can be used as a WMA playlist on the FOMA terminal.

6 Remove the FOMA USB Cable with Charge Function 01 (optional) from the FOMA terminal and PC.

● A WMA file which is transferred to the microSD memory card by other FOMA terminal may not be displayed or played back on your SO905i.
● When you use the microSD memory card in which a WMA file is transferred by other FOMA terminal even if the USB mode setting is set to [MTP mode] and the FOMA terminal is connected to a PC, the PC may not recognize it. In this case, either perform the Delete all WMA (P.289) or format the microSD memory card (P.284). If you format the microSD memory card, please note that not only music data but also all other data are deleted.

About Napster® appli

You can also transfer music data using Napster® appli.

- You can download Napster® appli from the website below.
http://www.napster.jp/ (as of October 2007)
- For more information, see the website for Napster® appli below.
http://www.napster.jp/support/ (as of October 2007)

Directly Copying Music Data to the FOMA Terminal on a PC

The microSD memory card can be used as an external drive of a PC by connecting the FOMA terminal to the PC, allowing you to read/write data from/to the microSD memory card.
With a MP3 file or AAC file (.3gp), you can play it back on the MUSIC Player also by saving it directly in the microSD memory card without using Windows Media Player or SonicStage.

- Music data that is saved in the microSD memory card without using Windows Media Player or SonicStage may not be played back properly on SO905i.
- Do not delete music data that is saved in the microSD memory card using Windows Media Player or SonicStage by performing the direct operation of the microSD memory card.
- For details on the folder setup of the microSD memory card, see P.280.

1 Change the USB mode setting of the FOMA terminal to [microSD mode].

- To change the USB mode setting, see "Using the FOMA Terminal with a PC" (P.285, step 1 to 3).

2 Connect the FOMA terminal and PC using the FOMA USB Cable with Charge Function 01 (optional).

3 Double-click [リムーバブル ディスク] of マイ コンピュータ.

4 Create folders named "PRIVATE", "DOCOMO", "MMFILE", and "MUSIC" in this order.

- You do not need to create the folders if they already exist.

5 Save the music data in the "MUSIC" folder created.

6 Remove the FOMA USB Cable with Charge Function 01 (optional) from the FOMA terminal and PC.

Transferring Music Data to a PC Using SonicStage

Music data such as music data (ATRAC format) bought at the music distribution sites such as mora or a music CD can be transferred to the microSD memory card of the FOMA terminal using SonicStage.

1 Install SonicStage on your PC.

You can download SonicStage from the following site.
http://mora.jp

2 Save music data such as music data (ATRAC format) bought at the music distribution sites such as mora and a music CD in the PC.

3 Change the USB mode setting of the FOMA terminal to either [microSD mode] or [ATRAC mode].

- To change the USB mode setting, see "Using the FOMA Terminal with a PC" (P.285, step 1 to 3).

4 Connect the FOMA terminal and PC using the FOMA USB Cable with Charge Function 01 (optional).

5 Transfer music data from SonicStage.

- When you transfer a playlist, the playlist can be used as an imported playlist on the FOMA terminal.
- In the ATRAC mode, you cannot transfer a playlist.

6 Remove the FOMA USB Cable with Charge Function 01 (optional) from the FOMA terminal and PC.

- For the operations on SonigStage, see the Help of SonicStage.
- For more information on transferring music data, see the website below.
http://www.SonyEricsson.co.jp/so905i/faq.html

Downloading Chaku-Uta Full®

You can download a Chaku-Uta Full® file of up to 5M bytes and save it in the Data Box or microSD memory card.

Example: Saving Chaku-Uta Full® in the Data Box

1 While displaying a site, select a Chaku-Uta Full® and press ▤.

```
Music
Play
Save
File property
Back
```

The Chaku-Uta Full® is downloaded to the FOMA terminal. For Uta-hodai, the information of time limit on playback is obtained and then the FOMA terminal starts to download an Uta-hodai.

Music&Video Channel/Music Playback

2 Select [Save] and press ▤.

```
Save to
 ▶Data Box
 ▥microSD
```

[Data Box]:
    Save data in MUSIC of the Data Box.

[microSD]:
    Save data in [Movable contents] of MUSIC in the microSD memory card. (Insert the microSD memory card.)

To play back Chaku-Uta Full®
    Select [Play].

To display detailed information
    Select [File property].

3 Select [Data Box] and press ▤.

4 Select a folder and press ☷ (Save).

    The downloaded Chaku-Uta Full® is saved.

● If you have deleted preinstalled Chaku-Uta Full®, you can download it from "SO@Planet".
   [i Menu] → [メニュー/検索] (Menu/Search) → [ケータイ電話メーカー] (Mobile Phone Manufacturers) → [SO@Planet] (Japanese only)

Playing Back Music Data

You can use the MUSIC Player to play back music data saved in MUSIC of the Data Box and microSD memory card.

You can also search a song you want to listen to easily by specifying an artist, album, genre, etc. in the Music menu.

● While music data in the MUSIC Player is updated, "♬" appears. If another function is activated, updating the data may take time. The MUSIC Player operation may be slower while the data is being updated. While the data is updated, all tracks may not be displayed. After the update is completed, re-display the Music menu.

● It may take time to start playback of some music data.

● Jacket images may not be displayed depending on music data.

● Sound skip or noise may occur depending on the format and bit rate of music data.

● Depending on the encoding method (VBR, etc.), the MUSIC Player may not be operated correctly such as the playback cannot be operated or the playback time for it may not be displayed correctly.

● When the battery level is low, you may not be able to operate the MUSIC Player. If the battery level becomes low during playback, the player is stopped. Fully charge the battery before using this function.

● Do not insert/remove the microSD memory card into/from the FOMA terminal while you are playing back music data on the MUSIC Player. The playback is interrupted.

● If you receive a voice, videophone, or PushTalk call or mail, or the Alarm/Schedule alarm/Booking alarm is activated while you are playing back music data on the MUSIC Player, the playback is interrupted and one of the above operations is performed. After the operation is completed, when you return to the MUSIC Player, the playback resumes automatically, however, with some exceptions.

● If you save a Chaku-Uta Full® or display the music folder while you are playing back music data on the MUSIC Player, the MUSIC Player is terminated.

● The MUSIC Player cannot be activated while watching One Seg.

● If you display One Seg in the microSD memory card while you are playing back music data on the MUSIC Player, the MUSIC Player is terminated.

● It may take time to display a music data list depending on music data.

Playing Back Music Data with the FOMA Terminal Open

Example: Playing back music data by selecting the artist

1 From the Menu, select [MUSIC] → [MUSIC Player] and press ▤.

```
        Music menu
 ▶Resume play
 ▤Shuffle all songs
 ▣Albums
 ▤Artists
 ▩Genres
 ▤Playlists
 ▤Songs
 ▤Top50
 ▤Recent 50
 ▤Saved areas
 ▥Music settings
```

[Resume play]:
    When there is music data that was played back last time, the current track is played back from the last stopped position. If you delete the music data, however, you cannot select [Resume play].

    ● When the Music menu is displayed by pressing [CLR] during playback, [To playback disp] appears. Select this option to return to the playback display.

[Shuffle all songs]:
    Perform random playback of all music data.

[Albums]:
    Display the list of albums. Select an album → music data.

[Artists]:
    Display the list of artists. Select an artist → an album → music data.

[Genres]:
    Display the list of genres. Select a genre → artist → an album → music data.

Music&Video Channel/Music Playback

[Playlists]:
　　Display the playlist. Select [Original playlist]/[Imported playlist]/[WMA playlist] → a playlist → music data.

[Songs]:
　　Display the list of all music data. Select the music data.

[Top50]:
　　Display up to 50 tracks in the order of the number of the playback times, from the highest to the lowest. Select the music data.

[Recent 50]:
　　Display up to 50 tracks in the order of the playback date/time, from the most recent to the oldest. Select the music data.

[Saved areas]:
　　Select a place to save to and select the music data.

[Music settings]:
　　Display the menu of the Music settings.

2 Select [Artists] and press ▤.

The artist list appears.

3 Select an artist → an album and press ▤.

To display detailed information
　　Move the cursor to the music data and from the Function menu, select [Detail info].
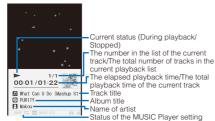

To check the jacket
　　Move the cursor to the music data and from the Function menu, select [Display img].

To check the lyrics
　　Move the cursor to the music data and from the Function menu, select [Display lyrics].

4 Select music data and press ▤ (Play).

Current status (During playback/Stopped)
The number in the list of the current track/The total number of tracks in the current playback list
The elapsed playback time/The total playback time of the current track
Track title
Album title
Name of artist
Status of the MUSIC Player setting

The selected music data is played back.

Operating method

Operation	Key operation
Play	Press ▤ (Play).
Stop	Press ▤ (Stop).
Volume adjustment	Use ▲ ▼.
Beginning of the next track	Press ▶.
Beginning of the current track	Press ◀ (within more than three seconds since the music starts).
Beginning of the previous track	Press ◀ (within less than three seconds since the music starts).
Fast-forward	Press ▶ for over a second during playback.
Fast-reverse	Press ◀ for over a second during playback.
Switch display	Press 🄸. The player screen switches between the visualizer display and jacket display.
Move to the previous display	Press CLR.

● Some jacket or lyric may be saved. To save it, press 🄸 (Save) while displaying it and select [Yes] → a folder.
● If you select [File mng. Mode] from the Function menu in the Music menu, you can stop the MUSIC Player to display the music data saved in the MUSIC folder that is to be prepared in each place to save.

Playing Back Music Data with the FOMA Terminal Folded

Example: Playing back music data by selecting the artist

1 Press (MUSIC/●) while the FOMA terminal is folded.

The sub-display lights.

2 Press (MUSIC/●) for over a second.

The Music Touch Key lights and can be operated.

- To prevent the Music Touch Key from being accidentally patted, press (MUSIC/●) to lock the Music Touch Key. Press the button once again to cancel the lock.
- When the Auto lock SubKey is set to [ON], the Music Touch Key is locked when the Power saver mode works (P.130).
- When the Power saver mode works, the Music Touch Key is turned off. Press (MUSIC/●) twice to light.

Use ＋ (UP)/ ━ (DOWN) to scroll the displayed contents by a page.

**3** Use + / − to select [Artists] and pat ►❚❚.

The artist list appears.

4 Use + / − to select an artist → an album and pat ►❚❚.

The music data list appears.

5 Select music data and pat ►❚❚.

The selected music data is played back.

● Press 📷 to swith the display by turns.

Move to the previous display	Pat CLR (CLR).
Display the Function menu	Press 📷.

To stop the MUSIC Player

Stop playback of the music data and then pat CLR (CLR) for over a second.

Playback Restrictions of Music Data

Some music data is set the playback restrictions. When you play back music data with playback restrictions, the different confirmation screen may appear depending on a type of music data.

■ Chaku-Uta Full®

When you play back music data with playback restrictions, the followings are displayed.

Playback restriction	Display
Playback time left	"This data can be replayed XX times. Replay?" appears. Select [Yes] to play back the music data.
Playback time over	"This data can no longer be replayed. Delete?" appears. Select [Yes] to delete the music data.
Time limit on playback over	"Replay period has expired. Delete?" appears. Select [Yes] to delete the music data.
Before playback period	"Replay period has not yet started" appears.

■ Uta-hodai

● When you play back an Uta-hodai whose time limit on playback has expired, "Some data need to update replay period. Send phone/terminal and UIM ID, and connect to site?" or "Need to update replay period. Send phone/terminal and UIM ID, and connect to site?" appears. Select [Yes] to update the time limit on playback. If you select [No], you cannot play back music data.

● The packet communication charge is required when updating the time limit on playback.

● When you use the FOMA terminal in other countries, the time limit on playback may expire before or after the displayed time limit.

● Pake-Houdai or Pake-Houdai Full does not cover the packet communication charge for updating the time limit on playback during international roaming.

● The playback restrictions for some Uta-hodai may be set the renewal period for a few days after the time limit on playback has expired. During the period, you can play back music data without updating the time limit on playback. After the renewal period on playback has passed, the file cannot be played back. Also, when you download music data while updating the time limit is not proceeded, playback cannot be performed before saving it.

● When the maximum number of music services (members only) which can be saved has been exceeded, the screen for confirming whether to overwrite a service appears. If you select [Yes], the new service overwrites the service which has the oldest time limit on playback. Also, you cannot play back music data downloaded from the service which is overwritten.

● The date and time of the time limit information in the display which notifies the time limit on playback is displayed in Japan time.

Setting How to Display the Music Data List

You can select how to display the music data list from two types.

● When no jacket information is available in the music data, the jacket is not displayed.

List display   Jacket display

📧 ❮   PURITY   📧 ❮   PURITY
❮ What Can U Do (Mash   What Can U Do (M
                             ashup Style)-Mak

1 Press 📧 (Func) in the music data list display, select [Change jackets], and press ▤.

The list display is changed to the jacket display or vice versa.

Managing the Playlist

There are three types of playlists that can be played back using the FOMA terminal.

Original playlist

The playlist is created on the FOMA terminal. You can create or edit up to 20 playlists and save up to 50 tracks of music data per file.

Imported playlist/WMA playlist

The playlist is created on an external device such as a PC. You can display up to 100 playlists. An imported playlist or WMA playlist can display up to 200 tracks or 500 tracks of music data per file, respectively. You cannot create or edit these playlists on the FOMA terminal. You can create an imported playlist (M3U format) using SonicStage and a WMA playlist using Windows Media Player 10/11.

Creating a Playlist

You can save your favorite music data in an original playlist.

Example: Adding and saving one track of music data in an original playlist

1 From the music data list, select music data and press ✉ (Func).

The Function menu appears.

2 Select [Add to playlist] → [Save one] and press ▭.

```
Select add to

XXX Best Hits 1
XXX Best Hits 2
XXX Live
```

To create a new original playlist
Press ▤ (Create) and enter a name for the playlist. Enter the name within nine full-width and 19 half-width characters.

To save several music data
From the Function menu, select [Add to playlist] → [Select&save] → music data and press ▤ (Complete).

To save all music data
From the Function menu, select [Add to playlist] → [Save all].

3 Select an original playlist to be saved and press ▭.

The screen for selecting the saving method appears.

[Add]:
Newly add selected music data to the music data saved in a playlist.

[Overwrite]:
The screen for confirming whether to overwrite all music data saved in a playlist with selected music data appears. Note that all data existing in the playlist is deleted when you select [Yes].

4 Select [Add] and press ▭.

The selected music data is saved in the original playlist.

Deleting/Reordering Music Data of the Playlist

You can delete music data from a playlist or reorder it within a playlist. Even if you delete music data from a playlist, the files of the music data are not deleted.

● You cannot delete music data from an imported playlist/WMA playlist or reorder it in an imported playlist.

Example: Deleting one track

1 From the Music menu, select [Playlists] → [Original playlist] → a playlist and press ▭.

The music data list of the Original playlist appears.

To delete all music data
From the Function menu, select [Delete from list] → [Delete all] → [Yes].

To delete several music data
From the Function menu, select [Delete from list] → [Select&delete] → music data. Press ▤ (Complete) and select [Yes].

2 Select music data and press ✉ (Func).

The Function menu appears.

To reorder music data
From the Function menu, select [Reorder] → music data. Move the cursor to the place to move to, press ▭ (Move), and press ▤ (Complete).

3 Select [Delete from list] → [Delete one] → [Yes] and press ▭.

The selected music data is deleted from the playlist.

Copying/Deleting/Editing the Name of the Playlist

You can delete a playlist or edit its name.

● You cannot copy/edit an imported playlist or WMA playlist.

Example: Deleting one playlist

1 From the Music menu, select [Playlists] → [Original playlist] and press ▭.

A list of all playlists appears.

To delete an imported playlist
Select [Imported playlist].

To delete a WMA playlist
Select [WMA playlist].

To delete all playlists
From the Function menu, select [Delete playlist] → [Delete all] → [Yes].

To delete several playlists
From the Function menu, select [Delete playlist] → [Select&delete] → playlists. Press ▤ (Complete) and select [Yes].

Music&Video Channel/Music Playback

2 Select a playlist and press ⊠ (Func).

The Function menu appears.

To edit the name of a playlist
> Move the cursor to the playlist and from the Function menu, select [Edit name]. Enter a new name within nine full-width or 19 half-width characters.

To copy a playlist
> Move the cursor to the playlist and from the Function menu, select [Copy Playlists] → [Yes].

To display the detailed information of a playlist
> Move the cursor to a playlist and from the Function menu, select [Detail info].

3 Select [Delete playlist] → [Delete one] → [Yes] and press ▭.

The selected playlist is deleted.

Changing the MUSIC Player Settings

1 From the Music menu, select [Music settings], and press ▭.

```
Music settings
Play mode
              Normal ▾
Repeat
              OFF ▾
Equalizer
              OFF ▾
CLEAR BASS
              OFF ▾
VPT(Surround)
              OFF ▾
Dynamic Normalizer
              OFF ▾
```

2 Select a playback mode for music data at [Play mode].

[Normal]:
> Play back the selected music data list in the order of appearance.

[Shuffle]:
> Perform random playback of the selected music data list.

3 Select the repeat type at [Repeat].

[All tracks]:
> Repeat playback of all tracks in the selected music data list.

[1 track]:
> Repeat playback of the selected track.

[OFF]:
> Play back only once.

4 Select the type of equalizer at [Equalizer].

To set no equalizer
> Select [OFF].

5 Select whether to boost the bass sound at [CLEAR BASS].

[+2]:
> Boost the bass sound to more extent.

[+1]:
> Boost the bass sound.

[OFF]:
> Do not boost the bass sound.

6 Select the type of surround playback at [VPT(Surround)].

To set no surround playback
> Select [OFF].

7 Select whether to adjust the playback volume automatically at [Dynamic Normalizer].

[ON]:
> If the volume level varies depending on music data, automatically adjust the playback volume to easy-listening.

[OFF]:
> Play back each music data at its original volume level.

8 Select whether to restrict the playback volume at [AVLS].

[ON]:
> Restrict the playback volume. You cannot turn up the volume to level 16 or higher.

[OFF]:
> Do not restrict the playback volume.

To reset the music settings to the default status
> From the Music settings display, select [Reset settings] → [Yes] and enter the Security code.

● While the FOMA terminal is folded, when you press (MUSIC/⏻➔) for over a second, the MUSIC Player is activated and the music menu items appear on the sub-display. Use ＋ / ― to select [Music settings] and pat ▶Ⅱ to display setting items. Use ＋ / ― to set each item and pat ▶Ⅱ to change the settings. While playing back music, press ☐ to display the Function menu on the sub-display, and select [Music settings].

Connecting the Flat-plug Stereo Earphone Set (optional), etc.

The operations of the Music&Video Channel or MUSIC Player can be performed by using the switch of the Flat-plug Earphone/Microphone with Switch (optional) or Flat-plug Stereo Earphone Set (optional) while playing back with the FOMA terminal folded.

Operation	Switch operation
Play/stop	Press once. Every time you press, playing and stopping occurs alternately.
Beginning of the next track	Press twice continuously.
Beginning of the previous track	Press three times continuously (within less than three seconds since the music starts).
Beginning of the current track※	Press three times continuously (within more than three seconds since the music starts).

※ It works only when the music track is played back on the MUSIC Player.

Other Convenient Functions

Multiaccess Feature <Multiaccess>

Multiaccess is a function that enables you to use a voice call, packet communication, and SMS functions at the same time.

● For multiaccess combinations, see P.386.

Voice call	1 line
i-mode, i-αppli, i-mode mail, packet communication by connecting a PC, and PushTalk	1 line
SMS	1 line

● Charge is required for the use of each communication line during multiaccess.
● You cannot use multiaccess during a videophone call or 64K data communication, but you can receive SMS.

Main Functions That Can Be Performed Using Multiaccess

Starting Other Communication during a Voice Call

Example: Connecting to i-mode during a voice call

1 Press 🔲 (MENU) during a voice call and press 🔲 (New TASK).

The menu display appears.

2 Select [i-mode] → [i Menu] → [メニュー/検索] (Menu/Search) and press ▤.

You can access i-mode while the call is being connected.

To send mail
Select [Mail] → [Compose message] and compose mail and send it.

To perform packet communication using a connected PC
Establish connection for packet communication using PC operation.

To switch the display
Press 🔲 (MENU) and select a task icon.

Receiving Mail during a Voice Call

You receive mail while the call is being connected.

● If you receive i-mode mail, SMS, or Message R/F while you are talking on the phone, the ring tone, incoming indicator, and vibrator do not operate.

Placing a Voice Call during i-mode/Packet Communication

Example: Placing a voice call during i-mode

1 Press 🔲 (MENU) during i-mode or packet communication.

The menu display appears and the cursor moves to the TASK MENU.

2 Select "▊" (Stand-by) and press ▤.

3 Enter a phone number and press 📞 .

Place a voice call while you continue to use i-mode or packet communication.

To switch the display during a call
Press 🔲 (MENU) and select a task icon.

● When you place a videophone call while i-mode is being used, the i-mode connection is disconnected and your videophone call is placed.

Receiving a Voice Call during i-mode/Packet Communication

1 When you receive a call, press 📞 .

When you receive a voice call, the receive call display appears.
You can answer a voice call while you continue to use i-mode or packet communication.

To switch the display during a call
Press 🔲 (MENU) and select a task icon.
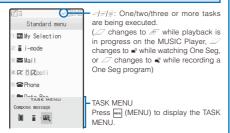

Multitask Feature <Multitask>

Multitask is a function that enables you to perform several functions at the same time, each of which you can access by switching the displays.

● For multitask combinations, see P.387.

Activating a New Function

1 Press ⬚ (MENU) during the activation of a function.

2 Press ⬚ (New TASK).

3 From the Menu, select a new function and press ⬚.

Switching Functions

While running multiple functions, you can switch to the display that provides access to the function you want to use.

1 Press ⬚ (MENU).

Function name

The cursor moves to a task icon on the TASK MENU.

2 Use ◀ ▶ to select a task icon and press ⬚.

The selected function display appears.

Stopping All Functions Currently Activated

1 Press [MENU] (MENU).

2 Press [i] (Quit all).

3 Select [Yes] and press [ ].

All functions currently activated are stopped.

● When you execute multiple functions, you can press [ ] to quit the current function.

Using the Lifetime Calendar

<Lifetime Calendar>

The Lifetime Calendar displays an image, mail, Schedule, and birthday data stored in the FOMA terminal in the Calendar format. This function helps you more effectively to keep track of items to remember.

You can also automatically display the items to remember, and display mail, Schedule, etc. from the Lifetime Calendar.

1 From the Menu, select [LifeKit] → [Lifetime Calendar] and press [ ].

2007/11/14 ─── Display status
─── Number of mail display
─── Recorded contents

The Lifetime Calendar appears.

● Use [メモ] to display the calendar of the next month and [▲マナー] to display the calendar of the previous month.
● The following icons show the displayed or saved items.

Number of mail display

Background color	Number of mail
Cream	1 to 4
Beige	5 to 9
Orange	10 to 19
Silver	20 to 99
Gold	More than 100

When the Lifetime Calendar is set as the stand-by display

When you press [ ] (Link) in the stand-by display and select the Lifetime Calendar, the Lifetime Calendar is activated.

To display the index

Press [i] (Index). When you select a year and month, the Lifetime Calendar for the selected year and month appears.

To create a new schedule

From the Function menu, select [Create new] and save the schedule.

To display the Lifetime Calendar by specifying a date

From the Function menu, select [Select date] and enter the date. Enter the date within the range from 2000/01/01 to 2050/12/31.

To update the displayed data

From the Function menu, select [Data update].

2 Select the date and press [ ].

The Lifetime Calendar appears displaying one year including the selected day (Detail view).

2007/11/14 Wed ─── Display status
─── Recorded contents

To display the index

Press [i] (Index). When you select a date, the Lifetime Calendar (Detail view) appears.

To display a still image

Select [▣] (P.266).

To display received mail

Select [▨] or [ ] (P.189).

To display sent mail

Select [▨] (P.189).

To display the schedule

Select [▦] (P.325).

To display a birthday

Select [👥]. The Phonebook display (P.96) or the Own number display (P.44) appears.

● The Phonebook, Own number, and Schedule saved as Secret are not displayed in the Lifetime Calendar. Set the Secret display to [ON] to display the data.

● When you have more still images, mail, and schedule data saved in the FOMA terminal, you can build a more interesting Lifetime Calendar. We recommend saving data in the FOMA terminal using infrared communication and the microSD memory card if you are going to use this function immediately after you purchase SO905i.

When Items to Remember Are Displayed

If no operation is performed for a specific period, still images, mail, and Schedule data saved in the FOMA terminal are displayed randomly as past memories.

Items to remember

To display details of the item to remember

Press [ch] (Memory). When you select an item to remember, the Lifetime Calendar (Detail view) appears.
Data Displayed in the Lifetime Calendar

The following data is displayed in the Lifetime Calendar.
- JPEG and GIF images saved in My picture of the Data Box
- Received and sent mail saved in the FOMA terminal, or images attached to SMS and received/sent mail※1
- Schedule saved in the FOMA terminal
- Name, Des call display, and birthday saved in the FOMA terminal phonebook※2
- Name, image, and birthday saved in the Own number

※1 When 2in1 is set to the A mode, data for Address A is displayed. When the B mode is set, data for Address B is displayed.

※2 When 2in1 is set to the A mode, data set as [Common] and [A] at the Phonebook 2in1 setting is displayed. When the B mode is set, data set as [Common] and [B] is displayed.

● Data saved in the microSD memory card cannot be displayed in the Lifetime Calendar.

● When the date and time of mail are corrected to the local time during international roaming, " 🕐 " appears next to the time (P.43).

● Images in the [Preinstall] and [Stamp&Frame] folders cannot be displayed in the Lifetime Calendar.

● While displaying the Lifetime Calendar, when receiving new mail or deleting/changing saved data such as images, Phonebook, or Schedule using Multitask, the displayed contents of the Lifetime Calendar may differ from the actual data. In this case, from the Function menu, select [Data update] to update the displayed contents of the Lifetime Calendar.

Other Convenient Functions

Setting the Display of Lifetime Calendar

You can set the data to be displayed in the Lifetime Calendar and set whether to automatically display the items to remember.

1 Press ✉ (Func) in the Lifetime Calendar.

The Function menu appears.

2 Select [LTC setting] and press ▦.

The LTC setting display appears.

[Display setting]:

Set the data to be displayed in the Lifetime Calendar.

[Memory auto display]:

Set the time before the item to remember is automatically displayed when a key is not operated for a specific period.

[Security data display]:

Set whether to display a folder which is set the Mail security or Data security. If you set [Display], you need to enter the Security code when you display the Lifetime Calendar.

To display the Help of the LTC setting
Press 🛈 (Help).

3 Select [Display setting] and press ▦.

The Display setting display appears.

[Photo]:

Set the display of the still image to [All]/[Selected]/ [Selected off]/[OFF]. To or not to display still images saved in a specific folder only, select [Selected]/ [Selected off] → [Select folder] → a folder.

● You cannot select the [Preinstall] or [Stamp&Frame] folder.

[Received mail]:

Set the display of the received mail to [All]/[Selected]/ [Selected off]/[OFF]. To or not to display mail received from a specific address only, select [Selected]/[Selected off] → [Select mail address] and set a mail address.

[Sent mail]:

Set the display of the sent mail to [All]/[Selected]/ [Selected off]/[OFF]. To or not to display mail sent to a specific address only, select [Selected]/[Selected off] → [Select mail address] and set a mail address.

[Schedule]:

Set the display of the schedule to [All]/[OFF].

[Birthday]:

Set the display of the birthday to [All]/[OFF].

To restore the default settings
Press 🔠 (Reset).

4 Select the display for each item.

5 Press 🛈 (Complete).

The LTC setting display appears.

6 Set the time before the item to remember is automatically displayed at [Memory auto display].

Select from [Fast], [Normal], [Slow], and [OFF].

To disable automatic display of the item to remember
Select [OFF].

7 Select [Security data display] and press ▦.

The Security code screen appears.

8 Enter the Security code and press ▦ (OK).

9 Select [Display]/[OFF] and press ▦.

The LTC setting is set.

Starting the Alarm at a Specified Time <Alarm>

The alarm is activated for about one minute at a specified time. You can set up to 12 alarms to be activated.

1 From the Menu, select [LifeKit] → [Alarm] and press ▦.

```
Alarm
Select alarm
Auto power on
                        OFF ▾
```

To set the operation of the alarm during power off
Select [Auto power on] → [ON]/[OFF].

● If you select [ON], when the alarm time comes during power off, the FOMA terminal is automatically powered on and the alarm works.

2 Select [Select alarm] and press ▦.

```
Select alarm
1 🔔 10:00  🕐Eyd
2    11:30  🕐Eyd    🐣
3    12:00  🕐Eyd
4    13:30  🕐Eyd    🐣
5 🔔 14:00  🕐OFF
6    16:00  🕐Day    🐣
7 🔔 18:30  🕐Day    🐣
8    00:00  🕐OFF
9    00:00  🕐OFF
10   00:00  🕐OFF
11   00:00  🕐OFF
12   00:00  🕐OFF
```

● The following icons show the setting status of the Alarm.

🔔	The Alarm is set
🐣	The Snooze is set

To switch between setting/canceling the Alarm
Move the cursor to the Alarm and press ✉ (Set)/ ✉ (Rel.).

3 Select an alarm to be set and press ▤.

```
Alarm1
Set          OFF ▼
Time         00:00
Repeat       OFF ▼
Alarm tone

Alarm image
        めざましアラーム鳴動
Vibrator     OFF
Color        C5
Snooze       OFF ▼
```

4 Select [ON]/[OFF] at [Set].

[ON]:
　Activate the alarm.

[OFF]:
　Do not activate the alarm.

5 Enter a time to start the alarm at [Time].

Enter a time in 24-hour format.

6 Select the repeat type at [Repeat].

[OFF]:
　Do not repeat the alarm.

[Eyd]:
　Repeat the alarm every day.

[Day]:
　Repeat the alarm on the same day of the week. Select a day of the week and press ▤ (OK).

7 Select an alarm tone from MUSIC/i-motion/Melody of the Data Box at [Alarm tone].

● You can set the following files. You can select a Chaku-Uta® from [i-motion].

Category	File format	File size	Image size
MUSIC※	AAC-LC/ HE-AAC	Max. 5M bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640× 480)]
Melody	SMF/ MFi	Max. 350K bytes	—

※ Some files may not be set.

When you select a Chaku-Uta Full® that has a choice of specified playback ranges from [MUSIC]
　The screen for selecting a type of setting appears. If you select [Full song], the entire track of Chaku-Uta Full® is set for the alarm tone. If you select [Point], the specified playback range of Chaku-Uta Full® is set for the alarm tone.

To mute the alarm tone
　Select [Silent].

To check the alarm tone
　Move the cursor to the alarm tone and press ▥ (Play).

8 Set the volume at [Alarm volume].

Select from [OFF] and [1 to 5].

To set the volume to [OFF]
　Press ▼ at level 1.

9 Select an alarm image from My picture/i-motion of the Data Box at [Alarm image].

● You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stand-by (480×864)], Max. W480×H288 for GIF animation
	SWF	Max. 100K bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640× 480)]

※ Some i-motion may not be set.

To check an alarm image
　Move the cursor to an alarm image and press ▥ (Play).

10 Select a vibration type at [Vibrator].

[Pattern1]:
　Set short intermittent vibration.

[Pattern2]:
　Set long intermittent vibration.

[Link melody]:
　Vibrates in accordance with the alarm tone. If you have set the alarm tone to [Silent] or to a melody that cannot be synchronized with the vibrator operation, the vibrator vibrates using [Pattern1].

[OFF]:
　Do not set the vibrator.

To check the vibration
　Move the cursor to the pattern and press ▤ (Confirm).

11 Select an indicator color at [Color].

Select from 12 indicator colors or [C13:ALL] (indicator flashes in 12 colors in sequence).
When you move the cursor, the indicator flashes accordingly.

12 Select [ON]/[OFF] at [Snooze].

[ON]:
　The alarm operates for about one minute and repeats operation up to six times every five minutes.

[OFF]:
　Do not repeat the alarm operation.

13 Press ▤ (Complete).

The Alarm is set and "🕐" appears in the stand-by display.

- When the Alarm and Schedule alarm are set simultaneously, "⚙" is displayed instead of "🕐".
- If the Alarm, Schedule alarm, and Booking alarm are set to start at the same time, the following priority is applied.
  1. Schedule alarm
  2. Booking alarm
  3. Alarm
- When you set an i-motion or Chaku-Uta Full® for the alarm tone or set an i-motion for the alarm image, the settings may be changed in some cases.

At the Alarm Time

The alarm tone sounds for about one minute with the indicator flashing.

```
Alarm

  06:30

      🕐

  CLOCK ALARM
```

To stop the alarm tone
   Press any key.
When you do not stop the alarm tone
   The display informing the release of the alarm appears. To turn off the display, press ☎ or CLR .
To stop the Snooze
   Press ☎ .

- If you set an i-motion with video and sound tracks to the alarm tone, a movie in the i-motion is displayed.
- If the alarm time comes during a voice call or PushTalk communication, the default alarm tone sounds and the default alarm image is displayed. The vibrator does not operate.
- The Alarm does not operate in the following cases.
  - While the Lock all is set
  - While the Personal data lock is set
  - While the Omakase Lock is set
  - While updating the software
- If the alarm time comes in the following cases, the Alarm may operate when the status changes to during a call or stand-by.
  - While placing/receiving a voice/videophone call or originating/receiving a PushTalk call
  - During packet communication
  - During the infrared communication/while the infrared remote control is being used
  - During the iC communication
  - During data communication or while reading/writing data from/into a microSD memory card on a PC with the FOMA terminal connected using the USB cable
  - While recording a still image/movie
  - While the Schedule alarm/Booking alarm is sounding
  - Beep while receiving Area Mail, while sounding Area Mail ring tone, or displaying Area Mail
- If another function is executed during the Alarm or Snooze operation, the alarm is stopped. The Snooze keeps operating within five times.
- When the PIN1 code setting and the Auto power on for the Alarm are set to [ON], the FOMA terminal is automatically powered on at the alarm time and the PIN1 code input screen appears after the Alarm operation. If you set any data for which the UIM operation restriction function is set to the alarm tone, the default melody sounds.
- If you leave the FOMA terminal with the battery pack removed or fully expended for a long period of time, the date and time is reset, and the Alarm may not operate correctly.

Saving Schedules <Schedule>

Up to 300 schedules, such as date and events/
appointments can be saved for management. When a
Schedule alarm is set, the FOMA terminal activates the
alarm at the scheduled time.

● An entry is required at [▦] (Event).

1 From the Menu, select [LifeKit] → [Schedule] and
press ▭.

The calendar is displayed.

2 Select a starting date and press 🔳 (Create).

```
Edit schedule
📅 2007/11/01 Thu
🕐 00:00
   All day OFF ▾

   None
✳ OFF ▾
   00min.before ▾
🔒 OFF ▾
   01 Count
```

The selected date is automatically entered.

To change the starting date
Select [📅] and change the date. Enter the date within
the range from 2000/01/01 to 2050/12/31.

3 Enter a starting time at [🕐].

Enter a time in 24-hour format.

To set the schedule period to all day
Select [ON] at [All day]. When it is set to [ON], you
cannot set the starting time, ending date, ending time,
and alarm.

4 Enter an ending date at [📅].

Enter from the starting date to 2050/12/31.

5 Enter an ending time at [🕐].

Enter a time in 24-hour format.

6 Enter the event at [▦].

Enter the event within 128 full-width or 256 half-width
characters.

7 Select a category icon at [🎀].

8 Enter an event outline at [▦].

Enter an outline within 20 full-width or 40 half-width
characters.

9 Select [ON]/[OFF] of the alarm at [🔔].

[ON]:
Sound the alarm tone. Select how many minutes before
the starting time of schedule the alarm should sound.
Select [00min.before] if you want to sound the alarm at
the same time as the starting time.

[OFF]:
Do not sound the alarm tone.

10 Select the schedule repeat type at [🔁].

[OFF]:
Do not repeat the schedule. Go to step 12.

[Eyd]:
Repeat the schedule every day.

[Week]:
Repeat the schedule on the same day of the week.

[Month]:
Repeat the schedule every month on the same day.

[Year]:
Repeat the schedule every year on the same day of the
same month.

When the schedule repeat type is set to other than [OFF]
Enter the repeat count within 01 to 99 times.

11 Select [ON]/[OFF] of a holiday at [Holiday].

[ON]:
The schedule repeats even on a holiday.

[OFF]:
The schedule does not repeat on a holiday, but it is
included in the repeat count.

12 Select [ON]/[OFF] of the Secret at [🔒].

[ON]:
Save the schedule as Secret. Details of the schedule
are masked with "✳" except for the time at the schedule
alarm time.

[OFF]:
Do not save the schedule as Secret.

To display the data saved as Secret
Set the Secret display to [ON].

13 Press 🔳 (Complete).

The schedule is saved. When the Alarm is set to [ON], "🔔"
appears in the stand-by display.
The schedule dates are highlighted on the calendar.

● When the Schedule alarm and Alarm are set
simultaneously, "📅" is displayed instead of "🔔".

● If the repeat type of the schedule set for the 31st is set to
[Month], the schedule is set for the last day of the month
for months with less than 31 days. It is also applied when
the repeat type of the schedule set for the 29th of February
in a leap year is set to [Year].

● When you set an i-motion or Chaku-Uta Full® for the alarm
tone or set an i-motion for the alarm image, the settings
may be changed in some cases.

At the Schedule Alarm Time

The alarm sounds for about 30 seconds with the indicator flashing and the schedule data is displayed.
If there are several overlapping schedules with the same start time of the alarm, the number of schedules you have in addition is shown as "XXX" on the upper right of the display.

```
Schedule
⏰12:00
📝Lunch meeting

        SCHEDULE ALARM
```

To stop the alarm tone
Press any key.

When you do not stop the alarm tone
The Schedule display appears.
To turn off the Schedule display, press ▤ (OK), ☎, or CLR.

● If you set an i-motion with video and sound tracks to the alarm tone, a movie in the i-motion is displayed.
● If the alarm time comes during a voice call or PushTalk communication, the default alarm tone sounds and default alarm image is displayed. The vibrator does not operate.
● The Schedule alarm does not operate in the following cases.
  - When the FOMA terminal is powered off
  - While the Lock all is set
  - While the Personal data lock is set
  - While the Omakase Lock is set
  - While updating the software
● If the alarm time comes in the following cases, the Schedule alarm may operate when the status changes to during a call or stand-by.
  - While placing/receiving a voice/videophone call or originating/receiving a PushTalk call
  - During packet communication
  - During the infrared communication/while the infrared remote control is being used
  - During the iC communication
  - During data communication or while reading/writing data from/into a microSD memory card on a PC with the FOMA terminal connected using the USB cable
  - While recording a still image/movie
  - Beep while receiving Area Mail, while sounding Area Mail ring tone, or displaying Area Mail
● If you leave the FOMA terminal with the battery pack removed or fully expended for a long period of time, the date and time is reset, and the Schedule alarm may not operate correctly.

Setting the Schedule Alarm Operations

You can set the details of the operations of the Schedule alarm.

1 Press ▣ (Func) in the calendar.

The Function menu appears.

2 Select [Schedule setting] → [Schedule alarm] and press ▤.

```
Alarm setting
Alarm tone
                  Alarm(std)
Alarm volume      4
Alarm image
 スケジュールアラーム鳴動中
Vibrator          OFF
Color             C5
```

3 Select an alarm tone from MUSIC/i-motion/Melody of the Data Box at [Alarm tone].

● You can set the following files. You can select a Chaku-Uta® from [i-motion].

Category	File format	File size	Image size
MUSIC※	AAC-LC/HE-AAC	Max. 5M bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640×480)]
Melody	SMF/MFi	Max. 350K bytes	—

※ Some files may not be set.

When you select a Chaku-Uta Full® that has a choice of specified playback ranges from [MUSIC]
The screen for selecting a type of setting appears. If you select [Full song], the entire track of Chaku-Uta Full® is set for the alarm tone. If you select [Point], the specified playback range of Chaku-Uta Full® is set for the alarm tone.

To mute the alarm tone
Select [Silent].

To check the alarm tone
Move the cursor to the alarm tone and press ⟨ch⟩ (Play).

4 Set the volume at [Alarm volume].

Select from [OFF] and [1 to 6].

To set the volume to [OFF]
Press ▼ at level 1.

5 Select an alarm image from My picture/i-motion of the Data Box at [Alarm image].

- You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stand-by (480×864)], Max. W480×H288 for GIF animation
	SWF	Max. 100K bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA(640×480)]

※ Some i-motion may not be set.

To check an alarm image
Move the cursor to an alarm image and press 🔲 (Play).

6 Select a vibration type at [Vibrator].

[Pattern1]:
Set short intermittent vibration.

[Pattern2]:
Set long intermittent vibration.

[Link melody]:
Vibrates in accordance with the alarm tone. If you have set the alarm tone to [Silent] or to a melody that cannot be synchronized with the vibrator operation, the vibrator vibrates using [Pattern1].

[OFF]:
Do not set the vibrator.

To check the vibration
Move the cursor to the pattern and press 🔲 (Confirm).

7 Select an indicator color at [Color].

Select from 12 indicator colors or [C13:ALL] (indicator flashes in 12 colors in sequence).
When you move the cursor, the indicator flashes accordingly.

8 Press 🔲 (Complete).

The Schedule alarm operations are set.

Displaying the Schedule

The saved schedule can be checked using the calendar.

1 From the Menu, select [LifeKit] → [Schedule] and press 🔲.

The details of the schedule appear.

To edit the saved schedule
Press 🔲 (Edit).

● If you set a repeat count beyond 2050/12/31, [To 2050/12/31] is displayed as the last day of the repeat when you display the schedule.

Other Convenient Functions

Deleting a Schedule

You can delete schedules using the following five methods.

Delete one	Delete a schedule. If you delete a schedule set to repeat, all its repeats are also deleted.
Select&delete	Delete the selected schedules. You can select up to 30 schedules over days at a time. If you delete a schedule set to repeat, all its repeats are also deleted.
Delete a day	Delete all schedules for the selected date. Schedules set to repeat cannot be deleted.
Del up to ysd	Delete all schedules before the selected date. Schedules set to repeat on and after the selected date cannot be deleted.
Delete all	Delete all schedules.

Example: Deleting a schedule

1 From the Menu, select [LifeKit] → [Schedule] and press ▭.

To delete all schedules

From the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

To delete all schedules before the selected date

Move the cursor to the date and from the Function menu, select [Delete] → [Del up to ysd]. Enter the Security code and select [Yes].

To delete all schedules for the selected date

Move the cursor to the date and from the Function menu, select [Delete] → [Delete a day] → [Yes].

2 Select a date and press ▭.

To delete several schedules

From the Function menu, select [Delete] → [Select&delete] and select schedules. Press ▪ (Complete) and select [Yes].

3 Select a schedule and press ▣ (Func).

The Function menu appears.

4 Select [Delete] → [Delete one] → [Yes] and press ▭.

The selected schedule is deleted.

Setting Holiday

You can set a day or a day of the week as a holiday and cancel the holiday settings. A day set as a holiday is displayed in red.

For today	Set a specific day as a holiday or cancel a holiday. Up to 1,000 days can be set or canceled.
Day of the week	Set a specific day of the week as a holiday or cancel a holiday of the week.
Rel up to yesterday	Cancel all holidays set by the For today before the selected date.
Release all	Cancel all holidays set by the For today and Day of the week.
Reset	Reset the holiday settings to the default settings.

Example: Setting a specific day as a holiday or canceling the holiday setting of a day

1 From the Menu, select [LifeKit] → [Schedule] and press ▭.

To set/cancel holidays by a day of the week

From the Function menu, select [Schedule setting] → [Set holidays] → [Day of the week]. Select the day of the week and press ▪ (Complete).

To cancel all holidays before the selected date

Move the cursor to the date and from the Function menu, select [Schedule setting] → [Set holidays] → [Rel up to yesterday] → [Yes].

To cancel all holidays

From the Function menu, select [Schedule setting] → [Set holidays] → [Release all], enter the Security code, and select [Yes].

To reset to the default settings

From the Function menu, select [Schedule setting] → [Set holidays] → [Reset], enter the Security code, and select [Yes].

2 Select a date and press ▣ (Func).

The Function menu appears.

3 Select [Schedule setting] → [Set holidays] and press ▭.

The Set holidays display appears.

4 Select [For today] → [Yes] and press ▭.

The selected day is set as a holiday or the holiday setting of the day is canceled.

● The public holidays are based on the "Law Partially Revising the National Holidays Law and the Old-Age Welfare Law" (Law No.59, 2001) and (Law No.43, 2005). Note that the Vernal Equinox Day and Autumn Equinox Day may fall on the dates other than those set on the FOMA terminal because they depend on the announcement by the official gazette on February 1st of the previous year (as of October 2007).
Perform the required setting when a holiday is changed or newly added.

Checking the Number of Schedules Saved

The number of schedules saved can be checked as well as the number of schedules still available to be saved or saved as Secret.

1 Press ✉ (Func) in the calendar.

The Function menu appears.

2 Select [Memory status] and press ▤.

```
Memory status
Remained      279
Used           21
Secret          5
```

[Remained]:
Display the number of schedules still available to be saved.

[Used]:
Display the number of schedules saved (including schedules as Secret).

[Secret]:
Display the number of schedules saved as Secret (this data is displayed only when the Secret display is set to [ON]).

Performing Frequently Used Functions Quickly <My Selection>

You can save frequently used functions in My Selection and select a saved function directly.
Up to 12 functions can be added to My Selection.

● When the Menu displays the Kisekae menu or Standard menu, you need to set the Start menu setting to [My Selection] (P.115).

1 Press ᴹᴱᴺᵁ (MENU) in the stand-by display, select a function, and press ⓘ (Exchange).

```
Replacement
i-mode
Mail
iαppli
Phone
Data Box
MUSIC
Osaifu-Keitai
LifeKit
Own number
Settings
1Seg
```

To delete the saved function
Press ᴹᴱᴺᵁ (MENU) in the stand-by display, move the cursor to the function, press ⊞ (Delete), and select [Yes].

To reset My Selection to the default setting
Reset the settings (P.334).

2 Select a function and press ⓘ (Save).

The screen for confirming whether to replace My Selection appears.

3 Select [Yes] and press ▤.

The selected function replaces My Selection.

Setting a Function to Be Activated in the TV Style <Display rotated appli>

When you switch the FOMA terminal to the TV style in stand-by status, you can set the functions to be activated automatically.

1 From the Menu, select [Settings] → [Display] → [Stand-by display] → [Display rotated appli] and press ▭.

[Activate 1Seg]:
Activate One Seg.
[Camera]:
Activate the Shoot by photo.
[Movie]:
Activate the Movie shoot.
[Full Browser]:
Activate Full Browser.
[OFF]:
Do not activate anything.

2 Select a function to be activated and press ▭.

The Display rotated appli is set.

Recording Recipient's or Your Own Voice <Voice memo>

Your own voice during stand-by and the recipient's voice during a voice call can be recorded.
Up to three voice memos of up to about 15 seconds each can be recorded.

● When you record a voice memo during a call in addition to the already recorded three voice memos, the oldest memo is automatically overwritten by the new one. When you record a voice memo during stand-by, the screen for confirming whether to overwrite the oldest voice memo appears.
● For information on playing back and deleting the voice memo, see P.72.

Recording Your Own Voice during Stand-by

1 Press ▭ in the stand-by display, select [Rec voice memo] → [Yes] and press ▭.

```
Rec voice memo
11/10 21:08

        RECORDING
            ▶0:05
```

The recording starts. When the recording ends, a beep sounds.

To stop the recording on the way
Press ▭ (Stop).

● If there is an incoming call/mail or the Alarm/Schedule alarm/Booking alarm time comes while recording a voice memo during stand-by, the recording stops and the voice memo recorded until then is saved.

Recording Recipient's Voice during a Call

1 Press ▭ during a call.

The recording starts. When the recording ends, a beep sounds.

To stop the recording on the way
Press ▭ (Stop).

● When the FOMA terminal is folded while recording a voice memo during a call, the recording is stopped and the recorded voice memo is saved if the Setting when folded is set to [Holding] or [Disconnect] and the recording is continued if set to [Mute].

Checking the Call Duration and Charge <Call duration/cost>

You can check the call duration and charge for the last and total voice and videophone calls.

● The call duration and charge displayed are estimated and may not be real values. The call charge does not include consumption tax.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Call Cost/Duration] and press ▭.

The Call Cost/Duration display appears.

[Last call cost]:
Display the call charge for the last voice call at [Voice call] and the last videophone call/64K data communication at [Digital]. The call charge is counted only when you place a call.
[Last call duration]:
Display the call duration for the last voice call at [Voice call] and the last videophone call/64K data communication at [Digital]. The call duration is counted when you receive a call as well as place a call.
[Total calls cost]:
Display the total call charge from the last reset to the present time.
[Total calls duration]:
Display the total call duration from the last reset to the present time.

2 Select the item and press ▭.

Other Convenient Functions

- When you place a call to a toll-free number such as NTT Free Dial or Directory Assistance (104), "0YEN" or "✳✳✳✳✳✳YEN" indicated for the call charge.
- The accumulated call charges are stored in the UIM. Therefore, if you switch the UIM, the accumulated total call charge (starting from December 2004) is displayed.
  ※ FOMA terminals manufactured earlier than the 901i series are not capable of displaying the accumulated call charges stored in the UIM. (The charges, however, are stored in the UIM used by the older terminals.)
- The duration and charge for PushTalk, i-mode, and packet communication are not counted. For details on how to check charges for i-mode, etc., see the "Mobile Phone User's Guide 【i-mode】 FOMA version" that you receive when you subscribe to i-mode.
- When the call duration for the last voice call or digital communication exceeds 99 hours, 59 minutes, and 59 seconds or the total call duration for voice calls or digital communication exceeds 9,999 hours, 59 minutes, and 59 seconds, "Over" is displayed.
- The ring time for incoming and outgoing calls are not counted.
- The transmission charge for Chaku-moji is not counted.
- When you use WORLD CALL, the international call charge is counted. When you use other international call services other than WORLD CALL, the call charge is not counted.
- When you switch between voice and videophone calls during a call, the call duration and call charge are counted separately for each call type and incremented at [Voice call] or [Digital] alternately every time you switch the call.
- When 2in1 is used, the total call duration and charge of both Number A and Number B are summed up and displayed.

Resetting the Total Call Duration and Charge

The display of the total call duration and charge can be reset. The count starts from 0 after the reset.

Example: Resetting the total call duration

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Call Cost/Duration] → [Reset] and press ▭.

```
Select reset
item

Total duration
Total cost
```

2 Select [Total duration] and press ▭.

The Security code screen appears.

To reset the total call charge
Select [Total cost], enter the PIN2 code, and select [Yes].

3 Enter the Security code and press ▭ (OK).

The screen for confirming whether to reset appears.

4 Select [Yes] and press ▭.

The total call duration is reset and the reset date/time are updated.

Automatically Resetting the Total Call Charge

You can set to automatically reset the total call charge at 00:00 a.m. on the first day of every month.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Call Cost/Duration] → [Auto reset] and press ▭.

The PIN2 code input screen appears.

2 Enter the PIN2 code and press ▭ (OK).

The Auto reset display appears.

3 Select [ON]/[OFF] and press ▭.

The Auto reset is set.

Setting the Limit for Alert on the Total Call Charge <Cost limit notice>

You can set an upper limit amount of call charges to alert yourself with an icon or alarm tone when the total call charge exceeds this limit value.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Call Cost/Duration] → [Cost limit notice] and press ▭.

The Security code screen appears.

2 Enter the Security code and press ▭ (OK).

```
Call cost limit
Set          OFF ▾
Limit
             0YEN
             (10-100000)
Notification
    Alarm+Stand-by ▾
```

3 Select [ON]/[OFF] for the Call limit notice at [Set].

4 Enter a value at [Limit].

Enter from ¥10 to ¥100,000 (in increments of ¥10).

5 Select a notification method at [Notification].

[Alarm+Stand-by]:
Display the icon in the stand-by display and sound an alarm tone to alert you at the same time.

[Stand-by]:
Display the icon in the stand-by display to alert you.

6 Press ▯ (Complete).

The Call cost limit is set.

Other Convenient Functions

When the Call Charge Exceeds the Limit

When the upper limit value of the call charge you have set is exceeded during a call or data communication, the notification icon "🏃" (Exceed cost limit) appears in the stand-by display.
When you set the notification method to [Alarm+Stand-by], an alarm tone sounds when the stand-by display reappears.

To check the call charge
Press 🔲 (Link) in the stand-by display and select "🏃".

● The alarm for the Call cost limit is heard at the same volume level as set for the incoming call ring volume. It is heard at the volume level 2 when you set the volume of the ring tone to [3] or higher level, [STEP DOWN], or [STEP UP].

Canceling the Icon for Limit Alert

Turn off the notification icon "🏃".

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Call Cost/Duration] → [Delete max cost icon] and press 🔲.

The Security code screen appears.

2 Enter the Security code and press 🔲 (OK).

The screen for confirming whether to delete the maximum cost icon appears.

3 Select [Yes] and press 🔲.

"🏃" disappears.

Using the Calculator   <Calculator>

You can use the FOMA terminal to perform the four basic operations of arithmetic (+, −, ×, ÷) for up to nine digits.

Example: Calculating 64×5

1 From the Menu, select [LifeKit] → [Calculator] and press 🔲.

2 Enter numbers and operators to display the result.

Press 🔲6, 🔲4, ▲, 🔲5, and # in this order.

0 to 9	🔲0 to 🔲9
Add (+)	▶
Subtract (−)	◀
Multiply (×)	▲
Divide (÷)	▼
Decimal (.)	✳
Calculate (=)	# or 🔲
Clear (C)/Clear All (AC)	CLR

● If the number is indivisible or the result of the calculation contains a decimal point and proves to be 10 digits or more, 10th digit and any more digits than this are discarded for display from the rightmost digit.
● If the result of the calculation is 10 digits or more, or if you attempt an illegal calculation (e.g. division by 0), the error code "0E" appears.
● Minus numbers can be calculated only when you enter a minus number first.

Using a Memo   <Text Memo>

Necessary information can be saved in the Text Memo. Up to 10 text memos can be saved.

● When you enter [Contents] of a memo, 🔳 (Complete) appears and you can save the memo.

1 From the Menu, select [LifeKit] → [Text Memo], press 🔲, and press 🔳 (Create).

2 Enter a memo at [Contents].

Enter a memo within 256 full-width or 512 half-width characters.

3 Select a category icon at [Category].

4 Press 🔳 (Complete).

The memo is saved.

Other Convenient Functions

Displaying a Memo

The contents of a saved memo can be checked.

1 From the Menu, select [LifeKit] → [Text Memo] and press ▭.

```
Text Memo list    1/5
📅Nov 23 at Karuizawa
✈Book airline ticket
🍼Milk and sugar
📞090XXXXXXXX
📝12345
```
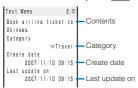

To copy [Contents] of a memo
Move the cursor to a memo and from the Function menu, select [Copy Text Memo] → [Yes].

To delete memos
Move the cursor to a memo and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete several memos, from the Function menu, select [Delete] → [Select&delete], and select memos. Press 🔘 (Complete) and select [Yes]. To delete all memos, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

2 Select a memo and press ▭.

```
Text Memo       2/5
Book airline ticket to ┬ Contents
Okinawa.

The memo appears.

To edit the memo
Press 🔘 (Edit).

Displaying the Settings of Various Functions <Application>

You can directly display the settings of each function and set each item. For more information about settings, see the relevant pages.

Display	Setting data
1Seg setting	Set the functions used for One Seg (P.255).
Lifetime Cal.	Set the data to be displayed in the Lifetime Cal., set whether to automatically display the items to remember, or etc. (P.320).
Mail	Set the functions used for i-mode mail, SMS Area Mail (P.194, 201, 203, etc.).
i-mode	Set the functions used for i-mode (P.105, 169, etc.).
i αppli	Set automatic activation of software and software description display during a download (P.105, 207, 213).
Phonebook	Set the display style and font size of the Phonebook (P.97).
Call record	Set the Redial/Received record display ON/OFF (P.131).
PushTalk	Set the operation for originating/receiving a PushTalk call (P.87).
Record msg	Set ON/OFF and the answer time of the Record message and the answering/recording image of the Videophone message (P.70).
ToruCa	Set the operation to be performed when a ToruCa card is obtained (P.224).
IC act. notice	Set the operation for notifying you that the FOMA terminal comes within the FeliCa communication range (P.225).
Schedule	Set the operation of holidays and the Schedule alarm (P.324, 326).
Input method	Set the function for character input (P.340, 342, etc.).

1 From the Menu, select [Settings] → [Application] and press ▭.

```
Application
📺 1Seg setting

```

2 Select a function and press ▭.

The setting display of each function appears.

Other Convenient Functions

Using the Earphone/Microphone with Switch <Earphone/microphone with switch>

When you connect the Flat-plug Earphone/Microphone with Switch (optional), etc. to the Earphone/Microphone Jack, you can answer a voice, videophone, or PushTalk call, place a voice call by simply pressing its switch. You can also set Earphone/Microphone operation.

● Do not wind the cord of the Earphone/Microphone around the FOMA terminal. Doing so may cause the radio wave condition to be degraded.
● Placing the cord of the Earphone/Microphone close to the antenna may cause noise.

Using the Switch to Place a Call

You can place a voice call to the first phone number saved as the Memory number (P.332) of the Phonebook using the switch on the Earphone/Microphone.

● When the Personal data lock is set, the call cannot be placed.

1 Connect the Earphone/Microphone to the FOMA terminal.
  ● Open the cover of the Earphone/Microphone Jack and insert the plug of the Earphone/Microphone into the jack.

2 Press the switch on the Earphone/Microphone for over a second in the stand-by display.
  The beep sounds and the call is connected to the recipient. Talk when the recipient answers the call.

3 Press the switch on the Earphone/Microphone for over a second to hang up.
  The beep sounds and the call is disconnected.

● If a Phonebook memory number that is saved as Secret is set for the Memory number, set the Secret display to [ON] if you want to use the switch on the Earphone/Microphone to place a call.
● When you use the MUSIC Player while the FOMA terminal is folded, you cannot use the switch to place a call.

Using the Switch to Receive a Call

1 When receiving a call, press the switch on the Earphone/Microphone for over a second.
  The beep sounds and the call is connected.

2 Press the switch on the Earphone/Microphone for over a second to hang up.
  The beep sounds and the call is disconnected.

● When you answer a videophone call using the switch on the Earphone/Microphone, a substitute image is sent to the caller.
● You cannot end communication using the switch on the Earphone/Microphone during PushTalk communication. Press ⌢ to end communication.

Setting the Operation of the Earphone/Microphone with Switch

You can set whether to permit the switch on the Earphone/Microphone to place a voice call. You can also set a Phonebook memory number to be used for placing a voice call by pressing the switch on the Earphone/Microphone.

1 From the Menu, select [Settings] → [Call] → [Headset setting] → [Headset sw. to call] and press ▭.

```
Headset sw. to call
Set          OFF
Memory number      999
```

2 Select [Voice call]/[OFF] of the switch on the Earphone/Microphone at [Set].
  [Voice call]:
    Use the switch on the Earphone/Microphone to place a voice call.
  [OFF]:
    Do not use the switch on the Earphone/Microphone.

3 Enter a memory number from the Phonebook used for placing a voice call at [Memory number].
  Enter from 000 to 999.

4 Press ▤ (Complete).
  The Headset sw. to call is set.

● If you delete phonebook data of the phone number that is set for the Memory number, the default Memory number setting 999 is restored.

Other Convenient Functions

Receiving a Call Automatically with Earphone

<Auto answer setting>

You can set to automatically answer a voice or videophone call when the Flat-plug Earphone/Microphone with Switch (optional), etc. is connected.

1 From the Menu, select [Settings] → [Call] → [Headset setting] → [Auto answer setting] and press 🔲.

```
Auto answer setting
Set             OFF▼
To answer     005 Sec
              (000-120)
```

2 Select [ON]/[OFF] of the Auto answer setting at [Set].

3 Enter the time before receiving a call automatically at [To answer].

Enter from 000 to 120 seconds.

4 Press 🔳 (Complete).

The Auto answer setting is set.

● When you receive a videophone call, a substitute image is sent to the caller.

● When the Record message, Voice Mail Service, Call Forwarding Service, and Auto answer setting are set simultaneously, and if you want to give priority to the Auto answer setting, set the time before starting the answering message for the Auto answer setting shorter than that for the Record message and the ring time for the Voice Mail and Call Forwarding Services.

Setting Which Mic to Use

<Headset microphone>

You can set to use a microphone during a call when the Flat-plug Earphone/Microphone with Switch (optional), etc. is connected.

1 From the Menu, select [Settings] → [Call] → [Headset setting] → [Headset microphone] and press 🔲.

[Valid main]:
Use the earpiece (microphone) of the FOMA terminal.

[Valid Headset]:
Use the Flat-plug Earphone/Microphone with Switch (optional).

2 Select a microphone to be used and press 🔲.

The Headset microphone is set.

Setting the JOG

<Jog setting>

You can set whether to make the JOG available for operations, the Scroll setting, and the functions to be activated when scrolling it in the stand-by display.

1 From the Menu, select [Settings] → [Management] → [Jog setting] and press 🔲.

```
Jog setting
Rotate set         ON ▼
<Scroll setting>
Mail view       Medium▼
Browser (i-mode/1Seg)
                Medium▼
Full Browser    Medium▼
<Stand-by display>
Upward rotation
              Data BOX  ▼
Downward rotation
              Phonebook ▼
```

2 Select [ON]/[OFF] of whether to perform the JOG operations at [Rotate set].

3 Select [Large]/[Medium]/[Small] of the scrolling amount when displaying mail at [Mail view].

4 Select [Large]/[Medium]/[Small] of the scrolling amount when displaying the browser and data broadcasting of One Seg at [Browser(i-mode/1Seg)].

5 Select [Large]/[Medium]/[Small] of the scrolling amount when displaying Full Browser at [Full Browser].

6 Select a function to be activated when the JOG is rolled upward in the stand-by display at [Upward rotation].

7 Select a function to be activated when the JOG is rolled downward in the stand-by display at [Downward rotation].

Setting Whether to Vibrate the Touch Key When Used <Force reactor>

You can set whether to vibrate the Touch Key when you pat it.

1 From the Menu, select [Settings] → [Management] → [Force reactor] and press ▭.

[ON]:
    Vibrate when you pat the Touch Key.
[OFF]:
    Do not vibrate when you pat the Touch Key.

2 Select [ON]/[OFF] and press ▭.

The Force reactor is set.

● When the Silent mode is set or recording a movie, the Touch key does not vibrate even if the Force reactor is set to [ON].

Resetting to the Default Settings <Reset settings>

You can reset the settings of each function to the default settings. For the functions that are reset by the Reset settings and the default settings of these functions, see the list of reset items (P.335) and the list of menus (P.374).

1 From the Menu, select [Settings] → [Management] → [Reset] → [Reset settings] and press ▭.

The Security code screen appears.
● The Reset display also appears by pressing [5] for over a second in the stand-by display. Select [Reset settings] and press ▭.

2 Enter the Security code and press ▭ (OK).

The screen for confirming whether to reset all settings appears.

3 Select [Yes] and press ▭.

The settings are reset.

Deleting All Saved Data <Reset all data&set>

You can delete saved data and reset the settings of each function to the default settings. For the functions to be reset by the Reset all data&set, see the list of reset items (P.335) and the list of menus (P.374).

● The following data is not deleted.
  - Preinstalled data in My picture, MUSIC, i-motion, Melody, My document, some Kisekae tools, and Chara-den of the Data Box
    (The [スーパーモンキーボール] in My picture is deleted by folder.)
  - Preinstalled Deco-mail templates
  - Osaifu-Keitai-compatible i-αppli, "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control)
● The preinstalled i-αppli software "Gガイド番組表リモコン" (G-GUIDE TV Program List Remote Control) is not deleted, but the settings at the time of purchase are restored.
● The preinstalled i-αppli software "スーパーモンキーボールモバイル for SO", "地図アプリ", "楽オク出品アプリ2", and "ｉアプリバンキング" are deleted.
● Even if you delete a preinstalled Deco mail pict., MUSIC, My document, and Chara-den data files, they are restored if you execute the Reset all data&set.
● The preset folders are not deleted. The folder names at the time of purchase are restored, however.
● If you execute the Reset all data&set when 2in1 is used, the 2in1 is set to OFF.
● When 2in1 is set to ON, all data are deleted regardless of the 2in1 modes.

1 From the Menu, select [Settings] → [Management] → [Reset] → [Reset all data&set] and press ▭.

The Security code screen appears.
● The Reset display also appears by pressing [5] for over a second in the stand-by display. Select [Reset all data&set] and press ▭.

2 Enter the Security code and press ▭ (OK).

The screen for confirming whether to reset all data and settings appears.

3 Select [Yes] and press ▭.

The screen for confirming whether to execute restart operation appears.

4 Select [Yes] and press ▭.

The FOMA terminal is initialized and restarts.

Other Convenient Functions

List of Reset Items

The items in which settings, that are made through the associated Function menus, etc., are reset by executing the Reset settings or Reset all data&set are as follows. For functions that can be accessed through the menu display, see the list of menus (P.374).

○: Items restored to their default settings　●: Items deleted

Character Entry

For kuten codes, see the "Kuten Code List" (PDF format) included in the supplied CD-ROM. You need Adobe® Reader® (Version 6.0 or later is recommended) to read the "Kuten Code List" (PDF format). If Adobe® Reader® is not installed on your PC, install it from the same CD-ROM, which also contains the Adobe® Reader® software.
For details on using Adobe® Reader®, see the Help that is installed with the software.

About Entering Text

The overview of the text entry is described here.

- Characters including JIS level 1 and level 2, 6,355 kanji are available.
- Some complicated kanji characters are abridged or simplified in part.

■ Text input display

※ The screen shown is an image for explanatory purpose.

① The name of a function for which characters are input

② Entered characters

③ Number of bytes of characters that can be entered

A half-width character is counted as one byte and a full-width character as two bytes. The number of characters is displayed for the SMS main body. While composing mail, it appears with a "－" (minus sign) when the number of entered characters exceeds the limit. The word "ap" (approximately) may appear.

④ Character mode or pictograph/symbol mode
  - The character mode or pictograph/symbol mode available varies depending on the contents to be edited.

Character mode	
Half-width	Full-width
[漢]: Kanji/Hiragana ※	[漢]: Kanji/Hiragana
[カナ]: Half-width katakana	[カ]: Full-width katakana
[Aa]: Half-width alphabet	[A]: Full-width alphabet
[12]: Half-width numeric	[１]: Full-width numeric

※ Characters are always entered in full-width in the kanji/hiragana mode even if the character mode is set to half-width.

Pictograph/Symbol mode			
Ranking	Pictograph	Deco mail pict.※	Symbols

※ Deco mail pict. is a Deco-mail pictograph that can be entered in the Edit mail, Edit template display, and Edit signature displays.

■ Changing the character mode or pictograph/symbol mode

Character mode for half-width
Every time you press 🔳 (Mode), the character mode changes in the order of [漢] → [カナ] → [Aa] → [12].

Character mode for full-width
Every time you press 🔳 (Mode), the character mode changes in the order of [漢] → [カ] → [A] → [１].

Pictograph/symbol mode
Every time you press 🔳 (Pict/Sym), the character mode changes in the order of [Ranking] → [Pict.] → [Pict-D] → [Symbol].

■ Changing the character mode between full-width and half-width

From the Function menu, select [Full/Half size].

■ Entering a character assigned to the same key twice or more in succession

After entering the first character, either press ▶ or wait for a while, and the cursor moves automatically.

■ Deleting a character

Move the cursor to the character and press CLR.

- The character at the cursor is deleted by pressing CLR for less than a second. The last character is deleted when the cursor is at the end of the text.
- All characters at and after the cursor position are deleted by pressing CLR for over a second. All characters are deleted when the cursor is at the end of the text.

■ Inserting a character

Move the cursor to the position to insert a character and enter the character. The characters after the cursor position are shifted to the right of the inserted character.

■ If the matching kanji word does not appear

If you cannot get the desired conversion, change the block of characters to be converted. Moving the cursor with ◀ ▶ changes the matching words list/conversion target words displayed according to the cursor position.

■ Undoing text

If you have performed an incorrect operation, you can select, from the Function menu, [Undo] to cancel the last operation and restore the previous status.
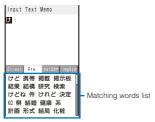

- [Undo] is available for the following actions:
  - Confirming character entry (▭)
  - [Undo]
  - Entering common phrases
  - Entering pictographs/symbols
  - Entering kuten codes (P.342)
  - Cutting or pasting (P.342)
  - Deleting characters (CLR)
  - Quoting data from Phonebook, My data, etc. (P.341)

Entering Text

Entering Text in the Prediction Conversion Mode

Example: Entering "健闘" (けんとう)

1 Check the character mode in the text input display.

Check that the kanji/hiragana mode is selected.

2 Press ② four times.

```
Input Text Memo
け
Direct  Pre.  Aa12カナ  ImgSym
けど 携帯 掲載 掲示板
結果 結構 研究 検索
けどね 件 けれど 決定
KO 県 結婚 健康 系
計画 形式 結局 化粧
```
— Matching words list

The first character "け" is entered and the matching words list is displayed.

To return to the previous character

When passing the target character by pressing extra keys, press ＃. Every time you press it, the character returns to the previous one.

3 Press ⓪ three times and press ④ five times.

```
Input Text Memo
けんと
Direct  Pre.  Aa12カナ  ImgSym
検討 健闘 剣道 見当
県道 限度 言動 原動
原動力 ケント 検討中
件と 県と 券と
権と 兼と 健と 圏と
```

The characters "んと" are entered and the matching words list is displayed.

To set the User conversion mode temporarily

When you press 🔳 (Convert), the conversion target words for the User conversion mode appear.

To change the matching words lists

Press 📧 (tab ＞). Every time you press 📧 (tab ＞), the matching words list changes in the order of "Aa12カナ" → "ImgSym" → "Direct" → "Pre.".

4 Press ▼.

The cursor moves to the matching words list.

5 Press ▲ ▼ ◀ ▶ to select [健闘] and press ▤.

```
Input Text Memo
健闘
              Phrase Item
の は を に で と です
も ね し た て から
する した だ か が
まで へ かも ない とき
る こと ？ ！ 。 、
```

"健闘" is entered. A selection of words that are expected to succeed the word "健闘" appears in the matching words list.

6 Press CLR.

The matching words list closes and "健闘" is finalized.

- The selected words from the matching words list are displayed with priority over other words next time.
- When you enter too many words at once, "◆Convert" is displayed instead of displaying the matching words list. When you press ▼, the conversion target words for the User conversion mode appear. When you select a word, the word is displayed in the matching words list from the next time.

Entering Text in the User Conversion Mode

Example: Entering "健闘" (けんとう)

1 Change the conversion mode to [User conversion].

- Follow the same steps as in "Changing the Conversion Mode" (P.340).

2 Check the character mode in the text input display.

Check that the kanji/hiragana mode is selected.

3 Enter a text.

```
Input Text Memo
けんとう
R.512        漢カナAa12
```

Press ② four times: け
Press ⓪ three times: ん
Press ④ five times: と
Press ① three times: う

4 Press [▼].

```
Input Text Memo
健闘:

  User Conversion Item
健闘 見当 健投 拳闘
献灯 賢答 けんとう
ケントウ ｹﾝﾄｳ
```

The matching words list for "けんとう" is displayed.

To finalize this word
   Press [▭] (Select).

5 Press [▼].

The cursor is moved to the matching words list.

6 Select [健闘] and press [▭].

"健闘" is finalized.

To cancel the conversion
   Press [✉] (Cancel).

Changing the Conversion Mode

Select the conversion mode from Prediction conversion or User conversion when the character mode is the kanji/hiragana mode.

1 From the Menu, select [Settings] → [Application] → [Input method] → [Select conversion] and press [▭].
[Prediction]:
   When entering characters, a selection of words predicted by the characters appears in the matching words list. This is a conversion mode that a look-ahead strategy is applied to by the FOMA terminal.

[User conversion]:
   Enter the entire reading of the word before conversion.

2 Select a conversion mode and press [▭].

The selected conversion mode is set.

● To change the conversion mode in the text input display, from the Function menu, select [Input method] → [Select conversion].

Setting the Movement Method for the Cursor in the Matching Words List

You can select a movement method for the cursor in the matching words list.

1 From the Menu, select [Settings] → [Application] → [Input method] → [Operation in item] and press [▭].

[⇕ 4 directions/▭ hor.]:
   Use [▲] [▼] [◄] [►] to move the cursor upward, downward, to the right, and to the left. When you scroll the JOG upward and downward, the cursor moves to the left and right.

[⇕ 4 directions/▭ vert.]:
   Use [▲] [▼] [◄] [►] to move the cursor upward, downward, to the right, and to the left. When you scroll the JOG upward and downward, the cursor moves upward and downward.

[⇕ hor./▭ hor.]:
   Use [▲] [▼] to move the cursor to the left and right. When you scroll the JOG upward and downward, the cursor moves to the left and right.

[⇕ hor./▭ vert.]:
   Use [▲] [▼] to move the cursor to the left and right. When you scroll the JOG upward and downward, the cursor moves upward and downward.

2 Select a movement method for the cursor and press [▭].

The Operation in item is set.

Setting the Cursor to Move Automatically

You can set the time before moving the cursor automatically after entering words.

1 From the Menu, select [Settings] → [Application] → [Input method] → [Auto cursor] and press [▭].

2 Select a time before moving the cursor automatically and press [▭].

Select from [1 to 5].

To set the cursor not to move automatically
   Select [OFF].

Entering Common Phrases

For common phrases, see P.385.

● Common phrases that are available vary depending on the contents to be edited. Unavailable categories are disabled for selection.

1 Press [✉] (Func) in the text input display.

The Function menu appears.

2 Select [Input phrases] → a category → a common phrase and press ⬚.

```
Category
1 Internet
2 Emoticon1
3 Emoticon2
4 Emoticon3
5 Greetings
6 Business
7 Private
8 Reply
9 Original
```

The selected common phrase is entered.

To check a common phrase
　Move the cursor to the common phrase and press ⬛ (Confirm).

Entering Pictographs/Symbols

Pictographs and symbols, which displayed in the order of number of entering in the Pict/Sym ranking, you entered can be selected when you enter characters. For pictographs and symbols, see P.383.

1 Press 📱 (Pict/Sym) in the text input display.

Every time you press 📱 (Pict/Sym), the pictograph/symbol mode changes in the order of [Ranking] → [Pict.] → [Pict-D] → [Symbol].

2 Press 📱 (Pict/Sym), select a pictograph, and press ⬚.

```
Input
♥

♥ ✆ ♥ ✔ ☎ ☎
♡ ♡ ♡ ☺ ☺ ☹
☎ ☎ ☎ ✖ ✖ ☺
☺ ☛ ☚ ♪ ♫ ✿
☺ ♪ ♪ ♪ ♪ ♪
Ranking Pict. Pict-D Symbol
```

The selected pictograph is displayed on the top of the text input display. To select the next pictograph, move the cursor to the desired one and press ⬚.

To cancel the all selected pictographs
　Press `CLR` for over a second.

3 Press ✉ (Close).

The selected pictographs are entered all at once.

● In the Edit mail, Edit template, and Edit signature displays, every time you select a pictograph, it is entered at a time. Press ✉ (Close) to end the pictograph/symbol mode.
● Deco mail pict. can be entered in the Edit mail, Edit template, and Edit signature displays. You can enter a Deco mail pict. to compose Deco-mail (P.180).

Editing/Saving Common Phrases
<Edit common phrases>

The preinstalled common phrases can be edited according to the intended use. Your own common phrases can also be added as new entries. For the list of common phrases, see P.385.

Example: Editing ".co.jp" saved in the "Internet" category

1 From the Menu, select [Settings] → [Application] → [Input method] → [Edit common phrases] and press ⬚.

The Common phrases display appears.

2 Select [Internet] → [.co.jp] and press ⬚.

To reset the common phrase to the default setting
　Move the cursor to the common phrase and from the Function menu, select [Reset] → [Reset one] → [Yes]. To restore the default set of common phrases in a category, from the Function menu, select [Reset] → [Reset all], enter the Security code, and select [Yes]. To restore the default set of common phrases in all categories, press ⬛ (Rset all) in the Common phrases display, enter the Security code, and select [Yes].

To delete a common phrase
　Move the cursor to the common phrase and from the Function menu, select [Delete one] → [Yes].

3 Press ⬛ (Edit) and edit the contents.

Enter a common phrase within 64 full-width or 128 half-width characters.
Editing is completed.

Quoting Data from the Phonebook, etc.

You can quote data saved in the Phonebook or Own number (My data) or characters scanned by the bar code reader to enter in the main body of mail or in the text input display while displaying a site.

Example: Quoting from the Phonebook

1 Press ✉ (Func) in the text input display.

The Function menu appears.

2 Select [Quote phonebook] and press ⬚.

The Phonebook appears.

To quote the Own number
　Select [Quote my data].

To quote texts using the bar code reader
　Select [Bar code reader].

3 Select a name → an item to be quoted and press ⬚.

The selected item appears in the text input display.

● When the selected item contains more characters than the maximum number of characters that can be entered, the extra characters are deleted.

Cutting/Copying/Pasting Text

The entered characters can be pasted to the other input display by cutting or copying.

The characters cut or copied are saved in the clipboard and pasted when the Paste function is selected. The contents of the clipboard can be pasted as many times as needed.

- The clipboard is a special memory area where cut or copied characters are temporarily saved. The clipboard can hold only one item and it is replaced with new data when copying or cutting next data to it.
- The characters in the clipboard are deleted when the FOMA terminal is powered off.
- A character that cannot be entered to the destination display is replaced with a half-width space when pasted. Any extra characters that exceed the maximum allowable number of characters are deleted.
- You cannot cut/copy and paste Deco mail pict. or images inserted in the Deco-mail main body.

■ Cutting

Cut the selected characters and save them in the clipboard (the selected characters are deleted from the source display).

Function menu	Setting option
Cut	Cut the selected text.

■ Copying

Copy the selected characters and save them in the clipboard (the selected characters are not deleted from the source display).

Function menu	Setting option
Copy	Copy the selected text.
Attach No.	Copy a phone number.
Item copy	Copy a phone number, mail address, etc. item by item.
Copy Text Memo	Copy the contents of the text memo.

■ Pasting

Paste the characters in the clipboard.

Function menu	Setting option
Paste	Paste the copied or cut data.

Copying/Cutting Text

1 Press ⊠ (Func) in the text input display.

The Function menu appears.

2 Select [Copy] and press ▤.

To cut
Select [Cut].

3 Select the Start point and press ▤.

The first character to be copied is set.

To select all characters
Press ⓘ (Sel. all).

4 Select the End point and press ▤.

The range of characters to be copied is set and saved in the clipboard.

Pasting Text

1 Select the position to paste in the text input display and press ⊠ (Func).

The Function menu appears.

2 Select [Paste] and press ▤.

The copied/cut text is pasted.

Entering Text Using Kuten Codes   <Input kuten>

You can enter characters, numbers and symbols using corresponding 4-digit kuten codes as listed in the Kuten code list.

- For kuten codes, see the "Kuten Code List" (PDF format) included in the supplied CD-ROM.

1 Press ⊠ (Func) in the text input display.

The Function menu appears.

2 Select [Input kuten] and press ▤.

```
┌─────────────────┐
│  Input kuten    │
│  ▮□            │
└─────────────────┘
```

3 Enter a kuten code.

The character corresponding to the entered kuten code is entered.

Saving the Frequently Used Kanji Words   <Save prediction/user>

Frequently used Kanji words can be saved in the Prediction or User dictionary. Saved words are displayed in the matching words list/conversion target words by priority when you convert characters.

Prediction dictionary	Save words that you want to display in the matching words list by priority when you use the Prediction conversion. Up to 300 words can be saved.
User dictionary	Save words that you want to display in the conversion target words by priority when you use the User conversion. Up to 200 words can be saved.

- The words saved in the User dictionary are automatically saved in the Prediction dictionary, but not vice versa.
- When you delete a saved word, delete it from the dictionary to which it is saved.

Example: Saving a word in the Prediction dictionary

1 From the Menu, select [Settings] → [Application] → [Input method] → [Edit prediction] and press ⬚.

The Prediction dictionary display appears.

To add a word to the User dictionary
Select [Settings] → [Application] → [Input method] → [Edit user dict].

To delete a word
Move the cursor to the word and from the Function menu, select [Delete one] → [Yes]. To delete several words, from the Function menu, select [Select&delete] and select words, press ⬚ (Complete), and select [Yes]. To delete all words, from the Function menu, select [Delete all], enter the Security code, and select [Yes].

To edit a word
Move the cursor to the word and press ⬚.

2 Press ⬚ (Create).

```
Edit prediction
Reading(Keyword)
                          ────── Reading field

Word(Prediction)

                          ────── Word field
```

3 Enter the reading in the reading field.

Enter a reading within 16 hiragana characters.

4 Enter the word in the word field.

Enter a word within 16 full-width or 32 half-width characters.

5 Press ⬚ (Complete).

The entered word is saved in the Prediction dictionary.

Restoring the Default Settings
<Reset data>

The FOMA terminal's dictionary has a data learning feature. The data leaning feature memorizes the frequency in which individual words are used and give priority to the frequently used words when displaying them in the matching words list/conversion target words.
If you reset the learning data, the order of priority is reset to the default setting.

1 From the Menu, select [Settings] → [Application] → [Input method] → [Reset data] and press ⬚.

The Security code screen appears.

2 Enter the Security code and press ⬚ (OK).

The screen for confirming whether to reset the learning data appears.

3 Select [Yes] and press ⬚.

The learning data is reset.

Using the Downloaded Dictionary
<Download dictionary>

Up to 20 dictionaries can be downloaded using i-mode for use with the FOMA terminal. When enabling a downloaded dictionary, words saved in it appear in the matching words list.

1 From the Menu, select [Settings] → [Application] → [Input method] → [Dictionaries] and press ⬚.

```
Dictionary folder
■流行語辞書
■エリア辞書
■大阪弁辞書
```

To display the detailed information
Move the cursor to the dictionary and from the Function menu, select [Information].

To change the name
Move the cursor to the dictionary and from the Function menu, select [Edit name]. Enter a name within eight full-width or 17 half-width characters.

To delete a dictionary
Move the cursor to the dictionary and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete several dictionaries, from the Function menu, select [Delete] → [Select&delete] and select dictionaries, press ⬚ (Complete), and select [Yes]. To delete all dictionaries, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

2 Select a dictionary and press ⬚ (Set).

The Valid/Invalid display appears.

3 Select [Valid]/[Invalid] and press ⬚.

When it is set to [Valid], the dictionary is enabled and "▥" (gray) changes to "▥" (green).

● If many dictionaries are enabled simultaneously, some words may not be displayed in the matching words list.

● The dictionary can be downloaded from "SO@Planet".
[i Menu] → [メニュー/検索] (Menu/Search) → [ケータイ電話メーカー] (Mobile Phone Manufacturers) → [SO@Planet] (Japanese only)

Sorting the Downloaded Dictionaries

When you download several dictionaries, you can change the order of the dictionaries in the list to display words of a frequently used dictionary by priority.

1 Press ⌨ (Func) in the Dictionary folder display.

The Function menu appears.

2 Select [Reorder] and press ▤.

3 Select a dictionary and press ▤.

The Reorder display appears.

4 Select a position to move to and press ▤ (Move).

5 Press ⓘ (Complete).

The searching priority is set.

Network Services

Using the Voice Mail Service

The Voice Mail Service takes messages for you, as long as it answers a call with the answering message, if there is an incoming voice or videophone call when you are in a location without the radio wave, while the FOMA terminal is powered off, or when you are in a situation where you cannot answer a call.

● When the Voice Mail Service and Record Message (P.69) are set simultaneously, and if you want to give priority to the Voice Mail Service, set the ring time for the Voice Mail Service shorter than the time before starting the answering message for the Record Message.

● When the Voice Mail Service is set to "Activate" and if you do not answer an incoming voice or videophone call, the call is saved in the Received record as a "Missed call" and the notification icon " " (Missed call) appears in the stand-by display.

● When the Call Forwarding Service is set to "Activate", the Voice Mail Service is automatically deactivated.

■ Basic flow of the Voice Mail Service

Step 1   Activate the service.
Step 2   The caller leaves a message.
Step 3   Play back the Voice Mail message.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Voice Mail] and press ▤.

2 Set each item.

Menu item		Operation
Activate※		Select [Activate] → [Activate]/[Ring+Activate] (→ Enter the ring time) → [Yes]. ● When you select [Ring+Activate], you can set the ring time (000 to 120 seconds) and activate the Voice Mail Service. ● When you select [Ring+Activate], the Voice Mail Service is activated by Number A. ● When 2in1 is set to the B mode, you cannot select the method of activating the Voice Mail Service.
Set ring time		Select [Set ring time] → Enter the ring time (000 to 120 seconds) → ▤ (Complete).
Deactivate※		Select [Deactivate] → [Yes].
Check setting		Select [Check setting]. ● When 2in1 is set to either the B or Dual mode, the screen for selecting either Number A or Number B appears.
Play messages※		Select [Play messages] → [Yes] → Operate as instructed by the guidance. ● The displayed number is the number that the guidance announces when playing back new Voice Mail messages. Already saved Voice Mail messages are not included. ● You can also play back the record message by pressing ▤ (Link) in the stand-by display and selecting " ".
Voice Mail setting※		Select [Voice Mail setting] → [Yes] → Operate as instructed by the guidance.
Check messages		Select [Check messages]. ● When a new message is stored at the Voice Mail Service Center, the notification icon " " (Voice Mail message) appears in the stand-by display.
Tone/Vibrate notice (Default: ON)		Set whether to alert you of a new message with the mail tone when it is received at the Voice Mail Service Center. Select [Tone/Vibrate notice] → [ON]/[OFF].
Delete VM icon		Select [Delete VM icon] → [Yes].
Missed Call notice	Activate	Notify you of a new message by SMS when it is received while the FOMA terminal is powered off or outside of the service area. Select [Missed Call notice] → [Activate] → [All calls]/[With Caller ID] → [Yes]. ● Even if the caller is saved in the Phonebook, the caller ID of the caller is notified and the name saved in the Phonebook is not displayed.
	Deactivate	Select [Missed Call notice] → [Deactivate] → [Yes].
	Check setting	Select [Missed Call notice] → [Check setting].

※ When 2in1 is set to the Dual mode, the screen for selecting either Number A or Number B appears.

Notes on the service for the videophone

● When the Voice Mail Service takes a videophone message for you, it is notified to you by SMS.
● To change the settings of the Voice Mail Service for videophone support, press `1` `4` `1` `2` `📞` in the stand-by display and operate as instructed by the guidance.
● A videophone of AV32K type is disabled for connection to the Voice Mail Service Center.
● When you connect to the Voice Mail Service Center using Chara-den, the DTMF operation is not available. From the function menu, select [DTMF send mode] (P.73).

Using the Call Waiting Service

When there is another incoming call while you are on a call, the in-call ring tone notifies you of the second call. You can answer the second call by putting the first call on hold. You can also put your current call on hold and place a call to another party.

● When you receive a videophone call during a voice call, you can answer the videophone call by disconnecting the voice call. You cannot answer a voice/videophone call that arrives during a videophone call. However, it is saved in the Received record.
● To use the Call Waiting Service, set the Arrival Call Act (P.350) to [Answer]. If it is set to other operation, you cannot answer a second voice call received while you are on a voice call even if the Call Waiting Service is activated.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Call Waiting] and press ▤.

2 Set each item.

Menu item	Operation
Activate	Select [Activate] → [Yes].
Deactivate	Select [Deactivate] → [Yes].
Check setting	Select [Check setting].

● To put the current call on hold and answer an incoming call, press ▤ (Call). When you put a call on hold, the message "Connecting" appears. Every time you press ▤ (Switch), you can switch between the calls. To disconnect the put on hold call, from the Function menu, select [Release Hold Call].
● To disconnect the current call and answer an incoming call, press 📞 and 📞.

Using the Call Forwarding Service

The Call Forwarding Service forwards a voice or videophone call to a preset forwarding number when you are in a location without the radio wave, the FOMA terminal is powered off, or you do not answer the call within the preset ring time.

● When the Call Forwarding Service and Record Message (P.69) are set simultaneously, and if you want to give priority to the Call Forwarding Service, set the ring time for the Call Forwarding Service shorter than the time before starting the answering message for the Record Message.
● When the Call Forwarding Service is set to "Activate" and if you do not answer an incoming voice or videophone call, the call is saved in the Received record as a "Missed call" and the notification icon " " (Missed call) appears in the stand-by display.
● When you receive a videophone call, the call is disconnected if the forwarding number does not support a videophone feature compliant with 3G-324M.

■ Basic flow of the Call Forwarding Service

Step 1	Save the forwarding number.
Step 2	Activate the Call Forwarding Service.
Step 3	Receive a call on your FOMA terminal.
Step 4	If you do not answer the call, it is automatically forwarded to the specified forwarding number.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Call Forwarding] and press ▤.

2 Set each item.

Menu item	Operation
Activate※	Select [Activate] → [Activate]/[Set+Activate] (→ Enter the forwarding number and ring time) → [Yes]. ● When you select [Set+Activate], you can set the forwarding number (within 26 digits) and ring time (000 to 120 seconds) and activate the Call Forwarding Service. ● When 2in1 is set to the B mode, you cannot select the method of activating the Call Forwarding Service.
Deactivate※	Select [Deactivate] → [Yes].
Change FWD number	Select [Change FWD number] → Enter the forwarding number (within 26 digits) → Select [Set]/[Set+Activate]. ● When 2in1 is set to the B mode, select [Change FWD number] → enter the forwarding number (within 26 digits) → select [Yes].
If FWD number busy	Set whether to connect to the Voice Mail Service Center when the forwarding number is busy. Select [If FWD number busy] → [Not connect]/[Connect].
Check setting	Select [Check setting]. ● When 2in1 is set to either the B or Dual mode, the screen for selecting either Number A or Number B appears.

※ When 2in1 is set to the Dual mode, the screen for selecting either Number A or Number B appears.

● To set on/off of the Call Forwarding guidance, press `1` `4` `2` `9` `r` in the stand-by display and operate as instructed by the guidance.

Using the Nuisance Call Blocking Service

The Nuisance Call Blocking Service prevents receiving a "nuisance call" such as prank phone calls. When you set the Bar Nuisance Calls, further calls from registered nuisance call numbers are automatically rejected and the call rejection guidance is played back on the caller's phone.

● The ring tone does not sound when there is an incoming call from the saved phone number. The call is not saved in the Received record, either.

● When you receive a videophone call from a caller who is saved as a nuisance caller, it is disconnected after playing back the call rejection video guidance on the caller's phone.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Bar Nuisance Calls] and press ▤.

2 Set each item.

Menu item	Operation
Register Caller	Save the phone number of the last received call. Select [Register Caller] → [Yes].
Reg. selected No.	Select [Reg. selected No.] → Enter the phone number (within 22 digits) → Select [Yes].
Delete all entries	Select [Delete all entries] → [Yes].
Delete last entry	Delete the last saved phone number. You can delete another phone number from the last saved one by repeating the same operation. Select [Delete last entry] → [Yes].
Check No. of entry	Select [Check No. of entry].

Using the Caller ID Display Request Service

When you receive a voice or videophone call without a caller ID, the Caller ID Display Request Service answers the call with a guidance requesting the caller to send the caller ID and then automatically disconnects the call.

● When there is an incoming call from the caller who does not notify the phone number, the ring tone does not sound. The call is not saved in the Received record either.

● When you receive a videophone call without a caller ID, it is disconnected after playing back the caller ID display request video guidance on the caller's phone.

● When you receive a PushTalk call without a caller ID, the caller ID display request guidance is not played back on the caller's phone and the call is disconnected.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Caller ID Request] and press ▤.

2 Set each item.

Menu item	Operation
Activate	Select [Activate] → [Yes].
Deactivate	Select [Deactivate] → [Yes].
Check setting	Select [Check setting].

Using the Dual Network Service

The Dual Network Service enables you to use a Mova terminal using the phone number of the FOMA terminal you use at present. This service enables you to select and use both the FOMA and Mova service areas as required.

- You cannot use the FOMA and Mova terminals at the same time.
- Make sure to perform the operation for switching the Dual Network Service from the FOMA terminal not using the service.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Dual Network] and press ▭.

2 Set each item.

Menu item	Operation
Switch Dual Network	Switch the Dual Network Service to enable using the FOMA terminal for this service. Select [Switch Dual Network] → Enter the network security code → Select [Yes].
Check setting	Select [Check setting].

Using the English Guidance Service

You can set English voice guidance to be played during various network service settings such as the Voice Mail Service and when you are outside of the service area.
If a caller is also using this service, the settings of a call from this caller have priority over the settings on the recipient's phone.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [English Guidance] → [Guidance setting] and press ▭.

2 Select a target for the English Guidance Service and press ▭.

[Call+Income]:
    Set both the guidance that you hear when you place a call and that a recipient hears upon receiving your call.
[Call]:
    Set the guidance that you hear when you place a call.
[Income]:
    Set the guidance that a recipient hears upon receiving your call.

3 Select a language for the guidance to be played during outgoing calls and press ▭.

4 Select a language for the guidance played during incoming calls and press ▭.

[Japanese]:
    Set the guidance to Japanese.
[Japanese+English]:
    Set the guidance in the order of Japanese → English.
[English+Japanese]:
    Set the guidance in the order of English → Japanese.

To check the settings
    From the Menu, select [Settings] → [Management] → [NW Services] → [English Guidance] → [Check setting].

Using the Service Numbers

You can call DoCoMo General Inquiries, Contact for Repairs, etc.

- Depending on the UIM being used, the items to be displayed may be different or some items may not be displayed.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Service Numbers] and press ▭.

The Service Numbers display appears.
[ドコモ故障問合せ] (Contact for Repairs):
    Call the DoCoMo representative of Contact for Repairs.
[ドコモ総合案内・受付] (General Inquiries):
    Call the DoCoMo information desk of General Inquiries (DoCoMo Information Center).

2 Select a contact number → [Yes] and press ▭.

The call is connected to the contact number.

● When 2in1 is set to the Dual mode, the screen for selecting either Number A or Number B appears.

Selecting an Operation for an Incoming Call during a Call <Arrival Call Act>

If you are subscribing to the Voice Mail, Call Forwarding, or Call Waiting Service, you can set the operation you want to perform when you receive the second voice or videophone call during a call.

- If you do not subscribed to the Voice Mail, Call Forwarding, or Call Waiting Service, you cannot answer a second incoming call received while you are on a current call.
- To use the Arrival Call Act function, set the In-call arrival act to "Activate".

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Arrival Call Act] and press ▤.

[Answer]:
　You can answer a call or forward it manually to the Voice Mail Service Center or a forwarding number.

[Voice Mail]:
　An incoming call is connected to the Voice Mail Service Center.

[Call Forwarding]:
　An incoming call is forwarded to a saved forwarding number.

[Call Rejection]:
　An incoming call is rejected.

2 Select an operation for an incoming call and press ▤.

The operation for an incoming call during a call is set.

Starting/Stopping the In-call Arrival Act

You can start or stop the operation you have selected for the Arrival Call Act.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [In-call arrival act] and press ▤.

2 Set each item.

Menu item	Operation
Activate	Select [Activate] → [Yes].
Deactivate	Select [Deactivate] → [Yes].
Check setting	Select [Check setting].

Setting Remote Control <Remote Control>

You can set to be able to operate the Voice Mail or Call Forwarding Service, etc. from a general push-button telephone, public phone, DoCoMo mobile phones, etc.

- To use the Voice Mail or Call Forwarding Service overseas, the Remote Control function must be set in advance.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Remote Control] and press ▤.

2 Set each item.

Menu item	Operation
Activate	Select [Activate] → [Yes].
Deactivate	Select [Deactivate] → [Yes].
Check setting	Select [Check setting].

Using the Multi Number Service

The Multi Number Service enables you to add up to two numbers, Additional No.1 and Additional No.2 in addition to the Basic Number, as your FOMA terminal phone numbers.

- You cannot use the Multi Number Service and 2in1 simultaneously.

Setting Phone Number Details

- You cannot change the phone number displayed under "Basic Number". However, you can set the ring tone/incoming image using the Incoming set, etc.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Multi Number] → [Number Setting] and press ▤.

2 Set each item.

Item	Description
Multi Number call	Select [ON]/[OFF] of the Multi Number call. [ON] : Enable to select a phone number to be used for placing a call from the Option call display. [OFF] : You cannot select a phone number when you place a call.
(NAME icon)	Enter a name within 10 full-width or 20 half-width characters.
(icon / icon)	Enter a phone number within 26 digits.
(♪ icon)	Select a ring tone from MUSIC/i-motion/Melody of the Data Box. ● You can set the following files. You can select a Chaku-Uta® from [i-motion]. {table below} ※ Some files may not be set. ● To mute the ring tone, select [Silent].

Category	File format	File size	Image size
MUSIC※	AAC-LC/HE-AAC	Max. 5M bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA (640×480)]
Melody	SMF/MFi	Max. 350K bytes	—

(image icon)	Select an incoming image from My picture/i-motion of the Data Box. ● You can set the following files. {table below} ※ Some i-motion may not be set.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stby (480×864)], Max. W480×H288 for GIF animation
	SWF	Max. 100K bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA (640×480)]

3 Press (Complete).

The details of a phone number are set.

● If you do not yet subscribe to the Multi Number Service, use the FOMA terminal with the Multi Number call set to [OFF].

● If the Multi Number call is set to [ON], a phone number and name associated with the Multi Number (Basic Number/Additional No.1/Additional No.2) selected in the Option call display are displayed while placing a call.

● When you receive a call, a phone number and name associated with the used Multi Number (Basic Number/Additional No.1/Additional No.2) being used are displayed.

● When you place a call from the Redial or Received record, the Multi Number previously used for placing/receiving a call is displayed and the call is placed using this number.

Setting an Originating Phone Number

You can select a phone number to be used when you place a call.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Multi Number] → [Set Multi Number] and press .

2 Select an originating phone number → [Yes] and press .

The phone number you use for placing a call is set.

To check the phone number you use for placing a call
From the Menu, select [Settings] → [Management] → [NW Services] → [Multi Number] → [Check Multi Number].

● You can select a phone number manually in the Call menu when you place a call (P.57).

Using 2in1

You can separately use two phone numbers, 2 mail addresses, and exclusive modes for each on your FOMA terminal as if you have two terminals.
For the default settings, see the List of menus (P.380).

Mode	Description
A mode	You can dial with your phone number (Number A), send i-mode mail with Address A, and browse related data.
B mode	You can dial with 2in1 phone number (Number B), access to sites where WEB mail is available with Address B, and browse related data.
Dual mode	The mode that supports both functions of A and B modes.

- Sending/receiving mail for Address B is performed on the specified WEB mail site.
- Packet communication in B mode is available while subscribing to the i-mode service.
- For details on 2in1, see the "Mobile Phone User's Guide【2in1】".
- When you replace the UIM (From 2in1 subscriber to 2in1 subscriber) while 2in1 is used, to obtain a correct Number B, you need to perform the 2in1 function OFF (P.353) first, and then set the 2in1 to ON again.
  When you replace the UIM (From 2in1 subscriber to 2in1 non-subscriber), perform the 2in1 function OFF.
- When placing a voice/videophone call or originating 64K data communication from an external device, if 2in1 is set to either the A mode or Dual mode, it is done by Number A. When the B mode is set, it is done by Number B.

Setting 2in1

You can set the operations such as the Stand-by display and Receive avoid. setting by setting the ON for 2in1.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [2in1 setting] and press ⬚.

The Security code screen appears.

- The 2in1 setting display also appears by pressing 8 for over a second in the stand-by display.

2 Enter the Security code and press ⬚ (OK).

When 2in1 is already set to ON
The 2in1 setting display appears.

3 Select [Yes] and press ⬚.

```
2in1 setting
Mode switching
Phonebook 2in1 setting
Stand-by display
Set call/receive No.
2in1 function OFF
Receive avoid. setting
```

2in1 is set to ON and the 2in1 setting display appears.

4 Set each item.

Menu item	Operation
Mode switching	Switch the 2in1 modes. Select [Mode switching] → [A mode]/[B mode]/[Dual mode].
Phonebook 2in1 setting	Change the 2in1 settings saved for the Phonebook. • When an entry is saved in the Phonebook, the Phonebook 2in1 setting compatible with the 2in1 mode is automatically saved. ● Set each entry Select [Phonebook 2in1 setting] → phonebook data → 🔖 (Set) → Select [A]/[B]/[Common]. ● Set for a group Select [Phonebook 2in1 setting] → ✉ (Func) → Select [Set all groups] → a group → 🔖 (Set) → Select [A]/[B]/[Common].
Stand-by display	Set the stand-by display for the B and Dual modes. Select [Stand-by display] → [B mode]/[Dual mode] → an image from My picture of the Data Box. • You can set the following files.

Category	File format	File size	Image size
My picture	GIF/JPEG	Max. 250K bytes	Max. [Stby (480×864)], Max. W480× H288 for GIF animation
	SWF	Max. 100K bytes	—

- To specify no image, select [None].

Network Services

Menu item	Operation
Set call/ receive No.	To identify the call placed or received using Number B, set the font color and ring tone of the incoming/ receiving call display. ● Set the font color Select [Set call/receive No.] → [Disp. call/rcv. No.] → [dark]/[light]. ● Set the ring tone Select [Set call/receive No.] → [Ringtone for Number B] → [Incoming call]/[Incoming V.phone] → a ring tone from MUSIC/i-motion/Melody of the Data Box. • You can set the following files.

Category	File format	File size	Image size
MUSIC※	AAC-LC/ HE-AAC	Max. 5M bytes	—
i-motion※	MP4	Max. 10M bytes	Max. [VGA (640×480)]
Melody	SMF/MFi	Max. 350K bytes	—

Menu item	Operation
	※ Some files may not be set. • If you select [ON] at [Link incoming call], the ring tone for the Incoming V.phone follows the setting for the Incoming call. • When you receive a call without the caller ID, the ring tone follows the setting of [Ringtone for Number B].
2in1 function OFF	Quit using the 2in1 functions. Select [2in1 function OFF] → [Yes].
Receive avoid. setting	Set the restriction for incoming call of Number A and Number B. ● Set the restriction for incoming call for Number A and Number B individually Select [Receive avoid. setting] → [Change receive avoid.] → [Rcv. avoid. (Number A)]/[Rcv. avoid. (Number B)] → [Receive]/[Avoid]/[Unchange] → 🔲 (Complete). ● Check the current setting Select [Receive avoid. setting] → [Check receive avoid.] → [Yes]. ● Activate/deactivate the Mode link When the A mode is used, allow to receive a call only for Number A. When the B mode is used, allow to receive a call only for Number B. When the Dual mode is used, allow to receive a call for both Number A and Number B. Select [Receive avoid. setting] → [Mode link setting] → [Yes]. ● Set the Receive avoid. setting from overseas Select [Receive avoid. setting] → [Rcv. avoid. set(Int.)] → Operate as instructed by the guidance.

Selecting a Phone Number When Placing a Call

When the Dual mode is set, you can select a phone number to place a call.

1 Enter a phone number in the stand-by display and press 📞.

To place a videophone call
Press 🔳 (V.phone).

```
📱 ドコモ次郎
  Select number
  to call

  Number A
  Number B
  Cancel
```

2 Select [Number A]/[Number B] and press ▤.

Place a call from the selected phone number.

● When you place a call using the Redial/Received record, the phone number which was used to receive/place a call previously is displayed and the call is placed using this phone number.

Functions Available for Each Mode

The funcions which only differ from each mode are listed (the functions which are common with the A mode are excluded).

Service		A mode	B mode	Dual mode
Voice/video-phone call	Call	Number A	Number B	Selectable when placing a call ※1
	Receive	All		
Phonebook	Display	A/Common	B/Common	All
	Change name ※2	A/Common	B/Common	All
	Phonebook 2in1 setting when saving new data	A	B	A
	Receive all from Infrared/iC communication/microSD memory card ※3	Copy the Phonebook 2in1 setting of the sender ※4		
	Receive one from Infared/iC communication/microSD memory card ※3	A	B	A
	UIM phonebook — Copy from FOMA terminal to UIM	Common		
	UIM phonebook — Copy from UIM to FOMA terminal	A	B	A
Redial record	Display	Call from Number A	Call from Number B	All
Received record	Display	Call for Number A	Call for Number B	All
Mail/SMS	Display	• Mail sent for/from Address A • SMS sent for/from Number A	FOMA terminal • Received mail sent for Address B saved in the FOMA terminal (at the WEB mail site, mail set to [端末に保存] (save to the FOMA terminal)), newly arrived notification mail, or alarm notification mail • SMS sent for Number B WEB mail site • Mail sent for/from Address B	FOMA terminal • Mail sent for/from Address A, received mail sent for Address B saved in the FOMA terminal, newly arrived notification mail, or alarm notification mail • SMS sent for/from Address A • SMS sent for Number B WEB mail site • Mail sent for/from Address B
	Send	• Mail from Address A • SMS from Number A	FOMA terminal • Cannot send mail/SMS WEB mail site • Mail from Address B	FOMA terminal • Mail from Address A ※5 • SMS from Number A WEB mail site • Mail from Address B
	Receive	• Mail for Address A/SMS for Number A (with sound) • Received mail sent for Address B saved in the FOMA terminal, newly arrived notification mail, or alarm notification mail/SMS sent for Number B (without sound)	• Mail for Address A/SMS for Number A (without sound) • Received mail sent for Address B saved in the FOMA terminal, newly arrived notification mail, or alarm notification mail/SMS sent for Number B (with sound)	• Mail for Address A/SMS for Number A (with sound) • Received mail sent for Address B saved in the FOMA terminal, newly arrived notification mail, or alarm notification mail/SMS sent for Number B (with sound)
	Receive all from Infrared/iC communication/microSD memory card ※3	Copy mail/SMS following the sender status ※4		
	Receive one from Infared/iC communication/microSD memory card ※3	A		
	SMS in UIM — Copy from FOMA terminal to UIM	A		
	SMS in UIM — Copy from UIM to FOMA terminal	A		
PushTalk	Originate	Number A	Not available	Number A
	Receive	Number A		
	PushTalk phonebook	Display	Cannot display	Display
i-αppli		Available all	Available ※6	Available ※7
Own number		Number A/Address A	Number B/Address B	Number A/B/Address A/B

※1 To place a call, Number A is the default setting for the Phonebook of the A/Common setting, and Number B is the one for the Phonebook of the B setting.

※2 When the phone number of placing/receiving a call or sending/receiving SMS and mail address of receiving/sending mail are saved in the Phonebook, after comparing them with the phonebook data, the name saved in the Phonebook of each phone number and mail address is displayed.

※3 When you save the phonebook entries or mail from the microSD memory card to the FOMA terminal, you can save them based on each file in the microSD memory card.

※4 When the sender's mobile phone is not compatible with the 2in1 functions, Number A is applied.

※5 When you compose new mail in the Dual mode, you can select a mail address from the Phonebook of the B mode setting but note that mail is sent from Address A.

※6 Except i-αppli with mail, i-αppli using mail, and i-αppli stand-by display.

※7 Except i-αppli stand-by display.

Network Services

Using OFFICEED   <OFFICEED>

"OFFICEED" is a fixed-rate service within a group provided by IMCS (Indoor Mobile Communication System). You may need to apply separately to use this service.

● For more information, see the DoCoMo's website for business customers (http://www.docomo.biz/d/212/).

Saving a New Service to Use It

<Additional service (USSD) registration>

When DoCoMo adds a new network service, you can save the service in the Menu and use it.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Additional service] and press ▤.

2 Set each item.

Menu item	Operation
Register USSD	[Register USSD] → [Unregistered] → 🔲 (Edit) → Enter a name of the service at [Service] (within 10 full-width or 20 half-width characters) → Enter a USSD command at [USSD] (within 20 digits) → 🔲 (Complete). ● To use a service Select [Register USSD] → a service. ● To delete a service [Register USSD] → Move the cursor to a service and press 🔲 (Func) → Select [Delete one] (to delete all services, select [Delete all] → enter the Security code) → Select [Yes].
Register ans word	[Register ans word] → [Unregistered] → 🔲 (Edit) → Enter an answering message at [Answer wording] (within 10 full-width or 20 half-width characters) → Enter a USSD command at [USSD] (within 20 digits) → 🔲 (Complete). ● To delete an answering message [Register ans word] → Move the cursor to an answering message and press 🔲 (Func) → Select [Delete one] (to delete all answering messages, select [Delete all] → enter the Security code) → Select [Yes].

PC Connection

For detailed information on Data Communication, see the "Manual for PC connection setting" (PDF format) included in the supplied CD-ROM. You need Adobe® Reader® (Version 6.0 or later is recommended) to read the "Manual for PC connection setting" (PDF format). If Adobe® Reader® is not installed on your PC, install it from the same CD-ROM, which also contains the Adobe® Reader® software.
For details on using Adobe® Reader®, see the Help that is installed with the software.

About Data Communication

You can use the FOMA terminal for three types of data communication, packet communication, 64K data communication, and data transfer.

- The FOMA terminal does not support Remote Wakeup.
- The FOMA terminal does not support FAX communication.
- If you are going to connect the FOMA terminal to DoCoMo's "sigmarionⅡ"/"sigmarionⅢ"/"musea" PDA to perform data communication, you should update "sigmarionⅡ"/"musea". For details about updating, see the DoCoMo's website.
- 64K data communication to be performed by connecting to a PC is not available overseas. When you originate the packet communication, use the IP connection to communicate (the PPP connection cannot originate the packet communication).

Packet Communication

A charge applies to this type of communication based on the volume of exchanged data (maximum reception speed 3.6Mbps, maximum transmission speed 384kbps).

You can perform packet communication by connecting the FOMA terminal to a PC using the FOMA USB Cable with Charge Function 01 (optional) and making the necessary settings. Use a FOMA packet communication-compliant access point such as DoCoMo's Internet connection service "mopera U" /"mopera". You can also exchange data by accessing an in-house LAN connected to the FOMA network.

- Note that packet communication could be expensive if you exchange large volumes of data such as viewing sites or Internet home pages that contain images or downloading files.
- The maximum transmission/reception speed is 384kbps outside of the FOMA HIGH-SPEED Area.
- When you use DoCoMo's "sigmarionⅢ"/"sigmarionⅡ"/ "musea" PDA to perform packet communication, the maximum transmission/reception speed is 384kbps. It does not support the high-speed communication compatible with HIGH-SPEED Area.

64K Data Communication

A charge applies to this type of communication based on the duration of a communication.

You can perform 64K data communication by connecting the FOMA terminal to a PC using the FOMA USB Cable with Charge Function 01 (optional) and making the necessary settings. Use a FOMA 64K data communication-compliant access point such as DoCoMo's Internet connection service "mopera U"/"mopera" or ISDN synchronous 64K access points.

- Note that 64K data communication could be expensive if it is performed for a long period of time.

Data Transfer

This type of communication is used to exchange data using the infrared or iC communication or the FOMA USB Cable with Charge Function 01 (optional) and no charge is required. Using infrared communication, you can exchange data with a device such as the FOMA terminal or a PC that is equipped with the infrared communication function.

Precautions on Use

Usage Fee of Internet Service Provider

When you use the Internet, a usage fee is required for your Internet service provider. This usage fee, which is separate from the FOMA service charges, must be paid directly to the Internet service provider. For details about usage fees, contact your Internet service provider.

You can use DoCoMo's Internet connection service "mopera U"/"mopera".

To use "mopera U", you need to subscribe to this service (paid service). No monthly charge is required to use "mopera" and you do not need to subscribe to it.

Setting a Host (Such as an Internet Service Provider)

The host for packet communication is different from the host for 64K data communication. To use packet communication, use a packet communication-compliant host; to use 64K data communication, use a FOMA 64K data communication-compliant host or ISDN synchronous 64K-compliant host.

- You cannot connect to a DoPa access point.
- You cannot connect to a PHS 64K/32K data communication access point such as PIAFS.

User Authentication for Network Access

User authentication (ID and password) may be required when connecting to some hosts. If user authentication is required, enter your ID and password on the communication software (dial-up network) for connecting to the host. The Internet service provider or network administrator of the host assigns an ID and password. For details, contact your Internet service provider or network administrator of the host.

Access Authentication for the Use of a Browser

When a FirstPass-compatible site that you access through the Internet browser on your PC requires the FirstPass (user certificate) as an access authentication, install the FirstPass PC software from the supplied CD-ROM and perform necessary settings. For details, see "FirstPassManual" (PDF format) in the [FirstPassPCSoft] folder on the CD-ROM. You need Adobe® Reader® (Version 6.0 or later is recommended) to read "FirstPassManual" (PDF format). If Adobe® Reader® is not installed on your PC, install it from the same CD-ROM, which also contains the Adobe® Reader® software.

For details on using Adobe® Reader®, see the Help that is installed with the software.

Conditions of Packet and 64K Data Communication

The following conditions are necessary to perform communication using the FOMA terminal.

- The FOMA USB Cable with Charge Function 01 (optional) can be used on your PC.
- Your PDA must have FOMA packet and 64K data communication support.
- You must be inside of the FOMA's service area.
- The host for packet communication must have FOMA packet communication support.
- The host for 64K data communication must have FOMA 64K or ISDN synchronous 64K data communication support.

Note, however, that even if you comply with the above conditions, you may not be able to perform communication if the base station is congested or radio wave condition is poor.

Before Using Data Communication

About the Operating Environment

Operating environment of a PC to be used for data communication is as follows.

Item	Required environment
PC main unit	• PC/AT compatible machine with a built-in or removable CD-ROM drive • USB port (Universal Serial Bus Specification 1.1 compliant)
OS※1	Windows 2000 Professional, Windows XP, Windows Vista (Japanese version)
Required memory※2	Windows 2000 Professional: 64MB or more Windows XP: 128MB or more Windows Vista: 512MB or more
Hard drive capacity※2	5MB or more free space
Display	High color (65,536 colors) and high resolution (800×600 dots) or over (recommended)

※1 Operation on a PC running upgraded OS is not guaranteed.

※2 The required memory and hard drive capacity may vary depending on the PC system configuration.

Other Necessary Items

Other than the FOMA terminal and a PC, the following hardware and software are necessary.

- FOMA USB Cable with Charge Function 01 (optional) or FOMA USB Cable (optional)
- Supplied CD-ROM "FOMA SO905i CD-ROM"

● This manual assumes that you use the FOMA USB Cable with Charge Function 01 (optional).

● Use the exclusive "FOMA USB Cable with Charge Function 01" or "FOMA USB Cable". A generic USB cable for a PC connection cannot be used because it has a different connector shape.

● If you use USB HUB, it may not work properly.

PC Connection

■ Definition of terms

● Administrator

An administrator is authorized access to all Windows XP, Windows 2000 Professional, and Windows Vista systems. At least one user with Administrator privilege is set for each PC. Normally, a user without Administrator privilege cannot install the FOMA communication configuration files. For more information on Administrator privilege, contact the manufacturer of your PC or a representative of Microsoft Corporation.

● APN (Access Point Name)

A character string used for identifying the Internet service provider host or in-house LAN for packet communication. For example, the APN of "mopera U" is "mopera.net".

● cid (Context Identifier)

A registration number available when you save a packet communication host (APN) in the FOMA terminal. You can save up to 10 numbers from one to 10 for the FOMA terminal.

Default cid of the FOMA terminal

Registration number (cid)	Host (APN)
1	mopera.ne.jp (mopera)
2	Undefined
3	mopera.net (mopera U)
4-10	Undefined

● DNS (Domain Name System)

DNS is a system that converts a domain name (example: nttdocomo.co.jp) into an IP address, which is used by a PC.

● IrDA (Infrared Data Association)

IrDA is an organization that establishes infrared communication-related standards.

● IrMC (Ir Mobile Communication)

Standards established for the purpose of data transfer between mobile phones and between PDAs (personal digital assistant). You can exchange phone numbers and schedule data between mobile phones or PDAs equipped with an IrMC-compliant infrared data port.

● OBEX (Object Exchange)

OBEX is one of the global standards for data communication. You can exchange data between OBEX-compliant mobile phones, PCs, digital cameras, and printers.
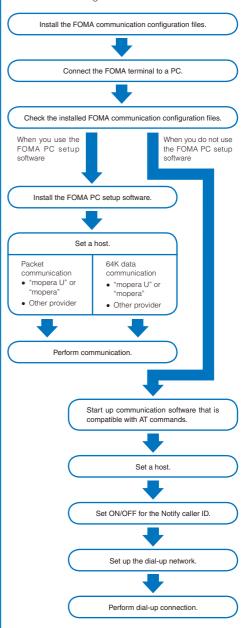

● QoS (Quality of Service)

Service quality technology that enables the user to use a communication line in accordance with requirements. If you are using the FOMA terminal, you can set the communication speed for connection.

● 通信設定最適化 (Optimizing the communication settings)

"通信設定最適化" is a "TCP parameter setting" tool that makes optimal use of TCP/IP transmission capabilities for packet communication on the FOMA network. To make the most of the communication performance of the FOMA terminal, you need to configure the communication settings using this software.

Preparations and Flow of Data Communication

The preparations required for performing packet and 64K data communication by connecting the FOMA terminal to a PC are given below.

Install the FOMA communication configuration files.

Connect the FOMA terminal to a PC.

Check the installed FOMA communication configuration files.

When you use the FOMA PC setup software

When you do not use the FOMA PC setup software

Install the FOMA PC setup software.

Set a host.

Packet communication
● "mopera U" or "mopera"
● Other provider

64K data communication
● "mopera U" or "mopera"
● Other provider

Perform communication.

Start up communication software that is compatible with AT commands.

Set a host.

Set ON/OFF for the Notify caller ID.

Set up the dial-up network.

Perform dial-up connection.

AT Commands

AT commands are the commands (instructions) that are executed on a PC for setting and changing the functions of the FOMA terminal.

For more information on the AT commands, see the "Manual for PC connection setting" (PDF format) included in the supplied CD-ROM.

About the Supplied CD-ROM

The supplied CD-ROM contains the software required for data communication using the FOMA terminal and the "Manual for PC connection setting"/"Kuten Code List" operation instructions (PDF format). For details, see the supplied CD-ROM.

<Software/PDF>
◆ FOMA communication configuration files
◆ FOMA PC setup software
◆ FOMA byte counter
◆ General information about DoCoMo keitai datalink
◆ FirstPass PC software
◆ General information about mopera U (mopera U start up tool/mopera U connection & setting tool/mopera U requesting original data/FOMA byte counter)
◆ General information about Napster®
◆ General information about mora
◆ "Manual for PC connection setting" in PDF format
◆ "Kuten Code List" in PDF format
◆ Adobe® Reader®
◆ Declaration of Conformity (DoC)

● When you set the supplied CD-ROM in the PC, a warning window as shown below may appear. This warning window appears because of the security setting on the Internet Explorer, however, causing no problem for use. Click [はい].

※ The window example assumes that Windows XP is used as an operating system. The actual window that appears may differ depending on your PC environment.

Introduction of DoCoMo keitai datalink

"DoCoMo keitai datalink" software is used to make backup files of the Phonebook and mail, etc. to a PC from your FOMA terminal and edit the data on the PC. This software is provided on the DoCoMo's website. For more information about this software and how to download this software, see the following website. You can also access the following website from the supplied CD-ROM. (Japanese only)

http://datalink.nttdocomo.co.jp/

For more details about the downloading method, data that can be transferred, supporting OS, operating environment, installation method, operation method, and restrictions, see the above website.

For the operation procedure after installing the software, see the Help of the software.

A FOMA USB Cable (optional) is required to use the DoCoMo keitai datalink software.

Overseas Use

Overview of International Roaming (WORLD WING)

The international roaming (WORLD WING) is a service that enables you to use the same phone number and mail address as used in Japan to have phone conversations or communicate using the networks of overseas carriers even if you are abroad.

For more information on available communication services while the international roaming service is used, see the "Mobile Phone User's Guide【International services】". Also, at the DoCoMo's "International service website", you can check the latest information of international services as well as download the latest "Mobile Phone User's Guide【International services】".

http://www.nttdocomo.co.jp/service/world/

● The FOMA terminal works in a 3G Roaming Area and GSM/GPRS service area.
● The FOMA terminal is set to automatically change a network at the time of purchase (P.368).

Subscribing to WORLD WING

● If you subscribed to the FOMA services after September 1, 2005, you already have "WORLD WING" and no application is required. If you declined to use "WORLD WING" when you subscribed to the FOMA services or canceled the "WORLD WING" service halfway, you need to make a separate application.
● If you subscribed to the FOMA services before August 31, 2005 and have not yet made an application to "WORLD WING", you need to make an application.
● This service is not available in some service charge plans.

■ Country codes for major countries

When you use an international call or set to the Int'l dial assist, use the following country codes (as of October 2007).

Area	Country code	Area	Country code
Australia	61	Malaysia	60
Austria	43	Maldives	960
Belgium	32	Netherlands	31
Brazil	55	New Caledonia	687
Canada	1	New Zealand	64
China	86	Norway	47
Czech Republic	420	Peru	51
Egypt	20	Philippines	63
Fiji	679	Russia	7
Finland	358	Singapore	65
France	33	Spain	34
Germany	49	Sweden	46
Greece	30	Switzerland	41
Hong Kong	852	Tahiti (French Polynesia)	689
Hungary	36		
India	91	Taiwan	886
Indonesia	62	Thailand	66
Italy	39	Turkey	90
Japan	81	United Kingdom	44
Korea	82	USA	1
Macau	853	Vietnam	84

● For other country codes and details, see the DoCoMo's "International service website".

Services Available Overseas

Communication services that you can use overseas are described in the following table.

● Some of the communication services may not be available depending on the carrier or network to which you connect. For the communication services that can be used during international roaming, see DoCoMo's "International service website".

Communication service	3G	GSM	GPRS
Voice call※1 You can use the same mobile phone number as used in Japan even from an overseas location to place international calls to Japan and other countries as well as ordinary calls in your country of stay.	○	○	○
Videophone call※1 You can place international videophone calls to specific 3G carrier users overseas and to FOMA users.	○	×	×
i-mode You can use i-mode even from an overseas location.	○	×	○
i-mode mail You can use the same mail address as used in Japan even overseas and send/receive i-mode mail.	○	×	○
SMS※2 You can use the same mobile phone number as used in Japan even from an overseas location to send/receive SMS messages.	○	○	○
i-Channel※3	○	○	○
Data communication (Packet communication)※4	○	×	○

※1 When 2in1 is used, you cannot place a call from Number B.
※2 You can send and receive SMS to/from a user who uses the FOMA terminal in Japan and overseas and a user who is using an overseas carrier, even if you are using the international roaming service.
  ● When you send SMS to the recipient who uses an overseas carrier, enter "+" and the recipient's country code before entering the phone number of the recipient as his address. Make sure to omit the first "0" when you enter the phone number, if it starts with "0".
  ● If you include characters in your SMS message that are not supported by the recipient's terminal, those characters may not be displayed correctly when you send this SMS message to a recipient who is using an overseas carrier. For details, see the "Mobile Phone User's Guide【International services】" and "Mobile Phone User's Guide【Network services】".
※3 Auto update is automatically and temporarily canceled when you connect to an overseas carrier. To restart the Auto update of i-Channel overseas, you need to perform the i-Channel setting again. Note that there is a communication charge every time you receive i-Channel while you are overseas (domestic free-of-charge communication is not applicable overseas).
※4 64K data communication to be performed by connecting to a PC is not available overseas. When you originate the packet communication, use the IP connection to communicate (the PPP connection cannot originate the packet communication).

● The GPS function is not available overseas. Also, if you access to the site for performing settings to use the GPS service, the display informing an error appears but packet communication charge is required.

Overseas Use

Before Using the FOMA Terminal Overseas

You must check the following items before departure, during your stay overseas, and after returning to Japan.

- The overseas communication charge is included in your monthly charge. In some cases, however, the overseas communication charge is included in the charge of the following month depending on the system used by the carriers in the country of your stay. Also note that in some cases the charge is not included in the relevant month even if you use the FOMA terminal overseas during the same billing target period.

Checks before Departure

To use the FOMA terminal overseas, please check the following items in Japan.

- When you use the network services from an overseas location, set the Remote Control to "Activate" before leaving Japan (P.350).

■ About charging the battery
About charging the battery, see the followings.
- Precautions on handling the AC adapter (P.19)
- How to charge with the AC adapter (P.39, 40)

■ About i-mode
To view sites using i-mode overseas, perform "海外利用設定" (the settings for using i-mode overseas) accessible from i Menu.
- For details, see the "Mobile Phone User's Guide【i-mode】FOMA version".

■ About setting the network services
When you are subscribing to the network services, you can perform the network service setting/cancellation from overseas, except for some functions.

- You may not be able even to use the network services that you are supposed to be able to set/cancel, depending on the overseas carrier you use. Also, some of the network services can be performed only in Japan.
  To use the network services overseas, see the "Mobile Phone User's Guide【International services】" and "Mobile Phone User's Guide【Network services】" before departure.

Menu name	Description
Voice Mail (P.346)	You may not be able to set the services in some service areas.
Call Waiting (P.347)	
Call Forwarding (P.347)	
Bar Nuisance Calls (P.348)	
Notify Caller ID (P.44)	You may not be able to set the service in some service areas. Also, a caller ID may not be notified correctly in some cases.
Caller ID Request (P.348)	You may not be able to set the service in some service areas.
Dual Network (P.349)	You cannot set this service.
English Guidance (P.349)	You may not be able to set the service in some service areas.
Multi Number (P.350)	You may not be able to set the service in some service areas. Note also that you cannot place a call from your additional number. You can receive an incoming call to your additional number, but you may not be able to identify the number being used for receiving the call.
2in1 (P.352)	You cannot place a call from Number B.
Chaku-moji (P.55)	You can set the service, but you cannot use it.
Roaming Guidance (P.370)	You may not be able to set the service in some service areas.
Bar Incoming call (P.370)	You may not be able to set the service in some service areas.
Public mode (Drive mode) (P.66)	You can set the service, but you cannot use it. Cancel the setting overseas.

Checks in the Location of Stay

The FOMA terminal works in a 3G Roaming Area and GSM/GPRS service area.
The FOMA terminal is set by default to automatically search the network and connect to the local carrier when you power it on in an overseas location.

About inquiries

For inquiries about loss, theft, the charge settlement, and repairs overseas, see "For Loss, Theft, and Charge Settlement for Overseas" or "About Troubles and Repairs for Services Overseas" on the backcover of this manual. Note that you are still liable for the call and communication charge incurred after the loss or theft occurred.

● For the latest information on the international access number and international prefix number for the universal number, see the DoCoMo's "International service website".

■ International access number for major countries (Table1)

The international access number for major countries is as follows (as of August 2007).

Area	Number	Area	Number
Australia	0011	Malaysia	00
Belgium	00	Monaco	00
Brazil	0041/0014	Netherlands	00
Canada	011	New Zealand	00
China	00	Norway	00
Czech Republic	00	Philippines	00
Denmark	00	Poland	00
Finland	00	Portugal	00
France	00	Russia	810
Germany	00	Singapore	001
Greece	00	Spain	00
Hong Kong	001	Sweden	00
Hungary	00	Switzerland	00
India	00	Taiwan	002
Indonesia	001	Thailand	001
Ireland	00	Turkey	00
Italy	00	United Arab Emirates	00
Korea	001	United Kingdom	00
Luxembourg	00	USA	011
Macau	00	Vietnam	00

■ International prefix number for the universal number (Table2)

The international prefix number for the universal number of each country is as follows (as of August 2007).

Area	Number	Area	Number
Argentina	00	Korea	001
Australia	0011	Luxembourg	00
Austria	00	Malaysia	00
Belgium	00	Netherlands	00
Brazil	0021	New Zealand	00
Bulgaria	00	Norway	00
Canada	011	Peru	00
China	00	Philippines	00
Colombia	009	Portugal	00
Denmark	00	Singapore	001
Finland	990	South Africa	09
France	00	Spain	00
Germany	00	Sweden	00
Hong Kong	001	Switzerland	00
Hungary	00	Taiwan	00
Ireland	00	Thailand	001
Israel	014	United Kingdom	00
Italy	00	USA	011

● Some of them may not be used.
● The universal number is available only for countries listed on the table above.
● When you place a call from a hotel, the hotel may charge the phone call (it is liable for you to pay). Before placing a call, make sure to check with the hotel.
● Please note that, in many cases, the universal number may not be available when you place a call from a mobile phone, public phone, hotel, or other places.

Display to Be Shown Overseas

While you use the FOMA terminal overseas, the name of the connected network carrier appears in the stand-by display.

- You can also set the FOMA terminal not to display the name of the carrier (P.370).
- To display the current date/time of the location of stay on the main clock and additionally to display the sub-clock, set the Auto time adjust to [ON] (P.43). However, the time may not be corrected in some networks overseas.

Connected network
Carrier name
Main clock
- Display the current date/time of the location of stay.
Sub-clock
- Display the current date/time of Japan.

- The following icons show the current network connection.

Icon	Network you can use
3G (Blue)	3G network (supported packet communication)
3G (Red)	3G network (not supported packet communication)
(GSM)	GSM network
(GPRS)	GPRS network

Checks after Returning to Japan

When you power on the FOMA terminal after returning to Japan, it is set by default to automatically search the network and connect to the FOMA network (NTT DoCoMo, Inc).

- If the Network search mode is set to [Manual], manually switch to the FOMA network (NTT DoCoMo, Inc) or change the setting to [Auto].
- You need to set to [Auto] or [3G] at the 3G/GSM setting.

Placing a Call from Your Overseas Location

You can use the international roaming service and place a call from an overseas location.

Placing a Call to Another Country (Including Japan) from Your Overseas Location

You can place a call to Japan or another country from your country of stay.

- You can easily place an international call if you save the country codes of frequently dialed countries using the Country code of the Int'l dial assist setting (P.60).

1 Press "+" (press [0] for over a second) in the stand-by display. Enter a country code, area code, and a recipient's phone number, in that order.

- If an area code begins with "0", omit the "0" when dialing (excepting when calling ordinary phones, etc. in Italy).
- To place an international call to Japan, enter the country code "81".

To place a call to a country saved using the Country code
Enter a phone number in the stand-by display, press [✉] (Option), select [Call method] → [Voice call]/[Videophone] → [Country code] → a country code, and press [📷] (Call).

To place a call to a recipient saved in the Phonebook
Select a recipient form the Phonebook and press [📞]. To place a videophone call, select a recipient, press [≡], and press [ch] (V.phone). The first digit of the phone number "0" is converted into a country code automatically added by the Int'l dial assist before the call is dialed.

To place a call from the Redial/Received record
Select a recipient from the Redial/Received record and press [📞] or [ch] (V.phone).

2 Press [📞].

The international call is dialed.

To place a videophone call
Press [ch] (V.phone).

Placing a Local Call in Your Overseas Location

You can place calls in your country of stay in the same way you do in Japan.

1 Enter a phone number in the stand-by display.

Make sure to include the area code, even for a local call.
If a recipient uses "WORLD WING", place a call to the recipient as an international call to Japan.

2 Press [📞].

The call is dialed.

To place a videophone call
Press [ch] (V.phone).

● If both you and the recipient of your videophone call are using a carrier that supports FOMA videophone calls, you can perform an international videophone call by first using the international call dialing method and then placing a videophone call.
　※ For information about countries and carriers you can connect to, see DoCoMo's "International service website".
　※ The videophone image displayed on the FOMA terminal may be distorted or the videophone call may not be connected depending on the terminal being used by the other party for the international videophone call.

Placing a Call to a WORLD WING Overseas User

If the recipient is a "WORLD WING" overseas user, enter the country code "81" and place the call as an international call to Japan regardless of the current location at home and abroad.

Receiving a Call

You can receive a call using the international roaming service when you are overseas.

1 When receiving a call, press 📞.

You can talk to a caller.

When you receive a videophone call
Press 📞 or 📱 (V.phone). To answer a call with a substitute image, press ▤ (Sub).

● If you receive a call during international roaming, the call is forwarded to the country of your stay from Japan. There is a communication charge to the caller for the call to Japan and an international call forwarding charge to the recipient.

Procedure for a Caller Who Wants to Call You

■ **When the caller places a call from Japan**
Ask the caller to dial only your phone number in the same manner as it is done in Japan.

> 090–XXXX–XXXX
> or
> 080–XXXX–XXXX

■ **When the caller places a call from countries other than Japan**
Ask the caller to dial the international access number and country code of Japan "81" and then your phone number without the first "0" and place the call as an international call to Japan regardless of your country of stay.

> International access number–81–90–XXXX–XXXX
> or
> International access number–81–80–XXXX–XXXX

Setting the Network to be Used

<3G/GSM setting>

You can set a communication method to be supported in an area or by a carrier you use.
● The default setting is set to [Auto].

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [3G/GSM setting] and press ▤.

```
3G/GSM setting

    Auto
    3G
    GSM/GPRS
```

[Auto]:
  Search all networks that can be connected to.
[3G]:
  Search only 3G-compatible networks.
[GSM/GPRS]:
  Search only GSM- or GPRS-compatible networks.

2 Select [Auto]/[3G]/[GSM/GPRS] → [Yes] and press ▤.

The network communication method is set.

● When the 3G/GSM setting is set to [Auto] and the Network search mode is set to [Auto], if you search a carrier that supports both the 3G and GSM/GPRS networks, the terminal is automatically connected to the 3G network.
● In Japan or 3G network compatible areas, it is recommended to set the 3G/GSM setting to [3G] to suppress the consumption of the battery.
● Even if you are in the GSM network, you cannot perform the packet communication if the network does not support GPRS.

Setting the Carrier Search Method <Network search mode>

You can set whether to search the network automatically and connect to another carrier when the network currently used falls outside of the service area.

Example: Changing a carrier for manual connection

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Network search mode] and press ▭.

```
Network search mode
Auto
Manual
Network re-search
PLMN setting
```

[Auto]:
　　Automatically connect to another carrier.
[Manual]:
　　Manually select a carrier.
[Network re-search]:
　　Search the carrier to be connected again.
[PLMN setting]:
　　Set a carrier with the higher-priority for connection (P.369).

2 Select [Manual] and press ▭.

The menu for selecting a network appears.

3 Select a carrier and press ▭.

The carrier to be connected is changed.

- ● You may not be able to set this function depending on the radio wave condition or network restrictions.
- ● As of October 2007, you cannot select a carrier other than NTT DoCoMo in Japan.
- ● If " " appears in the display after you return to Japan, check if the Network search mode is set to [Auto].

Setting the Higher-priority Carrier for Connection <PLMN setting>

You can set a priority for the carriers to be automatically connected when the Network search mode is set to [Auto]. You can save a priority setting for up to 20 carriers.

Example: Saving a carrier from the carrier list

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Network search mode] and press ▭.

The Network search mode display appears.

2 Select [PLMN setting] and press ▭.

The PLMN setting display appears.

3 Select [Unregistered] and press ▨ (Func).

The Function menu appears.

Entering a carrier manually
　　From the Function menu, select [PLMN manual sel.], enter a country code (MCC) and network number (MNC), press ▣ (Complete), and select a network communication method → [Yes].
To save the carrier being connected
　　From the Function menu, select [VPLMN to PLMN] → [Yes].
To change the priority
　　From the Function menu, select [Change priority] → a carrier → a desired position, press ▣ (Complete), and select [Yes].
To display detailed information
　　Move the cursor to the carrier and from the Function menu, select [Detail info].
To delete a carrier
　　Move the cursor to the carrier and from the Function menu, select [Delete] → [Delete one] → [Yes]. To delete all carriers, from the Function menu, select [Delete] → [Delete all], enter the Security code, and select [Yes].

4 Select [Select from List] and press ▭.

The PLMN slct from List display appears.

To search for a carrier by country name
　　Press ▣ (Search) and select a country name.

5 Select a carrier and press ▭.

The screen for selecting 3G/GSM appears.
[3G/GSM/GPRS]:
　　Set as the 3G and GSM/GPRS compatible carrier.
[3G]:
　　Set as the 3G compatible carrier.
[GSM/GPRS]:
　　Set as the GSM/GPRS compatible carrier.

6 Select a network communication method → [Yes] and press ▭.

A carrier with the higher-priority for connection is set.

Overseas Use

369

Setting the Display for International Roaming <Operator name display>

You can set whether to display the name of the connected carrier in the stand-by display while you are using the international roaming service.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Operator name display] and press ▭.

The display of the Operator name display appears.

2 Select [Display on]/[Display off] and press ▭.

The carrier name display is set.

● Even if you set the Operator name display to [Display on], the carrier name is not displayed when you are using the "DoCoMo" network or you are outside of the service area.

Checking the Communication Status <Check service area>

You can check the available network services in your overseas location.

1 From the Menu, select [Settings] → [Management] → [Check serv. area] and press ▭.

The available network services appear.

Starting the Roaming Guidance Service <Roaming Guidance>

If you receive a call during international roaming, you can inform a caller that you are using the international roaming service by playing back the guidance.

● The guidance may be played back in a foreign language depending on the conditions of the overseas carrier.
● You need to set the service in Japan.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Roaming Guidance] and press ▭.

The Roaming Guidance display appears.

To cancel the roaming guidance
　Select [Deactivate] → [Yes]. A caller hears the ring tone set by the overseas carrier.

To check the setting
　Select [Request Status] → [Yes].

2 Select [Activate] → [Yes] and press ▭.

The roaming guidance service is activated.

Rejecting an Incoming Call during Roaming <Bar Incoming call>

You can set whether to reject incoming calls during roaming. You can select whether to reject either all incoming calls or only incoming videophone calls.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Bar Incoming call] and press ▭.

The Bar Incoming call display appears.

To cancel the Bar Incoming call service
　Select [Deactivate barring], enter the network security code, and select [Yes].

To check the setting
　Select [Request Status].

2 Select [Activate barring] and press ▭.

The Activate barring display appears.

[Bar all incm call]:
　Reject all incoming calls.

[Bar. V.phone/64K]※:
　Reject incoming videophone calls.

※ 64K data communication cannot be used overseas.

3 Select the type of call to be rejected and press ▭.

The network security code screen appears.

4 Enter a network security code.

5 Select [Yes] and press ▭.

The Bar Incoming call is activated.

● You may not be able to set it depending on the overseas carrier you use.

Using the Network Services during Roaming <Oversea service>

You can use network services such as the Voice Mail and Call Forwarding Services from an overseas location.

- To use the network services overseas, set the Remote Control to "Activate" (P.350).
- An international call charge applies in the country where you use the service when you operate the FOMA terminal overseas.

Operating the Voice Mail Service from Your Overseas Location

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Voice Mail(Int.)] and press ▤.

2 Set each item.

Menu item	Operation
Activate	Select [Activate] → [Yes] → Operate as instructed by the guidance.
Deactivate	Select [Deactivate] → [Yes] → Operate as instructed by the guidance.
Play messages	Select [Play messages] → [Yes] → Operate as instructed by the guidance.
Voice Mail setting	Select [Voice Mail setting] → [Yes] → Operate as instructed by the guidance.
Set ring time	Select [Set ring time] → [Yes] → Operate as instructed by the guidance.

Operating the Call Forwarding Service from Your Overseas Location

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Call FWD(Int.)] and press ▤.

2 Set each item.

Menu item	Operation
Activate	Select [Activate] → [Yes] → Operate as instructed by the guidance.
Deactivate	Select [Deactivate] → [Yes] → Operate as instructed by the guidance.
Call FWD settings	Select [Call FWD settings] → [Yes] → Operate as instructed by the guidance.

Operating the Roaming Guidance Service from Your Overseas Location

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Roaming guide(Int.)] → [Yes] and press ▤.

Perform the setting as instructed by the guidance after this process.

Setting the Remote Control from Your Overseas Location

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Remote access(Int.)] → [Yes] and press ▤.

Perform the setting as instructed by the guidance after this process.

Operating the Caller ID Display Request Service from Your Overseas Location

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Caller ID req(Int.)] → [Yes] and press ▤.

Perform the setting as instructed by the guidance after this process.

Appendix/External Devices/Troubleshooting

List of Menus

● You can press a key on the keypad of the number or symbol next to some menu names listed below in the menu display to execute the associated function.

■Standard menu

○: The default setting/s is/are restored.　　●: Items deleted

0	わをんゎ□、 。ー・！？	ワヲンヮ□、。 ー・！？「」	□！？－，'；（） "＿～�637＆¥０	0
＊	、。ー・゛゜！？	゛゜、。ー・！？「」	！？－，'；（）" ＿～�637＆¥	＊
＃	Display character assignments in the reverse order (before acceptance of characters)/Line feed (after acceptance of characters)			＃
◄	Move cursor left			
►	Move cursor right/Insert half-width space (blank) (only when there is no character after the cursor)			

※ If you press a key for over a second, the assigned characters are switched one after another.

- □ indicates a space (blank). A space (blank) is provided in two sizes: a full-width and half-width sizes and counted as one full-width or half-width character.
- Characters marked with ▮ appear in the full-width character mode only.
- Blue colored characters appear in the half-width character mode only.
- Every time you press a key, the character changes to the next one that is assigned to that key. If you press and hold the key, the characters change continuously.
- Press ＃ after finalizing a character to start a new line. "↵" appears to indicate it. A new line is counted as a full-width character.
- Press ＊ before finalizing a character to insert a voice or semivoice sound symbol. Press 📞 to change its case from upper to lower case or vice versa. Press ＃ to change the character assigned to a key in the reverse order.
- In the Alphabetic mode, the case attribute of the character entered last or converted by pressing 📞 is inherited to the next character.

Special Symbols

- Symbols marked with ■ may not be displayed correctly when sending to i-mode non-compatible mobile phones or PCs.

■Full-width symbols

■Half-width symbols

Pictographs

- Pictographs may not be displayed correctly when sending to i-mode non-compatible mobile phones or PCs.
- Some pictographs may not be displayed correctly depending on the type of recipient's i-mode compatible mobile phone.
- For SMS, pictographs other than "♥", "♥", or "📞" are replaced with a half-width space (blank).

■Pictographs

Emoticons

When you enter the following words in the kanji/hiragana mode, emoticons are entered.

- Some of the following emoticons may be different from those actually displayed.
- Emoticons may be displayed in the ImgSym tab rather than in the Pre. tab.

※1　If you subscribe to the Call Waiting Service, you can place a call to another recipient while you already have a call in progress.

※2　If you subscribe to the Call Waiting Service, you can receive another call while you already have a call in progress. If you do not yet subscribe to the Call Waiting Service, you can receive another call after you disconnect the first call.

※3　You can place a voice or videophone call or originate a PushTalk call after disconnecting the current communication.

※4　The FOMA terminal does not perform the receiving operation and a received call is saved in the Received record as a missed call.

※5　If you do not yet subscribe to the Voice Mail Service, Call Waiting Service, or Call Forwarding Service, a received call is not saved in the Received record.

※6　In either of the following cases, the FOMA terminal notifies you of an incoming voice call and you can select either to "answer a voice call" or to "continue with PushTalk call". (The one that was not selected is terminated.)
- When the P-Talk arrival act is set to [Answer]
- When the P-Talk arrival act is set to [Voice Mail] or [Call Forwarding] and you do not subscribe to these services

※7　If you originate a PushTalk call, you can place another call to add a member.

※8　The FOMA terminal performs the operation set by the V.ph while packet.
- When the V.ph while packet is set to [Prefer packet] or when the V.ph while packet is set to [V.ph voicemail] or [Call forwarding] and you do not subscribe to these services, the packet communication is continued.
- When the V.ph while packet is set to [Prefer V.phone], packet communication is disconnected and you can receive a videophone call.

※9　The FOMA terminal performs the operation set by the i-mode arrival act.
- When set to [Prefer i-mode], i-mode communication is continued.
- When set to [Prefer PushTalk], i-mode communication is disconnected and you can receive a PushTalk call.

※10　While you are performing i-mode communication using i-αppli, you can send data after disconnecting the i-mode communication in progress.

※11　A combination of the same communication direction, either sending or receiving, is not available.

※12　When you set the Host selection to [i-mode(UIM)], "▶" appears.

※13　After the current communication is terminated, the Full Browser communication is started.

※14　When switching from i-mode to Full Browser, after the i-mode communication is terminated, the Full Browser communication is started.

※15　You can only enter a phone number directly in the stand-by display.

Multitask Combinations

The table below indicates whether another function is available for each function in the menu.

- The FOMA terminal may not operate as indicated in the table below depending on the status of each function.
- Some functions may pause temporarily when they are not displayed in the main display even if already activated.

Services Available on the FOMA Terminal

Service	Phone number
Number guide service (paid: service charge + call charge) (Phone numbers of customers who declined to disclose their number information cannot be guided.)	(no area code) 104
Telegram service (paid: telegram fee)	(no area code) 115
Time (paid)	(no area code) 117
Weather (paid)	Area code of the area you want to hear the weather forecast for + 177
Emergency call to Police	(no area code) 110
Emergency call to Fire/Ambulance	(no area code) 119
Emergency call to Maritime rescue	(no area code) 118
Disaster Message Board Service (paid)	(no area code) 171
Collect Call (paid: service charge + call charge)	(no area code) 106

● When placing a Collect Call through 106, the recipient pays for the call charge and a handling fee of 90 yen (94.5 yen including tax) per call (as of October 2007).

● When calling the Directory Assistance at 104, you are required to pay a service charge of 100 yen (105 yen including tax) besides the call charge (as of October 2007). Note that Operator Services are free to the people with impairment in the vision or upper limbs. For more details, contact 116 (NTT Sales Office) from an ordinary phone.

● If you have an ordinary phone with subscription to the Call Forwarding Service and you designate your mobile phone number to forward your calls to, the caller may hear a ringing sound even if the mobile phone is busy, outside of the service area, in the Self mode, or powered off, etc. depending on the settings of the ordinary phone/mobile phone.

● Note that 116 (NTT Sales Office), Dial Q2, Message Dial, Credit calls cannot be called from the FOMA terminal (note that Automatic Credit Calls may be used when calling from ordinary phones to the FOMA terminal).

● This FOMA terminal supports "Emergency call location information".

If you use the FOMA terminal to place a call to emergency numbers such as 110, 119, or 118, the information of a location where you are calling from (location information) is automatically notified to the Emergency call acceptance organization such as the Police Station. The Emergency call acceptance organization may not be able to figure out your exact location depending on the location where you place a call or radio wave condition. If you notify your current location information, the name of the notified Emergency call acceptance organization appears in the stand-by display.

If you place a call without the caller ID, such as by entering a phone number with "184" for each call, the location information and phone number are not notified. However, the Emergency call acceptance organization may decide to obtain the location information and phone number regardless of your settings when they consider it is necessary for lifesaving, etc.

Note that the areas/time for which the "Emergency call location information" is ready to be used vary depending on the preparatory state of each Emergency call acceptance organization.

● When you call the Police (110), Fire/Ambulance (119), or Maritime rescue (118) from the FOMA terminal, clearly indicate that you are calling from a mobile phone, then give your present location and mobile phone number, since the Police or Fire/Ambulance may have to get in contact with you. Also, make a point to call in a stationary position to prevent the call from being dropped. Do not power off the FOMA terminal for at least 10 minutes after the emergency call just in case the Police or Fire/Ambulance may have to get in contact with you.

● Note that you may not connect to the local Fire Department or Police Station depending on where you are calling from. In this case, try to call from a public phone or an ordinary phone in the neighborhood.

Optional and Related Devices

A variety of commercially available optional devices allows you to expand the FOMA terminal's capabilities by supporting a wide range of applications, including personal and business uses. Some accessories are only available in some areas. For details, please contact our service counter (DoCoMo shop, etc.). For details on optional devices, see the user's manual of each device.

- Battery Pack SO02
- Back Cover SO08
- FOMA AC Adapter 01/02 ※1
- FOMA DC Adapter 01/02
- FOMA Portable Charging Adapter 01
- FOMA AC Adapter 01 for Global use ※2
- FOMA Dry Battery Adapter 01
- Desktop Holder SO07
- In-Car Holder 01
- Carry Case S 01
- In-Car Hands-Free Kit 01 ※3
- FOMA In-Car Hands-Free Cable 01
- FOMA USB Cable with Charge Function 01 ※4
- FOMA USB Cable ※4
- FOMA Indoor Booster Antenna ※5
- FOMA Indoor Booster Antenna (Stand Type) ※5
- Flat-plug Earphone/Microphone with Switch P01/02
- Flat-plug Stereo Earphone Set P01
- Earphone/Microphone with Switch P001/002 ※6
- Stereo Earphone Set P001 ※6
- Earphone Terminal P001 ※6
- Earphone Plug Adapter P001
- Bone conduction microphone/receiver

※1 For information on charging the AC adapter, see P.39 and P.40.
※2 For use overseas, a plug adapter that fits the electrical outlets in the country you stay is needed.
※3 FOMA In-Car Hands-Free Cable 01 is required to connect to FOMA SO905i using USB or charge FOMA SO905i.
※4 If you use USB HUB, it may not work properly.
※5 Use it only in Japan.
※6 The Earphone Plug Adapter is required.

Introduction of Movie Player Software

To play back a movie (MP4 format file) on a PC, you need QuickTime Player (free) ver. 6.4 or later (or ver. 6.3+3GPP) from Apple Computer, Inc.
You can download QuickTime from the following website.

　　http://www.apple.com/jp/quicktime/download/

● To download this software, you need a PC connected to the Internet. A separate communication charge is also required for downloading.
● Check the above website for details about the operating environment, downloading method, operation method, and other information.

Troubleshooting

First, check if the software update is necessary for the FOMA terminal. If necessary, perform the software update (P.402).

Trouble	Cause and Remedy
Cannot power on the FOMA terminal. (The FOMA terminal cannot be used.)	● Check if the battery pack is attached properly (P.38). ● Check if the battery pack is not run out (P.41).
The warning tone sounds and does not stop even when you press the Power key, and the FOMA terminal is powered off.	● The battery is running out. Charge the battery (P.40).
The busy tone sounds and the call is not connected, even if you dial up.	● Check if "▓▓" appears (P.30). ● Check if you enter the area code (P.49). ● Check if you dial up in a hurry without hearing the ringing tone (P.49).
"▓▓" is displayed and the busy tone sounds.	● Check if you are outside of the service area or in a location with weak radio wave condition (P.30).
Cannot place a call even if you press the keypad.	● Check if the Self mode is set (P.128). ● Check if the Key dial lock is set (P.130).
The dark display appears and cannot operate anything.	● Check if the FOMA terminal is powered on (P.42).
The set stand-by display does not appear and the dark display appears.	● Check if the Power saver mode is set (P.114).
Text is displayed in Japanese.	● Check if the Select language is set to [Japanese] (P.120).
Cannot receive a call or the ring tone does not sound.	● Check if the Public mode (Drive mode) is set (P.66). ● Check if the Ring volume is set to [OFF] (P.103). ● Check if the Manner mode is set (P.108). ● Check if the Self mode is set (P.128). ● Check if the Accept/Reject call is set (P.133). ● Check if the Denied no ID is set (P.134). ● Check if the Set ring start time is set (P.134). ● Check if the Reject unknown is set (P.135). ● Check if the ring time of the Voice Mail/Call Forwarding Service is set to 0 seconds (P.346, 347). ● Check if the Caller ID Request is set (P.348). ● Check if the Mova terminal is enabled for the Dual Network Service (P.349).
The mail and alarm tones sound but the ring tone for an incoming call does not sound.	● Check if the Ring volume is set to [OFF] (P.103). ● Check if a longer interval (such as 99 sec) is set at [Start time] of the Set ring start time. Set it to a shorter interval (P.134).
The mail tone sounds but there is no incoming mail.	● Check if the Tone/Vibrate notice of the Voice Mail Service is set to [ON]. If it is ON, you are notified of the increase in the number of record messages by the mail tone (P.346).

Trouble	Cause and Remedy
Cannot use the Music Touch Key or Viewing Touch Key.	• Check if the Key is locked (P.130). • Check if the Key is available to the function (P.26).

An image other than that you set is displayed for an incoming call.	• If multiple images are set for the incoming image for voice/videophone call, the image is displayed in the following order of priority (P.92, 95, 102).
	  1. Des call display set in the Phonebook
	  2. Des call display set in the Group setting
	  3. Incoming image set in the Incoming set
	When an i-motion or Chaku-Uta Full® is set for the ring tone or an i-motion is set for the incoming image, however, the order of priority may vary.

A ring tone other than that you set sounds for an incoming call.	• If multiple ring tones are set for voice/videophone call, the ring tone sounds in the following order of priority (P.92, 95, 103, 351, 353).
	  1. Ring tone set in the Number Setting (when a call is placed to an Additional No. for the Multi Number)
	  2. Des phone tone set in the Phonebook
	  3. Des phone tone set in the Group setting
	  4. Ring tone of the Ringtone for Number B of 2in1
	  5. Ring tone set in the Incoming set
	When an i-motion or Chaku-Uta Full® is set for the ring tone or an i-motion is set for the incoming image, however, the order of priority may vary.

A ring tone other than that you set sounds for an incoming mail.	• If multiple ring tones are set for mail, the ring tone sounds in the following order of priority (P.92, 95, 103).
	  1. Des mail tone set in the Phonebook
	  2. Des mail tone set in the Group setting
	  3. Ring tone set in the Incoming set
	When an i-motion or Chaku-Uta Full® is set for the ring tone, however, the order of priority may vary.

The incoming indicator in the color other than that you set lights for an incoming call or mail.	• If multiple incoming indicators are set for voice call/videophone call/mail, the incoming indicator flashes in the following order of priority (P.92, 95, 103).
	  1. Select phone/mail Illum. set in the Phonebook
	  2. Select phone/mail Illum. set in the Group setting
	  3. Indicator color set in the Incoming set

The incoming indicator flashes in certain cycle.	• Check if the Missed call is set to [ON] (P.118).
The charge indicator stays lit.	• Check if [Charging] of the Backlight always on is set to [ON] (P.113). In this setting, it may take time to complete charging, but this is not a malfunction. • Check if you use a function such as the videophone, data communication, and i-αppli while charging the battery. In this case, it may take time to complete charging, but this is not a malfunction.
The keypad sound is not heard.	• Check if the Keypad sound volume is set to [OFF] (P.104). • Check if the Manner mode is set (P.108).
The display is slow to react on pressing a key.	• This may occur when a large amount of data is stored in the FOMA terminal.
The Total calls cost does not increment.	• It does not increment if the counter reaches the upper limit value (about ¥16,770,000) of total calls cost of UIM. Reset the counter to ¥0 (P.329).
Data communication does not start.	• Check if you use USB HUB. If you use USB HUB, it may not work properly.
Cannot watch One Seg.	• Check if you are outside of the Terrestrial digital TV broadcasting service area or in the places with the weak radio wave condition. • Check if the UIM card is inserted. • Check if the channel is set (P.242).

Error Messages

- In some cases, a 3-digit number may be displayed together with a message. This is a DoCoMo own code that DoCoMo displays on the FOMA terminal.

A

Accessing IC card. Cannot delete
- Failed to delete the software because data in the Osaifu-Keitai-compatible i-αppli IC card is being accessed.

Address is not valid (451)
- Failed to send the mail because of unknown mail address. Enter the correct mail address and send it again.

Announcement time is past
- The time set for the Booking alarm is before the current time. Set the time after the current time (P.247).

Another function is active. Cannot activate this at the same time
- Another function that cannot be run simultaneously by multitasking is active. Quit the function, if it is not being used, and then retry the operation (P.316).

Authentication failed
- Failed in verifying the authentication password. Set the password so that it matches the one of the other device and then retry the operation (P.297, 298, 299, 300).
- The authentication type (one/all) does not match the one set for the other device. Set the same authentication type (one/all) on both party to exchange data using the infrared or iC communication (P.297, 298, 299, 300).

Authentication type is not supported (401)
- Failed to connect to the site or website, etc. because of the unsupported authentication type.

C

Camera function error. Quit the application
- The Camera mode is terminated because of an error occurrence. To continue to use the camera, restart the Camera mode.

Camera function error. Save the data and quit the application
- The Camera mode is terminated after the image is saved because of an error occurrence. To continue to use the camera, restart the Camera mode.

Camera function error. Switch to Substitute image
- The videophone image is switched to the substitute image because of an error occurrence. Switch it again to the camera image (P.48).

Cannot execute because of memory shortage
- Failed to execute the function because of insufficient memory.

Cannot move. Not enough memory
- The remaining memory in the microSD memory card is insufficient. Delete unnecessary data (P.98, 166, 167, 193, 223, 290, 326, 331).

Cannot read. You need to format
- The microSD memory card is not formatted correctly. Format it using the FOMA terminal (P.284).

Cannot support content
- Data that is not supported by the FOMA terminal is contained in the contents.

Cannot switch mode
- Failed to set to the microSD, MTP, or ATRAC mode because of a communication using the FOMA USB Cable with Charge Function 01 (optional) in progress.

Certificate is rejected (tampered)
- There are some problems with the certificate.

Check address
- The SMS address exceeds 21 digits or 186/184 is entered at the beginning of the address. Enter the correct address and send it again (P.202).

Check SMS Center setting
- The incorrect host is set at the SMSC. Restore the host to "DoCoMo", the default setting at the time of purchase (P.203).

Connection failed
- The host number set for the Host selection is incorrect. Restore the host number to "iモード", the default setting at the time of purchase (P.169).
- Failed to connect because of weak radio wave condition. Retry to connect from a place with better radio wave condition.
- Failed to connect to a line due to a network problem. Retry to connect after a while.
- Failed to connect to a line for some reason when placing a videophone call.

Connection failed (403)
- Failed to connect to i-mode for some reason. Retry to connect (P.161).

Connection failed (503)
- Failed to connect to a line due to a network problem. Retry to connect after a while.

Connection failed (562)
- Failed to connect to the i-mode center. Move to a location with better radio wave condition and then retry the operation.

Connection interrupted

- The communication is interrupted because of an error occurrence during data communication.

Content length exceeds maximum size for i-motion

- Failed to retrieve the data because its volume has exceeded the maximum size.

Content length exceeds replayable size for i-motion

- Failed to retrieve the data because its volume has exceeded the maximum size.

Continue using ⑤αppli and transmit data?

- This message appears when the number of times of communication performed while an i-αppli software is used has increased significantly for a certain period of time. To continue using the i-αppli software, select [Yes]. To continue using the i-αppli software after the communication is terminated, select [No]. To quit the i-αppli software, select [Terminate].

Copy-protected program

- Failed to record the One Seg program which you are watching because the copy signal indicates that the program cannot be recorded (P.252).

Copy-protected program. End recording

- End recording the One Seg program because the copy control signal that indicates the program cannot be recorded is detected while recording the One Seg program.

Could not find channel

- Failed to search any broadcast station in the current area.

Could not move

- Failed to move data because of an error occurrence.

Could not save

- Failed to save the image, music data, or i-αppli software.
- Failed to save to the microSD memory card.
- Failed to receive data during the infrared/iC communication or data communication with a PC.
- Failed to save the image or melody scanned by the bar code reader.
- Failed to save the i-motion because the size exceeded 10M bytes. You can set a Chaku-Uta Full® with up to 10M bytes of i-motion for the ring tone/Alarm using [Point].

D

Data in IC-card is full. Unable to display program guide

- Failed to activate the program guide because the Osaifu-Keitai-compatible i-αppli IC card is full of data. Delete the Osaifu-Keitai-compatible i-αppli software and its data from the IC card, and then retry the operation (P.215).

Data in IC card is full. Unable to download. Delete service?

- Failed to download the data because the Osaifu-Keitai-compatible i-αppli IC card is full of data. When you select [Yes], the names of the Osaifu-Keitai services on the card appear. Select a service name and delete its Osaifu-Keitai-compatible i-αppli software and data from the IC card.

Data transmission is frequent. Continue transmission?

- This message appears when the number of times of communication performed while an i-αppli software is used has increased significantly for a certain period of time. To continue using the i-αppli software, select [Yes]. To continue using the i-αppli software after the communication is terminated, select [No]. To quit the i-αppli software, select [Terminate].

Deleted invalid text

- Characters other than digits cannot be accepted for the postal code. They are discarded.

Download failed

- Failed to download because of an error occurrence.

Draft is full. Cannot create

- The number of saved mail has reached 50 or there is not enough memory. Delete unnecessary saved mail (P.193).

E

Error in IC card data. Unable to delete software

- Failed to delete the software because data in the Osaifu-Keitai-compatible i-αppli IC card contains an error.

Error in image. Does not work correctly

- The Flash movie cannot be played back correctly due to some errors in the Flash movie.

Error in the dictionary

- There are some words or phrases that have failed to be saved because of an error in part of the dictionary data (words or phrases that have been saved successfully can be used as dictionary data).

Exceeds max number of simultaneous call

- This message appears when you originate a PushTalk call to more than four members. Reduce the number of members you select to four or less and originate the call again.

F

Final number exists. Cannot shoot

- The microSD memory card contains a file with the maximum number (999-9999), so no more files can be saved in it. Delete the images from the largest file numbers (P.290).

I

ⓘαppli stand-by display terminated due to security error

- The i-αppli stand-by display was canceled since it has attempted an unauthorized operation. Check the security error history (P.216).

ⓘαppli To function is not set

- The i-αppli To is set to [No]. Set the i-αppli To to [Yes] and then retry the operation (P.209).

IC card is locked

- The IC card lock is set. Cancel the IC card lock and then retry the operation (P.226).

Image display setting OFF. Cannot download

- Failed to download the image because the Display img is set to [OFF]. Set the Display img to [ON] and then retry the operation.

i-mode mail service is busy. Please try again later (553)

- The line is extremely congested. Wait for a while and then retry the operation.

Input error (205)

- Incorrect input data. Check the input contents.

Insert UIM

- The UIM is not inserted. Insert the UIM and then retry the operation (P.36).

Invalid data (XXX)

- You tried to connect to the site or website, etc. not supporting i-mode.
- The URL you entered may be invalid.
- Failed to display because of an error in the received data.

Invalid data. Connection cannot be established (400)

- The host number you set for the Host selection is incorrect. Restore the host number to "iモード", the default setting at the time of purchase (P.169).
- Failed to connect to i-mode for some reason. Retry to connect (P.161).

Invalid data. Data size is not supported (413)

- You tried to connect to the site, etc. not supporting i-mode.
- The URL you entered may be invalid.

Invalid UIM, requested software failed to start

- Failed to start the i-αppli software due to the function for restricting UIM operation. Insert the UIM that was used when you retrieved the data or file and then retry the operation (P.36).

Invalid UIM. Delete not possible

- Unable to delete software because the information on a UIM inserted in the FOMA terminal and its corresponding information on the IC card are different. Use the UIM that was inserted in the FOMA terminal when you downloaded and activated the Osaifu-Keitai-compatible i-αppli for the first time.

Invalid UIM. Download failed

- Unable to download software because the information on a UIM inserted in the FOMA terminal and its corresponding information on the IC card are different. Use the UIM that was inserted in the FOMA terminal when you downloaded and activated the Osaifu-Keitai-compatible i-αppli for the first time.

Invalid UIM. Requested service not available

- Failed to perform the operation due to the function for restricting UIM operation. Insert the UIM that was used when you retrieved the data or file and then retry the operation (P.36).

Invalid UIM. Start failed

- Unable to start software because the information on a UIM inserted in the FOMA terminal and its corresponding information on the IC card are different. Use the UIM that was inserted in the FOMA terminal when you downloaded and activated the Osaifu-Keitai-compatible i-αppli for the first time.

Invalid URL

- When you entered a URL, you did not enter "http://" or "https://", or entered it incorrectly. Enter the correct URL and then retry the operation (P.164).
- Failed to display a link because the URL contains an error.

K

Key dial locked

- The Key dial lock is set. Cancel the Key dial lock and then retry the operation (P.130).

L

Lock all

- The Lock all is set. Cancel the Lock all and then retry the operation (P.126).

Low battery. Cannot update data information

- When the battery level is very low, you cannot add an i bookmark/mark in the PDF data saved in [Movable contents] of My document in the microSD memory card.

M

Mail security is set

- The Mail security is set. Cancel the Mail security and then retry the operation (P.132).

以下の宛先にはメール送信できませんでした（561）　Mails could not be sent to following address

○○@△△△.ne.jp

※ Mail addresses vary depending on each recipient.

- Failed to send mails to some mail addresses. Move to a location with better radio wave condition and then send them again.

Main memory shortage

- The remaining memory on the FOMA terminal is insufficient. Change the image quality or image size, or delete unnecessary images (P.147, 154, 290).

Main memory shortage. May not save

- An image you edit may not be saved because of insufficient memory on the FOMA terminal. Delete unnecessary images or move some images to the microSD memory card (P.283, 290).

MainMenu cannot be activated now

- Failed to display the menu because a function that does not support menu display is executed.

Manner mode is set

- Failed to adjust the volume because the Manner mode is set. Cancel the Manner mode and then retry the operation (P.108).

Memory shortage

- The operation is interrupted because of insufficient memory. If the message is frequently displayed, power off the FOMA terminal once and then power it on again.

Memory shortage. Cancel operation

- The operation is discontinued because of insufficient memory.

Message rejected and cannot be received

- Failed to send SMS because the recipient rejects receiving SMS.

Message rejected and cannot be sent

- Failed to send SMS because sending SMS is rejected.

microSD error

- Failed to access the microSD memory card (loading error, etc.). Remove the microSD memory card once and insert it again (P.279). If this message appears again, the microSD memory card may be damaged.

N

No assigned channel to this keypad

- No channel is assigned to this key. Either press other key or edit a remote-control number (P.243).

No content is available (204)

- The site or website you specified contains no display data.

No memory space

- The number of entries saved in the Phonebook has reached 1,000. Delete unnecessary entries in the Phonebook (P.98).
- The number of saved schedules has reached 300. Delete unnecessary schedules (P.326).
- Failed to save the data. This message appears if there is not enough memory when you attempt to exchange data using the infrared or iC communication.
- There is not enough memory to save new data. Delete unnecessary data (P.294).

No more file number. Please reset

- The file number which is attached to an image saved in the microSD memory card and incremented with the number of saved images has reached the maximum number (999-9999). Perform the Reset file No. or delete the images from the largest file numbers (P.156, 290).

No requested software

- The i-αppli software to be started from the site or mail, or by the infrared communication is not stored in the FOMA terminal.

No response

- Failed to identify a recipient of iC communication. Check if both FeliCa marks "⊃" are opposed correctly with each other or the other device operates properly (P.298).
- Failed to recognize the other device for the infrared communication. Check if the infrared data ports are pointed at each other correctly or if the other device operates properly (P.295).

No response (408)

- The communication is interrupted because there is no response from the site or website. Retry the operation after a while.

No space in main memory

- Another image recorded by the camera cannot be saved because of no memory to save it on the FOMA terminal. Change the image quality or image size, or delete unnecessary images (P.147, 154, 290).
- The remaining memory on the FOMA terminal is insufficient. Delete unnecessary data (P.98, 166, 167, 193, 223, 290, 326, 331).

No space to attach signature

- Failed to attach the signature because the total number of characters in the mail main body and signature exceeds 5,000 full-width or 10,000 half-width characters. Decrease the number of characters in the mail main body or send mail with no signature attached (P.179, 196).

Not enough space in microSD

- Another image recorded by the camera cannot be saved because of no vacant space to save it in the microSD memory card. Change the image quality or image size, or delete unnecessary images (P.147, 154, 290).

Not supported by this Reader/Writer

- The recipient's terminal does not support the iC communication.

O

Omakase Lock activated

- The Omakase Lock is set. While the Omakase Lock is set, all key operations are disabled except for answering an incoming voice or videophone call and powering on/off (P.123).

Out of service area

- The i-mode services are not available since you are outside of the service area or in a location without the radio wave. Move to a location where "圏外" disappears (P.30).

P

Page is not found (404)

- The site, website, etc. cannot be located. Check if the URL you entered is correct.

Personal data locked

- The Personal data lock is set. Cancel the Personal data lock and then retry the operation (P.129).

Please wait for a while

- Voice line/packet communication system failure or very high congestion in voice line/packet communication network. Retry after a while. However, you can still place a call to 110, 119, or 118, with some exceptions depending on the situation.

Please wait for a while (packet)

- Packet communication system failure or very high congestion in packet communication network. Retry the operation after a while.

Positioning failed

- Failed to position the current location. Move to a location with better radio wave condition and then try it again.

Program guide is currently unavailable for use

- IP (information service providers) stopped the use of the i-αppli software. Contact IP.

Public mode (Drive mode)

- The Public mode is set. Cancel the Public mode and then retry the operation (P.66).

PUK blocked

- The PUK code is locked. Contact the nearest DoCoMo shop (P.123).

R

Receiving data exceeds maximum size for i-motion

- Failed to retrieve the data because its volume has exceeded the maximum size.
- Failed to retrieve the data because its file size has exceeded 10M bytes while playing back a streaming type i-motion.

Receiving data exceeds replayable size for i-motion

- Failed to retrieve the data because its volume has exceeded the maximum size.
- Failed to retrieve the data because its file size has exceeded 500K bytes while playing back a standard type i-motion.

Registration is in progress (554)

- User registration of i-mode is in progress. Retry the operation after a while.

Remotely Controllable services denied

- You currently do not yet subscribe to services such as the Voice Mail or Call Forwarding Service that can be operated by remote control. To use the remote control, subscribe to services.

Replay period has expired

- This file is provided with an expiry date or time limit on playback. It cannot be played back because the term permitted for playback has expired. Check the expiry date in the Detail info display (P.291).

Replay period has not yet started

- This file is provided with a time limit on playback. It cannot be played back because the term permitted for playback has not yet started. Check the starting date of the term in the Detail info display (P.291).

Requested software unavailable

- Failed to start the i-αppli software stored in the FOMA terminal from a site or mail, or by infrared communication.

Reservation data was updated. Could not save

- Failed to save the reservation because of the Booking list being updated while editing it. Retry the operation (P.248).

Retention period has expired (492)

- The time for storage of the pull-type file attachment has expired. It cannot be obtained.

Root certificate has expired. Connect?

- The certificate of the FOMA terminal is not yet valid or has expired. Select [Yes] to connect or [No] to cancel to connect. This message may also appear when the current date and time are set wrong. Set them correctly (P.43).

Root certificate is not valid

- The SSL list is set to [Invalid]. Set the SSL list to [Valid] (P.171).
- The SSL/TLS list is set to [Invalid]. Set the SSL/TLS list to [Valid] (P.171).

Run software and delete data on IC card. Then delete software

- Failed to delete the Osaifu-Keitai-compatible i-αppli software because of some data being contained in the IC card. Delete the saved data after starting the software and then retry the operation (P.220).

S

Same ToruCa exists. Unable to receive ToruCa

- You cannot obtain a ToruCa card that already exists when the Duplication check is set (P.225).

Services are full. MUSIC of overwritten service is unable to play. Overwrite?

- The maximum number of music services (members only) which can be saved has been exceeded. If you select [Yes], the new service overwrites the service which has the oldest time limit on playback. Also, you cannot play back music downloaded from the service which is overwritten.

Server is busy

- The software update is not available because the server is busy. Wait for a while and then retry the operation (P.404).

Server is full (551)

- When the number of mail held for the recipient at the i-mode center reaches the maximum number, no more mail sent to the recipient is accepted by the i-mode center. Try to send mail after the recipient makes space for new mail at the i-mode center (P.184).

Service is used by the previous software. Unable to download. Delete a service?

- Downloading/upgrading is unavailable because software using the same service has been already downloaded.

Service not provided

- SMS is not provided.

Service not registered

- You do not have a subscription for the i-mode service. To use i-mode, subscribe to i-mode.
- If you signed up for i-mode after starting to use the FOMA terminal, power off the FOMA terminal once and then power it on again.

Set the channel list

- Failed to operate because the channel list is not set. Set the channel list and then retry the operation (P.243).

Setting self mode

- The Self mode is set. Cancel the Self mode and then retry the operation (P.128).

Setting unknown reject

- The Reject unknown is set. Cancel the Reject unknown and then retry the operation (P.135).

Software already updated

- No update is available for the i-αppli software because it has been already updated to the latest.

Software terminated due to security error

- The i-αppli software was terminated since it has attempted an unauthorized operation. Check the security error history (P.216).

SSL session failed

- Failed to connect to the server because of a server authentication error.

SSL session was terminated

- The SSL communication is disconnected because there is a problem with the certificate of the site.

SSL/TLS session cannot be established

- The SSL/TLS session failed. Connect again.

SSL/TLS session failed

- Failed to connect to the server because of a server authentication error.

Syntax error (XXX)

- Failed to display because of an error in the received data.

T

Text volume exceeds. Cannot send

- The number of characters in the mail main body has exceeded the limit and mail cannot be sent. Reduce the number of characters.

This certificate has expired. Connect?

- The certificate of the site is not yet valid or has expired. Select [Yes] to connect or [No] to cancel to connect.

This certificate is not valid for this URL. Connect?

- The CN-Name (server name) of the certificate of the site does not match the actual server name. Select [Yes] to connect or [No] to cancel to connect.

This data can no longer be replayed

- This file is provided with a limitation on the number of times of playback. It cannot be played back because the number of times permitted for playback has been exceeded. Check the permitted number of times in the Detail info display (P.291).

This data may not be replayed

- You may not be able to play back this i-motion data because it is invalid.

This function is unavailable

- The function you selected cannot be used concurrently with the function that is currently executed (P.316).

This site is not certified. Connect?

- The certificate of the site is not supported by the FOMA terminal. Select [Yes] to connect or [No] to cancel to connect.

This software contains an error

- Failed to download or upgrade because information required for it is not set on the i-αppli software.

This software contains an error. Unable to download

- Failed to download because of an error in the software data.

This software is currently unavailable for use

- IP (information service providers) stopped the use of the i-αppli software. Contact IP.

This software is not supported by this phone

- The software you want to download or upgrade does not support the FOMA terminal.

This UIM cannot be recognized

- Make sure that the correct UIM is inserted (P.36).
- The UIM contains an error. Contact our service counter (DoCoMo shop, etc.).

Time out

- Failed to connect within the time set for the Connection timeout. Change the setting or retry to connect after a while (P.169).

Too many active functions. Cannot activate

- You cannot execute the selected function because of too many functions being executed by multitasking. Quit a currently executed function and then retry the operation (P.316).

Too many active functions. Cannot execute. Quit other function and retry

- You cannot execute a selected function because of insufficient memory. Quit a currently executed function and then retry the operation (P.316).

Too much data was entered

- Failed to send because of too many characters. Reduce the number of characters and try to send again.

Transmission failed

- An error occured while sending mail. Make sure that "📵" is not displayed and send it again. If the message appears again, retry to send after a while (P.184).
- The address of SMS is incorrect. Enter the correct address (phone number) and send again (P.202).

Transmission failed (552)

- Failed to connect to a line due to a problem at the i-mode or SMS center. Retry to connect after a while.

U

UIM is full

- The number of SMS saved in the UIM has reached the maximum number. Delete unnecessary SMS (P.193).

UIM is not inserted. Content is unavailable

- Failed to operate because the UIM is not inserted. Insert the UIM that was used when you retrieved the data or file and then retry the operation (P.36).

Unable to display this program guide

- When 2in1 is set to the B mode, you cannot run the program guide i-αppli with mail or using mail.

Unable to obtain data due to replay restriction data error

- Failed to obtain the file because of an error in the playback restriction data.

Unable to retrieve the requested URL (504)

- Failed to connect to the site or website for some reason. Retry to connect.

Unable to run this software

- When 2in1 is set to the B mode, you cannot run i-αppli with mail or i-αppli using mail.

Unable to search any available channels

- Failed to search any broadcast station in the current area.

Unable to update pattern definitions

- Failed to update pattern definitions because of error occurrence.

Unable to use in My Data B

- You cannot originate a PushTalk call from the Own number display of the B mode.

Unavailable channel

- Failed to receive the signal because you are in a location without the broadcast wave. Move to a location with better radio wave condition and then retry the operation.
- Failed to receive the signal because broadcasting is in intermission.

Unsupported microSD

- A non-compatible microSD memory card is installed in the FOMA terminal. Install a FOMA terminal-compatible microSD memory card (P.278).

URL is too long to register

- Failed to save the site as a bookmark because the URL exceeds 256 half-width characters (P.164).

Usage is currently restricted. Try again later

- Users of the flat-rate i-mode packet service may not be able to connect during certain hours because of sharp increase in communication traffic. In this case, wait for a while until you can use i-mode.

Use ToruCa automatic reading func through the reader/writer?

- Auto recognition is set to [OFF] (P.225).

Y

Your HTTP version is not supported (505)

- You tried to connect to the site, etc. not supporting i-mode.

Symbol

αerror

- An error occurred while running the i-αppli software. Start to run again or check the error history (P.216).

"◇△□.ne.jp"宛のメールが混み合っているため、送信することができません(555) (Failed to send mail to "◇△□.ne.jp" because the line is congested)

※ Domain names vary depending on each recipient.

- The line is extremely congested. Wait for a while and then retry the operation.

Warranty and After Sales Services

Warranty

● Make sure that the warranty is received with the FOMA terminal upon purchase.
Check to be sure that the name of the retailer, date of purchase, and other items have been filled out on the warranty before storing it in a safe place. If any necessary information is not provided, immediately contact the retailer and request to complete the warranty. The FOMA terminal comes with a year's free warranty starting from the date of purchase.

● Specifications of this product and its accessories are subject to change for improvement without prior notice.

● Data saved in the Phonebook or other memory locations may be changed/lost due to the trouble/repairs or handling of the FOMA terminal. Note down the data in the Phonebook or other memory locations on a separate memo and keep it safely to prevent such problems. When the FOMA terminal is replaced due to trouble, the information downloaded using i-mode and i-αppli are not transferred to the repaired FOMA terminal because of copyright laws, with some exceptions.

　※ This FOMA terminal allows you to save data, such as the Phonebook, in the microSD memory card.

　※ This FOMA terminal allows you to save i-motion files and data that is used by i-αppli software in the microSD memory card.

　※ This FOMA terminal allows you to use the Data Security Service (a paid service that requires a subscription) to store data, such as the Phonebook, at the Data Security Service Center.

　※ If you have a PC, you can use the DoCoMo keitai datalink (P.361) and the FOMA USB Cable with Charge Function 01 (optional) or FOMA USB Cable (optional) to transfer data saved in the Phonebook and other memory from the FOMA terminal to the PC and save data in the PC.

After Sales Services

◎ If you have problems with the FOMA terminal

Before requesting for repairs, refer to "Troubleshooting" of this manual to see if the problem can be remedied (P.390).
If the FOMA terminal still malfunctions, call the "Contact for Repairs" on the backcover of this manual.

◎ If repair is required resultingly

Bring the FOMA terminal to the DoCoMo repair handling service counter. However, it must be taken during business hours of the DoCoMo repair handling service counter. Make sure to bring a warranty card with the product when you visit the shop.

◎ Within the warranty period

● We repair the FOMA terminal free of charge based on the terms documented in the warranty.

● When requesting a repair, make sure to bring the warranty card with the FOMA terminal. Repair requests that are not accompanied by the warranty or that involve malfunction and damage due to incorrect handling by the owner will only be repaired at the owner's expense, even if the warranty period is still effective.

● Malfunction due to use of devices and consumable parts other than those specified by DoCoMo will only be repaired at the owner's expense, even if the warranty period is still effective.

● Damages on the liquid-crystal screen, connecter, or other parts occurred after the purchase will be repaired at the owner's expense.

◎ Note that repair may be refused in the following cases.

We may not repair the FOMA terminal if the water leak seal is reacted or if the FOMA terminal has corrosion due to water leakage, condensation, perspiration, etc. or if the internal circuit board is damaged or deformed. Even if repair is possible, it will be done at the owner's expense, as this type of corrosion or damage is not covered by the warranty.

◎ If the warranty period expires

We will repair the FOMA terminal at the owner's expense.

Appendix/External Devices/Troubleshooting

◎Parts stock period

The functional parts necessary to repair the FOMA terminal will be basically available for a minimum of six years after the manufacture is discontinued. However, depending on the defective portion, repair may not be possible because of a shortage of repair parts.

Note that repair may still be possible depending on the defective portion even if the stock period has expired. Call the "Contact for Repairs" on the backcover of this manual.
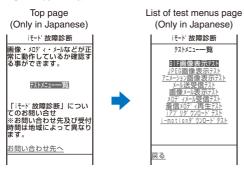

◎Precautions

● Never modify the FOMA terminal or accessories.
- • Doing so may result in fire, injuries or malfunctions.
- • The modified FOMA terminal may be repaired only if the owner agrees on that all the modified parts are restored to the original conditions. However, repairs may be refused depending on the modifications.
  The following cases may be considered as modifications.
  - Put a seal on portions such as of the liquid-crystal screen or keypad.
  - Glued decorations on the FOMA terminal using adhesion bond, etc.
  - Change the parts such as exterior to other than DoCoMo Standard Parts.
- • Malfunction and damage due to modifications will be repaired at the owner's expense, even if the warranty period is still effective.

● The model sticker must not be removed from the FOMA terminal.
  The model sticker certifies that the FOMA terminal satisfies technical standards. It should be noted that if the sticker is removed or is replaced with a different sticker, and the original model sticker cannot be verified, it may disqualify the unit from repairs due to not being able to determine the technical standards of that particular phone.

● Note that the settings, total call duration, and other information may be reset (cleared) as a result of malfunction, repair or other handling. In this case, make the settings again.

● A material that generates a magnetic field is used in the following parts of the FOMA terminal. Do not hold an object that is easily affected by magnetism, such as a cash card, close to the FOMA terminal. You may not be able to use the card any more.
  Where it is used: Earpiece, speaker

● If the FOMA terminal has gotten wet or moist, immediately power off the terminal and remove the battery pack from it, and then bring it to the DoCoMo repair handling service counter as soon as possible. However, note that we may not repair the FOMA terminal depending on the extent of the damage.

Precautions on Memory Dial (Phonebook Function) and Downloaded Data

● It is strictly recommended to back up all the data you have saved in the FOMA terminal or other recording media. DoCoMo shall have no liability for any change or loss of the data.

● Note that data you created or data you retrieved or downloaded from sources other than your FOMA terminal may be changed or lost when you change the model or have repairs done to the FOMA terminal. DoCoMo shall have no liability for any change or loss of any kind. Under some circumstances, DoCoMo may replace your FOMA terminal with its equivalent instead of repairing it.
  Only when the FOMA terminal is replaced, the images/melodies for incoming calls that you downloaded to your FOMA terminal and user-defined data are transferred to a new terminal. (However, depending on the data and seriousness of the trouble, data cannot be transferred to a new terminal.)
  ※ Depending on the volume of data saved in the FOMA terminal, it may take time or it may not be possible to transfer data to a new terminal.

i モード故障診断 (i-mode Trouble Diagnosis) Site

This website allows you to check by yourself whether some operations, such as sending/receiving mail and downloading images and melodies, are performed normally on your FOMA terminal.

● Access to the "ｉモード故障診断" (i-mode trouble diagnosis) site

i-mode site : [i Menu] → [お知らせ] (Information) → [サービス・機能] (Service/Function)
→ [ｉモード] (i-mode) → [ｉモード故障診断] (i-mode trouble diagnosis)

- No packet communication charge is required for the i-mode trouble diagnosis site.
  ※ Packet communication charge is required from abroad.
- Available test items vary depending on the model of the FOMA terminal and may be subject to change.
- When you check your mobile phone for normal operation on each test item, carefully read the precautions described in the website before starting the diagnosis.
- When you access the i-mode trouble diagnosis site and perform a mail sending test, your FOMA terminal-specific information (such as model name and mail address) is automatically sent to the server (server for the i-mode trouble diagnosis). DoCoMo will not use the information sent from your FOMA terminal for any purposes other than for the i-mode trouble diagnosis.
- If your mobile phone is diagnosed as having some troubles, call the "Contact for Repairs" on the backcover of this manual for remedial action.

Updating the Software
<Software update>

About Updating the Software

This function allows you to check if the software update is necessary by connecting to the network for the FOMA terminal and if necessary, download a part of the software using packet communication to update the software.

※ No packet communication charge is required for updating software.

If the software update is necessary, we inform of it on DoCoMo's home page and in "お知らせ" (Information) accessible from i Menu.

You can use one of the three update types: "Auto-update", "Now update", "Reserve" to update the software.

Auto-update	Download new software automatically and rewrite at the previously set time.
Now update	Update the software immediately at any time you want.
Reserve	Reserve a date/time you want to update the software. The software update starts automatically at the reserved date and time.

● Do not remove the battery pack while updating the software. The software update may fail if you do so.
● The software update can be made with data, such as Phonebook entries, images recorded by the camera and downloaded data, remaining in the FOMA terminal. However, note that the safety of the data may not be assured depending on the conditions of your FOMA terminal (e.g. malfunction, damage and exposure to water). It is recommended to take a backup copy of important data (some data such as downloaded data may be protected from backup copy).

Before Using the Function

- You can update the software even if the Host selection is set to other than [i-mode(UIM)].
- Before updating the software, be sure to fully charge the battery pack of the FOMA terminal.
- You cannot update the software in the following cases:
  - When the date and time of the FOMA terminal are not set
  - When "▨▨外" is displayed
  - While the Omakase Lock is set
  - When the UIM is not inserted
  - During a call
  - While the Self mode is set
  - When the battery level is low
  - When another function is being used
  - When the FOMA terminal is connected to an external device such as a PC
- It may take time to update (download and rewrite) the software in some cases.
- The Alarm, Schedule alarm, and Booking alarm do not operate while updating the software.
- You cannot place or receive a call, and use various communication functions and other functions while updating the software. (You can receive a voice call while downloading the software.)
- The FOMA terminal uses SSL communication with the DoCoMo server to update the software. Before starting update, set the SSL list to [Valid] (Default: [Valid]) (P.171).
- It is recommended to update the software under strong radio wave condition with 3-antenna marks displayed and not to move the FOMA terminal while updating the software.
  ※ When the weakening of the radio wave occurs while downloading the software or the download is interrupted for any reason, perform the software update again in a location of good radio wave condition.
- If no new update is available, the message "No update is needed. Please continue to use as before" appears when you check the necessity of the update.
- After updating the software, icons that notify you about mail/messages stored at the i-mode center disappears. When the Recv option setting is [ON], the screen notifying you of new mail may not be displayed after completion of the update if there is new mail while updating the software.
- When you update the software, your FOMA terminal-specific information (such as model and manufacturer's serial number) is automatically sent to the server (server for updating the software under DoCoMo's supervision). DoCoMo will not use the information sent from your mobile phone for any purposes other than to update the software.
- When the software update fails, the message "Rewrite failed" appears and no further operation is possible. In this case, please bring the FOMA terminal to the nearest DoCoMo repair handling service counter.
- You cannot use the software update overseas.

Updating the Software Automatically (Auto-update)

Download new software automatically and rewrite old one with it at the previously set time.

When the status is changed to be ready to rewrite, "⟳" appears. After you check the time of rewriting, you can change the time or select whether to rewrite right away.

1 From the Menu, select [Settings] → [Management] → [SW Update] and press ▭.

The Security code screen appears.

2 Enter the Security code and press ▭ (OK).

- The Security code is masked by "✳✳✳✳".
- The Security code is set to "0000" at the time of purchase.

3 Select [Set auto-update] and press ▭.

```
Set auto-update
Set
        Auto-update ▾
Day    None specified ▾
Time             09:05
```

4 Set whether to update the software automatically at [Set].

[Auto-update] : Update the software automatically.

[Only notice] : The notification icon "⟳" (Update notification) appears in the stand-by display when the software update is necessary.

[Disable] : Do not update the software automatically.

5 Set a day of the week to perform the software update at [Day].

Select from [Mon to Sun] and [None specified].

6 Set a time to start the software update at [Time].

Enter a time in 24-hour format.

7 Press ▤ (Complete).

The Set auto-update is set.

When the Set auto-update is set to [Disable]

Select [Yes].

After Receiving the Software Update Information

```
Nov  1 Thu   9:05 AM

Update schedule
◉
```

When the Set auto-update is set to [Auto-update], the notification icon "◉" (Update schedule) appears in the stand-by display.

To check the date and time of the software update

Press ▭ (Link) in the stand-by display and select "◉". To change the date and time of the update, select [Change]. To start the update, select [Now rewrite].

When the Set auto-update is set to [Only notice], the notification icon "⊘" (Update notification) appears in the stand-by display.

To activate the software update

Press ▤ (Link) in the stand-by display, select "⊘", and select [Yes].

Update notification

⊘

● The notification icon of the SW Update appears only when DoCoMo notifies software update.

Activating the Software Update

1 From the Menu, select [Settings] → [Management] → [SW Update] and press ▤.

The Security code screen appears.

2 Enter the Security code and press ▤ (OK).

- The Security code is masked by "✱✱✱✱".
- The Security code is set to "0000" at the time of purchase.

3 Select [Update] and press ▤.

Establishing SSL session (Authenti-cating)

▶

Checking

The FOMA terminal starts SSL communication to check if the software update is necessary.

4 If necessary, select the timing to start update and press ▤.

Update is needed

Now update
Reserve
Cancel

[Now update] : Start updating the software. The software update may not be completed successfully if the server is busy.

[Reserve] : Reserve a date/time to start the software update.

[Cancel] : Do not start updating the software.

When the message informing there is no need to update the software appears
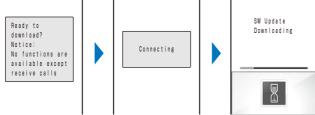

You do not need to update the software. Continue to use the FOMA terminal without updating.

● When the server is busy, the screen to the right appears. To reserve, select [Reserve] and set a date/time for the update.

Server is busy

Reserve
Cancel

Updating the Software Immediately (Now update)

1 From the screen for selecting the update type, select [Now update] and press ▤.

```
Ready to
download?

▶
```
SW Update
Downloading
```

After a while, the software download starts.

- When downloading starts, step 2 is performed automatically (no need to operate).

To cancel the download

Press ▢ (Cancel) while downloading.

- If you stop the download before it is completed, the data downloaded up until this point is deleted.

2 After the download is completed, press ▤ (OK).

```
書換え開始します
```
▶
```
書換え中

Rewriting
```
▶
```
書換え完了しました
再起動します

Rewriting is complete.
Ready to reload?
```

The software rewriting starts and the incoming indicator lights. After rewriting is completed, the FOMA terminal is restarted automatically.
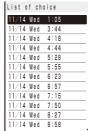

- While the software is being rewritten, all key operations are disabled. You even cannot stop the update operation.

● When the FOMA terminal is restarted, "🔁" (Update complete) appears in the stand-by display. If there is any information that you must confirm, "🔁" (Check for update) appears. The icon and message disappear after you check the notification information by selecting the icon.

Reserving a Date/Time for the Software Update (Reserve)

If downloading takes too long or the server is congested, you can connect to the server and preset a date/time to start the software update.

Example: Reserving the software update on November 14 (Wed) 1:05 a.m.

1 From the screen for selecting the update type, select [Reserve] and press ⬚.

List of choice
11/14 Wed 1:05
11/14 Wed 3:44
11/14 Wed 4:18
11/14 Wed 4:44
11/14 Wed 5:28
11/14 Wed 5:55
11/14 Wed 6:23
11/14 Wed 6:57
11/14 Wed 7:15
11/14 Wed 7:50
11/14 Wed 8:27
11/14 Wed 8:58

The FOMA terminal connects to the server and displays a list of reservation choices.

● When reserving the software update, the time set on the server is displayed.

To select another date/time
Press 🔘 (Others) and select the preferred date, time slot, and time. You can confirm vacant time slot available for reservation in the Preferred- time slot display as follows:
"○: Available", "△: Almost full", or "×: Full".

To cancel the reservation operation
Press ✉ (Cancel).

2 Select the date/time to be reserved → [Yes] and press ⬚.

Reserve for 2007/11/14 Wed 1:05?		Connecting		Reserved for 2007/11/14 Wed 1:05
Yes				
No				

The FOMA terminal connects to the server and completes the reservation.

When the Reserved Time Comes

Ready to update software?

The screen to the left appears. After about five seconds, the software update starts automatically and the incoming indicator flashes.

● Before the reserved time comes, turn the FOMA terminal to the stand-by display and place it in a location of good radio wave condition.

● The software update may not start if another function is being used when the reserved time comes.

● When the Alarm/Schedule alarm/Booking alarm is set to start at the same time as the reserved time, the software update has priority and the alarm may not sound.

● If you execute the Reset all data&set or leave the FOMA terminal without a battery pack or with a fully expended battery pack for a long period of time after you complete the reservation, the date and time is reset, and the software update does not start even if the reserved time comes. Perform the reservation again.

Confirming the Reservation

1 From the Menu, select [Settings] → [Management] → [SW Update] and press ▭.

The Security code screen appears.

2 Enter the Security code and press ▭ (OK).

3 Select [Update] and press ▭.

```
Already reserved
for
2007/11/14 Wed
1:05

   OK
   Change
   Cancel
```

If the software update is already reserved, the reserved information appears.

To change the reservation

Select [Change]. The FOMA terminal connects to the server and you can select another date/time.

To cancel the reservation

Select [Cancel] → [Yes]. The FOMA terminal connects to the server and cancels the reservation.

Protecting Your Mobile Phone from Harmful Data   <Scan function>

At first, update the pattern definitions to get the latest definitions.

You can detect information related to the data and programs obtained into the FOMA terminal from an external source, such as data downloaded from a site or i-mode mail, and delete data or end the start-up of application that can cause a trouble.

- Use the pattern definitions for checking. Since the pattern definitions are upgraded every time a new problem is discovered, be sure to update the definitions (P.408).

- The scanning function provides explicit protection against intrusive data that causes mobile phone trouble while you are viewing a website or receiving mail. Note that if the pattern definitions corresponding to each trouble are not downloaded to the mobile phone, or if there are no pattern definitions corresponding to each trouble, this function cannot prevent the trouble occurrences.

- The contents of the pattern definitions vary depending on the model of your mobile phone. Note that the distribution of pattern definitions for models released more than three years ago may be discontinued at our company's discretion.

Setting the Scanning Function

You can set whether to automatically check data and programs when they are executed.

1 From the Menu, select [Settings] → [Management] → [Scan function] → [Set scan] and press ▤.

```
Set scan
Scan function
          Valid  ▾
Message scan
          Valid  ▾
```

[Scan function] : Set whether to enable the scanning function.
[Message scan] : Set whether to enable the scanning function for SMS when the Scan function is set to [Valid].

2 Select [Valid] at [Scan function].

[Valid] : Execute the scanning function. If data that can cause a trouble is detected, a warning is displayed in five levels.

[Invalid] : Do not execute the scanning function.

When you change the setting

Select [Yes].

3 Select [Valid] at [Message scan].

[Valid] : Execute the scanning function for the SMS. If a phone number or URL is included in the mail main body, the message appears.

[Invalid] : Do not execute the scanning function for the SMS.

When you change the setting

Select [Yes].

Updating the Pattern Definitions

1 From the Menu, select [Settings] → [Management] → [Scan function] → [Update] and press ▤.

```
Update pattern
definitions?

     Yes
     No
```

2 Select [Yes] → [Yes] and press ▤.

```
Ready to
send your
terminal ID?
     Yes
     No
```
▶
```
Update
Downloading

     ⏳
```

When the pattern definitions are the latest available

There is no need to update the pattern definitions. Use them as is.

● When you update the pattern definitions, your FOMA terminal-specific information (such as model and manufacturer's serial number) is automatically sent to the server (server for the scanning function under DoCoMo's supervision). DoCoMo will not use the information sent from your mobile phone for any purposes other than the scanning function.

● You cannot update the pattern definitions in the following cases:
  - When the date/time is not set   - When "📶" is displayed
  - During a call   - While the Self mode is set
  - While the Lock all is set   - While the Omakase Lock is set
  - When the UIM is not inserted   - When another function is being used
  - When the FOMA terminal is connected to an external device such as a PC
  - When the international roaming service is used

● If you cancel the downloading operation before it is completed, the data downloaded until this point is deleted.

Setting Whether Pattern Definitions Are Automatically Updated

You can set whether to update the pattern definitions automatically.

1 From the Menu, select [Settings] → [Management] → [Scan function] → [Set auto-update] and press ▤.

```
Set auto-update
of pattern
definitions
 Valid
 Invalid
```

[Valid]   : Update the pattern definitions automatically.
[Invalid] : Do not update the pattern definitions automatically.

2 Select [Valid] → [Yes] → [Yes] and press ▤.

The Set auto-update is set.

● If the Set auto-update is set to [Valid], "🔄" (Update completed) appears in the stand-by display when the pattern definitions auto-update is completed. If the pattern definitions were not auto-updated successfully, "🔄" (Update definitions) appears. Confirm the information by selecting the icon to clear the notification.

● If you leave the FOMA terminal without a battery pack or with a fully expended battery pack for a long period of time, the date and time is reset, and the Auto-update may not operate correctly.

About the Scanning Result Indication

If data that can cause a trouble is detected, the warning display appears.

■Scanning result indication

※1 You can save up to 50 entries in the UIM.

※2 The actual number of data items that can be saved may decrease depending on the data to be saved.

※3 Includes the preinstalled data.

※4 Does not include the preinstalled data.

※5 Includes the preinstalled Deco-mail pictographs and the images saved in the [スーパーモンキーボール] folder at the time of purchase.

About the Specific Absorption Rate (SAR) of Mobile Phones, etc.

SAR Certification Information

This model phone FOMA SO905i meets the MIC's* technical regulation for exposure to radio waves.

The technical regulation established permitted levels of radio frequency energy, based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The regulation employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit is 2 watts/kilogram (W/kg)** averaged over ten grams of tissue. The limit includes a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The value of the limit is equal to the international guidelines recommended by ICNIRP***.

All phone models should be confirmed to comply with the regulation, before they are available for sale to the public. The highest SAR value for this model phone is 0.350 W/kg. It was taken by the Telecom Engineering Center (TELEC), a Registered Certification Agency on the Radio Law. The test for SAR was conducted in accordance with the MIC testing procedure using standard operating positions with the phone transmitting at its highest permitted power level in all tested frequency bands. While there may be differences between the SAR levels of various phones and at various positions, they all meet the MIC's technical regulation. Although the SAR is determined at the highest certified power level, the actual SAR of the phone during operation can be well below the maximum value.

For more information about SAR, please see the following websites:
World Health Organization (WHO): http://www.who.int/peh-emf/

われわれはR&TTE指令の要求事項を満たしています（**1999/5/EC**）
We fulfill the requirements of the R&TTE Directive (**1999/5/EC**)

Radio Frequency (RF) Exposure and SAR

Your mobile phone is a low-power radio transmitter and receiver.
When it is turned on, it emits low levels of radio frequency energy (also known as radio waves or radio frequency fields).

Governments around the world have adopted comprehensive international safety guidelines, developed by scientific organizations, e.g. ICNIRP (International Commission on Non-Ionizing Radiation Protection) and IEEE (The Institute of Electrical and Electronics Engineers Inc.), through periodic and thorough evaluation of scientific studies. These guidelines establish permitted levels of radio wave exposure for the general population. The levels include a safety margin designed to assure the safety of all persons, regardless of age and health, and to account for any variations in measurements.

Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a mobile phone. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level of the mobile phone while operating can be well below this value. This is because the mobile phone is designed to use the minimum power required to reach the network.

Variations in SAR below the radio frequency exposure guidelines do not mean that there are variations in safety. While there may be differences in SAR levels among mobile phones, all Sony Ericsson mobile phone models are designed to meet radio frequency exposure guidelines.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (that is, at the ear and worn on the body) as required by the FCC for each model. For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when the handset is positioned a minimum of 15 mm from the body without any metal parts in the vicinity of the phone or when used with the original Sony Ericsson body worn accessory intended for this phone. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

A separate leaflet with SAR information for this mobile phone model is included with the material that comes with this mobile phone. This information can also be found, together with more information on radio frequency exposure and SAR, on:
www.sonyericsson.com

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions :
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

Radio Wave Exposure and Specific Absorption Rate (SAR) Information

United States & Canada

THIS PHONE MODEL HAS BEEN CERTIFIED IN COMPLIANCE WITH THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

The SO905i mobile phones have been designed to comply with applicable safety requirements for exposure to radio waves. Your wireless phone is a radio transmitter and receiver. It is designed to not exceed the limits* of exposure to radio frequency (RF) energy set by governmental authorities. These limits establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by international scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a safety margin designed to assure the safety of all individuals, regardless of age and health.

The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate (SAR). Tests for SAR are conducted using standardized methods with the phone transmitting at its highest certified power level in all used frequency bands. While there may be differences between the SAR levels of various phone models, they are all designed to meet the relevant guidelines for exposure to radio waves. For more information on SAR, please refer to the safe and efficient use chapter in the User Guide.

The highest SAR value as reported to the authorities for this phone model when tested for use by the ear is 0.67 W/kg*, and when worn on the body is 0.41 W/kg* for speech and 0.34 W/kg* for data calls. Body worn measurements are made while the phone is in use and worn on the body with a Sony Ericsson accessory supplied with or designated for use with this phone. It is therefore recommended that only Ericsson and Sony Ericsson original accessories be used in conjunction with Sony Ericsson phones.

**Before a phone model is available for sale to the public in the US, it must be tested and certified by the Federal Communications Commission (FCC) that it does not exceed the limit established by the government-adopted requirement for safe exposure*. The tests are performed in positions and locations (i.e., by the ear and worn on the body) as required by the FCC for each model. The FCC has granted an Equipment Authorization for this phone model with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. While there may be differences between the SAR levels of various phones, all mobile phones granted an FCC equipment authorization meet the government requirement for safe exposure. SAR information on this phone model is on file at the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID PY7A3624011 Additional information on SAR can be found on the Cellular Telecommunications & Internet Association (CTIA) website at http://www.phonefacts.net.

*   In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/ kilogram (W/kg) averaged over one gram of tissue. The standard incorporates a margin of safety to give additional protection for the public and to account for any variations in measurements.

** This paragraph is only applicable to authorities and customers in the United States.

Europe

This mobile phone model SO905i has been designed to comply with applicable safety requirements for exposure to radio waves. These requirements are based on scientific guidelines that include safety margins designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using standardized methods with the phone transmitting at its highest certified power level in all used frequency bands.

While there may be differences between the SAR levels of various phone models, they are all designed to meet the relevant guidelines for exposure to radio waves.

For more information on SAR, please refer to the safety chapter in the User's Guide.

SAR data information for residents in countries that have adopted the SAR limit recommended by the International Commission of Non-Ionizing Radiation Protection (ICNIRP), which is 2 W/kg averaged over ten (10) gram of tissue (for example European Union, Japan, Brazil and New Zealand):

The highest SAR value for this model phone tested by Sony Ericsson for use at the ear is 0.63 W/kg (10g).

Important Safety Information

AIRCRAFT
Switch off your wireless device when boarding an aircraft or whenever you are instructed to do so by airline staff. If your device offers a "flight mode" or similar feature, consult airline staff as to whether it can be used on board.

DRIVING
Full attention should be given to driving at all times, and local laws and regulations restricting the use of wireless devices while driving must be observed.

HOSPITALS
Mobile phones should be switched off wherever you are requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

PETROL STATIONS
Obey all posted signs with respect to the use of wireless devices or other radio equipment in locations with flammable material and chemicals. Switch off your wireless device whenever you are instructed to do so by authorized staff.

INTERFERENCE
Care must be taken when using the phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers
Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this, use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

Hearing Aids
Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

For Other Medical Devices
Please consult your physician and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical device.

Disposal of old electrical & electronic equipment
This symbol indicates that all electrical and electronic equipment included shall not be treated as household waste. Instead it shall be left at the appropriate collection point for recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources. For more detailed information about recycling this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

Disposing of the battery
Please check local regulations for disposal of batteries or call your local Sony Ericsson Call Center for information.
The battery should never be placed in municipal waste. Use a battery disposal facility if available.

Export Controls and Regulations

This product and its accessories are covered and controlled by Japan's export control regulations ("Foreign Exchange and Foreign Trade Law" and related laws and regulations). If you wish to export this product and/or its accessories, you must complete the necessary procedures at your own responsibility and cost. Detailed information on the procedure, contact the Ministry of Economy, Trade and Industry.

Index/Quick Manual
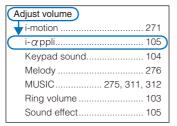

Index
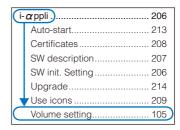

How to Look up in the Index

The index can be used as an "alphabetical table of contents". Under each headword, terms relevant to it are listed. Not only terms representing function names actually displayed on the FOMA terminal, but also those that are a brief summary about the functions described in this manual.

Example: Adjusting the volume of i-αppli software

Adjust volume	
i-motion	271
i-αppli	105
Keypad sound	104
Melody	276
MUSIC	275, 311, 312
Ring volume	103
Sound effect	105

i-αppli	206
Auto-start	213
Certificates	208
SW description	207
SW init. Setting	206
Upgrade	214
Use icons	209
Volume setting	105

Saving an Entry in the FOMA Terminal Phonebook (P.91)

1 Press ▼ (📞) in the stand-by display → 📧 (Create).

2 [Main memory] → 📧.

To save data in the UIM phonebook
Select [UIM].

3 Save other items at the Basic display.

4 Press ▼ and save each item at the Detail display.

---

5 Press ▼ and save each item at the Setting display.

6 Press 📧 (Complete).

■ Items you can save
- **ナマ**: Name (Required)
  Enter a name within 16 full-width/32 half-width characters.
- **カナ**: Reading
  Enter the reading within 32 half-width characters.
- **GP**: Group
  Select from 20 different groups.
- **NO.**: Memory no.
  Enter from 000 to 999.
- **電話**: Phone number
  Up to three numbers per entry are available.
  Enter each number within 26 digits.
  - Phone number type
    Select from nine different icons.
- **🌐**: E-mail address
  Up to three mail addresses per entry are available. Enter each address within 50 half-width alphanumeric characters and symbols.

5

Entering Text (P.338)

② Character mode or pictograph/symbol mode

① Number of bytes that can be entered
- A half-width character is counted as one byte and a full-width character as two bytes.

※ The screen is an image.

1

■ Changing the character mode
📧 (Mode)
- Character mode for half-width: Every time you press 📧 (Mode), the character mode changes in the order of [漢] → [カナ] → [A a] → [1 2].
- Character mode for full-width: Every time you press 📧 (Mode), the character mode changes in the order of [漢] → [カ] → [A] → [1].

■ Changing the pictograph/symbol mode
🔣 (Pict/Sym)
- Every time you press 🔣 (Pict/Sym), the character mode changes in the order of [Ranking] → [Pict.] → [Pict-D] → [Symbol]. [Pict-D] can be selected only in the Edit mail and Edit signature displays.

■ Changing the character mode between full-width and half-width
📧 (Func) → [Full/Halfsize]

2

■ E-mail address type
Select from five different icons.

🔒 **Secret code**
Enter the Secret code which is saved in the recipient's mail address (phone number@docomo.ne.jp) in four digits.

Secret
Select whether to display the Phonebook data.

📞 **Des call display**
Select or shoot a call image to be displayed when placing/receiving a voice/videophone call, right after receiving mail, and when displaying the individual Phonebook entry.

Location information
Add the location information.

Postal code
Enter a code within seven half-width digits.

Address
Enter an address within 64 full-width/128 half-width characters.

Birthday
Enter a date within the range from 1900/01/01 to 2050/12/31.

6

■ Entering a character assigned to the same key twice or more in succession
After entering the first character, either press ▼ or wait for a while, and the cursor moves automatically.

■ Deleting a character
CLR
- The character at the cursor is deleted by pressing CLR for less than a second. The last character is deleted when the cursor is at the end of the text.

■ Inserting a character
Move the cursor to the position to insert a character.

■ Changing the block of characters
Move the cursor with ◄ ►.

■ Undoing text
📧 (Func) → [Undo]

3

■ Des substitute image
Select the Des substitute image to be sent during a videophone call.

📞 **Des phone tone**
Select a ring tone that sounds for an incoming voice/videophone call.

Des mail tone
Select a ring tone that sounds for an incoming voice/videophone call.

Des phone Illum.
Select an indicator color that flashes for an incoming voice/videophone call.

Des mail Illum.
Select an indicator color that flashes immediately after receiving mail.
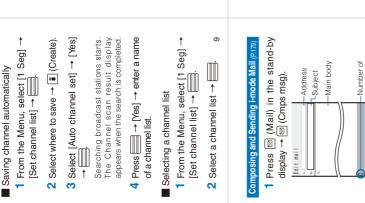

Editing an Entry (P.98)
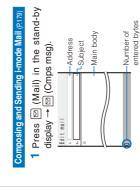

1 From the Phonebook, select an entry → 📧 (Edit).

2 Edit each item → 📧 (Complete).

7

- All characters at and after the cursor position are deleted by pressing CLR for over a second. All characters are deleted when the cursor is at the end of the text.

Tear-off line

Camera (P.142, 146)

■ Recording still images

1 Press [📷] in the stand-by display (for over a second).

2 Point the camera at the object → 🔲 (Shoot).

3 Press 🔲 (Save).

■ Recording a movie

1 Press 🔲 (Func) in the Camera mode display → [Shoot] → [Switch mode] → [Movie shoot] → 🔲.

2 Point the camera at the object → 🔲 (Shoot).

3 Press 🔲 (Stop) to end recording.

4 Press 🔲 (Save).

8

Videophone (P.49, 63)

■ Placing a videophone call

1 Enter a phone number in the stand-by display → [📺] (V.phone).

2 Press [↪] to hang up.

■ Receiving a videophone call

1 When you receive a call, press [↩] or [📺] (V.phone).

2 Press [↪] to hang up.

■ Operations during a videophone call

Key operation	Operation
🔲 (MySide/Sub)	Switch between camera image/substitute image
[📺] (In/Out)	Switch between In-/Out-camera
[↩] (📞)	Hands-free ON/OFF
[▲]/[▼]	Out-camera zoom-in/-out

12

One Seg (P.242, 243, 252, 277)

■ Saving channel automatically

1 From the Menu, select [1 Seg] → [Set channel list] → 🔲.

2 Select where to save → 🔲 (Create).

3 Select [Auto channel set] → [Yes] → 🔲.

Searching broadcast stations starts. The Channel scan result display appears when the search is completed.

4 Press 🔲 → [Yes] → enter a name of a channel list.

■ Selecting a channel list

1 From the Menu, select [1 Seg] → [Set channel list] → 🔲.

2 Select a channel list → 🔲.

9

Composing and Sending i-mode Mail (P.179)

1 Press 🔲 (Mail) in the stand-by display → 🔲 (Cmps msg).

```
Edit mail
```
— Address
— Subject
— Main body
— Number of entered bytes

2 Enter an address at [To].

To add an address

From the Function menu, select [Add receiver] → address type (To/Cc/Bcc).

To delete an address

Move the cursor to an address and from the Function menu, select [Delete receiver] → [Yes].

13

■ Watching One Seg

1 Press [TV] in the stand-by display (for over a second).

When you watch One Seg in the TV style, switch to the TV style in stand-by status.

■ Recording a video

1 Press [📷] in the One Seg display (for over a second).

2 To end the recording, press [📷] → [Yes] → 🔲.

■ Playing back a video

Example: Playing back a video saved in the Data Box

1 Press [◀] ([🔲]) in the stand-by display → [1Seg] → [Video] → 🔲.

2 Select a file → 🔲.

10

3 Enter a subject at [Sub].

4 Enter the main body at [🔲].

5 Press [📧] (Send).

File Attachment (P.183)

1 Press 🔲 (Func) in the Edit mail display → [Add attach file] → 🔲.

Select from [Image], [i-motion], [Melody], [ToruCa], [PDF], [Phonebook], [My data], [Schedule], [Bookmark], [Others], and [Activate camera].

2 Select a file type → a folder → a file → 🔲.

"🖼", "🎵", "📄", or "📎" appears.

3 Compose mail → [📧] (Send).

14

Music (P.310)

Example: Playing back music data by selecting an artist

■ Play back while the FOMA terminal is open

1 From the Menu, select [MUSIC] → [MUSIC Player] → 🔲.

2 Select [Artists] → 🔲.

3 Select an artist → an album → 🔲.

4 Select music data → 🔲 (Play).

■ Play back while the FOMA terminal is folded

1 Press [MUSIC/▷] (for over a second).

2 Use [+] [−] to select [Artists] → [▶❙❙].

3 Use [+] [−] to select an artist → an album → [▶❙❙].

4 Select music data → [▶❙❙].

11

Checking New i-mode Mail (P.186)

1 Press 🔲 (Mail) in the stand-by display (for over a second).

An inquiry result is displayed.

Auto Receiving i-mode Mail (P.185)

1 When receiving mail

"📩" flashes.

2 When receiving is completed

The number of received mail is displayed. The display before receiving reappears after about 15 seconds.

15

■ Selecting the menu

1 [MENU] (MENU)

■ Changing the menu

Every time you press [icon] (Chg.MENU), the display changes in the order of Kisekae menu → Standard menu → My Selection.

■ About Troubles and Repairs for Services Overseas
<Network Technical Support and Operation Center>
(24-hour service)

From DoCoMo mobile phones
International access number -81-3-6718-1414* of your country of stay (Table1) (toll-free)
* **The call charges to Japan apply when you place a call from ordinary phones.**
※ Dial +81-3-6718-1414 to get connected when you place a call from SO905i. (Press and hold the "0" key for at least one second to enter "+".)

From ordinary phones
Universal number
International prefix number for the universal number (Table2) -800-5931-8600*
* **The call charges to your country of stay may apply.**
● For the international access number of major countries (Table1) and international prefix number for the universal number (Table2), see P.13 or P.14 respectively.

1

Network Search Mode (P.369)

Example: Changing a carrier to be connected for manual connection

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Network search mode] →

[Auto]:
Automatically connect to another carrier.
[Manual]:
Manually select a carrier.
[Network re-search]:
Search the carrier to be connected again.
[PLMN setting]:
Set a carrier with the higher-priority for connection.

2 Select [Manual] → a carrier →

PLMN Setting (P.369)

Example: Saving a carrier from the carrier list

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Network search mode] → [PLMN setting] →

2 Select [Manual] → [NTT DoCoMo, Inc] →

5

Before Using the FOMA Terminal Overseas

■ Setting the i-mode

[In Japan]
1 Press [メール] in the stand-by display → [i Menu] → [料金&お申込・設定] → [オプション設定] → [i モード利用設定] → [i モード利用設定] → Enter an i-mode password → [決定] →

[Overseas]
1 Press [メール] in the stand-by display → [i Menu] → [海外利用設定] → [i モード利用設定] → [利用する] → Enter an i-mode password → [決定] →

■ Setting the Remote Control

[In Japan]
1 From the Menu, select [Settings] → [Management] → [NW Services] → [Remote Control] → [Activate] → [Yes] →

2

Setting After Returning to Japan (P.367)

The default setting is to search a network after the FOMA terminal powered on in Japan and connect to the FOMA network (NTT DoCoMo, Inc) automatically.

■ Changing the network to the FOMA network (NTT DoCoMo, Inc) manually

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Network search mode] →

2 Select [Manual] → [NTT DoCoMo, Inc] →

2 Select [Unregistered] and press [Func].
3 Select [Select from List] → a carrier →
4 Select a network communication method → [Yes] →

6

Available Network

3G roaming	Available
GSM network	Available
GPRS network	Available

[Overseas]
1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Remote access(Int.)] → [Yes] →

■ Setting the clock
1 From the Menu, select [Settings] → [Date/time] → [Auto time adjust] → [ON] →

3

Display to Be Shown Overseas (P.367)

While you use the FOMA terminal overseas, the name of the connected carrier appears in the stand-by display.

Nov 1 Thu 9:05 AM

Carrier name
Main clock
Sub-clock
Connected network

• Display the current date/time of the location of stay.
• Display the current date/time of Japan.

• The following icons show the current network connection.

Icon	Network you can use
3G (Blue)	3G network (supported packet communication)
3G (Red)	3G network (not supported packet communication)
GSM	GSM network
GPRS	GPRS network

7

Placing a Call from Your Overseas Location (P367)

■ Placing a call to another country (including Japan) from your overseas location

1 Press "+" (press [0] for over a second) in the stand-by display and enter a country code, area code, and a recipient's phone number, in that order.
- If an area code begins with "0", omit the "0" when dialing (excepting when calling ordinary phones, etc. in Italy).
- To place an international call to Japan, enter the country code "81".

To place a call to a country saved using the Country code
Enter a phone number in the stand-by display, press ⊠ (Option), select [Call method] → [Voice call]/[Videophone] → [Country code] → a country code, and press [国] (Call).

To place a call to a recipient saved in the Phonebook
Select a recipient form the Phonebook and press [ ] To place a videophone call, select a recipient, press [国] and press [日] (V.phone). The first digit of the phone number "0" is converted into a country code automatically added by the Int'l dial assist before the call is dialed.

To place a call from the Redial/Received record
Select a recipient from the Redial/Received record and press [ ] or [日] (V.phone).

2 Press [ ].
To place a videophone call
Press [日] (V.phone).

■ Placing a local call in your overseas location

1 Enter a phone number in the stand-by display.
- Make sure to include the area code, even for a local call.
- If you place a call to a "WORLD WING" overseas user, enter the country code "81" and make the call an international call to Japan even if the recipient is currently in the same country in which you stay.

2 Press [ ].
To place a videophone call
Press [日] (V.phone).

Receiving a Call (P368)

1 When receiving a call, press [ ].
When you receive a videophone call
Press [ ] or [日] (V.phone). To answer a call with a substitute image, press [国] (Sub.).

■ When the caller places a call from Japan
Ask the caller to dial your phone number.

■ When the caller places a call from countries other than Japan
Ask the caller to dial the international access number –81–your phone number without the first "0".

Network Services
To use the network services overseas, set the Remote Control beforehand.

■ Roaming Guidance (P370)
- You need to set it in Japan.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Roaming Guidance] → [国]

■ Bar Incoming call (P370)
- You may not be able to set it depending on the overseas carrier you use.

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Bar Incoming call] → [国]

■ Voice Mail(Int.) (P371)

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Voice Mail(Int.)] → [国]

■ Call FWD(Int.) (P371)

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Call FWD(Int.)] → [国]

■ Roaming guide(Int.) (P371)

1 From the Menu, select [Settings] → [Management] → [NW Services] → [Int'l roaming] → [Roaming guide(Int.)] → [Yes]

Country Codes for Major Countries
When you use an international call or set to the Int'l dial assist, use the following country codes (as of October 2007).

Area	Country code	Area	Country code
Australia	61	Malaysia	60
Austria	43	Maldives	960
Belgium	32	Netherlands	31
Brazil	55	New Caledonia	687
Canada	1	New Zealand	64
China	86	Norway	47
Czech Republic	420	Peru	51
Egypt	20	Philippines	63
Fiji	679	Russia	7
Finland	358	Singapore	65
France	33	Spain	34
Germany	49	Sweden	46
Greece	30	Switzerland	41
Hong Kong	852	Tahiti (French Polynesia)	689
Hungary	36		
India	91	Taiwan	886
Indonesia	62	Thailand	66
Italy	39	Turkey	90
Japan	81	United Kingdom	44
Korea	82	USA	1
Macau	853	Vietnam	84

- For other country codes and details, see the DoCoMo's "International service website".

International Access Number for Major Countries (Table1)
The international access number for major countries is as follows (as of August 2007).

Area	Number	Area	Number
Australia	0011	Malaysia	00
Belgium	00	Monaco	00
Brazil	0041/0014	Netherlands	00
Canada	011	New Zealand	00
China	00	Norway	00
Czech Republic	00	Philippines	00
Denmark	00	Poland	00
Finland	00	Portugal	00
France	00	Russia	810
Germany	00	Singapore	001
Greece	00	Spain	00
Hong Kong	001	Sweden	00
Hungary	00	Switzerland	00
India	00	Taiwan	002
Indonesia	001	Thailand	001
Ireland	00	Turkey	00
Italy	00	United Arab Emirates	00
Korea	001	United Kingdom	00
Luxembourg	00	USA	011
Macau	00	Vietnam	00

International Prefix Number for the Universal Number (Table2)
The international prefix number for the universal number of each country is as follows (as of August 2007).

Area	Number	Area	Number
Argentina	00	Korea	001
Australia	0011	Luxembourg	00
Austria	00	Malaysia	00
Belgium	00	Netherlands	00
Brazil	0021	New Zealand	00
Bulgaria	00	Norway	00
Canada	011	Peru	00
China	00	Philippines	00
Colombia	009	Portugal	00
Denmark	00	Singapore	001
Finland	990	South Africa	09
France	00	Spain	00
Germany	00	Sweden	00
Hong Kong	001	Switzerland	00
Hungary	00	Taiwan	00
Ireland	00	Thailand	001
Israel	014	United Kingdom	00
Italy	00	USA	011

About Inquiries
For inquiries about loss, theft, the charge settlement, and repairs, see "For Loss, Theft, and Charge Settlement for Overseas" on the frontcover or "About Troubles and Repairs for Services Overseas" on P.1 of this manual.
- When you place a call to a contact number for inquiries, call the "International access number of your country of stay (Table1)" or "International prefix number for the universal number (Table2)" assigned to the location where you stay, and then enter the contact phone numbers.

Don't forget your FOMA terminal or your manners!

When you use the FOMA terminal, be careful not to disturb others around you.

Power off the FOMA terminal in the following cases

● When you are in a place where the use is prohibited

In airplanes and hospitals, power off the FOMA terminal.

※ Power off the FOMA terminal not only inside hospital wards but also in the lobby or waiting rooms since electronic medical equipment may be used nearby.

● When there is a possibility that the implantable cardiac pacemaker or implantable cardioverter defibrillator is used nearby such as on rush-hour trains

The FOMA terminal may affect the operation of implantable cardiac pacemaker or implantable cardioverter defibrillator.

Set the Public mode in the following cases

● When you are driving

Holding the mobile phone with a hand while driving applies the penal regulations.

※ When you are compelled to receive a call, tell "Call you back" to the caller using the Hands-free function and park the vehicle in a safe place to place a call.

● When you are in a public place such as in a theater, movie theater or museum

Power off the FOMA terminal in a quiet public place since it may disturb others around you.

Be careful of where you use the FOMA terminal and the volume of your voice and ring tone

● Be careful of the volume of your voice when you use the FOMA terminal in a quiet place such as in a restaurant or hotel lobby.

● Use the FOMA terminal in a place where you do not disturb passengers on the streets.

Be sensitive regarding privacy

Please be considerate of the privacy of individuals around you when taking and sending photos using camera-equipped mobile phones.

Features to support public manners

The FOMA terminal is equipped with helpful features, such as muting sounds, not answering incoming calls, etc.

● Public mode (Drive Mode/Power off) (P.66, 68)

● Manner mode (P.108)/Original manner mode (P.109)

● Vibrator (P.103)

● Record message (P.69)

This manual was printed and produced in such a way to allow easy recycling. Please dispose it for recycling when it is no longer needed.

"ドコモeサイト" allows you to go through procedures for various registration changes, including changes of the address and charge plan, and request for relevant documents.

Using i-mode　i Menu➡料金＆お申込・設定➡各種手続き (ドコモeサイト)　Free packet communication charge

From a PC　My DoCoMo (http://www.mydocomo.com/) ➡ 各種手続き (ドコモeサイト)

※ For access using i-mode, the "network security code" is required.
※ For access using i-mode, no packet communication charge is required, except for from abroad.
※ For access from a PC, the "DoCoMo ID/Password" are required.
※ If you have not yet obtained the "network security code" or "DoCoMo ID/Password", or you forget them, call the "General Contact" below.
※ Access to the services may not be available depending on the subscription detail.
※ DoCoMo e-site may be inaccessible because of the system maintenance.

General Contact

■From DoCoMo mobile phones or PHSs (in Japanese only)

(No prefix) **151** (toll-free)
※Not available from ordinary phones.

■From ordinary phones

0120-800-000 (toll-free) (in Japanese)
0120-005-250 (toll-free) (in English)
※Also available from mobile phones and PHSs.
● Check the number you call and dial it correctly.

For Loss, Theft, and Charge Settlement for Overseas

FOMA® SO905i
Manual for
PC connection setting

■Brief summary of the Manual for PC connection setting

This manual provides instructions on how to install the "FOMA communication configuration files" and "FOMA PC Setup Software" that are both included in the supplied CD-ROM as well as information necessary for performing data communication on the FOMA SO905i. Operating procedures and window examples may partly differ depending on your PC environment.

About Data Communication

You can use the FOMA terminal for three types of data communication, packet communication, 64K data communication, and data transfer.

- The FOMA terminal does not support Remote Wakeup.
- The FOMA terminal does not support FAX communication.
- If you are going to connect the FOMA terminal to DoCoMo's "sigmarionⅡ"/"sigmarionⅢ"/"musea" PDA to perform data communication, you should update "sigmarionⅡ"/"musea". For details about updating, see the DoCoMo website.
- 64K data communication to be performed by connecting to a PC is not available overseas. When you originate the packet communication, use the IP connection to communicate (the PPP connection cannot originate the packet communication).

Packet Communication

A charge applies to this type of communication based on the volume of exchanged data (maximum reception speed 3.6Mbps, maximum transmission speed 384kbps). You can perform packet communication by connecting the FOMA terminal to a PC using the FOMA USB Cable with Charge Function 01 (optional) and making the necessary settings. Use a FOMA packet communication-compliant access point such as DoCoMo's Internet connection service "mopera U"/"mopera". You can also exchange data by accessing an in-house LAN connected to the FOMA network.

- Note that packet communication could be expensive if you exchange large volumes of data such as viewing sites or Internet home pages that contain images or downloading files.
- The maximum transmission/reception speed is 384kbps outside of the FOMA HIGH-SPEED Area.
- When you use DoCoMo's "sigmarionⅢ"/"sigmarionⅡ" /"musea" PDA to perform packet communication, the maximum transmission/reception speed is 384kbps. It does not support the high-speed communication compatible with High-Speed Area.

64K Data Communication

A charge applies to this type of communication based on the duration of a communication.
You can perform 64K data communication by connecting the FOMA terminal to a PC using the FOMA USB Cable with Charge Function 01 (optional) and making the necessary settings. Use a FOMA 64K data communication-compliant access point such as DoCoMo's Internet connection service "mopera U" /"mopera" or ISDN synchronous 64K access points.

- Note that 64K data communication could be expensive if it is performed for a long period of time.

Data Transfer

This type of communication is used to exchange data using the infrared communication, iC communication, or FOMA USB Cable with Charge Function 01 (optional) and no charge is required. Using infrared communication, you can exchange data with a device such as the FOMA terminal or a PC that is equipped with the infrared communication function.

Precautions on Use

Usage Fee of Internet Service Provider

When you use the Internet, a usage fee is required for your Internet service provider. This usage fee, which is separate from the FOMA service charges, must be paid directly to the Internet service provider. For details about usage fees, contact your Internet service provider.
You can use DoCoMo's Internet connection service "mopera U"/"mopera".
To use "mopera U", you need to subscribe to this service (paid service). No monthly charge is required to use "mopera" and you do not need to subscribe to it.

Setting a Host (Such as an Internet Service Provider)

The host for packet communication is different from the host for 64K data communication. To use packet communication, use a packet communication-compliant host; to use 64K data communication, use a FOMA 64K data communication-compliant host or ISDN synchronous 64K-compliant host.

- You cannot connect to a DoPa access point.
- You cannot connect to a PHS 64K/32K data communication access point such as PIAFS.

User Authentication for Network Access

User authentication (ID and password) may be required when connecting to some hosts. If user authentication is required, enter your ID and password on the communication software (dial-up network) for connecting to the host. The Internet service provider or the network administrator of the host assigns an ID and password. For details, contact your Internet service provider or the network administrator of the host.

Access Authentication for the Use of a Browser

When a FirstPass-compatible site that you access through the Internet browser on your PC requires the FirstPass (user certificate) as an access authentication, install the FirstPass PC software from this CD-ROM and perform necessary settings. For details, see the "FirstPassManual" (PDF format) in the [FirstPassPCSoft] folder on the CD-ROM. You need Adobe® Reader® (Version 6.0 or later is recommended) to read the "FirstPassManual" (PDF format). If Adobe® Reader® is not installed on your PC, install it from the same CD-ROM, which also contains the Adobe Reader software. For details on using Adobe® Reader®, see the Help that is installed with the software.

1

Conditions of Packet and 64K Data Communication

The following conditions are necessary to perform communication using the FOMA terminal.

- The FOMA USB Cable with Charge Function 01 (optional) can be used on your PC.
- Your PDA must have FOMA packet and 64K data communication support.
- You must be inside of the FOMA's service area.
- The host for packet communication must have FOMA packet communication support.
- The host for 64K data communication must have FOMA 64K or ISDN synchronous 64K data communication support.

Note, however, that even if you comply with the above conditions, you may not be able to perform communication if the base station is congested or radio wave condition is poor.

Before Using Data Communication

About the Operating Environment

Operating environment of a PC to be used for data communication is as follows.

Item	Required environment
PC main unit	• PC/AT compatible machine with a built-in or removable CD-ROM drive • USB port (Universal Serial Bus Specification 1.1 compliant)
OS※1	Windows 2000 Professional, Windows XP, Windows Vista (all Japanese versions)
Required memory※2	Windows 2000 Professional: 64MB or more Windows XP: 128MB or more Windows Vista: 512MB or more
Hard drive capacity※2	5MB or more free space
Display	High color (65,536 colors) and high resolution (800×600 dots) or over (recommended)

※1 Operation on a PC running upgraded OS is not guaranteed.
※2 The required memory and hard drive capacity may vary depending on the PC system configuration.

- Recommended system to operate the menu is as follows.
  For Windows XP/Windows 2000 Professional
    Microsoft Internet Explorer 6.0 or later.
    When the menu is not displayed even if you set the CD-ROM, search the CD-ROM at My Computer or other locations, and double-click [index.html].
  For Windows Vista
    Microsoft Internet Explorer 7.0 or later.
    When the menu is not displayed even if you set the CD-ROM, search the CD-ROM at Computer or other locations, and double-click [index.html].

● When you set the supplied CD-ROM in the PC, a warning window as shown below may appear. This warning appears because of the security setting on the Internet Explorer, however, causing no problem for use. Click [はい].

※ The window example assumes that Windows XP is used as an operating system. The actual window that appears may differ depending on your PC environment.

Other Necessary Items

Other than the FOMA terminal and a PC, the following hardware and software are necessary.

- FOMA USB Cable with Charge Function 01 (optional) or FOMA USB Cable (optional)
- Supplied CD-ROM "FOMA SO905i CD-ROM"

● This manual assumes that you use the FOMA USB Cable with Charge Function 01 (optional).
● Purchase the exclusive "FOMA USB Cable with Charge Function 01" or "FOMA USB Cable". A generic USB cable for a PC connection cannot be used because it has a different connector shape.
● If you use USB HUB, it may not work properly.

■ Definition of terms

● Administrator
An administrator is authorized access to all Windows XP, Windows 2000 Professional, and Windows Vista systems. At least one user with Administrator privilege is set for each PC. Normally, a user without Administrator privilege cannot install the FOMA communication configuration files. For more information on Administrator privilege, contact the manufacturer of your PC or a representative of Microsoft Corporation.

● APN (Access Point Name)
A character string used for identifying the Internet service provider host or in-house LAN for packet communication. For example, the APN of "mopera U" is "mopera.net".

● cid (Context Identifier)
A registration number available when you save a packet communication host (APN) in the FOMA terminal. You can save up to 10 numbers from one to 10 for the FOMA terminal.
Default cid of the FOMA terminal

Registration number (cid)	Host (APN)
1	mopera.ne.jp (mopera)
2	Undefined
3	mopera.net (mopera U)
4-10	Undefined

● DNS (Domain Name System)
DNS is a system that converts a domain name (example: nttdocomo.co.jp) into an IP address, which is used by a PC.

● IrDA (Infrared Data Association)
IrDA is an organization that establishes infrared communication-related standards.

● IrMC (Ir Mobile Communication)
Standards established for the purpose of data transfer between mobile phones and between PDAs (personal digital assistant). You can exchange phone numbers and schedule data between mobile phones or PDAs equipped with an IrMC-compliant infrared jack.

● OBEX (Object Exchange)
OBEX is one of the global standards for data communication. You can exchange data between OBEX-compliant mobile phones, PCs, digital cameras, and printers.

● QoS (Quality of Service)
Service quality technology that enables the user to use a communication line in accordance with requirements. If you are using the FOMA terminal, you can set the communication speed for connection.

● 通信設定最適化 (Optimizing the communication settings)
"通信設定最適化" is a "TCP parameter setting" tool that makes optimal use of TCP/IP transmission capabilities for packet communication on the FOMA network. To make the most of the communication performance of the FOMA terminal, you need to configure the communication settings using this software.

Preparations and Flow of Data Communication

The preparations required for performing packet and 64K data communication by connecting the FOMA terminal to a PC are given below.

Install the FOMA communication configuration files (P.4).

⬇

Connect the FOMA terminal to a PC (P.3).

⬇

Check the installed FOMA communication configuration files (P.5).

When you use the FOMA PC setup software

When you do not use the FOMA PC setup software

Install the FOMA PC setup software (P.7, 13).

⬇

Set a host.

Packet communication	64K data communication
• "mopera U" or "mopera" (P.9, 15)	• "mopera U" or "mopera" (P.10,16)
• Other provider (P.9, 15)	• Other provider (P.11, 17)

⬇

Perform communication (P.11, 17).

⬇

Start up communication software that is compatible with AT commands (P.18).

⬇

Set a host (P.18).

⬇

Set ON/OFF for the Notify caller ID (P.19).

⬇

Set up the dial-up network (P.19).

⬇

Perform the dial-up connection (P.23).

Connecting the FOMA Terminal to a PC

Connect the FOMA terminal to a PC when they are powered on.

● You need to set the USB mode setting of the FOMA terminal to [Communication mode].

1 Open the external connection terminal cover.

2 Insert the external connection connector of the FOMA USB Cable with Charge Function 01 (optional) into the external connection terminal of the FOMA terminal until it clicks.

3 Connect the USB connector of the FOMA USB Cable with Charge Function 01 to the USB terminal of the PC.

The FOMA terminal is connected to the PC and "⚎" is displayed on the FOMA terminal.

Insert the connector horizontally with the label side facing up.
External connection terminal
USB terminal USB connector External connection connector
FOMA USB Cable with Charge Function 01

■ Disconnecting the FOMA USB Cable with Charge Function 01

1 Make sure to pull out the FOMA USB Cable with Charge Function 01 horizontally while holding the release buttons pressed.

When you remove the FOMA USB Cable with Charge Function 01, "⚎" which is displayed on the FOMA terminal disappears.

Release buttons
Forcibly pulling out the FOMA USB Cable with Charge Function 01 may cause malfunction.

2 Pull out the FOMA USB Cable with Charge Function 01 from the USB terminal of the PC.

● Do not remove the FOMA USB Cable with Charge Function 01 during data communication. Doing so may cause malfunction, etc.

● It is after installing the FOMA communication configuration files that "⚎" appears on the FOMA terminal.

Installing the FOMA Communication Configuration Files

To connect the FOMA terminal to a PC using the FOMA USB Cable with Charge Function 01 (optional) and perform data communication, install the FOMA communication configuration files from this CD-ROM.

● A user with Administrator privilege can install the software.

When Using Windows XP

1 Set "FOMA SO905i CD-ROM" in the CD-ROM drive of the PC.

2 Click [データリンクソフト・各種設定ソフト] → [インストール] under "FOMA通信設定ファイル(USBドライバ)" (FOMA communication configuration files (USB drivers)).

The "SO905i_USB_Driver" folder appears.

3 Double-click [FOMAinst.exe].

The Terms of Use for FOMA SO905i USB Driver appears.

4 Check the contents and click [同意する] to accept the terms.

The screen for confirming the connection between the PC and FOMA terminal appears.

When you click [同意しない]
　　Installation is canceled.

5 Connect the FOMA terminal to the PC using the FOMA USB Cable with Charge Function 01.

When you click [キャンセル]
　　Installation is canceled.

6 Click [完了].

To install the FOMA byte counter
　　Keep installing the software continuously.

When Using Windows 2000 Professional

1 Set "FOMA SO905i CD-ROM" in the CD-ROM drive of the PC.

2 Click [データリンクソフト・各種設定ソフト] → [インストール] under "FOMA通信設定ファイル(USBドライバ)" (FOMA communication configuration files (USB drivers)).

The "SO905i_USB_Driver" folder appears.

3 Double-click [FOMAinst.exe].

The Terms of Use for FOMA SO905i USB Driver appears.

4 Check the contents and click [同意する] to accept the terms.

The screen for confirming the connection between the PC and FOMA terminal appears.

When you click [同意しない]
　　Installation is canceled.

5 Connect the FOMA terminal to the PC using the FOMA USB Cable with Charge Function 01.

When you click [キャンセル]
　　Installation is canceled.

6 Click [完了].

To install the FOMA byte counter
　　Keep installing the software continuously.

1 Set "FOMA SO905i CD-ROM" in the CD-ROM drive of the PC.

2 Click [データリンクソフト・各種設定ソフト] → [インストール] under "FOMA通信設定ファイル(USBドライバ)" (FOMA communication configuration files (USB drivers)).

The "SO905i_USB_Driver" folder appears.

3 Double-click [FOMAinst.exe].

The user account control window appears.

4 Click [許可].

The Terms of Use for FOMA SO905i USB Driver appears.

5 Check the contents and click [同意する] to accept the terms.

The screen for confirming the connection between the PC and FOMA terminal appears.

When you click [同意しない]
   Installation is canceled.

6 Connect the FOMA terminal to the PC using the FOMA USB Cable with Charge Function 01.

When you click [キャンセル]
   Installation is canceled.

7 Click [完了].

To install the FOMA byte counter
   Keep installing the software continuously.

Checking the Installed FOMA Communication Configuration Files

Confirm that the FOMA communication configuration files are installed properly.

● You need to connect the FOMA terminal and PC using the FOMA USB Cable with Charge Function 01 (optional) beforehand.

When Using Windows XP/Windows 2000 Professional

Example: When using Windows XP

1 Click [スタート] → [コントロールパネル] → [パフォーマンスとメンテナンス] → [システム].

When using Windows 2000 Professional
   Click [スタート] → [設定] → [コントロールパネル] and then double-click [システム].

2 Click the [ハードウェア] tab and then [デバイスマネージャ].

3 Click each device and confirm the name of the installed driver.

Device type	Driver name
Port (COM/LPT)	● FOMA SO905i Command Port ● FOMA SO905i OBEX Port
Modem	● FOMA SO905i
USB (Universal Serial Bus) controller	● FOMA SO905i

● The COM port number may be different depending on the PC.

When Using Windows Vista

1 Click [スタート] → [コントロールパネル] → [システムとメンテナンス] → [デバイスマネージャ].

The user account control window appears.

2 Click [続行].

3 Click each device and confirm the name of the installed driver.

Device type	Driver name
Port (COM/LPT)	● FOMA SO905i Command Port ● FOMA SO905i OBEX Port
Modem	● FOMA SO905i
Universal Serial Bus controller	● FOMA SO905i

● The COM port number may be different depending on the PC.

5

Uninstalling the FOMA Communication Configuration Files

- A user with Administrator privilege can uninstall the software.
- Before starting uninstallation, make sure to disconnect the FOMA terminal from the PC.

When Using Windows XP/Windows 2000 Professional

Example: When using Windows XP

1 Click [スタート] → [コントロールパネル] → [プログラムの追加と削除].

When using Windows 2000 Professional
Click [スタート] → [設定] → [コントロールパネル] and then double-click [アプリケーションの追加と削除].

2 Select [FOMA SO905i USB] and click [変更と削除].

The deletion confirmation window appears.

3 Click [はい].

The uninstallation of the FOMA communication configuration files starts.

4 Click [OK].

● When you failed to install the software or "FOMA SO905i USB" does not appear on the window in step 2, perform the following operations.
1. Set "FOMA SO905i CD-ROM" in the CD-ROM drive of the PC.
2. Click [スタート] → [マイコンピュータ].
3. Right-click the CD-ROM icon and click [開く].
4. Open the folders in the CD-ROM in the order of "SO905i_USB_Driver" → "Drivers" → "Win2k_XP".
5. Double-click [so905iun.exe].

When Using Windows Vista

1 Click [スタート] → [コントロールパネル] → [プログラムのアンインストール].

2 Select [FOMA SO905i USB] and click [アンインストールと変更].

The user account control window appears.

3 Click [続行].

The deletion confirmation window appears.

4 Click [はい].

The uninstallation of the FOMA communication configuration files starts.

5 Click [OK].

● When you failed to install the software or "FOMA SO905i USB" does not appear on the window in step 2, perform the following operations.
1. Set "FOMA SO905i CD-ROM" in the CD-ROM drive of the PC.
2. Click [スタート] → [コンピュータ].
3. Right-click the CD-ROM icon and click [開く].
4. Open the folders in the CD-ROM in the order of "SO905i_USB_Driver" → "Drivers" → "WinVista32".
5. Double-click [so905iun.exe].

About the FOMA PC Setup Software

To connect the FOMA terminal to a PC and perform packet or 64K data communication, various communication-related settings are necessary. If you use the FOMA PC setup software, you can perform the following settings very easily. You can also set up for packet or 64K data communication without using the FOMA PC setup software (P.18).

● かんたん設定 (Easy setup)

You can follow the guidance to create a dial-up connection for FOMA data communication. The optimization of the communication settings is performed at the same time.

● 通信設定最適化 (Optimizing the communication settings)

Before using FOMA packet communication, optimize the communication settings on the PC.
The optimization of the communication settings is necessary for the possible communication performance.

● 接続先(APN)の設定 (Host (APN) setting)

Perform the setting of a host (APN) required for packet communication.
Unlike in 64K data communication, a regular phone number is not used for a FOMA packet communication host. You must register in advance a host name called APN in the FOMA terminal for each host and specify this registration number (cid) in the host number field to connect.

- At the time of purchase, cid1 and cid3 are assigned to "mopera.ne.jp", a host (APN) for mopera and "mopera.ne.jp", a host (AP) for mopera U respectively. To connect to other provider or the corporate LAN, the host (APN) setting is necessary.

● If you have a FOMA PC setup software Ver.4.0.0 or earlier (hereinafter referred to as an old FOMA PC setup software) installed, uninstall it beforehand.

Setting Communication Using the FOMA PC Setup Software (When Using Windows XP/Windows 2000 Professional)

Installing the FOMA PC Setup Software

To use the FOMA PC setup software, install it from this CD-ROM.

- When you install the FOMA PC setup software, be sure to use the user account with Administrator privilege of the PC.
- Before starting installation, quit all programs that are running.
- Confirm that the FOMA communication configuration files are installed properly on the PC (P.5).

Example: When using Windows XP

1 Set "FOMA SO905i CD-ROM" in the CD-ROM drive of the PC.

2 Click [データリンクソフト・各種設定ソフト] → [インストール] under "FOMA PC設定ソフト" (FOMA PC setup software).

- When you click [インストール], a warning window as shown below may appear. This warning appears because of the security setting on the Internet Explorer, however, causing no problem for use.

When the "ファイルのダウンロード － セキュリティの警告" (File Download - Security Warning) window appears
　　Click [実行].

When the "Internet Explorer － セキュリティの警告" (Internet Explorer - Security Warning) window appears
　　Click [実行する].

3 Click [次へ].

The Terms of Use for the FOMA PC setup software appears.

4 Check the contents and click [はい] to accept the terms.

When you click [いいえ]
　　Installation is canceled.

5 Put a checkmark for [タスクトレイに常駐する] and click [次へ].

After installation of the FOMA PC setup software, the "通信設定最適化" (Optimizing the communication settings) icon is resident in the task tray.

- You can also change the resident setting for the "通信設定最適化" icon after installing the FOMA PC setup software.

6 Check the installation destination and click [次へ].

To change the installation destination
　　Click [参照], specify the desired installation destination, and click [次へ].

7 Check the name of the program folder and click [次へ].

To change the folder name
　　Enter a new folder name and click [次へ].

8 Click [完了].

When the installation is completed, the FOMA PC setup software operation window starts.

Uninstalling the FOMA PC Setup Software

Example: When using Windows XP

1 Quit the program that is running.

- Quit the "通信設定最適化" (Optimizing the communication settings) software. Right-click [通信設定最適化ソフト] in the task tray located in the lower right corner of the desktop window and click [終了].
- Quit the FOMA PC setup software. Click [終了] at the lower right corner of the software window.

2 Click [スタート] → [コントロールパネル] → [プログラムの追加と削除].

When using Windows 2000 Professional
Click [スタート] → [設定] → [コントロールパネル] and then double-click [アプリケーションの追加と削除].

3 Select [NTT DoCoMo FOMA PC設定ソフト] and click [削除].

4 Check the name of the program to be deleted and click [はい].

The program is uninstalled and deleted.

5 Click [完了].

The FOMA PC setup software is uninstalled.

When the communication settings are optimized
The following window appears. Normally, click [はい] to cancel optimization.

Preparations Before Making Various Settings

We recommend using "mopera U", which provides a broadband connection option for an Internet connection using the FOMA terminal. (You need to subscribe separately to this service.)

Users who want to connect to the Internet immediately may find it easy using "mopera".

To create an easy dial-up connection for FOMA, select/enter responses for the displayed questions in accordance with information of the "Connection method" and "Connection provider" you have selected. Before making the settings, make sure the FOMA terminal is connected to a PC and recognized properly (P.3, 5).

Example: When using Windows XP

1 Click [スタート] → [すべてのプログラム] → [FOMA PC設定ソフト].

When using Windows 2000 Professional
Click [スタート] → [プログラム] → [FOMA PC設定ソフト].

8

Easy Setup (Packet Communication)

- Note that packet communication could be expensive if you exchange large volumes of data such as viewing sites or Internet home pages that contain images or downloading files.

When Using "mopera U" or "mopera"

- When using "mopera", the maximum transmission/reception speed is 384kbps.

1 Start the FOMA PC setup software and click [かんたん設定].

2 Select [パケット通信（HIGH-SPEED対応端末）] and click [次へ].

3 Select [『mopera U』への接続] or [『mopera』への接続] and click [次へ].

When you select [『mopera U』への接続], the confirmation window for subscription appears. If you have already subscribed to "mopera U", click [はい].

4 Click [OK].

The host (APN) is loaded from the FOMA terminal. Wait for a few moments.

5 Enter a host name (any name) at [接続名] and click [次へ].

- You cannot enter half-width characters, "¥" "/" ":" "＊" "?" "<" ">" "|" """ and "!".
- When you use either "mopera U" or "mopera", your caller ID must be notified. For overseas use, select [設定しない(推奨)].
- "mopera" is only supported [PPP接続]. "mopera U" is supported both [PPP接続] and [IP接続]. For overseas use, select [IP接続].

6 Select a choice of accessible users and click [次へ].

You can connect with [ユーザID] and [パスワード] left blank.

7 Put a checkmark for [最適化を行う] and click [次へ].

The "HIGH-SPEED対応端末の確認" (Check the HIGH-SPEED-compatible terminal) window appears.

- If you have performed the optimization already, the window for optimization does not appear.

8 Click [はい].

9 Check the setting information and click [完了].

10 Click [OK].

- When you performed the optimization in step 7 to 8, you need to restart the PC.

When Using Other Providers

1 Start the FOMA PC setup software and click [かんたん設定].

2 Select [パケット通信（HIGH-SPEED対応端末）] for the connection type and click [次へ].

3 Select [その他] for the host and click [次へ].

4 Click [OK].

The host (APN) is loaded from the FOMA terminal. Wait for a few moments.

5 Enter a host name (any name) at [接続名].

- You cannot enter half-width characters, "¥" "/" ":" "＊" "?" "<" ">" "|" """ and "!".
- Select [PPP接続] for the connection type.
- Select [IP接続] for the connection type for overseas use.
- A connection to some access points may not be available depending on the connection type they provide.
- About whether you should notify your caller ID, follow the instruction of your provider.

■ Advanced setting (Setting of TCP/IP)

When you click [詳細情報の設定], the setting window of [IPアドレス] and [ネームサーバー] appears. If any entries are required as information for dialing up to your provider or office LAN, enter the appropriate addresses according to the provided instructions.

6 Click [接続先(APN)設定].

9

7 Click [追加] and set a host (APN) and click [OK].

Set 2 or a number between 4 and 10 for cid.

8 Select the newly added host (APN) and click [OK].

9 Click [次へ].

10 Select a choice of accessible users, set [ユーザID] and [パスワード], and click [次へ].

To set [ユーザID] and [パスワード], enter the appropriate information supplied by your provider accurately with careful attention to the letter case.

11 Put a checkmark for [最適化を行う] and click [次へ].
- If you have performed the optimization already, the window for optimization does not appear.

12 Check the setting information and click [完了].

13 Click [OK].
- When you performed the optimization in step 11, the window for confirming whether to restart the PC appears. Click [はい].

Easy Setup (64K Data Communication)

When Using "mopera U" or "mopera"

- Note that 64K data communication could be expensive if it is performed for a long period of time.

1 Start the FOMA PC setup software and click [かんたん設定].

2 Select [64Kデータ通信] and click [次へ].

3 Select [『mopera U』への接続] or [『mopera』への接続] and click [次へ].

When you select [『mopera U』への接続], the confirmation window for subscription appears. If you have already subscribed to "mopera U", click [はい].

4 Enter a host name (any name) at [接続名] and click [次へ].
- You cannot enter half-width characters, "\" "/" ":" "*" "?" "<" ">" "|" """ and "!".
- If [FOMA SO905i] is not set for [モデムの選択], select [FOMA SO905i].
- To connect to "mopera U" or "mopera", your caller ID must be notified. Select [186を付加する（通知する）].

5 Select a choice of accessible users and click [次へ].

You can connect with [ユーザID] and [パスワード] left blank.

6 Check the setting information and click [完了].

7 Click [OK].

1 Start the FOMA PC setup software and click [**かんたん設定**].

2 Select [64Kデータ通信] for the connection type and click [**次へ**].

3 Select [**その他**] for the host and click [**次へ**].

4 Enter dial-up information.

- About whether you should notify your caller ID, follow the instruction of the provider you use.

[**接続名**]:
　　Enter a host name (any name).
- You cannot enter half-width characters, "￥" "/" ":" "＊" "?" "<" ">" "|" """ and "!".

[**モデムの選択**]:
　　Select [FOMA SO905i].

[**電話番号**]:
　　Enter the line phone number of your provider.
- Enter information supplied by your provider accurately.

■ Advanced setting (Setting of TCP/IP)

When you click [詳細情報の設定], the setting window of [IP アドレス] and [ネームサーバー] appears. If any entries are required as information for dialing up to your provider or office LAN, enter the appropriate addresses according to the provided instructions.

5 Click [**次へ**].

6 Select a choice of accessible users, set [**ユーザID**] and [**パスワード**], and click [**次へ**].

To set [ユーザID] and [パスワード], enter the appropriate information supplied by your provider accurately with careful attention to the letter case.

7 Check the setting information and click [**完了**].

8 Click [OK].

Starting the Communication You Just Finished Setting Up

Connect the FOMA terminal to a PC before starting this operation.

Example: When using Windows XP

1 Double-click the connection icon on the desktop.

The communication starts.

To start from the Start menu
　Windows XP
　Click [スタート] → [すべてのプログラム] → [アクセサリ] → [通信] → [ネットワーク接続].
　Windows 2000 Professional
　Click [スタート] → [プログラム] → [アクセサリ] → [通信] → [ネットワークとダイヤルアップ接続].

2 Enter [**ユーザー名**] and [**パスワード**], and click [**ダイヤル**].

- You can connect with [ユーザー名] and [パスワード] left blank when using "mopera U" or "mopera".

The connection is established.

● The communication speed displayed on a PC may be different from the actual communication speed.
● An icon appears on the FOMA terminal during communication.

During packet communication (no data transmission)

During packet communication (with data transmission)

During 64K data communication

11

Disconnecting Communication

Sometimes, closing the Internet browser does not disconnect communication. To ensure the disconnection of communication, perform the following procedure.

1 Click the dial-up icon in the task tray.

2 Click [切断].

The connection is disconnected.

Dial-up icon

Optimizing the Communication Settings

The "通信設定最適化" (Optimizing the communication settings) software is a "TCP parameter setting" tool that makes optimal use of TCP/IP transmission capabilities for packet communication on the FOMA network. To make the most of the communication performance of the FOMA terminal, you need to configure the communication settings using this software.

● To connect to a PC overseas, you need to cancel the "通信設定最適化" (Optimizing the communication settings) first and then do it.

When Using Windows XP

You can optimize the settings for each dial-up connection.

1 Start the FOMA PC setup software and click [通信設定最適化].

To perform the operation from the task tray
Click "🖥" in the task tray.

2 Select [FOMA HIGH-SPEED対応端末（受信最大3.6Mbps）] or [FOMA端末（受信最大384kbps）] and click [最適化を行う].

● When using the HIGH-SPEED-compatible access point, select [FOMA HIGH-SPEED対応端末（受信最大3.6Mbps）]. If you select [はい] at the "HIGH-SPEED対応端末の確認" (Check the HIGH-SPEED-compatible terminal) window, all dial-up settings are optimized to support HIGH-SPEED. When there are multiple dial-up settings such as 64K data communication, make sure to be careful.

● When using the HIGH-SPEED non-compatible access point, select [FOMA端末（受信最大384kbps）].

When the system settings are optimized
If you need to cancel the settings because of some reasons such as connecting using other than the FOMA terminal, follow the same steps as in "Canceling the Optimization" (P.12 step 2 to 4).

3 Select the dial-up connection to be optimized and click [実行].

The system and dial-up settings are optimized.

4 Restart the PC in accordance with the instructions on the window.

The system settings are optimized.

Canceling the Optimization

Example: When using the HIGH-SPEED-compatible access point

1 Start the FOMA PC setup software and click [通信設定最適化].

To perform the operation from the task tray
Click "🖥" in the task tray.

2 Click [最適化を解除する].

To cancel the entire dial-up settings using the HIGH-SPEED non-compatible access point
Click [システム設定] and click [最適化を解除する].

To cancel each dial-up setting using the HIGH-SPEED non-compatible access point
Remove the checkmark from the host for which to cancel the optimization and click [実行] → [OK].

● Restart the PC to enable the cancellation of the optimization.

3 Click [OK].

4 Restart the PC in accordance with the instructions on the window.

The cancellation of the optimization is enabled.

When Using Windows 2000 Professional

1 Start the FOMA PC setup software and click [通信設定最適化].

To perform the operation from the task tray
Click "🖥" in the task tray.

2 Select [FOMA HIGH-SPEED対応端末(受信最大 3.6Mbps)] or [FOMA端末(受信最大384kbps)] and click [最適化を行う].

When the system settings are optimized
The message "現在、FOMA HIGH-SPEED対応端末用に最適化されています。" (The settings are optimized for the FOMA HIGH-SPEED-compatible terminal.) appears. To cancel the settings because of some reasons such as connecting using other than the FOMA terminal, click [最適化を解除する].

3 Restart the PC in accordance with the instructions on the window.

The system settings are optimized.

Host (APN) Setting

You can set a host (APN) for packet communication. Connect the FOMA terminal to a PC before starting this operation.

1 Start the FOMA PC setup software and click [接続先(APN)設定].

2 Click [OK].

The host (APN) is loaded from the FOMA terminal. Wait for a few moments.

3 Set a host (APN).

To add a host (APN)
Click [追加].
To edit (change) a host (APN)
Select a host (APN) and click [編集].
To delete a host (APN)
Select a host (APN) and click [削除].
- You cannot delete a host (APN) saved as [cid1] and [cid3]. (Even if you select [cid3] and click [削除], it is not actually deleted. The operation is returned to [mopera.net].)
To save data in a file
Click the [ファイル] menu → [上書き保存]/[名前を付けて保存].
To read data from a file
Click the [ファイル] menu → [開く] and select a saved file.
To read host (APN) data from the FOMA terminal
Click the [ファイル] menu → [FOMA端末から設定を取得].
To write host (APN) data to the FOMA terminal
Click the [ファイル] menu → [FOMA端末へ設定を書き込む].
To create dial-up
Select a host (APN) and click [ダイヤルアップ作成]. Set up a dial-up connection for packet communication in accordance with the instructions on the window.

● The host (APN) is information that must be saved in the FOMA terminal. When you use the PC with a different FOMA terminal connected, it is required to save it again in the new FOMA terminal.
● To continue using a host (APN) saved in the PC, save the registration number (cid) of the same host (APN) in the FOMA terminal.

Setting Communication Using the FOMA PC Setup Software (When Using Windows Vista)

Installing the FOMA PC Setup Software

To use the FOMA PC setup software, install it from this CD-ROM.

- When you install the FOMA PC setup software, be sure to use the user account with Administrator privilege of the PC. An error occurs when a user account without Administrator privilege is used. For more information on Administrator privilege, contact the manufacturer of your PC or a representative of Microsoft Corporation.
- Confirm that the FOMA communication configuration files are installed properly on the PC (P.5).

1 Set "FOMA SO905i CD-ROM" in the CD-ROM drive of the PC.

2 Click [データリンクソフト・各種設定ソフト] → [インストール] under "FOMA PC設定ソフト" (FOMA PC setup software).

- When you click [インストール], a warning window as shown below may appear. This warning appears because of the security setting on the Internet Explorer, however, causing no problem for use.

When the "ファイルのダウンロード － セキュリティの警告" (File Download - Security Warning) window appears
Click [実行].

The user account control window appears.

3 Click [続行].

4 Click [次へ].

The Terms of Use for the FOMA PC setup software appears.

5 Check the contents and click [はい] to accept the terms.

When you click [いいえ]
Installation is canceled.

6 Check the installation destination and click [次へ].

To change the installation destination
Click [参照], specify the desired installation destination, and click [次へ].

7 Check the name of the program folder and click [次へ].

To change the folder name
Enter a new folder name and click [次へ].

8 Click [完了].

When the installation is completed, the FOMA PC setup software operation window starts.

Uninstalling the FOMA PC Setup Software

1 Quit the program that is running.

Quit the FOMA PC setup software. Click [終了] at the lower right corner of the software window.

2 Click [スタート] → [コントロールパネル] → [プログラムのアンインストール].

3 Select [NTT DoCoMo FOMA PC設定ソフト] and click [アンインストール].

The user account control window appears.

4 Click [続行].

The deletion confirmation window appears.

5 Check the name of the program to be deleted and click [はい].

The program is uninstalled and deleted.

6 Click [完了].

The FOMA PC setup software is uninstalled.

Preparations Before Making Various Settings

We recommend using "mopera U", which provides a broadband connection option for an Internet connection using the FOMA terminal. (You need to subscribe separately to this service.)
Users who want to connect to the Internet immediately may find it easy using "mopera".
To create an easy dial-up connection for FOMA, select/enter responses for the displayed questions in accordance with information of the "Connection method" and "Connection provider" you have selected. Before making the settings, make sure the FOMA terminal is connected to a PC and recognized properly (P.3, 5).

1 Click [スタート] → [すべてのプログラム] → [FOMA PC設定ソフト].

Easy Setup (Packet Communication)

- Note that packet communication could be expensive if you exchange large volumes of data such as viewing sites or Internet home pages that contain images or downloading files.

When Using "mopera U" or "mopera"

When you use "mopera", the maximum transmission/reception speed is 384kbps.

1 Start the FOMA PC setup software and click [かんたん設定].

2 Select [パケット通信] and click [次へ].

3 Select [『mopera U』への接続] or [『mopera』への接続] and click [次へ].

When you select [『mopera U』への接続], the confirmation window for subscription appears. If you have already subscribed to "mopera U", click [はい].

4 Click [OK].

The host (APN) is loaded from the FOMA terminal. Wait for a few moments.

5 Enter a host name (any name) at [接続名] and click [次へ].

- You cannot enter half-width characters, "¥" "/" ":" "*" "?" "<" ">" "|" """ and "!".
- When you use either "mopera U" or "mopera", your caller ID must be notified. For overseas use, select [設定しない（推奨）].
- "mopera" is only supported [PPP接続]. "mopera U" is supported both [PPP接続] and [IP接続]. For overseas use, select [IP接続].

6 Set [ユーザID] and [パスワード] and click [次へ].

You can connect with [ユーザID] and [パスワード] left blank.

7 Check the setting information and click [完了].

8 Click [OK].

When Using Other Providers

1 Start the FOMA PC setup software and click [かんたん設定].

2 Select [パケット通信] for the connection type and click [次へ].

3 Select [その他] for the host and click [次へ].

4 Click [OK].

The host (APN) is loaded from the FOMA terminal. Wait for a few moments.

5 Enter a host name (any name) at [接続名].

- You cannot enter half-width characters, "¥" "/" ":" "*" "?" "<" ">" "|" """ and "!".
- Select [PPP接続] for the connection type.
- Select [IP接続] for connection type for overseas use.
- A connection to some access points may not be available depending on the connection type they provide.
- About whether you should notify your caller ID, follow the instruction of your provider.

■ Advanced setting (Setting of TCP/IP)

When you click [詳細情報の設定], the setting window of [IPアドレス] and [ネームサーバー] appears. If any entries are required as information for dialing up to your provider or office LAN, enter the appropriate addresses according to the provided instructions.

6 Click [接続先(APN)設定].

7 Click [追加] and set a host (APN) and click [OK].

Set 2 or a number between 4 and 10 for cid.

8 Select the newly added host (APN) and click [OK].

9 Click [次へ].

10 Set [ユーザID] and [パスワード] and click [次へ].

To set [ユーザID] and [パスワード], enter the appropriate information supplied by your provider accurately with careful attention to the letter case.

11 Check the setting information and click [完了].

12 Click [OK].

Easy Setup (64K Data Communication)

When Using "mopera U" or "mopera"

● Note that 64K data communication could be expensive if it is performed for a long period of time.

1 Start the FOMA PC setup software and click [かんたん設定].

2 Select [64Kデータ通信] and click [次へ].

3 Select [『mopera U』への接続] or [『mopera』への接続] and click [次へ].

When you select [『mopera U』への接続], the confirmation window for subscription appears. If you have already subscribed to "mopera U", click [はい].

4 Enter a host name (any name) at [接続名] and click [次へ].

● You cannot enter half-width characters, "¥" "/" ":" "＊" "?" "<" ">" "|" """ and "!".

● If [FOMA SO905i] is not set for [モデムの選択], select [FOMA SO905i].

● To connect to "mopera U" or "mopera", your caller ID must be notified. Select [186を付加する（通知する）].

5 Set [ユーザID] and [パスワード] and click [次へ].

You can connect with [ユーザID] and [パスワード] left blank.

6 Check the setting information and click [完了].

7 Click [OK].

1 Start the FOMA PC setup software and click [**かんたん設定**].

2 Select [**64Kデータ通信**] for the connection type and click [**次へ**].

3 Select [**その他**] for the host and click [**次へ**].

4 Enter dial-up information.

- About whether you should notify your caller ID, follow the instruction of the provider you use.

[**接続名**]:

Enter a host name (any name).

- You cannot enter half-width characters, "¥" "/" ":" "＊" "?" "<" ">" "|" """ and "!".

[**モデムの選択**]:

Select [FOMA SO905i].

[**電話番号**]:

Enter the line phone number of your provider.

- Enter information supplied by your provider accurately.

■ Advanced setting (Setting of TCP/IP)

When you click [詳細情報の設定], the setting window of [IP アドレス] and [ネームサーバー] appears. If any entries are required as information for dialing up to your provider or office LAN, enter the appropriate addresses according to the provided instructions.

5 Click [**次へ**].

6 Set [**ユーザID**] and [**パスワード**] and click [**次へ**].

To set [ユーザID] and [パスワード], enter the appropriate information supplied by your provider accurately with careful attention to the letter case.

7 Check the setting information and click [**完了**].

8 Click [OK].

Starting the Communication You Just Finished Setting Up

Connect the FOMA terminal to a PC before starting this operation.

1 Double-click the connection icon on the desktop.

The communication starts.

To start from the Start menu

Click [スタート]→[接続先] and select [すべて] at [表示]. Select a dial-up connection and click [接続].

2 Enter [**ユーザー名**] and [**パスワード**], and click [**ダイヤル**].

- You can connect with [ユーザー名] and [パスワード] left blank when using "mopera U" or "mopera".

When you allow the users other than yourself to connect

Put a checkmark for [次のユーザーが接続するとき使用するために、このユーザー名とパスワードを保存する] (Save this user name and password so that they can be used for further connections by other users) and select [このコンピュータを使うすべてのユーザー] (All users who use this computer).

The connection is established.

- The communication speed displayed on a PC may be different from the actual communication speed.
- An icon appears on the FOMA terminal during communication.

During packet communication (no data transmission)

During packet communication (with data transmission)

During 64K data communication

17

Sometimes, closing the Internet browser does not disconnect communication. To ensure the disconnection of communication, perform the following procedure.

1 Click the dial-up icon in the task tray.

2 Select the currently active dial-up connection and click [切断].

The connection is disconnected.

Dial-up icon

Host (APN) Setting

You can set a host (APN) for packet communication. Connect the FOMA terminal to a PC before starting this operation.

1 Start the FOMA PC setup software and click [接続先(APN)設定].

2 Click [OK].

The host (APN) is loaded from the FOMA terminal. Wait for a few moments.

3 Set a host (APN).

To add a host (APN)
Click [追加].
To edit (change) a host (APN)
Select a host (APN) and click [編集].
To delete a host (APN)
Select a host (APN) and click [削除].
● You cannot delete a host (APN) saved as [cid1] and [cid3]. (Even if you select [cid3] and click [削除], it is not actually deleted. The operation is returned to [mopera.net].)
To save data in a file
Click the [ファイル] menu → [上書き保存]/[名前を付けて保存].
To read data from a file
Click the [ファイル] menu → [開く] and select a saved file.
To read host (APN) data from the FOMA terminal
Click the [ファイル] menu → [FOMA端末から設定を取得].
To write host (APN) data to the FOMA terminal
Click the [ファイル] menu → [FOMA端末へ設定を書き込む].
To create dial-up
Select a host (APN) and click [ダイヤルアップ作成]. Set up a dial-up connection for packet communication in accordance with the instructions on the window.

● The host (APN) is information that must be saved in the FOMA terminal. When you use the PC with a different FOMA terminal connected, it is required to save it again in the new FOMA terminal.
● To continue using a host (APN) saved in the PC, save the registration number (cid) of the same host (APN) in the FOMA terminal.

Setting Communication without the FOMA PC Setup Software

The procedure for setting packet or 64K data communication without using the FOMA PC setup software is given below.
To perform the settings, communication software for entering AT commands is necessary. In this section, the "Hyper Terminal" preinstalled as a standard feature in the Windows is used for explanation.

Host (APN) Setting

Set a host (APN) for performing packet communication.

● If you are using "mopera U" or "mopera" as the packet communication host, you do not have to set a host for 64K data communication.

Example: When using Windows XP

1 Connect the FOMA terminal to a PC.

2 Click [スタート] → [すべてのプログラム] → [アクセサリ] → [通信] → [ハイパーターミナル].

Hyper Terminal is started up.

When using Windows 2000 Professional
Click [スタート] → [プログラム] → [アクセサリ] → [通信] → [ハイパーターミナル].

When using Windows Vista
Windows Vista does not support Hyper Terminal. Perform the same operations using other terminal software.

3 Enter any name at [名前] and click [OK].

4 Enter a dummy (nonexistent) phone number (such as "0") at [電話番号], select [FOMA SO905i] at [接続方法], and click [OK].

The connection window appears.

5 Click [キャンセル].

6 Enter a host (APN) and press ↵.

Input format
AT+CGDCONT=<cid>, "PPP", "APN" ↵

Enter the registration number 2 or a number between 4 and 10.   Enclose the host name you enter in double quotes.

If the AT command you entered is not displayed
Enter "ATE1 ↵".
When the host (APN) is set, "OK" appears.

7 Click the [ファイル] menu → [ハイパーターミナルの終了].

Hyper Terminal ends.
- When the message "現在、接続されています。切断してもよろしいですか？" (The line is connected. Are you sure you want to disconnect?) appears, select [はい].
- When using Windows XP, the message ""XXX" と名前付けされた接続を保存しますか？" (Do you want to save the connection named "XXX"?) appears. You do not need to save the connection.
- When using Windows 2000 Professional, the message "セッションXXXを保存しますか？" (Do you want to save session XXX?) appears. You do not need to save the session.

To reset a host (APN)
Input format
AT+CGDCONT=↵ (Reset all cid)
AT+CGDCONT=<cid>↵ (Reset a specific cid only)

To display a current host (APN)
Input format
AT+CGDCONT?↵

Setting ON/OFF for the Notify Caller ID

The caller ID is important personal information. Carefully decide whether you want to notify a recipient of your caller ID.
- The caller ID must be notified when you use "mopera U" or "mopera".

1 Perform step 1 to 5 in "Host (APN) Setting" (P.18).

2 Set ON/OFF for the Notify caller ID during packet communication.

Input format
AT＊DGPIR=<n>↵
1: Add "184" (OFF).
2: Add "186" (ON).

If the AT command you entered is not displayed
Enter "ATE1↵".
When ON/OFF for the Notify caller ID is set, "OK" appears.

■ ON/OFF setting of a dial-up network

You can add 186 (ON)/184 (OFF) to a host number even for a dial-up network setting (P.19).
When this setting is performed by both ＊DGPIR command and dial-up network setting, the following parameters are used.

Dial-up network setting (when <cid>=3)	＊DGPIR command setting		
	No setting	OFF	ON
＊99＊＊＊3#	ON	OFF	ON
184＊99＊＊＊3#	OFF		
186＊99＊＊＊3#	ON		

Dial-up Network Setting

When Using Windows XP

1 Click [スタート] → [すべてのプログラム] → [アクセサリ] → [通信] → [新しい接続ウィザード].

The new connection window appears.

2 Click [次へ].

3 Select [インターネットに接続する] and click [次へ].

4 Select [接続を手動でセットアップする] and click [次へ].

5 Select [ダイヤルアップモデムを使用して接続する] and click [次へ].

6 Put a checkmark in the checkbox of [モデム - FOMA SO905i] and click [次へ].
- The window for selecting the device appears only when there are several modems.

7 Enter any name at [ISP名] and click [次へ].

8 Enter a host number at [電話番号] and click [次へ].

For packet communication

For packet communication

Enter "＊99＊＊＊<cid>#". Enter the registration number of a host for <cid>.

For 64K data communication

Enter the phone number of a host.

9 Enter [ユーザー名], [パスワード], and [パスワードの確認入力] and click [次へ].

- You can connect with [ユーザー名] and [パスワード] left blank when using "mopera U" or "mopera".

10 Click [完了].

11 Click [スタート]→[すべてのプログラム]→[アクセサリ]→[通信]→[ネットワーク接続].

12 Select the created host icon and then click the [ファイル] menu → [プロパティ].

13 Check each item of the [全般] tab.

- When multiple modems are connected to a PC, put a checkmark only for [モデム - FOMA SO905i] at [接続方法].
- Remove the checkmark from [ダイヤル情報を使う].

14 Click the [ネットワーク] tab, check each item, and click [設定].

- Select [PPP:Windows 95/98/NT4/2000, Internet] for [呼び出すダイヤルアップサーバーの種類].
- Put a checkmark only for [インターネットプロトコル (TCP/IP)] at [この接続は次の項目を使用します]. Since you cannot change [QoSパケットスケジューラ], leave it as it is.

15 Remove all checkmarks and click [OK].

16 Click [OK].

The host and TCP/IP protocol are set.

When Using Windows 2000 Professional

1 Click [スタート] → [プログラム] → [アクセサリ] → [通信] → [ネットワークとダイヤルアップ接続].

The network and dial-up connection window appears.

2 Double-click the [新しい接続の作成] icon.

The location information window appears.

- The network connection wizard appears for the second time and later. Go to step 5.

3 Enter an area code at [市外局番] and click [OK].

The phone and modem option window appears.

4 Click [OK].

The network connection wizard appears.

5 Click [次へ].

6 Select [インターネットにダイヤルアップ接続する] and click [次へ].

7 Select [インターネット接続を手動で設定するか、またはローカルエリアネットワーク(ＬＡＮ)を使って接続します] and click [次へ].

8 Select [電話回線とモデムを使ってインターネットに接続します] and click [次へ].

9 Check whether [**インターネットへの接続に使うモデムを選択する**] is set to [FOMA SO905i] and click [**次へ**].

- This window may not appear on some operating environments of the PC. In this case, go to step 10.

10 Enter a host number at [**電話番号**] and click [**詳細設定**].

For packet communication
Enter "＊99＊＊＊<cid>#". Enter the registration number of a host for <cid>.
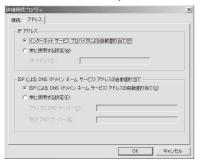

For 64K data communication
Enter the phone number of a host.

11 Set each item of the [**接続**] tab as shown on the window example.

12 Click the [**アドレス**] tab and set each item as shown on the window example.
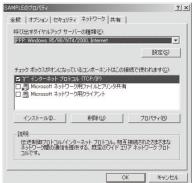

13 Click [OK].

14 Click [**次へ**].

15 Enter [**ユーザー名**] and [**パスワード**], and click [**次へ**].

- You can connect with [ユーザー名] and [パスワード] left blank when using "mopera U" or "mopera".

16 Enter a host name (any name) at [**接続名**] and click [**次へ**].

17 Select [**いいえ**] and click [**次へ**].

18 Remove the checkmark from [**今すぐインターネットに接続するにはここを選んで[完了]をクリックしてください**] and click [**完了**].

19 Select the created host icon and then click the [**ファイル**] menu → [**プロパティ**].

20 Check each item of the [**全般**] tab.

- When multiple modems are connected to a PC, put a checkmark only for [モデム - FOMA SO905i] at [接続方法].
- Remove the checkmark from [ダイヤル情報を使う].

21 Click the [**ネットワーク**] tab, check each item, and click [**設定**].

- Select [PPP:Windows 95/98/NT4/2000, Internet] for [呼び出すダイヤルアップサーバーの種類].
- Put a checkmark only for [インターネットプロトコル (TCP/IP)] for component.

22 Remove all checkmarks and click [OK].
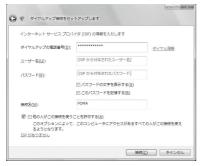

23 Click [OK].

The host and TCP/IP protocol are set.

1 Click [スタート]→[接続先].

2 Click [接続またはネットワークをセットアップします].

3 Select [ダイヤルアップ接続をセットアップします] and click [次へ].

4 Click [モデム - FOMA SO905i].
- The window for selecting the device appears only when there are several modems.

5 Enter a host number at [ダイヤルアップの電話番号].

For packet communication
Enter "＊99＊＊＊<cid>#". Enter the registration number of a host for <cid>.

For 64K data communication
Enter the phone number of a host.

6 Enter [ユーザー名] and [パスワード], enter any name at [接続名], and click [接続].
- You can connect with [ユーザー名] and [パスワード] left blank when using "mopera U" or "mopera".

The connecting window appears.

7 Click [スキップ].

8 Click [接続をセットアップします].

9 Click [閉じる].
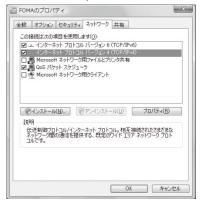

The new dial-up connection is created.

10 Click [スタート]→[接続先].

11 Right-click the icon of a created host and click [プロパティ].

12 Check each item of the [全般] tab.
- When multiple modems are connected to a PC, put a checkmark only for [モデム - FOMA SO905i] at [接続の方法].
- Remove the checkmark from [ダイヤル情報を使う].

13 Click the [ネットワーク] tab and check that the checkmark is put for [インターネットプロトコル バージョン4(TCP/IPv4)] at [この接続は次の項目を使用します].
- You may need to put checkmarks for other items depending on your provider or office LAN. Follow the instructions provided by the provider or the administrator of the office LAN to put checkmarks.

14 Click the [オプション] tab and click [PPP設定].

15 Remove all checkmarks and click [OK].

16 Click [OK].

The host and TCP/IP protocol are set.

Performing the Dial-up Connection

Connect the FOMA terminal to a PC before starting this operation.

Example: When using Windows XP

1 Click [スタート] → [すべてのプログラム] → [アクセサリ] → [通信] → [ネットワーク接続].

2 Double-click the host icon.

3 Check each item and click [ダイヤル].
- You can connect with [ユーザー名] and [パスワード] left blank when using "mopera U" or "mopera".

The connection is established.

- ● The communication speed displayed on the PC may be different from the actual communication speed.
- ● An icon appears on the FOMA terminal during communication.

During packet communication (no data transmission)

`Connecting`

During packet communication (with data transmission)

`Sending/receiving`

During 64K data communication

`Connecting 64K data`

Disconnecting the Dial-up Connection

Sometimes, closing the Internet browser does not disconnect communication. To ensure the disconnection of communication, perform the following procedure.

1 Click the dial-up icon in the task tray.

2 Click [切断].

The connection is disconnected.

Dial-up icon

AT Commands

AT commands are the commands (instructions) for setting and changing the functions of the FOMA terminal on a PC.

■ Input format of AT commands

Always enter an AT command by adding AT at the beginning of the command. Be sure to use half-width alphanumeric characters. An input example is given below.

ATD＊99＊＊＊3# ⏎

Return mark: Press Enter key. It separates the commands.
Parameter: Description of the command
Command: Command name

Always enter an AT command including a parameter (number and symbol) right after the command in one line. One line means the row of characters from the first character to the character immediately before pressing ⏎.

■ Input mode of AT commands

To operate the FOMA terminal using AT commands, set the PC to the terminal mode.

The terminal mode is used for operating a PC as a communication terminal. The characters entered from the keyboard are sent to the device connected to the communication port or the line.

● Offline mode

The FOMA terminal is in stand-by status. This mode is normally used when you operate the FOMA terminal using AT commands.

● Online data mode

The FOMA terminal is in the status where communication is in progress. If you enter an AT command in this status, the characters sent are sent to the destination in their original form and the modem at the destination may develop a trouble. Do not enter AT commands during communication.

● Online command mode

This mode allows you to operate the FOMA terminal using AT commands even if it is in the status where communication is in progress. In this case, an AT command is executed while the terminal remains connected to the destination. You can continue communication again after completion of the AT command execution.

● When placing a voice/videophone call or originating 64K data communication from an external device, if 2in1 is set to the A mode or Dual mode, it is done by Number A. When the B mode is set, it is done by Number B.

Switching between the Online Data Mode and Online Command Mode

You can use the following two methods to switch the FOMA terminal between the online data mode and online command mode.

● Enter the code set to "+++" command or "S2" register.
● Set the ER signal of RS-232C(※) to OFF when "AT&D1" is set.
  ※ Since the RS-232C signal line is emulated by a USB interface, RS-232C signal line control by the communication application is enabled.

To switch from the online command mode to the online data mode, enter "ATO ⏎".

AT Command List

AT commands that can be used for FOMA SO905i are listed below.

[&F] : Commands that have their settings initialized by the AT&F command.

[&W] : Commands that have their settings saved by the AT&W command. You can use the ATZ command to call back the setting value.

Command		Outline/Parameter	Input example
A/		Re-executes the last executed command.	A/
AT%V		Displays the version of the FOMA terminal in the "Verx.xx" format.	AT%V
AT&C<n>		Selects the operating conditions for the circuit CD signal to DTE.	AT&C1
	n=0	Always sets the CD signal to ON (When the parameter is omitted).	
[&F][&W]	n=1	Changes CD signal in accordance with the other party's modem status (Default).	
AT&D<n>		Selects the operation that takes place when the circuit ER signal received from DTE changes to ON/OFF.	AT&D1
	n=0	Ignores the ER signal state (Always ON) (When the parameter is omitted).	
	n=1	Sets the online command mode if the ER signal changes from ON to OFF.	
[&F][&W]	n=2	Sets the offline mode if the ER signal changes from ON to OFF (Default).	
AT&E<n>		Selects specification of the speed indication during connection.	AT&E1
	n=0	Displays the communication speed between wireless sections.	
[&F][&W]	n=1	Displays the communication speed between a PC and FOMA terminal (Default).	
AT&F<n>		Sets the AT command setting values of the FOMA terminal to default. When this command is executed during communication, the operation for disconnecting the communication is performed.	AT&F0
	n=0	Only n=0 can be specified (Can be omitted).	
AT&S<n>		Sets the control of the DR signal to be output by the FOMA terminal.	AT&S0
	n=0	Always sets the DR signal to ON (Default, when the parameter is omitted).	
[&F][&W]	n=1	Sets the DR signal to ON when the line is connected.	
AT&W<n>		Writes the current setting value to the FOMA terminal.	AT&W0
	n=0	Only n=0 can be specified (Can be omitted).	
AT＊DANTE		Displays the radio wave condition of the FOMA terminal in the "＊DANTE:m" format. m=0: Outside of the service area, m=1-3: Number of antennas displayed on the FOMA terminal (m=1: No or one antenna).	AT＊DANTE AT＊DANTE=?
AT＊DGANSM=<n>		Sets the Accept/Reject call to packet incoming call.	AT＊DGANSM=0 AT＊DGANSM? AT＊DGANSM=?
	n=0	Sets the Accept/Reject call setting to OFF (Default).	
	n=1	Sets the Reject call to ON.	
	n=2	Sets the Accept call to ON.	
AT＊DGAPL=<n>[,<cid>]		Sets a host (APN) that accepts a packet incoming call. The <cid> parameter defined by "+CGDCONT" is used as an APN. If <cid> is omitted, all cid are added/deleted.	AT＊DGAPL=0,1 AT＊DGAPL? AT＊DGAPL=?
	n=0	Adds an APN defined by <cid> to the Accept call list.	
	n=1	Deletes an APN defined by <cid> from the Accept call list.	
AT＊DGARL=<n>[,<cid>]		Sets a host (APN) that rejects a packet incoming call. The <cid> parameter defined by "+CGDCONT" is used as an APN. If <cid> is omitted, all cid are added/deleted.	AT＊DGARL=0,1 AT＊DGARL? AT＊DGARL=?
	n=0	Adds an APN defined by <cid> to the Reject call list.	
	n=1	Deletes an APN defined by <cid> from the Reject call list.	
AT＊DGPIR=<n>		Sets the Notify caller ID ON/OFF when sending/receiving data on packet communication.	AT＊DGPIR=0 AT＊DGPIR? AT＊DGPIR=?
	n=0	Uses an APN as it is (Default).	
	n=1	Adds "184" to an APN.	
	n=2	Adds "186" to an APN.	
AT＊DRPW		Displays the received power indicator of radio waves being received by the FOMA terminal in the "＊DRPW:m" format (m=0-75).	AT＊DRPW AT＊DRPW=?
AT+CEER		Displays the reason for disconnection of the last communication (P.28).	AT+CEER AT+CEER=?
AT+CGDCONT=[<cid>[,"PPP"[,"<APN>"]]]		Sets a host (APN) during outgoing packet transmission.	AT+CGDCONT=2,"PPP","abc"
	cid=1-10	Used for managing hosts (APN) saved in the FOMA terminal for packet communication	AT+CGDCONT= ※1 AT+CGDCONT=<cid> ※2
	APN=Arbitrary	Host-specific arbitrary character string that indicates a host	AT+CGDCONT? AT+CGDCONT=?

※1 Resets all cid to the default settings.　　　※2 Resets a specified cid to the default setting.

Command		Outline/Parameter	Input example
AT+CGEQMIN=[<cid.[,,<n>[,<m>]]]		Saves the criteria for permitting or not permitting QoS (Quality of Service) notified from the network when packet communication is established.	AT+CGEQMIN=2,,64,384
	cid=1-10	Used for managing hosts (APN) saved in the FOMA terminal for packet communication	AT+CGEQMIN=2,,64 AT+CGEQMIN=2,,,384 AT+CGEQMIN= ※1
	n=None/64	The minimum uplink communication speed (kbps) used between the FOMA terminal and the base station. None: Permits all speeds (Default). 64: Packet communication may not be connected in some cases.	AT+CGEQMIN=<cid> ※2
	m=None/384	The minimum downlink communication speed (kbps) used between the FOMA terminal and the base station. None: Permits all speeds (Default). 64: Packet communication may not be connected in some cases.	
AT+CGEQREQ=[<cid>]		Sets the QoS (Quality of Service) requested to the network when packet communication is originated.	AT+CGEQREQ= ※1 AT+CGEQREQ=<cid> ※2
	cid=1-10	Used for managing hosts (APN) saved in the FOMA terminal for packet communication	
AT+CGMR		Displays the version of the FOMA terminal in 16 digits.	AT+CGMR AT+CGMR=?
AT+CGREG=<n>		Sets whether the network registration status is notified.	AT+CGREG=1 AT+CGREG? AT+CGREG=?
	n=0	No notification (Default)	
[&F][&W]	n=1	Notifies the registration status inside/outside of the service area in the "+CGREG:<n>,<stat>" format. stat=0: Outside of the service area, stat=1: Inside of the service area (home), stat=4: Unknown, stat=5: Inside of the service area (visitor)	
AT+CGSN		Displays the manufacturing number of the FOMA terminal.	AT+CGSN AT+CGSN=?
AT+CLIP=<n>		Sets whether the sender's caller ID is displayed on a PC when receiving 64K data communication. When you enter "AT+CLIP?", "+CLIP:n,m" appears. m=0: Network setting that does not notify caller ID to the other party when originating 64K data communication, m=1: Network setting that notifies caller ID to the other party when originating 64K data communication, m=2: Unknown	AT+CLIP=0 AT+CLIP? AT+CLIP=?
	n=0	Does not display the sender's caller ID (Default, when the parameter is omitted).	
[&F][&W]	n=1	Displays the sender's caller ID.	
AT+CLIR=<n>		Sets whether the recipient is notified of your caller ID when you originate 64K data communication. When you enter "AT+CLIR?", "+CLIR:n,m" appears. m=0: CLIR is not executed (always notifies), m=1: CLIR is always executed (never notifies), m=2: Unknown, m=3: CLIR temporary mode (Default: No notification), m=4: CLIR temporary mode (Default: Notification)	AT+CLIR=0 AT+CLIR? AT+CLIR=?
	n=0	The terms of the CLIR service are applied (When the parameter is omitted).	
	n=1	No notification	
	n=2	Notification (Default)	
AT+CMEE=<n>		Sets the error report format of the FOMA terminal (P.28).	AT+CMEE=0 AT+CMEE? AT+CMEE=?
	n=0	Displays "ERROR" (Default, when the parameter is omitted).	
	n=1	Displays using the "+CME ERROR:xxxx" format (xxxx are numerics).	
[&F][&W]	n=2	Displays using the "+CME ERROR:xxxx" format (xxxx are characters).	
AT+CNUM		Displays the home station number of the FOMA terminal using the "+CNUM:,"home station number",type". type=129: Does not include the international access code +, type=145: Includes the international access code +	AT+CNUM AT+CNUM? AT+CNUM=?
AT+CR=<mode>		Sets whether the communication type is displayed before displaying "CONNECT" when the line is connected.	AT+CR=0 AT+CR? AT+CR=?
	mode=0	Does not display (Default, when the parameter is omitted).	
[&F][&W]	mode=1	Displays using the "+CR:serv" format. serv=SYNC: 64K data communication, serv=GPRS: Packet communication	
AT+CRC=<n>		Sets whether the extended result code is used when receiving a call.	AT+CRC=0 AT+CRC? AT+CRC=?
	n=0	Does not use (Default).	
[&F][&W]	n=1	Uses.	

※1 Resets all cid to the default settings. ※2 Resets a specified cid to the default setting.

Command		Outline/Parameter	Input example
AT+CREG=<n>		Sets whether the outside/inside of the service area information is displayed. When you enter AT+CREG?, the result is displayed in the "+CREG: <n>,<stat>" format. stat=0: Outside of the service area, stat=1: Inside of the service area (home), stat=4: Unknown, stat=5: Inside of the service area (visitor)	AT+CREG=1 AT+CREG? AT+CREG=?
	n=0	Does not display (Default).	
[&F][&W]	n=1	Displays.	
AT+GMI		Displays the name of the FOMA terminal manufacturer.	AT+GMI AT+GMI=?
AT+GMM		Displays the name of the FOMA terminal.	AT+GMM AT+GMM=?
AT+GMR		Displays the version of the FOMA terminal.	AT+GMR AT+GMR=?
AT+IFC=<n,m>		Sets the local flow control method between the PC and the FOMA terminal. n is used for setting the control of DCE by DTE while m is used for setting the control of DTE by DCE. When m is omitted, the same input value as DCE by DTE is used.	AT+IFC=2,2 AT+IFC? AT+IFC=?
	n=0	Does not perform flow control.	
	n=1	Performs XON/XOFF flow control.	
	n=2	Performs RS/CS (RTS/CTS) flow control (Default).	
	m=0	Does not perform flow control.	
	m=1	Performs XON/XOFF flow control.	
[&F][&W]	m=2	Performs RS/CS (RTS/CTS) flow control (Default).	
AT+WS46=<n>		Sets the radio network used by the FOMA terminal when originating communication.	AT+WS46=22 AT+WS46? AT+WS46=?
[&F][&W]	n=22	FOMA network (fixed value)	
AT¥S		Displays the command setting and S register data.	AT¥S
AT¥V<n>		Selects whether an extended result code is used when the connection is established.	AT¥V0
	n=0	Does not use an extended result code (Default, when the parameter is omitted).	
[&F][&W]	n=1	Uses an extended result code.	
ATA		Performs the receiving operation according to the mode received by the FOMA terminal.	
ATD		Originates packet or 64K data communication. For packet communication: Enter the command in the "ATD＊99＊＊cid#" format. When cid is omitted, cid=1 is set. If the command is entered in the format beginning with "ATD184＊99", then 184 (without caller ID) is added to an APN of the specified cid. (This condition also applies to 186.) For 64K data communication: Enter the command in the "ATD phone number" format. For originating a call by redial: Enter the command in the "ATDL" or "ATDN" format.	ATD＊99＊＊＊3#
ATE<n>		Sets whether characters sent from the PC are echoed back.	ATE0
	n=0	Does not echo back (When the parameter is omitted).	
[&F][&W]	n=1	Performs an echo back (Default).	
ATH		Disconnects packet or 64K data communication.	ATH
ATI<n>		Displays an identification code.	ATI0
	n=0	Displays "NTT DoCoMo" (When the parameter is omitted).	
	n=1	Displays the name of the FOMA terminal.	
	n=2	Displays the version of the FOMA terminal.	
ATO		Switches from the online command mode to the online data mode during communication.	ATO
ATQ<n>		Sets whether the result code is displayed on the PC.	ATQ1
	n=0	Displays (Default, when the parameter is omitted).	
[&F][&W]	n=1	Does not display.	
ATS0=<n>		Sets the number of rings sounded until the FOMA terminal automatically receives a call.	ATS0=0 ATS0?
	n=0	Does not automatically receive a call (Default, when the parameter is omitted).	
[&F][&W]	n=1-255	Number of rings	

Command		Outline/Parameter	Input example
ATS2=<n>		Sets an escape character.	ATS2=0 ATS2?
	n=0-126	43: Default, 0: When the parameter is omitted	
[&F]	n=127	Disables the escape operation.	
ATS3=<n>		Sets a carriage return (CR) character that can identify the end of an AT command character string. It is added to the end of the echoed back command character string and result code.	ATS3=13 ATS3?
[&F]	n=13	Default	
ATS4=<n>		Sets a line feed (LF) character. When the result code is displayed in alphabets, it is added after the carriage return (CR) character.	ATS4=10 ATS4?
[&F]	n=10	Default	
ATS5=<n>		Sets a backspace (BS) character that deletes the last character of input buffer during AT command input.	ATS5=8 ATS5?
[&F]	n=8	Default	
ATS6=<n>		Sets the pause time (seconds) until dialing. Although the register is set, the operation does not take place even if this command is used.	ATS6=5 ATS6?
[&F]	n=2-10	5: Default, when the parameter is omitted	
ATS8=<n>		Sets the pause time (seconds) until a comma dial is performed. Although the register is set, the pause time is fixed to 3 seconds even if this command is used.	ATS8=3 ATS8?
[&F]	n=1-255	60: Default, 121-255: Assumes 120	
ATS10=<n>		Sets the automatic disconnection delay time (1/10 seconds). Although the register is set, the operation does not take place even if this command is used.	ATS10=1 ATS10?
[&F][&W]	n=1-255	1: Default, when the parameter is omitted	
ATS30=<n>		Sets the waiting time (minutes) until communication is disconnected when no data is exchanged during 64K data communication.	ATS30=0 ATS30?
	n=0	Does not disconnect (Default, when the parameter is omitted).	
[&F]	n=1-255	Waiting time (minutes) until communication is disconnected	
ATS103=<n>		Sets a separator used when originating a call by adding an incoming call sub-address for 64K data communication.	ATS103=0 ATS103?
	n=0	＊ (When the parameter is omitted)	
	n=1	/ (Default)	
[&F]	n=2	￥	
ATS104=<n>		Sets a separator used when originating a call by adding an outgoing call sub-address for 64K data communication.	ATS104=0 ATS104?
	n=0	# (When the parameter is omitted)	
	n=1	% (Default)	
[&F]	n=2	&	
ATV<n>		Sets the display method for the result code.	ATV1
	n=0	Displays the result code using a numeric value (When the parameter is omitted).	
[&F][&W]	n=1	Displays the result code using text (Default).	
ATX<n>		Sets the busy tone and dial tone detection, and communication speed indication.	ATX1
	n=0	Without busy/dial tone detection, without speed indication (When the parameter is omitted)	
	n=1	Without busy/dial tone detection, with speed indication	
	n=2	Without busy tone detection, with dial tone detection, without speed indication	
	n=3	With busy tone detection, without dial tone detection, with speed indication	
[&F][&W]	n=4	With busy/dial tone detection, with speed indication (Default)	
ATZ		Sets the FOMA terminal settings to the contents of a volatile memory recorded by AT&W. When this command is executed during communication, the operation for disconnecting the line is performed.	ATZ
+++		Switches the FOMA terminal from the online data mode to the online command mode. The escape guard section is fixed to 1 second.	+++

List of Reasons for Disconnection

■ Packet communication

Value	Reason
27	An APN is not found or is incorrect.
30	Disconnected from the network.
33	Not signed up for packet communication.
36	Normal disconnection

■ 64K data communication

Value	Reason
1	A specified number is not found.
16	Normal disconnection
17	Cannot communicate because the other party is already in communication status.
18	Communication was originated but no response is returned within the specified time.
19	Cannot communicate because the recipient's terminal is ringing.
21	The recipient rejected the call.
63	Network service and option are not enabled.
65	An invalid processing speed has been specified.
88	A call was originated to or received by a terminal with different terminal attributes.

List of Error Reports

Numeric value indication	Text indication	Reason
10	SIM not inserted	UIM is not set.
15	SIM wrong	SIM (IC card equivalent to UIM) other than a DoCoMo product is inserted.
16	incorrect password	Wrong password
100	unknown	Unknown error

Result Codes

The result code is displayed in the text indication format (initial value) when the ATVn command is set to n=1 (P.27), while the result code is displayed in the numeric value format when it is set to n=0.

■ List of result codes

Numeric value indication	Text indication	Description
0	OK	Normal execution
1	CONNECT	Connected to the other party.
2	RING	There is an incoming call.
3	NO CARRIER	The line is disconnected.
4	ERROR	Cannot accept a command.
6	NO DIALTONE	Cannot detect a dial tone.
7	BUSY	During the detection of a busy tone
8	NO ANSWER	Connection timeout
100	RESTRICTION	The network is restricted. The communication network is congested. Retry later.
101	DELAYED	Call origination using the redial record is restricted.

■ Extended result codes

● &E0

Displays the connection speed between the FOMA terminal and the base station.

Numeric value indication	Text indication	Connection speed
121	CONNECT 32000	32,000bps
122	CONNECT 64000	64,000bps
125	CONNECT 384000	384,000bps
133	CONNECT 3648000	3,648,000bps

● &E1

Displays the connection speed between the FOMA terminal and a PC.

Numeric value indication	Text indication	Connection speed
5	CONNECT 1200	1,200bps
10	CONNECT 2400	2,400bps
11	CONNECT 4800	4,800bps
12	CONNECT 9600	9,600bps
16	CONNECT 19200	19,200bps
17	CONNECT 38400	38,400bps
18	CONNECT 57600	57,600bps
19	CONNECT 115200	115,200bps
20	CONNECT 230400	230,400bps
21	CONNECT 460800	460,800bps

● The displayed communication speed, which remains only for compatibility with a modem that has a conventional RS-232C interface, does not indicate the actual speed because the FOMA USB Cable with Charge Function 01 (optional) is used for connection between the FOMA terminal and a PC.

■ Communication protocol result codes

Numeric value indication	Text indication	Description
1	PPPoverUD	64K data communication connection
5	PACKET	Packet communication connection

■ Example of result code indication

● When ATX0 is set

When the connection is completed, only "CONNECT" is displayed regardless of the AT¥V command setting (P.26).

Text indication example	Numeric value indication example
ATD＊99＊＊＊3# CONNECT	ATD＊99＊＊＊3# 1

● When ATX1 is set※

● When ATX1 or AT¥V0 is set
When the connection is completed, indicated in "CONNECT <speed between the FOMA terminal and a PC>" format.

Text indication example	Numeric value indication example
ATD＊99＊＊＊3# CONNECT 460800	ATD＊99＊＊＊3# 1 21

● When ATX1 or AT¥V1 is set※
When the connection is completed, indicated in "CONNECT <speed between the FOMA terminal and a PC>PACKET<Host APN>/<Highest uplink speed (FOMA terminal → base station)>/<Highest downlink speed (FOMA terminal ← base station)>" format.

Text indication example	Numeric value indication example
ATD＊99＊＊＊3# CONNECT 460800 PACKET mopera.net/384/3648	ATD＊99＊＊＊3# 1 21 5

(Indicates that the uplink connection is made using 384kbps maximum and the downlink connection is made using 3,648kbps maximum to mopera.net.)

※ When ATX1 and AT¥V1 are set simultaneously, the dial-up connection may not be performed correctly. We recommend using AT¥V0 only.

FOMA® SO905i

Kuten Code List

In the following Kuten code list, a 4-digit kuten code is expressed by the combination of the row for the first three digits and the column for the last digit.

Example: When you wish to input “★” (corresponding to kuten code “0190”), locate it in the Kuten code list and determine the kuten code for it from its row (“019”) and column (“0”).

※ The display of the Kuten code list may be different from the actual display.
