Consumption values were measured in normalized conditions in compliance with Standard IEC/EN 60 456. Consumption data in the home may vary with respect to the values in the table in relation to the water supply pressure and temperature, the load and the type of wash.

* The time indicated on the display can deviate from the values in the table, because it takes into account the operation conditions applicable at that time.

** To reduce the water temperature, some cold water is added at the end of the main wash cycle, before the pump drains the water out.

ADD DETERGENTS, CLOSE THE DOOR AND SELECT THE PROGRAMME

Add detergent as indicated on the front page and as described in the chapter "Detergent and Additives" in your Instructions for Use. Turn the programme selector to the desired programme; the light of the "Start (Pause)" button blinks. The **temperature** and **spin speed** indicated on the display can be altered by pressing the "Temperature" button or the "Spin Speed" button.

SELECT ANY DESIRED OPTION

When the combination of programme and additional option(s) is not possible, the indication lights switch off automatically.

Unsuitable combinations of options are deselected automatically.

"Prewash" button

- Only for heavily soiled loads (for example sand, granular dirt) sensible. Increases the cycle time by approximately 15 min.
- Do not use liquid detergent for the main wash when activating the "Prewash" option.

"Clean+" button

- Choose this option if you use an in-wash additive for stain removal (powder, for example "Vanish") - it will optimize the additive's efficiency to get better wash performance and stain removal.
- Selectable for programmes "Cotton" and "Synthetics"; choose temperature of 30 or 40°C and use with maximum load.
- Add an appropriate amount of in-wash additive for stain removal (powder) to the main wash chamber, together with your detergent (only use powder detergent with this option). Respect the manufacturer's dosing instructions.
- Prolongs the programme by approx. 10 to 15 minutes.

- Appropriate for use of stain removers and bleaches on oxygen basis. **Chlorine or perborate bleaches must not be used!**

"Easy ironing" button

- Can be used together with "Cotton", "Synthetics" and "Daily load" programmes to make ironing easier.
- Increases the water quantity and the clothes are spun very gently.

"Intensive rinse" button

- More water is added and rinse cycle is prolonged.
- This option is particularly suitable for areas with very soft water or for washing baby linen, and helps people with allergies.

"Spin Speed" button

- Every programme has a predefined spin speed.
- Press the button to set another spin speed.
- If spin speed "0" is selected, the final spinning is cancelled but intermediate spin peaks remain during rinse. The water is drained out only.
- If you select "Rinse hold" , the laundry remains in the last rinse water without progressing to the final spin cycle, to avoid creasing and prevent colours from changing. To activate the "Rinse hold", press the "Spin Speed" button repeatedly until the "Rinse hold" symbol  on the display lights up.
 - The wash programme stops to "Rinse hold" when the "Rinse hold" symbol  on the display blinks; the light of "Start (Pause)" blinks as well.
 - To terminate the "Rinse hold" by draining the water, without any spinning, press the "Start (Pause)" button.
 - To terminate the "Rinse hold" by spinning the laundry, press the "Spin Speed" button to select the desired spin speed and then "Start (Pause)" to start the spin cycle.
 - Do not leave the laundry to soak for too long in the "Rinse hold".

SAVE YOUR FAVOURITE PROGRAMMES

If there is a programme setting which you use frequently, the appliance offers the possibility to save one setting for each programme so that it can be used again by just pushing one button.

- Select the desired programme, temperature, spin speed and option(s), push and hold the "Favourites" button for at least 3 seconds. The lamp next to "Favourites" shortly blinks and then lights up - the programme setting is saved.

Next time you want to use your individual programme setting, select the programme, push the "Favourites" button and start by pushing "Start (Pause)".

If you want to replace the saved programme setting by another one, proceed as already described above.

 - The time delay indication disappears when the programme starts and it is replaced by the remaining programme time.

To cancel the "Start delay"

..before you press the "Start (Pause)" button:

- Select another programme or press the "Reset/Drain" button.

..after having pressed the "Start (Pause)" button:

Press the "Reset/Drain" button for at least 3 seconds; the start delay time disappears from the display.

"ADD GARMENT" INDICATION

As soon as you press "Start (Pause)", the door will lock until the end of the programme and must on no account be forced open. In case you have to open it urgently during a running programme, refer to "Reset a running programme before the end". If you try to start a wash programme and the door is not properly closed, the "Add garment" indication will blink.

PROGRAMME START

Open the tap and press the "Start (Pause)" button; the blinking "Start (Pause)" button light becomes constant. The "Add garment" indication goes out, and the lit bubbles indicate that the programme is in process. In some phases, the remaining programme time is newly calculated - if this is the case, the "6th sense" indication  on the display will fade.

- Turn the programme selector to a programme position, or run a programme as usual.
- Press the "Temperature" and the "Spin Speed" button simultaneously for at least 3 seconds. The "Child lock" symbol  will shortly blink and then light up to indicate that the child lock is active.

The programme setting cannot be changed anymore; the only change possible is to switch the washer off by turning the programme selector to the "Off/O" position. To deactivate the child lock:

- Press again the 2 buttons marked with the key symbol  simultaneously for at least 3 seconds.

RED FAILURE INDICATIONS

If one of the red failure indications on the display lights up, refer to the "Troubleshooting Guide" in your "Instructions for Use".

- The display shows "End", and the "Programme finished" indication  lights up.
 - Turn the programme selector to the "Off/O" position.
 - Close the water tap.
 - Open the door and unload the machine.
- Leave the door ajar to allow the drum to dry.
