## Please read before operating your new Air Purifier

Some odor ingredients absorbed by the filters may become separated and may be discharged through the air outlet and result in additional odor. Depending on the usage environment, especially when the product is used in a condition significantly more severe than household use, this odor may become strong in a shorter period than expected.

The air purifier is designed to remove air-suspended dust and odor, but not harmful gases (for example, carbon monoxide contained in cigarette smoke). If the odor sources still exist, it cannot completely remove the odor (for example, odor from construction materials and pet odor).

It is suggested to open the window a bit when you are smoking in order to facilitate ventilation.

In this case we recommend purchasing the optional replacement filters.

## FEATURES

### EXCLUSIVE AIR PURIFYING TECHNOLOGY

Filtration System + Plasmacluster Ion

### REMOVE ODOR

Active Carbon Deodorizing Filter absorbs many common household odors.

### REMOVE DUST, POLLEN, DANDER & MOULD\*

HEPA filter traps 99.97% of particles as small as 0.3 microns.\*

### REFRESH AIR

Plasmacluster refreshes the air similar to the way nature cleans the environment by emitting a balance of positive and negative ions.

\*From that air is drawn through the filter system.

Applicable area : 62m<sup>2</sup>

## 操作您的新空氣清新機之前，請詳細閱讀本手冊

有些已被過濾網吸收的異味成分可能會離開過濾網並經吹出口被排出，因而產生額外的異味。根據不同的使用環境，尤其是這產品應用於比家居使用環境惡劣的情況下，這些異味可能在比預期更短的時間內變得強烈。

本空氣清新機用於去除空氣中懸浮的灰塵和異味，而不能去除有害氣體（如：香煙煙霧中的一氧化碳）。如果異味的源頭依然存在，異味將不能徹底去除（如：來自建築材料或寵物身上的異味）。

建議吸煙時將窗戶稍微打開，以便空氣流通。

在這種情況下，我們建議購買更換用過濾網。
