PHILIPS

English

- Important**
- Before connecting the appliance check that the voltage selector setting corresponds to the local mains voltage.
 - Keep away from water! Do not use this product near or over water contained in baths, washbasins, sinks, etc. If, for some reason, the product has fallen into water: first unplug immediately. Then, dispose of the product. It must not be used again.
 - Even when the hair dryer is switched off, the power is still on. Always pull out the mains plug when not in use.
 - Never obstruct the air grills.
 - This product is equipped with an automatic overheating protection device. If the appliance overheats, it will switch off. Unplug the appliance. After cooling down for a few minutes, the appliance can be used again. Before reusing, check the inlet and outlet grilles for possible blockage by fluff, hair, etc. If in doubt, consult your dealer or a Philips Service Centre.
 - If the mains cord of this appliance is damaged, it must only be replaced by Philips or their service representative, as special tools and/or parts are required.
 - For examination or repairs always return the appliance to an authorised Philips service centre. Unqualified repair work can lead to extreme hazards for the user.

General description (please refer to illustration)

- Voltage selector
- Collapsible handle
- Push button switch
- Switch indicator
- "Concentrator" nozzle
- Hanging loop
- "Auto Sensor" sensitive area
- "Auto Sensor" pilot light

Voltage selector

Prior to first use, check that the appliance is adjusted to the local mains voltage. Do not forget to check the voltage selector when taking the appliance with you on a journey and when coming back; it may be necessary to change the setting (using e.g. a coin).

- Setting 240: suitable for mains voltages in the range 220-240 V AC.
- Setting 110: suitable for mains voltages in the range 110-125 V AC.

Switch

Off: Gentle and warm air flow for easy styling.
II: High temperature and strong air flow for quick drying.

"Concentrator" nozzle

The "concentrator" nozzle may be fitted to the air outlet opening for directing the airflow e.g. when using curlers.

"Auto Sensor" sensitive area

If the appliance is connected and switched on (i.e. switch C in positions I or II), "Auto Sensor" automatically activates the dryer when picking it up... and switches it back to stand-by position when putting it down!

"Auto Sensor" pilot light

Pilot light off = appliance is switched off and/or not connected; Pilot light flashes = appliance is connected and switched on, but not activated (i.e. not held in the hand); Pilot light on = appliance is connected, switched on and also activated (i.e. being held in the hand).

Non-rewirable mains plug (for U.K. only)

This appliance is supplied with a non-rewireable 13 Ampere fused plug. The plug must never be used without the fuse cover being in place. If a replacement fuse cover is required it must be of the same type or colour as the coloured insert around the fuse cover. Only fit a 13 Ampere BS1 or ASTA BS 1362 approved replacement fuse.

Always refit the fuse cover after changing the fuse. Replacement fuse covers are available from Electrical Retailers or direct from Philips, tel. No. 081 - 689 - 2166 Ext. 8014.

Important safety information

If the supplied non-rewireable plug is not suitable for the socket outlets in your home it can be removed and an appropriate one fitted. (See below.)

Warning: The non-rewireable plug must be cut from the mains cord, the fuse removed, and the plug safely discarded to prevent further use. The removed plug can be hazardous if inserted into a live mains socket.

Wiring instructions U.K. "IMPORTANT"

The wires in the mains lead are coloured in accordance with the following code:

Blue - neutral

Brown - live

As the colours of the wires in the mains lead of this appliance may not correspond with the markings identifying the terminals in your plug, proceed as follows: The wire which is coloured Blue must be connected to the terminal which is marked with the letter "N" or coloured Black.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter "L" or coloured Red.

DO NOT CONNECT either of these wires to the earth terminal in the plug which is marked with the letter "E" or by the earth symbol + or coloured GREEN, or GREEN AND YELLOW.

Note: If the terminals of the plug are unmarked or if you are in any doubt consult a qualified electrician. If a (BS 1363) 13 amp. plug is used this must be fitted with a 13 amp. fuse.

Guarantee and service

This product is guaranteed by Philips for a period of **one year** after the date of purchase against defects due to faulty workmanship or materials. The guarantee covers both piece parts and labour. Service under guarantee is only provided upon presentation of reasonable evidence (e.g. completed guarantee card or purchase receipt) that the date of the claim is within the guarantee period.

The guarantee is not valid if the defect is due to accidental damage, misuse or neglect and in case of alterations or repair carried out by unauthorised persons.

Service (during and after guarantee) is available in all countries where the product is officially distributed by Philips. In countries where Philips do not distribute the product, the local Philips service organisation will also arrange service although there may be a delay if the required spare parts are not readily available.

In the event of difficulty please contact: Philips Domestic Appliances and Personal Care B.V. Service Department, P.O. Box 225, 9700 AE Groningen, The Netherlands. Fax: +31.50.138016.

This product is manufactured to comply with the radio interference requirements of the Council Directive 87/308/EEC.

Français

Important

- Avant de brancher votre appareil assurez-vous que la tension affichée sur le sélecteur de tension correspond à celle de votre logement.
- Évitez tout contact de l'appareil avec l'eau. N'utilisez pas l'appareil près ou au-dessus du lavabo ou de la baignoire.
- Si pour une raison quelconque l'appareil tombe dans l'eau: avant tout, débranchez la prise de courant. Reliez alors l'appareil de l'eau. Il ne doit pas être utilisé à nouveau.
- Arrêtez toujours l'appareil avant de le poser même pour un court instant. Débranchez la prise en cas de non-utilisation prolongée.
- N'obstruez jamais les grilles d'aération.
- Votre appareil est équipé d'une sécurité thermique. En cas de surchauffe, l'appareil s'arrêtera automatiquement. Dans ce cas, débranchez la prise de courant et attendez quelques minutes que l'appareil refroidisse. Vous pourrez le réutiliser à nouveau après vous être assuré que les grilles d'entrée d'air ne sont pas obstruées par des cheveux ou des peluches. En cas de doutes, consultez votre revendeur.
- Si le cordon secteur de votre appareil est endommagé, il doit impérativement être remplacé par un réparateur indépendant agréé Philips car des équipements et des composants spécifiques sont exigés.
- Rapportez votre appareil toujours chez votre revendeur ou station service agréée Philips. Une réparation par des personnes non qualifiées peut être dangereuse pour l'utilisateur.

Description générale (voir illustration)

- Sélecteur de tension
- Sélecteur de tension
- Poignée escamotable
- Interrupteur poussoir
- Témoin lumineux
- Concentrateur d'air
- Anneau de suspension
- Auto-sensor (poignée sensible)
- Auto-sensor (témoin lumineux)

Sélecteur de tension

Avant chaque utilisation, vérifiez bien que la tension affichée correspond à la tension locale. N'oubliez pas que lors de la première utilisation, il peut être nécessaire de modifier la tension (à l'aide d'une pièce par exemple).

- Setting 240: suitable for mains voltages in the range 220-240 V AC.
- Setting 110: suitable for mains voltages in the range 110-125 V AC.

Interrupteur

O = Arrêt: II = Froid: après avoir mis en forme votre coiffure avec une brosse ou un peigne, vous pouvez fixer les boucles à l'aide d'un jet d'air froid.

II = Chaud: permet de sécher les cheveux rapidement.

Concentrateur d'air

Cet accessoire peut être fixé sur la sortie d'air du séche-cheveux, afin mieux concentrer l'air sur les cheveux, par exemple lorsque vous portez des bigoudis.

"Auto-sensor" poignée sensible

Lorsque l'appareil est connecté au réseau et que l'interrupteur (C) se trouve sur la position I ou II, l'"auto-sensor" est activé.

Il permet la mise en marche dès que l'appareil est pris en main ou l'arrêt dès qu'il est reposé !

"Auto-sensor" témoin lumineux

Témoin lumineux éteint = arrêt

Témoin lumineux clignotant = appareil sous tension, mais pas de chauffage ni de ventilation (poignée tenue en main)

Témoin lumineux allumé = appareil en marche, air chaud ou ventilation (poignée tenue en main).

"Auto-sensor" positionen:

I = Aus

II = Schwacher Luftstrom von angenehmer Wärme zum bequemen Frisieren.

III = Starker Luftstrom von hoher Temperatur zum schnellen Trocknen.

Konzentrator-Düse

Diese Düse kann auf das Gerät aufgesetzt werden, um den Luftstrom z.B. beim Wellen des Haars zu bündeln.

Auto-Sensor

Einschaltertem Gerät (Ein-/Ausschalter (C) auf Position I oder II) setzt der Auto-Sensor das Gerät in Betrieb, sobald Sie es aufnehmen ... und schaltet es aus, wenn Sie es niedergelegt!

"Auto-Sensor" témoin lumineux

Diese Düse kann auf das Gerät aufgesetzt werden, um den Luftstrom z.B. beim Wellen des Haars zu bündeln.

Kontrolllampe für den Auto-Sensor

Kontrolllampe aus = Das Gerät ist ausgeschaltet und/oder der Stecker ist nicht in der Steckdose.

Kontrolllampe blinkt = Das Gerät ist ans Netz angeschlossen und eingeschaltet, aber nicht in Betrieb.

- Stand 240: geschikt voor netspanningen van 220-240 V.

- Stand 110: geschikt voor netspanningen van 110-125 V.

Schakelaar

Standen: O: Ut

I: Zachte luchtstroom en prettige warmte voor gemakkelijk modeleren.

II: Hoge temperatuur en sterke luchtstroom voor snel drogen.

"Concentrator"-mondstück

Het "concentrator"-mondstuk kan op het apparaat gezet worden om de luchtstroom te richten, bijvoorbeeld wanneer u haarkrullen gebruikt.

"Auto Sensor" gevoelige zone

Als het apparaat is aangesloten en ingeschakeld (met schakelaar in stand I of II), stelt de "Auto Sensor" de haardroger in werking zodra deze optakt...

en schakelt het apparaat weer in de ruststand als u het neerlegt!

"Auto Sensor" controllampje

Controlelampje uit = apparaat is uitgeschakeld en/of niet aangesloten.

Controlelampje knippert = apparaat is aangesloten en ingeschakeld, maar niet in werking gesteld (dus wordt niet in de hand gehouden).

Controlelampje aan = apparaat is aangesloten en ingeschakeld, en ook in werking gesteld (dus wordt wel in de hand gehouden).

Garantie en service

Dit product wordt door Philips gedurende één jaar na de datum van aankoop gegarandeerd tegen gebreken als gevolg van materieel- en fabricagefouten. De garantie omvat zowel onderdelen als arbeidsloon.

Reparatie wordt alleen onder garantie uitgevoerd indien overtuigend wordt aangetoond (bijvoorbeeld door middel van een ingevulde garantiekaart of aankoopbon) dat dat de garage of klacht is ingediend binnen de garantieperiode van.

De garantie vervalt indien het defect is ontstaan door schade als gevolg van een ongeluk, onjuist gebruik, verwaarlozing, of indien er ingrepen zijn verricht of reparatie is uitgevoerd door daartoe niet bevoegde personen.

Service (tijdens en na de garantieperiode) kan worden verkregen in alle landen waar het product officieel door Philips wordt gedistribueerd.

Ook in landen waar het product niet door Philips wordt gedistribueerd, zal de plaatselijke Philips organisatie service verlenen. Er zal echter enige vertraging kunnen optreden wanneer de juiste reserve-onderdelen niet direct beschikbaar zijn.

- Vigtigt!**
- Før hårtorrenen tages i brug, kontrolleres det, at spændingsomskifteren **A** er sat i en stilling, der svarer til den lokale netspænding.
 - Brug aldrig hårtorren i nærheden af vand eller over vand i eks. badekar, håndvask etc.
 - Hvis apparatet ved en fejltagelse er faldet ned i vand, tages stikket øjeblikkeligt ud af stikkontakten. Smid derefter hårtorren væk, den må ikke anvendes igen.
 - Selvom der er slukket for hårtorren, er der stadig strøm på den. Træk derfor altid stikket ud af stikkontakten når apparatet ikke bruges.
 - Blokér aldrig for hårtorrens luftind- og udtag.
 - Apparatet er forsynet med en automatisk beskyttelsesmechanisme mod overophedning. Hvis hårtorren bliver for varm, slukker den automatisk. Træk stikket ud af stikkontakten. Efter nogle få minutters afkøling kan hårtorren bruges igen. Kontroller dog først, at luftind- og udtag ikke er blokeret af fugt, hår eller lignende. Hvis De er i tvivl, kontakt da Dereks forhandler eller Philips.
 - Hvis hårtorrens ledning er beskadiget, skal De henvende Dem til Philips, der kræver specialværktøj og/eller specielle dele til udskiftning af ledningen.
 - Hvis hårtorren skal undersøges eller repareres, henvend Dem da til Philips. Ufagligt og dårligt reparationsarbejde kan udsejte Dem for stor fare ved brug af apparatet.

Generel beskrivelse (se illustration).

- Spændingsomskifter.
- Sammenklappelig håndtag.
- Trykknop-omskifter.
- Omskifter-indikator.
- Fønneb.
- Opbevaringssoje.
- Auto-Sensoren virksomme område.
- Kontrollampe for Auto-Sensoren.

Spændingsomskifter **A**.
Før hårtorren tages i brug kontrolleres det, at spændingsomskifteren er sat i en stilling, der svarer til den lokale netspænding. Husk at kontrollere omskiftersætningen, når hårtorren er taget med på rejser, og når De kommer tilbage igen. Det kan være nødvendigt at ændre på omskifteren (ved hjælp af en meni eller lign.).
Stilling 240: Anvendes til netspændinger mellem 220-240V a.c.
Stilling 110: Anvendes til netspændinger mellem 110-125V a.c.

Omskifter **B** -stilleren.
I: Skansom, varm luftstrøm til let hårbehandling.
II: Høj temperatur og kraftig luftstrøm til hurtig hårtørring.

Fønneb **C**.
Fønnebbet kan monteres på hårtorrens luftudtag, hvis der ønskes direkte luftstrøm til hårbehandlingen.

Auto-Sensoren virksomme område **D**.
Hvis hårtorren er forbundet til stikkontakten, og der er tændt for den (omskifteren (C) stilling "I" eller "II"), tænder Auto-Sensoren automatisk for hårtorren, når man tager den op i hånden og.....

skifter den tilbage til "stand-by"-stilling, når man lægger den fra sig!

Kontrollampe for Auto-Sensoren **E**.
Kontrollampen **slukket** = Hårtorrenen er slukket og/eller ikke forbundet til stikkontakten.

Kontrollampen **blinker** = Hårtorren er forbundet til stikkontakten, og der er tændt for den, men den blæser ikke (= er i "stand-by"-stilling, fordi den ikke holdes i hånden).

Kontrollampen **lyser** = Hårtorren er forbundet til stikkontakten, der er tændt for den, og den blæser (= den holdes i hånden).

Garanti og Service

På dette produkt yder Philips 1 års garanti regnet fra købsdato. Garantien dækker fabrikations- og materialefejl og omfatter både reservedele og arbejdsløn. Service under garantien ydes kun såfremt det kan dokumenteres at produktet, på tidsprænt for reklamationen, er inden for garantiperioden (korrekt udfyldt garantisbevis eller maskinstemplet kassebon med dato og præcisat).

Garantien dækker ikke såfremt apparatet har været misbrugt, tabt, dærtig vedligeholdt eller hvis ændring/reparation har været udført af andre end Philips. Service (under og efter garantien) kan ydes i alle lande hvor produktet er markedsført af Philips. I lande hvor dette ikke er tilfældet vil den lokale Philips-serviceorganisation også yde service, men der må forventes en længere reparationstid hvis de nødvendige reservedele ikke leveres i det pågældende land.

I tilfælde af problemer kan De eventuelt kontakte:
