## HOW SHARP AIR PURIFIER WORKS

An air purifier draws in room air from its air intake, lets the air pass through an Active Carbon Filter (Deodorizing Filter) and a HEPA Filter (dust collection filter) inside the unit, then discharges the air from its air outlet. The air purifier repeats this process by moving its internal fan.

As air passes through, the HEPA Filter can remove dust particles. The Active Carbon Filter gradually absorbs odour elements as they repeatedly pass through the filter. (Odour elements are absorbed by HEPA Filter as well.)

Some odour ingredients absorbed by the filters may become separated and may be discharged through the air outlet and result in additional odour. Depending on the usage environment, this odour may become strong in a shorter period than expected. In this case, purchase the optional replacement filter kit FZ-28SEF.

### NOTE

The air purifier is designed to remove air-suspended dust and odour, but not harmful gases (for example, carbon monoxide contained in cigarette smoke). Neither can it completely remove odours that are always present (for example, odours from construction materials and pet odours).

**WARNING** - To reduce the risk of electrical shock, fire or injury to persons:

- Read all instructions before using the air purifier.
- Use only a 220 volt outlet .
- **Do not use the air purifier if the power cord or plug is damaged or the connection to the wall outlet is loose.**
- Periodically remove dust from the power plug.
- **Do not insert fingers or foreign objects into the intake or air outlet.**

**When removing the power plug, always hold the plug and never pull the cord.**

Electrical shock and/or fire from short circuit may occur as result.

- **Do not use this air purifier near gas appliances or fireplaces.**
- **Remove the power plug from the wall outlet before cleaning the unit and when not using the unit.**

Electrical shock from bad insulation and / or fire from short circuit may occur as a result.

- **If the power cord is damaged, it must be replaced by the manufacturer, its service agent, Sharp authorized service or similarly qualified person in order to avoid a hazard.**
- Do not operate when using aerosol insecticides or in rooms where there is oily residue, incense, sparks from lit cigarettes, chemical fumes in the air or a humidity condition.
- Use care when cleaning the air purifier. Strong corrosive cleansers may damage the exterior.
- Only Sharp Authorized Servicers should service this air purifier. Contact the nearest Servicer for any problems, adjustments, or repairs.
- The batteries must be removed from the remote control before disposal, and the batteries must be disposed safely.

## CAUTIONS CONCERNING OPERATION

- Do not block the intake and air outlet.
- Do not use the unit near or on hot objects, such as range or where it may come into contact with steam.
- **Always hold the main unit when moving it.**  
Holding the front panel when carrying may cause it to detach, thus dropping the unit and resulting in bodily injury.
- **Do not operate the unit without the filter.**
- **Do not wash the Active Carbon Filter and the HEPA Filter.**  
Not only it does not improve filter performance, it may cause electric shock or malfunction.
- **Clean the exterior with a soft cloth only.**  
The unit surface may be damaged or cracked.  
In addition, the sensor may malfunction as a result.

## REMOTE CONTROL LIMITATIONS

### DO NOT USE THE REMOTE CONTROL IN THE FOLLOWING LOCATIONS:

- **Any location where there is inverter lighting equipment or electronic spontaneous lighting equipment**  
The remote control may become inoperative. In this case, move away from such lighting equipment or change direction.
- **Location exposed to direct sunlight or fluorescent.**  
The unit may not receive signals from the remote control.

## CAUTIONS WHEN MOUNTING THIS PRODUCT ON A WALL

- **Avoid a location where the sensor is exposed to direct wind.**  
The unit may not operate properly.
- **Avoid a location where curtains, etc., come into contact with the intake or air outlet.**  
Curtains, etc., may become dirty or a malfunction may occur.
- **Avoid locations where the unit is exposed to condensation, due to drastic temperature changes.**
- **Place on a stable surface with sufficient air circulation.**
- **Install the unit on a wall, wooden pillar, crosspiece, etc. that is flat and strong enough.**
- **Do not install the unit on a thin wall or on plasterboard. The unit may fall down if installed on an insufficiently strong wall.**
- **To install the unit on a wooden wall that is less than 10 mm thick, consult your dealer and have them confirm the strength of the wall before installation.**
- **Always hold the main unit when moving it.**  
Holding the front panel may cause it to become detached, thus dropping the unit and resulting in bodily injury.
- **Do not install when there is generation of lampblack, such as in a kitchen, etc.**  
The unit surface may crack or the sensor may malfunction as a result.

# PREPARATION

## INSERTING BATTERIES IN THE REMOTE CONTROL

### About the batteries

- The battery life is about 1 year.
- Replace the batteries when the remote control becomes inoperative.
- Incorrect usage of the batteries may cause battery fluid leakage and/or damage. Take care of the following when handling:
  - When replacing the batteries, replace both batteries with new ones of the same type. (Use 2 AA manganese batteries.)
  - When not using the unit or remote control for an extended period, remove the batteries. This prevents malfunction of the remote control from battery fluid leakage.
- The batteries of the accessory are for initial use only and may be depleted within 1 year.

## REMOTE CONTROL USE

- Operate the remote control facing the main unit receiver.
- The signal range is about 7m (front).
- Make sure there are no objects blocking the path of the signal.
- A beep sound will be heard from the main unit when a signal is received.

### NOTE

- Avoid dropping or damaging the remote control, using in a high humidity condition, in direct sunlight or near a heat source.

# INSTALLATION

## FOR APPROPRIATE INSTALLATION

## To remove room odour

Installing the unit high up on the wall is most effective.

## To remove room dust

Comparatively large dust particles such as pollen and house dust collect in the lower strata of the room air.

**Select a location in the room where the air circulation is good.**

This improves the cleaning performance and causes Plasmacluster ions to spread throughout the room.

## Operating Conditions

**Please operate the unit under the following conditions.**

It is recommended to use the unit in a room where the temperature is in the range of 0 - 35°C.

Avoid locations where the unit is exposed to condensation, due to drastic temperature changes.

## 1 Determine the mounting location

Leave space around the bracket referring to the drawing below. The unit cannot be mounted if there is insufficient spacing around the bracket.

## Installation Cautions

- Before fixing the wall mounting bracket, make sure there is nothing that could obstruct installation of the unit. Then fix the wall mounting bracket through screw holes with the supplied wood screws.
- Install the unit on a wall, wooden pillar, crosspiece or the like that is flat and strong enough..
- If the wall is weak or made of concrete, have the unit installed by a specialist such as an electric appliance store.
- Avoid locations near inverter lamps or where the unit is exposed to direct sunlight.

## 2

### Mount wall mounting bracket

- Mount the bracket using the included wood screws so that it is mounted in horizontal balanced level.

#### ● Installation on a concrete, block or mortar surface

Drill holes of at least 35 mm depth and 5 mm diameter into the wall, drive in fisher plugs, and fix the unit with wood screws.

#### ● Installation on a wooden pillar, crosspiece or other wooden surface

Use wood screws for installation.

### Caution

- To install the unit on a wooden wall that is less than 10 mm thick, consult your dealer and have them confirm the strength of the wall before installation.
- Install the unit on a wall, wooden pillar, crosspiece, etc. that is flat and strong enough.
- Make sure that the unit is installed in an upright position, without leaning to the right or left.

# INSTALLATION

**Before starting the wall installation, be sure to remove the front panel and filter frame.**

## 3 Install the unit on the wall.

- 1 Place the unit facing up, remove the Front Panel and Filter Frame.

## 2 Adjust the length of the power cord.

- 1 Measure the distance between the unit and the wall outlet. (Refer to E-6)
- 2 Place the unit face down, and insert the power cord into the power cord adjusting guide so as to adjust it to the measured length.

## Cautions

- To avoid scratching or damaging the unit, place it on a soft piece of cloth until it is installed on the wall.
- Do not lead the power cord together with other cord and do not twist it.
- Never modify the power cord.
- Take care not to damage the power cord.

**3** Apply a mark (tape, etc.) 8 cm above both ends of the wall mounting bracket.

**4** Lift up the unit so that the hooking holes on the unit are aligned with the marks, hook the unit onto the wall mounting bracket and slide it to the right.  
When positioned correctly, the unit will move down slightly until it engages.

**5** Double-check the installation.

**Make sure that the claws of the unit are hooked in properly. If they are not, the unit will move sideways. In addition, the unit may fall off the wall and be damaged.**

• Make sure that the power cord is not caught in the unit.

**6** Remove the mark.

## HOW TO REMOVE THE UNIT

Pull the power plug out of the wall outlet and remove the Front Panel and Filter Frame. Holding the unit by its lower corners, lift it up slightly, then slide it to the right or left and lift it off toward the top.

# FILTER INSTALLATION

Be sure to remove the filters from the plastic bags before using the unit.

- 1 Remove the Pre-Filter, Active Carbon Filter and HEPA Filter from the Filter Frame.**

- 2 Remove the Active Carbon Filter and HEPA Filter from the plastic bags.**

- 3 Place the HEPA Filter within the Filter Frame.**

Do not install the filter backwards or the unit will not operate properly.

- 4 Place the Active Carbon Filter within the Filter Frame on top of the HEPA Filter.**

The Active Carbon Filter does not have a front and a back.

- 5 Next, place the Pre-Filter within the Filter Frame.**

Fit the 4 tabs of the Pre-Filter into the holes in the Filter Frame.

# 6 Mount the Filter Frame to the main unit.

# 7 Fill in the usage start date on the Date Label.

Use the date as a guide for the Filter Replacement schedule.

# 8 Mount the Front Panel to the main unit.

# 9 Insert the power plug into the wall outlet and check on/off operation using the remote control.

# OPERATION

For the first 30 seconds after the plug is inserted into the wall outlet, the unit will check the conditions of the air.

- **Auto Operation**

Odour sensor checks the amount of impurities in the air and the fan speed switches automatically.

- **Manual Operation**

Regardless of the amount of impurities, desired fan speed can be switched between Silent and Max.

## MAIN UNIT OPERATION

### POWER ON/OFF button

- Used to start AUTO operation (short beep) and stop operation (long beep).
- Plasmacluster Indicator Light and Fan Speed Indicator Light (AUTO) turn on/off.
- Unless unplug the power cord, the operation starts in the previous mode the unit was operated in.

### Fan Control button

The fan speed can be switched among Silent, Max and AUTO.

### OFF Timer button

- The set timer switches every time the button is pressed as shown below.
- When "4 hours" is selected "4 H" indicator light activates. When the remaining time becomes 1 hour, then indicator light switches to "1 H".

## Plasmacluster Ion Operation

While the product is in operation, the unit will constantly discharge approximately the same amount of Positive and Negative cluster ions. This is effective for inactivating airborne mold, viruses, bacteria, allergens and reducing mold odors.

## REMOTE CONTROL OPERATION

# CARE AND MAINTENANCE

To maintain optimum performance of this air purifier, please clean the unit including the sensor and filters periodically.

When cleaning the unit, be sure to unplug the power cord, and never handle the plug with wet hands. Electrical shock and/or bodily injury may occur as a result.

## FILTER REPLACEMENT GUIDELINES

Depending on the usage environment, air outlet odour may become strong after several months.

**If dust or odours cannot be removed easily, replace the filters.**

(Refer to HOW SHARP AIR PURIFIER WORKS E-1)

### Guide for filter replacement timing

- The following filter life and replacement period is based on the condition of smoking 10 cigarettes per day, reducing the dust collection/deodorization power to half compared with that of new filters.

• HEPA Filter	About 12 months after opening
• Active Carbon Filter	About 12 months after opening

## REPLACING THE FILTERS

## 聲寶空氣清新機操作原理

空氣清新機經進氣口吸入室內空氣，使其通過機內的活性碳過濾網（除臭過濾網）和HEPA過濾網（集塵過濾網），然後從排氣口排出。空氣清新機通過其內部風扇的操作不斷重複此過程。當空氣通過時，HEPA過濾網能夠除去灰塵粒子。當異味成分多次通過活性碳過濾網時，便逐步被吸收。（異味成分也被HEPA過濾網吸收。）

有些已被過濾網吸附的異味分子可能會離開過濾網，然後隨出風口吹出。根據不同的使用環境，這些異味可能在比預期更短的時間內變得強烈。在這種情況下，請選購過濾網更換配件FZ-28SEF。

### 注意

本空氣清新機用於去除空氣中懸浮的灰塵和異味，而不能去除有害氣體（如：香煙煙霧中含有的一氧化碳）。如果異味的源頭依然存在，異味將不能徹底被去除。（如：來自建築材料和寵物身上的異味）。

將前過濾網上的4個頁片按入到過濾網支架上的孔中。

## 6 將過濾網支架裝進主機。

## 7 在日期標籤上填寫開始使用的日期。

該日期將作為日後過濾網更換時間的參考之用。

## 8 將前面板裝進主機。

## 9 將電源插座插入牆上的插座內，並使用遙控器啟動或停止操作。

# 操作

將插頭插入牆壁插座後的頭30分鐘內，裝置將檢測空氣狀況。

- **自動操作**

異味感應器檢測空氣中雜質的含量，風速會根據檢測狀況自動被轉換。

- **手動操作**

不管空氣中雜質的含量，風速可根據需要在靜音(Silent)和最大(Max)兩種模式下進行切換。

## 主機操作

### 電源開/關按鈕

- 用於開始自動操作本機（短嗶聲）和停止操作本機（長嗶聲）。
- 離子簇指示燈和風速指示燈（自動）開/關。
- 除非拔掉電源線，否則主機啟動後將維持前一次的操作模式。

### 風扇控制按鈕

風扇速度可在靜音和最大兩種模式間進行轉換。

### 關機定時器按鈕

- 每按一次該按鈕，設定時間將按以下順序設定。
- 選擇“4小時”定時，“4小時”指示燈會點亮；如果定時設置為1小時，則指示燈轉換至“1小時”。

## 離子簇模式操作

當本產品正在操作時，本機會持續釋放數量大致相等的正、負離子群。這對於減少某些空氣中的霉菌十分有效。

## 遙控器操作

### 電源開/關按鈕

- 用於開始自動操作本機（短嗶聲）和停止操作本機（長嗶聲）。
- 離子簇指示燈和風速指示燈（自動）開/關。
- 除非拔掉電源線，否則主機啟動後將維持前一次的操作模式。

### 自動（風速）按鈕

風速將根據室內空氣的污染程度自動轉換。

### 手動（風速）按鈕

風速可以在靜音和最大之間轉換。

### 關機定時器按鈕

- 每按一次該按鈕，設定時間將按以下順序設定。
- 選擇“4 小時”定時，“4 小時”指示燈會點亮；如果定時設置為 1 小時，則指示燈轉換至“1 小時”。

# 保養和清潔

為了保持空氣清新機的最佳性能，請定期清潔本機，包括感應器和過濾網。

清潔本機時，請拔掉電源線，並切記不要用濕手觸摸電源插頭。否則可能會導致電擊和／或受傷。

## 過濾網更換指南

根據不同的使用環境，幾個月後排氣口的異味可能會變得強烈。

如果灰塵或異味不易被去除，請更換過濾網。

（參見聲寶空氣清新機操作原理 第C-1頁）

### 過濾網更換時間指南

- 以下的過濾網使用壽命和更換時間是以每天吸10支煙，且集塵/除臭效能比初次使用時減少一半來計算。

• HEPA過濾網	打開後約12個月
• 活性碳過濾網	打開後約12個月

## 更換過濾網

**1** 關於更換時過濾網的安裝指南，請參見第C-10、11頁。

**2** 在日期標籤上填寫過濾網開始使用的日期。

### 更換用的過濾網

型號：FZ-28SEF

- HEPA過濾網（備有微生物控制過濾網）：1 只
- 活性碳過濾網：1 只

請向您的經銷商諮詢購買更換用的過濾網事宜。

### 棄置過濾網

請根據當地法律規定來棄置已使用的過濾網。

HEPA過濾網材料：

- 過濾網：聚丙烯
- 支架：聚酯
- 微生物控制過濾網：聚丙烯，聚乙烯

活性碳過濾網材料：

- 除臭劑：活性炭
- 框架：聚酯
- 網：60%聚丙烯，40%聚酯

## 主機

為防止主機積聚灰塵和污垢，需經常清潔主機。時間長了頑固的污垢將變得難以清洗。

### 使用一塊柔軟的乾布擦拭

對於頑固的污漬，使用一塊溫水浸過的軟布擦拭。

### 請勿使用揮發性液體

苯、油漆稀釋劑以及打蠟粉等可能會損壞主機表面。

### 請勿使用清潔劑

清潔劑可能會損壞主機。

### 請勿讓本機進水

## 異味感應器

使用吸塵機除去感應器表面的灰塵。

## 前過濾網

取下過濾網支架，用吸塵機輕輕地清潔前過濾網表面。如果髒的很厲害，將其從過濾網支架中取出清洗。

### 注意

- 如要進行清洗，請使用一個軟刷以及冷／溫水。
- 金屬刷或硬刷可能會損壞過濾網。
- 清洗後將其放在陰涼處風乾。然後將其放回過濾網支架內。
