12. Speaker

Charging

1. Connect the player to your computer using the included USB cable.

2. Charge the battery between 3-5 hours. Do not charge for more than 8 hours.

3. The green battery in the lower right corner of the charing screen is the battery level indicator.

Battery level indicator:

- indicates that the battery is full.

- indicates low battery; the player should be charged as soon as possible.

Important: Charge the player for at least 8 hours before using it for the first time.

Basic operation

Power on/off
• To turn on the player, make sure the **[ON/OFF]** switch is in the "ON" position and press and HOLD the **[MAIN]** button until the display lights up.

• To turn off the player, press and HOLD the **[MAIN]** button until the display shuts off, or slide the **[ON/OFF]** switch to the "OFF" position (shutting the player this way is quicker but the last changes in the settings, or last played song will not be saved).

Transferring media files to the player

1. Find music, picture, or video files on your computer.

IMPORTANT: *Do not disconnect the MP3 Player from the PC while transferring files as doing so will damage the MP3 Player and your files.*

ⓘ *It is also possible to delete files on the player while connected to the computer. Select the file and press the delete key of the computer's keyboard.*

2. Connect the MP3 Player to your computer, and locate **"MP3"**.
3. Drag or copy the files as shown below (do not drag or copy files into the **"RECORD"** folder).

Drag or copy files here
(do not drag the files into the "RECORD" folder)

Locate "MP3"

When you are done, disconnect your MP3 Player from the computer using the "**Safe Device Removal**" utility in the taskbar.

NOTE: *Screenshots above may be slightly different than your computer's operating system.*

Main Menu

To navigate the main menu

Troubleshooting

Can not power on
• The battery may be exhausted, please recharge the battery.

Files can not be transferred to the player
• Check if the driver is installed correctly in the computer by disconnecting and then reconnecting the player to the computer
• Check the connection between the player and PC, and confirm the USB cable is properly connected.

No sound from the headphones
• Please ensure the volume is turned up, and the \ headphones are properly connected.
• Check if the format of music file is supported by the player.

Can not record
• Check if there is enough memory and battery capacity.

Display is in the wrong language
• Please ensure you selected the correct language from the "Settings" menu.

I cannot display my .jpg files
• Many digital cameras and image editing softwares add hidden data to the .jpg files. This data can prevent the player from loading the images. Try to eliminate them by saving the file with another name.
