

Structure : Silicon Monolithic Integrated Circuit

Product series : Control IC for CD-R/RW drive

Type : BB6381KU

Function :

- Supports CD-DA/CD-ROM/CD-R/CD-RW formats.
- Supports 56x Read (40x for CD-DA) and 56x Write.
- Built-in high performance Analog Front End Processor.
- Supports all CD recording type. (Red Book, Orange Book, Mt. Rainier)
- Built-in FM recovery and ATIP recovery function.
- The optimum record shape of waves can be set by the high performance Write Strategy function.
- Built-in the data slicer circuit, low jitter channel PLL circuit, and the function of automatic compensation for the high readability.
- Built-in the Auto Formatter and the automatic generation of CD subcode and link block for reduction of load of the micro controller.
- Built-in the recovery function at the Buffer Under Run.
- S/W servo control with DSP.
- Support ATA/ATAPI PIO MODE4, Multi-Word DMA Mode2 and Ultra DMA Mode4.
- Built-in ARM7 processor.
- Support EDO-DRAM/SDRAM.(Max 128Mbit)
- Power saving function.
- UQFP-256 package.

Application example :

- The product described in this specification is designed to be used with ordinary electronic equipment or devices. Should you intend to use this product with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life, please be sure to consult with our sales representative in advance.
- This product isn't designed for protection against radioactive rays.

○ Absolute maximum ratings (Ta=25°C)

Parameter	Symbol	Limits	Unit
Power supply voltage (Digital part Digital core)	VDD	2.5	V
Power supply voltage (Digital part IO/Analog)	VDDIO/AVDD1,2,3/VDD33	4.5	V
Power supply voltage (RF part)	VCC33/VCC1,2,3/VDD5V	7.0	V
Storage temperature	Tstg	-55~125	°C

Note) The storage temperature range is an ambient temperature.

The absolute maximum ratings is a limit value which does not rise even the origin of any condition and momentarily and moreover, the value that do not reach at the same time by any two items is set. When the absolute maximum ratings is exceeded and used, there is a possibility of deterioration or damaging it, and operation in the absolute maximum ratings is never guaranteed.

○ Recommended operating conditions (Ta=-20~+75°C)

• DSP/CPU Part

Note) The sign is a terminal name in LSI.

Parameter	Symbol	Standard value			Unit
		MIN	TYP	MAX	
Operating power supply voltage range (Digital core)	VDD	1.65	1.8	1.95	V
Operating power supply voltage range (Digital I/O)	VDDIO	3.0	3.3	3.6	V
Operating power supply voltage range (Analog)	AVDD1,2,3	3.0	3.3	3.6	V
Operating temperature range	Topr	-20	25	75	°C
Input voltage	VIN	VSS-0.3	—	VDDIO+0.3	V

• AFEP part

Note) The sign is a terminal name in LSI.

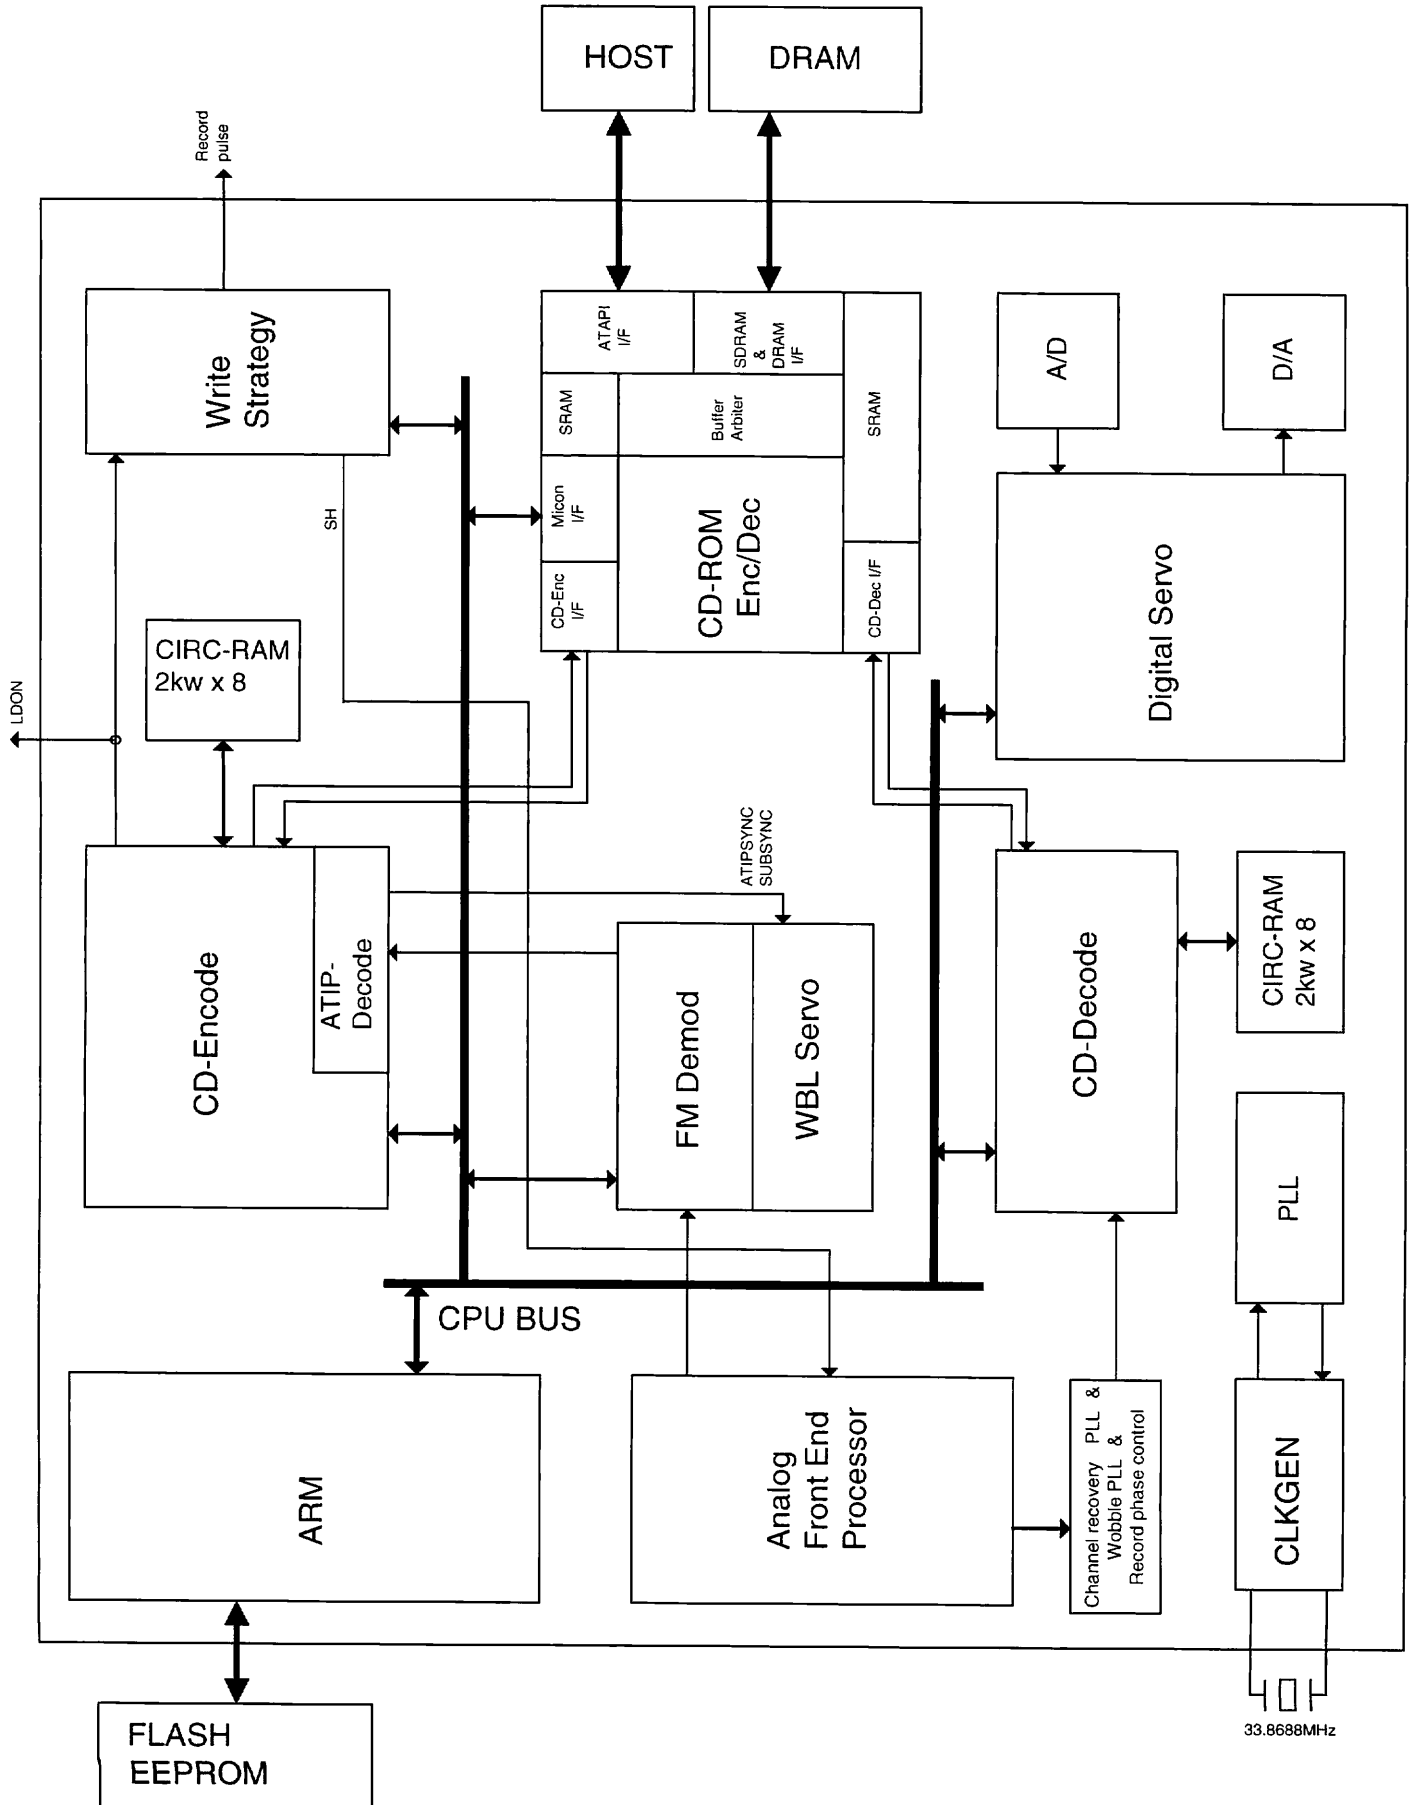

Parameter	Symbol	Standard value			Unit
		MIN	TYP	MAX	
Operating power supply voltage range (Analog 1)	VCC33	3.0	3.3	3.6	V
Operating power supply voltage range (Analog 2)	VCC1,2,3	4.5	5.0	5.5	V
Operating power supply voltage range (Digital 1)	VDD33	3.0	3.3	3.6	V
Operating power supply voltage range (Digital 2)	VDD5V	4.5	5.0	5.5	V
Operating temperature range	Topr	-20	25	75	°C
Input voltage	VIN	VSS-0.3	—	#+0.3	V

# The input voltage is different depending on the power supply voltage of each terminal.

(UNIT : mm)

Drawing No. EX278-6001

### Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

#### About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
